Political science professors analyze debate

By MICHAEL STUMP

After the first presidential debate between President Ronald Reagan and Walter Mondale, Cal Poly political science professors agreed that the most important issue raised was the federal budget deficit, but held contrasting views on how the candidate handled the issue.

Walter Mondale repeatedly referred back to the budget topic to put Reagan on the defensive. Mondale also did say that he thought Mondale came across forcefully, yet with humor and grace. Does Mondale have any outcome in changing the minds of the uncommitted? "Yes," he said. "Very few people actually vote on the issue."

Responding to Mondale's claim, "every estimate by this administration about size of the deficit has been of billions and trillions."

"People cannot believe anything," he said. Mondale absolutely right, the political science professors agree that Mondale's plan will work or not. That is in fact he offers a solution that will be another debate."

Crackshanks criticized Reagan for not having a grasp on the unanswerable questions about the argument of who should go first," he said. "What are they trying to do is one-up the other person. They each tried hard to sway the argument, not answer questions."

With all the political rhetoric and emphasis of the issue, is there anything to be learned by watching the debate? "Definitely," Crackshanks said. I gained a lot. I now have more serious questions about Reagan's ability to do the job. He was taught off guard a number of times. I was not impressed with the way he conducted himself.

$10 million raised so far for Cal Poly

By JILL PERRY

What do a new thoroughbred training track on Donna Lee Road and a $6 million Computer Science Building have in common? They are both part of the latest acquisitions by Cal Poly Development Office, which has raised more than $10 million over the past four years to purchase equipment, make renovations, support educational and professional development programs and establish funds which state funds cannot cover.

The Development office is here to seek out and define donations to provide scholarships for the university in addition to state funding. Carroll Price, Development office director, said, "We need help."

Although the Development office has been in existence for only three years, its director, Carroll Price, has already brought in donations which has allowed the university to purchase equipment on campus such as the CALCP (computerized system) for engineering and architecture students, special collections in the Fine Arts Library, and a robotic arm in manufacturing programs.

The office also has raised funds for projects which aren't readily of interest to the media, is that someone has to do the wiring and air conditioning of the new IHM which costs.

This color scanner, operated by graphics major Leah Jones, was donated by the New York-based electronic firm HGM, recognized, such as conferences for instructors, recruitment of faculty, student field trips and purchases of equipment when unexpected breakdown occur in the middle of the quarter.

When requests come into the Development office it does perhaps what should receive more priority," the Vice President for University Relations, Dr. James Strom, and I deal with priorities, requesting tested, then he talks to the president and provost and I try to follow a test they decide. He said.

In fiscal year 1983-84 donations to Cal Poly increased 40 percent over the previous year and so far this year the office already has raised more then $4 million in terms of equipment than the $4.5 million raised last year with the addition of the new IHM 141 and $4.5 million so far.

Often donations from corporations alone and friends of Cal Poly have been added to state funds to purchase needed equipment such as the supercomputer computers which are available in room 113 of the Computer Science Building.

The computers were purchased by the state, but donations paid for the wiring and air conditioning.

The Cal Poly Development Chromograph DC 300 B 2L

If you want these kinds of things available to use and we just have to look at it."

Most acquisitions are not that easy however generally when we need an expensive piece of equipment we have to beg for a donation. Price hopes in the future the Development office could expand to tap other sources who knows are available. We are a small operation and I think we just started to scratch the poten-

Health services to be outlined

By DONALD MUNRO

Non-alcoholic diuretics, brand new for health schools, are among the unexpected items that can be bought at the University Union Pharmacy. 

"We will have the opportunity to pick up Extra Rich chocolate milk shakes and talk to the health educators for the health minors who attend the health classes," he said.

By LISA MCKINNON

Committee is organizing events for women's week

An organizational meeting of the 1983 Cal Poly Women's Week Committee will be held at noon Thursday, Oct. 11 in U Room 259. The committee will discuss possible activities for the fourth annual campus celebration of women's achievements.

