Baker resisting classroom capacity changes

BY SUSAN DETHLEFSEN

The graphics communications department receives a Hello-Kissograph printout from the gravure machine, which electronically engraves gravure cylinders for high quality printing, was donated by General Foods of Battle Creek, Mich. The graphics communications department is one of 10 university gravure resource centers in the United States.

Counselors offer helping hand

By KEVIN H. FOX

The members of the Cal Poly Counseling Services Department don't want to analyze dreams, talk about Freud or ask about childhood experiences.

Career Planning Services, headed by Joe Diaz, offers students the chance to look to themselves to make decisions related to career planning.

I would impress on students that they are and should be in control of their career decision," said Joe Diaz, "and I find that most people are aware of that area.

The CPS works with students to determine their needs and then develop a process to help them make accurate career decisions.

Through the use of tests such as personality profiles, value assessments and aptitude appraisals, the staff of the center helps students to move in the right direction. Problems students face range from being in the wrong major to being unsure where the jobs are.

I would like to see students earlier in their career at Cal Poly," Diaz said. "Students lack career information. All they have is a title with no career information to go with it. That's what we're here to do.

Diaz said that while his department in part of the Counseling Services Program he is trying to establish an autonomy of its own.

Jill Hayden, a para-professional career counselor with the center, said that many students are afraid to go to see someone. "Students have a stigma about counseling services. They think counseling is only for the sick. We are trying to change the image of the department," she said. "I'm not an analyst.

"Students need someone to tell them it is alright to change a major or to go to a different school," Hayden said.

Determining the proper career goal can aid students in finding a job.

Students who complete graduation requirements prior to the fall quarter may be offered the chance to participate in a Fall Quarter commencement ceremony.

The possibility of having another graduation ceremony at the end of the fall quarter is currently being reviewed by the Commencement Committee.

Donald Coats, Associate Dean of Educational Services and a member of the Commencement Committee, said that the tentative dates for the ceremony are Dec. 14 and Dec. 16.

We sent surveys to all 536 students who are eligible for graduation this fall and received 211 responses. Coats explained these surveys were aimed at finding out whether these students were in favor of a fall commencement, and many replied that they were.

Coats said that although 511 students completed graduation requirements last fall, only 158 of these students participated in the graduation ceremony last June.

"Many students who finish in the fall cannot come back to San Luis Obispo in June because they are working all over the country and have other commitments," Coats said.

"The June ceremonies can also be anti-climactic for some because these people have been out of school for six months.

"Many students finish in the fall who cannot come back to San Luis Obispo in June because they are working all over the country and have other commitments," Coats said. "The June ceremonies can also be anti-climactic for some because these people have been out of school for six months.

The Commencement Committee is comprised of at least seven faculty representatives, one representative from both the Associated Students of Cal Poly, and the Senate and Student Affairs and the representative is also a member and said that the committee primarily focuses on suggestions made in the student center and counseling center, to continue to get the funds to operate.

S at Student Senate meetings every Wednesday night at 7 p.m. in room 220 of the University Union.

Fall graduates may be offered ceremony

By LEANNE ALBERTA

Students who complete graduation requirements prior to the fall quarter may be offered the chance to participate in a Fall Quarter commencement ceremony.

The possibility of having another graduation ceremony at the end of the fall quarter is currently being reviewed by the Commencement Committee.

Donald Coats, Associate Dean of Educational Services and a member of the Commencement Committee, said that the tentative dates for the ceremony are Dec. 14 and Dec. 16.

We sent surveys to all 536 students who are eligible for graduation this fall and received 211 responses. Coats explained these surveys were aimed at finding out whether these students were in favor of a fall commencement, and many replied that they were.

Coats said that although 511 students completed graduation requirements last fall, only 158 of these students participated in the graduation ceremony last June.

"Many students who finish in the fall cannot come back to San Luis Obispo in June because they are working all over the country and have other commitments," Coats said.