The committee hopes to recognize the 100th anniversary of Eleanor Roosevelt's birth with a program scheduled for Feb. 12, 1985.

"We have such a small budget and that is why we must get to know people and the keynote address for free, if possible."

In addition, Cal Poly students, please see WOMEN PAGE 7
Rounding up rodeo support

This week has officially been dubbed "Fall Rodeo Week" at Cal Poly.

This special week was designed to recognize our outstanding rodeo team and to bring our diverse university a little closer together.

Many students do not know how widely-accepted our men's and women's rodeo teams are. Coach Ralph Rianda said the team is not only known nationally, but internationally, for its excellence.

When people think of college rodeo, he said, they think of Cal Poly, San Luis Obispo.

Last year both the men's and women's teams won the West Coast Region titles. Cal Poly was rated "Number One" in the nation throughout most of the year and two members of the team earned the top titles at the national championships.

Cal Poly has competed in every national finals, but one, since the team was originated in 1949. They have won four national championships and have a chance of rounding up another one this year.

Except...

At the present time our rodeo program has very little money.

The Associated Students, Inc. have delegated an adequate amount of money, said Rianda, for a travel fund for the nine actual team members.

However, this money is not enough when around 50 Cal Poly students travel with the actual team and compete independently. The team is structured much like wrestling — there is opportunity for students to move up to and off of the actual team. Which nine members compete at each rodeo under the Cal Poly name is determined by how well any of the students did at the last rodeo.

In addition to travel expenses, the team must buy stock to practice with each year, feed and supplies, and pay for caring.

The rodeo team and the Rodeo Boosters hold fundraisers every year, but the money they can raise is far from the amount needed to pay for the program and the coaches' salaries.

Rianda said Tuesday that the School of Agriculture is in the process of finding funds for the rodeo program.

We strongly hope that the school and university officials can get these funds finalized for the team.

We also recommend that other parts of the university look into any possible support they can find.

And, we urge Cal Poly students, faculty and staff members back our great rodeo team.

This Friday and Saturday is the annual Fall Rodeo. This will be the only chance this quarter to watch the action-packed team Rianda has written the rules of college rodeo.

Not only can we enjoy a very exciting and different sport, but we may be able to help save a team that has continuously earned Cal Poly a great deal of respect.

The rodeo on Friday is at 6 p.m. in Collet Arena and on Saturday at 1:30 p.m. Advance tickets are on sale at the University Union ticket office for only $2 for students and $3 for general admission. Children's tickets are $1.

See you there!
Mondale is criticized for his Diablo position

Editor:

As a spending-conscious Cal Poly student, I have a freedom of speech, of the press, and of the political assembly. The amendment encourages a free exchange of ideas and information among citizens, which is vital to our source of pride and democracy. But these ideas are being thwarted by one government. The current administration is denying us that exchange of ideas by denying visas to foreign scholars, writers, scientists, politicians and even Nobel Prize winners because their political beliefs are contrary to the U.S. government's.

According to the Immigration and Naturalization Service, 8,000 people from 98 countries are currently restricted from this nation because of their political beliefs.

Dario Fo, an Italian actor, director and playwright, spoke to a group of concerned citizens in Washington, D.C. about the absurdity of U.S. policy. Actually, the listeners were in D.C. and Fo was in Canada, speaking over two-way closed-circuit television. Author of the play "Accidental Death of an Anarchist," he was denied a U.S. visa because of his anarchist beliefs. It is ironic that though Fo is excluded from the U.S., his play is currently being produced in New York. To this he said, "I am honored to be excluded from the U.S. Looking at the list of denials, I am in great company."

Carlos Fuentes, Nobel laureate, former Mexican Ambassador to France and writer, has also been denied many visas because of his "leftist" ideals. On the occasions he was allowed to enter the U.S., his access was extremely limited. The terms of one particular visa, for example, confined him to Manhattan for five days. His good friend and fellow writer, Norman Mailer, happened to live in Manhattan for five days. His good friend and fellow writer, Norman Mailer, happened to live in Manhattan for five days.

How can the current administration be justifiably criticized or even challenged? The United States doesn't allow people into this country because of their political beliefs? I have been taught since grade school that this country was founded by people escaping persecution because their beliefs were contrary to the existing government's.

No one knows exactly how much higher the rates would go if a portion of PG&E's customers is industrial, not residential, and the above figures may be underestimated. But they should not be so short-sighted. The fact is rate hikes are all rates will hit us. Many certain that couldn't afford the average figure of $773 would cost each customer.

Critics may argue that a portion of any U.S. of PG&E's customers is industrial, not residential, and the above figures may be underestimated. But they should not be so short-sighted. The fact is rate hikes are all rates will hit us. Many certain that couldn't afford the average figure of $773 would cost each customer.

Closing the plant would cause a loss of availability-of-jobs community-wide. Since when does the president of the United States have the automatic right to take jobs from—and cause increasing financial difficulties for—other U.S. citizens and legal residents? I hope never. Could it be Mondale is actually the "rich man's president?"

View from the Hill

Tarnished ideals evident

So, you think we live in a free country, huh?

The First Amendment certainly guarantees us many freedoms. Freedom of speech, of the press, and of the political assembly. The amendment encourages a free exchange of ideas among citizens, which is vital to our source of pride and democracy.

But these ideas are being thwarted by one government. The current administration is denying us that exchange of ideas by denying visas to foreign scholars, writers, scientists, politicians and even Nobel Prize winners because their political beliefs are contrary to the U.S. government's.

According to the Immigration and Naturalization Service, 8,000 people from 98 countries are currently restricted from this nation because of their political beliefs.

Dario Fo, an Italian actor, director and playwright, spoke to a group of concerned citizens in Washington, D.C. about the absurdity of U.S. policy. Actually, the listeners were in D.C. and Fo was in Canada, speaking over two-way closed-circuit television. Author of the play "Accidental Death of an Anarchist," he was denied a U.S. visa because of his anarchist beliefs. It is ironic that though Fo is excluded from the U.S., his play is currently being produced in New York. To this he said, "I am honored to be excluded from the U.S. Looking at the list of denials, I am in great company."

Carlos Fuentes, Nobel laureate, former Mexican Ambassador to France and writer, has also been denied many visas because of his "leftist" ideals. On the occasions he was allowed to enter the U.S., his access was extremely limited. The terms of one particular visa, for example, confined him to Manhattan for five days. His good friend and fellow writer, Norman Mailer, happened to live in Manhattan for five days. His good friend and fellow writer, Norman Mailer, happened to live in Manhattan for five days.

How can the current administration be justifiably criticized or even challenged? The United States doesn't allow people into this country because of their political beliefs? I have been taught since grade school that this country was founded by people escaping persecution because their beliefs were contrary to the existing government's.

Now, 200 years later, the United States government does not allow dissenters into its jurisdiction. Even 70 years ago, hordes of European immigrants found sanctuary in the United States. Today, vice presidential candidate Geraldine Ferraro even boasts she is the daughter of an Italian immigrant.

How can the current administration restrict foreigners from entering our country simply because their political ideals are not harmonious with democracy? Perhaps the answer can be found in our history.

There was a mania more than 30 years ago called McCarthyism. Laws were made during those frantic '50s to stomp out communists once and for all. The most damaging law was the Immigration and Naturalization Act, enacted over President Truman's veto in 1952. This is also known as the McCarran-Walter Act which excludes aliens on the basis of their political beliefs. Though amended in 1977, it is still so broad that aliens can be denied U.S. entrance because their beliefs are considered "contrary to the public interest."

I think some of President Reagan's policies are contrary to the public interest.

Those laws were made at the height of the Red Scare. When these fears waned in the '60s and '70s, so did the enforcement of these laws. Now it seems the current administration is dusting off those laws to keep out people whose ideas and opinions the government doesn't want Americans to hear.

I want to know why the present administration is so afraid of a "free marketplace of ideas" and is imposing this ideological exclusion. Isn't there any confidence in the American ideals of democracy that we have been instilled in us since we could recite the Pledge of Allegiance?