"The June ceremonies can also be anti-climactic for some because these people have been out of school for six months.

"Many students finish in the fall who cannot come back to San Luis Obispo in June because they are working all over the country and have other commitments," Coats said. "The June ceremonies can also be anti-climactic for some because these people have been out of school for six months.

The Commencement Committee is comprised of at least seven faculty representatives, one representative from both the Associated Students of Cal Poly, and the Senate and Student Affairs, and the representative is also a member and said that the committee primarily focuses on suggestions made in the student center and counseling center, to continue to get the funds to operate.

The machine, which electronically engraves gravure cylinders for high quality printing, was.

It's important to have a fall commencement, " he said. He explained with a performing arts major these students would be excluded.

The last topic of Baker's speech was on Cal Poly's development program, which includes raising money from the private sector.

"Without the quality we hope to achieve without private support," he said. "The main problem, he cited, is that to raise money, money needs to be invested. The state does not provide the school with money to be used for such investments.

"A lot of money is earmarked when people donate it. They don't give money to raise money. They give money for specific things," he said.

Students play an important role in the development program by participating in phone-a-thons. Although this does not earn much money for the campus, it does re-profit that they can donate money to Cal Poly in the future.

After ending his talk, Baker answered questions from the student senators.

Baker also spoke briefly about the Cal Poly President Warren Baker in his objectives for the reorganization of the university counseling center, continue to get the funds to operate.
As I write and you read these lines, 800 million people on this planet are starving or close to starvation. This is 3.5 times the entire population of the United States. It is more than one human being out of six. These are the figures for serious malnutrition and starvation. Hundreds of millions more live in degrading poverty.

Over much of our planet, a precarious balance exists between food and people. Abnormal weather can affect the food supply of whole continents. Breakdowns of government or transportation—or wars—can plunge nations into famine almost overnight. Then, the more prosperous countries (such as the U.S.) are called upon to send in food.

How did the world get to this point?

World population is now 4.7 billion. By year 2000, it will probably reach 6.1 billion by 2020, 7.8 billion. Some demographers hope it may level off there; most doubt it.

Some of the 800 million in the less developed countries are in rural areas. They swell the armies of unemployed and survive in squalid shanty towns. Not so many years ago, there was almost universal hope that industrial development would soon provide jobs for all who needed them in the less developed countries. It was argued that this would lead to a rise in living standards, which, in turn, would lead to smaller families.

But hopes proved unrealistic. Each agricultural or industrial advance has been overwhelmed by ever-increasing numbers of people in many less developed countries. There seems to be no "catching up" with the world's soaring rate of population.

About 40 years ago, this dilemma began to alarm some influential people. They believed that food and economic aid should continue, but it would be only a stopgap until developing countries got their population growth under control. This meant cutting the birth rate. And the best way to do that, they reasoned, was to educate as many people as possible in the use of contraceptives and other methods of limiting fertility. Private foundations funded educational programs to persuade people that planned parenthood, birth control, and small families were desirable. Many governments began giving out contraceptives at little or no cost.

Despite such efforts, populations kept climbing in places that could least support more people. In fact, as medical aid and food relief programs grew in generosity, populations shot up as never before. People still wanted large families.

Already controversial, population-control programs tried a new approach. Some countries offered various incentives—called "bribes" or "penalties"—by critics—to get couples to limit their families to two children or less. The reasoning is that more than two children will mean a net increase in population.

I believe we, as Americans, have both an unselshless and a selfish reason to face up to the challenge of population. The unselshless reason is that we should not tolerate a billion more people living at the brink of starvation or in abject poverty. The selfish reason is that the effects of overpopulation can drag us down, too. Our economic prosperity could not long survive in a world that could not buy our products, or pay its debts.

Facing up to the challenge of population means considering a great variety of deeply held personal, moral, ethnic, cultural, national and religious convictions.

Granted all the difficulties and others, the truth is that in spite of earnest efforts we have thus far failed to solve this problem. And time is running out for constructive solutions.

Anthony Wayne Smith is a Washington-based attorney who writes for The National Forum.

The Mustang Daily encourages readers opinions, criticisms and comments on new stories, writers and editors. Letters and press releases should be submitted by the Daily office in Rm. 226 of the Graphic Arts Building, or sent to Editor, Mustang Daily, CRC 226, Cal Poly, San Luis Obispo, CA 93407. Letters should be kept as short as possible and must include the writers' signatures and phone numbers. To ensure that they are considered for next action letters should be submitted to the Daily office at least a week before they should run. All releases must include phone numbers and names of the people or organizations involved. In case more information is needed unsigned editorials reflect the viewpoint of the Mustang Daily Editorial Board.
Computers offer fair deal

By Lisa McKinnon

The south wing of Chumash auditorium was filled with the row of computer display terminals of the clicking sound of soft-touch keyboards during the Computer Fair on Thursday from 9 a.m. to 2 p.m.

Representatives from eight major computer companies displayed their wares to a steady stream of interested Cal Poly students and faculty who began to congregate outside the auditorium even before the doors were unlocked at 9 a.m. in the hopes of being the first to gain access to the computers.

The purpose of the Computer Fair, sponsored by the K3 Corral bookstore, was to give students and faculty of Cal Poly a chance to learn about the various computer systems which will be available in the bookstores.

AT&T, Apple, Hewlett-Packard, IBM, Leading Edge, Sanyo and Toshiba (Radio Shack) have agreed to sell personal computers to university people through the bookstores at prices discounted 20 to 50 percent below the manufacturer's listed price. TelcoVideo, which also participated in the Computer Fair, is expected to sign a discount agreement soon.

The promise of a discount was a strong draw for many of the students and faculty who began to congregate anxiously outside the auditorium a few minutes after 9 a.m.

The old Cal Poly Apple proposal to students, and faculty of Cal Poly who attended the fair. Rather than harm business, however, Braverman said that the Macintosh was extremely successful, "especially here, because of all the pent up desire," brought on by the controversy.

During the Computer Fair each company displayed some of the fancier aspects of their products. Sanyo had a program called "French Curves," which drew and then colored in intricate pictures. AT&T showed off their fancy "Microsoft Flight Simulator," which filled the screen with all the dials and gauges of a pilot's cabin, and Hewlett-Packard had a special hookup between screens and printer to produce line drawings of the space shuttle.

"What use would a student have for all these programs or, at the very least, a basic computer?" Hayden Purnell, a data sales consultant for AT&T, off the company's personal computer. "But I've found that students are really quite advanced in their understanding of the system.

"The computer can be a big advantage to students, especially now with the discount," Held said.

Meet the newest member of the family!

It's here! HP-41CX ... the newest member of the Series 41 family of advanced calculators from Hewlett-Packard. Expandable, versatile, reliable, this brand new edition of an all-time favorite is everything you'd expect of the Series 41 family. The hardware has new built-in features like Trigonometric and Extended Functions modules, plus test File Editor. And, there are literally thousands of pre-written software programs available. For more facts about the new HP-41 CX, come in today.

$21 million marijuana plantation seized

SANTA YNEZ, Calif. (AP) — Some 6,700 marijuana plants worth an estimated $21.4 million on the street were seized Wednesday in Santa Barbara County.

The raid occurred near Cuyama that were valued at an estimated $21.4 million.

Basketballs were stolen this week and are valued at $2 million on campus, said Berrett.

Two- bicycles were stolen this week and are valued at $1 million on campus, said Berrett.

Technology’s Leading Edge
Challenging opportunities in the U.S. Air Force are offered to motivated young men and women in the following categories:

- Program Management
- Weather Officer
- Physician
- Chemical Research
- Behavioral Scientist
- Satellite Operations

If in the next 12 months you will earn a college degree in any of these areas, or an undergraduate specialization in mathematics, physics, computer science, engineering or industrial technology, you may qualify for a rewarding career as an Air Force officer. You must be under the age of 35 and a U.S. citizen. For more information, contact your Air Force Science and Technology Team. Contact SSgt. Ron Medrano (805) 543-0700.