Though aliens may not have the right to be here, we have the right to hear them. The relics of McCarthyism must be changed through sensible and constitutional legislation. What happened to the land of the free and the home of the brave? I'm worried.

Julia M. Prodis is a senior journalism major interning with Congressman Ron Edwards in Washington, D.C.

You can be part of the greatest alliance in American business history — Electronic Data Systems and General Motors. This alliance combines the information processing strengths of EDS with the resources of the largest company in the nation. And with it comes vast opportunities for you — the kind that business professionals can spend their entire careers seeking.

You’re already starting at the top with our outstanding resources for growth and success. And the only way to go is up.

We’re looking for self-starters — people with the confidence to set high goals and the determination to reach them. We want to put you at the core of EDS operations as a Systems Engineer. EDS Systems Engineers use both business and technical skills to solve complex problems for our clients. And every EDS Systems Engineer has graduated from our nationally recognized Systems Engineering Development (SED) Program.

The SED Program will prepare you for the leadership responsibilities you will have in the EDS-GM alliance. It lasts approximately 18 months and will undoubtedly be one of the most rigorous and rewarding business experiences of your life. You’ll receive intensive classroom training, and you’ll also have the chance to deal directly with our customers. You’ll gain knowledge that will place you far ahead of your peers. And when you graduate, you’ll have an exciting position with unlimited growth potential.

To qualify for the SED Program, you must be a college graduate with a technical aptitude and an outstanding record of achievement. You should have a major in Management Information Systems, Computer Information Systems, Computer Science, or Engineering. We will also consider candidates with any academic major and a strong interest in business and information processing. In addition, you must be flexible to relocate and travel. Finally, you must be a U.S. citizen or permanent resident. If you are a successful candidate, EDS will reward you with a competitive compensation package. And you’re sure to thrive in our corporate environment where rewards are based on achievement — not seniority.

TAKE THE FIRST STEP TOWARD JOINING THE GREATEST ALLIANCE IN AMERICAN BUSINESS HISTORY

Contact your college placement office today to schedule an interview with a local EDS recruiter. Or write to Electronic Data Systems Corporation, 7171 Forest Lane, Dallas, TX 75230. (214) 661-6000. An Equal Opportunity Employer.

Reagan Rhetoric

Some answers from the policy makers

By MARGARITA MILLS

WASHINGTON — Every four years we elect someone to the presidential office. This one person in hold accountable for everything that happens to the country, whether it be a change in national economic status, military operations, domestic policy or foreign relations.

The truth is that the person who gets elected is in fact not the person who makes the decisions. The President keeps a whole staff on hand to advise, develop and execute national policy in all areas. These are the people who understand specific policy and its making best. These are the people who answer questions concerning administrative policy most completely.

The White House recently held a press briefing for college journalists, featuring the major policy makers of the Reagan Administration.

With election day nearing the fight between Ronald Reagan and his challenger Walter Mondale is mounting and hard issues are being drug between the two. Issues concerning Reagan's policies over the past four years have been the target of campaign speeches, commercials and candidate debates.

Ambassador to the United Nations Jeane Kirkpatrick, Deputy Press Secretary Larry Speakes, Speechwriter for the Pentagon Jack Bergen and Secretary of Education Ted Bell were available for questions and comment on current Reagan policy.

THE BUDGET

In a 30-minute briefing, Colonel Jack Bergen explained a system which the administration uses to come up with a budget. According to the terms of the system, the increasing amounts budgeted for defense spending are justified. The question that arises, however, is whether the values reflected in the system are true to those of the American public.

Bergen pointed out that the deficit is not the result of defense spending. "We at the Pentagon don't feel we're putting a lot of investment into defense. That worries us, particularly when we see the military power we're putting together and the military power we're thwarting, particularly when we see the surplus we've managed to accumulate. They're really putting a lot of investment into defense. That worries us, particularly when we see the military power we're putting together and the military power we're thwarting," he explained.