You’re Needed All Over the World.

Ask Peace Corps home economists and nutritionists why they travel to Asia, Africa and Latin America. They’ll tell you they are helping to diminish malnutrition by teaching gardening, food preparation and preservation, hygiene and budgeting. MUStANGS
“When I was in Holland I had a light preference for the American system, but now that I have met the add and drop system I am not so sure!”
—Cees Eyesberg
A Dutchman in America finds education less structured here

MICHAEL MARTER
Staff writer

Visiting Dutch geography professor Cees Eysberg began teaching thin fall as a blanks spot on his students' CARS forms. He didn't know what classes he would teach until a few days before they began, nor did he ever have time to order textbooks.

As a new professor in a foreign country, Eysberg found the somewhat informal atmosphere of American universities a bit disconcerting.

In Holland, he explained, the educational system is more standardized. Students attend high schools catering to scientific, professional or vocational interests and, if they are chosen to attend a university, must select a major before they begin, nor did he even have time to order textbooks.

There is the usual selection of books and the slight clutter that seems to come with academia. His bicycle and pipe dutifully wait for more relaxing times. The accent of the tan and trim Dutchman is noticeable but not difficult to understand. His speech is not as fast as an American's, but his vocabulary reveals a learned man.

Eysberg will be teaching at Cal Poly through Spring Quarter.

He said the uniform policies of Dutch education make teaching in Holland somewhat easier because instructors know the approximate backgrounds of their students. With American students coming from diverse educational backgrounds, he said, the range of knowledge between students can be considerable. "It is difficult to figure out where to start," he said.

Although Eysberg was somewhat critical of the American "supermarket" approach, he said the disciplined student can plan a responsible curriculum while maintaining educational variety, although he is not sure if all students are capable of such planning.

On the other hand, Eysberg said, the Dutch rigidity of curriculum can be confusing to students.

But things are slowly changing. "There is more differentiation now than when I was in high school," said Eysberg.

Eysberg finds the Dutch educational system to be about the same as that of Utrecht University in Holland, where he dresses large and the same as American society - very open, democratic, and social. "If you visit a campground in Europe you will find the Dutch people gathered around talking." But there are some fundamental differences between the two countries. Holland does not enjoy the economic self-sufficiency of the United States and therefore must be adept at dealing with other economies. "Basically, we are a very commercial people - the largest foreign investor in the U.S. It explains why we have to learn a lot of foreign languages and geography," said Eysberg.

Though Dutch education does employ a certain degree of pragmatism, he believes American education is still more job-oriented. "In Europe and Holland people are more interested in education for itself - not just to get a job. In the U.S. the culture is more pragmatic." Eysberg has visited the U.S. twice before and will soon publish a book on American geography. He enjoys speedskating, bicycling and listening to jazz. With a strong interest in architecture, Eysberg designed his own home and built part of it himself. He has a wife and two children aged 18 and 20. His daughter attends Cal Poly.

Rodeo week begins

**Daniels concert, rodeo end week**

The Cal Poly Rodeo Club and the business club SAM Society for the Advancement of Management will coordinate "Fall Rodeo Week" Oct. 8-14. Activities are planned by ASI Concerts, ASI Films, ASI Outings and the agricultural fraternity Alpha Sigma, and will culminate with a rodeo and a concert by the Charlie Daniels Band.

The collaboration hopes to bring the agricultural and academic facets of Cal Poly closer together.

The Mustang Daily will preview "Rodeo Week" with stories on the events and the Cal Poly rodeo team Monday.

Action from volleyball practice on Wednesday. The volleyball team will be at home this Saturday for a match with Arizona.

**Teams playing at home this week**

Saturday, the women's volleyball will play Arizona State at 7:30 p.m. in the Main Gym. Also at 7:30 p.m. Saturday night, the men's soccer team will play a match against Loyola in Mustang Stadium.

The women's soccer team will move into Mustang Stadium on Sunday, 1 p.m., for a match with Fresno.

All three teams are in the running for a league championship. The games are free to students.
Poly tries to get on winning road

After two losses Mustangs travel to Santa Clara

By ROSEMARY COSTANZO Sports writer

Western Football Conference play begins this weekend as Cal Poly travels to Santa Clara to battle the undefeated Broncos.

"I think score-wise they (Santa Clara) are favored because they beat Davis and we didn't," said head Mustang coach Jim Sanderson.

Despite the fact that Cal Poly dominated almost every statistical category last week they lost to the Davis Aggies, 18-6.

"Our problems are pretty evident," said Sanderson, "when we get into scoring position we self-destruct. We made too many mistakes and Davis was able to capitalize on them.

One mistake that hurt the Mustangs early in the game was when right cornerback Keenan Stanley returned a punt 68 yards for an apparent touchdown in the..."
**Football...**

from page 10

**First Quarter**

A clipping penalty wiped out thetouchback.

The Mustangs failed to score from the one-yard line in the third quarter and Cal Poly outgained Davie 311 yards to 219. The Mustangs recorded 15 first downs as compared to 10 for the Aggies.

And the Mustangs ran off 79 plays and had the ball for 34 minutes while in the Aggie's 28 minutes of possession they got off 69 plays.

"We have to get our offense cranked up," said Sanderson. Starting quarterback against Santa Clara will be Yale Keckin. Keckin has completed 30 of 71 attempts with four interceptions and one touchdown.

The top receiver for Poly has been tight end Damone Johnson with 12 catches for 173 yards. Johnson is followed by wide receiver Clarence Martin who has 7 catches for 128 yards.

Top ground gainer is running back Gary Myers. Myers has picked up 324 yards on 70 carries including two touchdowns. Myers is ranked number two in total yards rushed in the Western Football Conference. He chalked up his second 100 yard game of the season against Davie.

Quarterback Yale Keckin during practice for the game with Santa Clara. Keckin is a junior transfer student from Santa Monica Junior College and has started at quarterback for the Mustangs this year.

Riche Phillips, the attorney for major league baseball's striking umpires, resumed talks Thursday with Club Feeney, president of the National League, and Bobby Brown, president of the American League.

Meanwhile, the scene of the NL playoffs shifted to San Diego for Game 3 in the best-of-five series, with a new set of umpires selected to replace the four-man crew that worked the first two games at Chicago, both won by the Cubs.

After Chicago's 4-2 victory Wednesday pushed San Diego within one loss of elimination, Jack McKeon, the Padres' general manager, assailed the two league presidents for what he says is the failure to head off the strike.

"Why don't they get off their rear ends?" McKeon said. They were slow at the switch. They've been dragging their feet on this.

Phillips, who met with Brown at the AL playoffs between the Detroit Tigers and the Royals at Kansas City and then with Feeney in Chicago, was back in his Philadelphia office Thursday and on the telephone with both league presidents.

Phillips' office declined to characterize the talks or say if there was any progress.

But upon returning from Chicago late Wednesday, Phillips said: 'I don't want to say we've made the meetings helped give us a clearer understanding of each other's problems. But I wouldn't say we're close.'

The key issues in the umpires' dispute involve pay and job security, two areas covered for only two years in the four-year agreement reached in 1982. Those parts of the contract expired Sunday, when the regular season ended.

In the first four playoff games, only two minor controversies involving the substitute umpires arose, both in Wednesday's games.

Generally, the umpires have had their way. "I don't think you're going to find any better judgment than they've done," Detroit Manager Sparky Anderson said. "And Dick Howser, manager of the Royals, said. "I thought the umpiring was good."