Bergen emphasized that the Reagan Administration does not envision the United States as the "world policeman. He cited a "collective defense" strategy as the basic idea for the nation's plan.

"Our strategy does not seek to fight, not seek to set out into another conflict. That means our strategy is based on deterrence," he said.

We see to it that we have that capability to convince anybody who wants to start trouble, that they couldn't gain anything from it because we could retaliate. Bergen explained, "That's really at the cross of our strategy."

Yet, in addition to deterrence, Bergen stated that part of the administration's strategic plan is to get arms reduction. They are looking to bring down the levels at which the U.S. must be said, and keep negotiating with the Soviets.

* But in the meantime, we recognize that we must have the capability to retaliate, the capability to protect our interests," Bergen continued.

Bergen cited capabilities as the fifth step in achieving a budget that included a whole spectrum from nuclear weapons to conventional combat.

"But we need capable forces that are ready," he said. "Readiness is composed of things like having people who are well-trained, that have the equipment they can operate, that they have the spare parts they need to keep operating. I would emphasize the people part of readiness because that is something we are very proud of."

"We've gone from 68% to 92% of our people who are high school graduates in just three years. People who are reenlisting are increasing from 55% to almost 70%," he commented.

The final stage of a budget is budgeted. Bergen said, is the budget budgeted. "We at the Pentagon, we are today being debated in congress is a budget based on all those five steps," Bergen said. "It's a budget that goes all the way back to the commitments. And as Secretary Weinberger likes to say, as senators and congressmen tell him, 'Secretary, you really can't nor that money,' he tells them. 'Tell me what commitments I can cut off, then.'"

The budget is just one aspect of administrative policy which causes concern to those looking forward to the presidential race approaching next month. Tomorrow the Mustang Daily will feature the administration's explanation concerning the involve in Central America.

Presidential politics emphasized

Noon book reviews begin today

In keeping up with the pace of this election year, the first two book reviews of the Books at High Noon are devoted to presidential politics.

Today David George of the political science department will discuss Lyndon Johnson, by Robert A. Caro.

Other presentations will be scheduled for the remainder of the Fall Quarter, and the (California Loans to Assist Students (CLAS). Both have low, fixed interest rates and flexible repayment plans. Depending on your circumstances and the loans you choose, you can borrow $1,000 to $8,000 per year and take 5 to 10 years to repay. And you may not have to start repaying until after you graduate.

Quick response. You want fast answers to your loan request. Our on-line system gives you quick turnaround and immediate information about your loan whenever you want it. Wells Fargo offers two special plans, the California Guaranteed Student Loan (CGSL) and the California Loans to Assist Students (CLAS). Both have low, fixed interest rates and flexible repayment plans. Depending on your circumstances and the loans you choose, you can borrow $1,000 to $8,000 per year and take 5 to 10 years to repay. And you may not have to start repaying until after you graduate.

WOMEN

From page 1 faculty and staff who are interested in organizing or making a presentation relevant to the theme are urged to attend the meeting to contact Coleman at 546-2478.

"We need them to come bounce their ideas off of us," she said, adding that a presentation need not be a speech. "In the past we have worked on a wide variety of suggestions."

Coleman said that Women's Week was started at Cal Poly in order to "provide the opportunity for us to focus attention on women in a way which is generally lacking in the educational system—women as doers. In the classroom, women are touched on very peripherally."

She added that Cal Poly's Women's Week activities try to display all the roles that women play: wives, mothers, workers and everything in between. The on-campus celebration of Women's Week is out of sync with National Women's History Week, Coleman said, so that the presentations will coincide with the quarter system.

The committee hopes to have an outline of planned presentations by mid-November so that professors can plan ahead and assign or recommend that students attend one or more of the programs as part of their Winter Quarter coursework.

"Our goal is to tie the presentations in with support from classroom information, which usually doesn't cover women's achievements in detail," Coleman said.

CORRECTION

The Oct. 9 Mustang Daily article, "Students cross party lines after internships," incorrectly stated KCPR would hold a debate between the Cal Poly College Republicans and the Students for Mondale-Ferraro Oct. 30.

KCPN informed the Mustang Daily that date, along with the entire debate, is still up in the air. Whether or not KCPN will eventually hold the debate is contingent on many matters, both internal and logistical.
Outdoors

The Californian at rest this weekend in Port San Luis. It was the flag ship at the Olympic Tall Shippers Conference.

Even the peace of the Central Coast can be broken.

Cars clog the streets. Voices grate. Deadlines sprint up and roar by as tensions distract you. There isn't even enough time to consider slowing down.

That's when the ocean beckons and you would do well to listen to it. The siren-song of the ocean is loudest on Saturday mornings, or on breezy weekday afternoons when life itself keeps you from enjoying it.

There are dark swells in which to dip your lines from the piers. Maybe a fish to catch, certainly an hour or two to talk things over, and time to remind yourself of the splendors seen by putting slack in the pace of daily life.

And in your ocean daydreams, a tall ship may blow onto the horizon, sailing into the harbor, laden down with visions of long ago, as the Californian was this weekend entering Port San Luis.

To the ocean you can deposit your worries. From it you can draw peace in the distant, unreal clapping of canvas in the wind, the yelping of seals and sea lions, the desperate cries of gulls, the embracing curl of wind. Then you can and face what you escaped.
You're holed up in your dorm room, wrapped in a text at your apartment and wondering when you'll get out to see this Central Coast you've heard so much about.

Plan to drop the book for a while and see what the Natural History Association of San Luis Obispo Coast, Inc. has to show you. The association conducts a constant flow of hiking tours, films and talks. Here are some of the October offerings.

"Where the Wild Things Live," a twist on Maurice Sendak's children's book, is the theme of the association's annual Blue Heron Film Festival at the Morro Bay State Park Museum of Natural History, a three-day celebration of outdoor adventure films beginning this weekend. Friday, Oct. 12 and Saturday, Oct. 13 feature family nights, with film and puppet shows from 7:30 to 9:30 p.m. The festival is free, though donations are accepted so the association may continue to offer new film lineups.

*Museum officials calls these "Adventures with Nature," also known as nature walks:

• Saturday, Oct. 13, 10:30 a.m.: Bill Keiller leads a walk along the bluff of Montana de Oro. You should bring binoculars and a sweater. And hotdogs and fixings if you want to cook from the fire Park Campground on Pier Ave. in Oceano. Three miles, two and a half hours.

• Saturday, Oct. 20, 10:15 a.m.; The docent Puppeteers offers an informative puppet show. Bring the kids. A film will follow. It's in the State Park Museum auditorium. One hour.

Also on that day at 2 p.m. is the California State Park Foundation Clam and Lobster Bake at Spooner Cove. This area has been honored to host the fundraising event for the first time. Tickets, available now, are in the $30 range. After the bake, Don Klipper and Bill Keiller will each lead seacliff walks. Two miles, two hours.

Also at that time, you can hike the high dunes of the Pismo Dunes Natural Preserve with Dick Simpson. Meet at the State Park Campground on Pier Ave. in Pismo Beach. Three miles, two and a half miles.

Sunday, Oct. 14, 10 a.m.: Meet at the Morro Bay State Park museum entrance for a short walk as Jean Cartwright shares the importance of the Morro marshlands. You'll get an overview of the delta, the marshlands and the true lagoon. Water samples will be collected and brought back to the museum for inspection under microscopes. A half mile, one and a half hours.

Also at that time, you can hike the high dunes of the Pismo Dunes Natural Preserve with Dick Simpson. Meet at the State Park Campground on Pier Ave. in Pismo Beach. Three miles, two and a half miles.

You're holed up in your dorm room, wrapped in a text at your apartment and wondering when you'll get out to see this Central Coast you've heard so much about.

"Where the Wild Things Live," a twist on Maurice Sendak's children's book, is the theme of the association's annual Blue Heron Film Festival at the Morro Bay State Park Museum of Natural History, a three-day celebration of outdoor adventure films beginning this weekend. Friday, Oct. 12 and Saturday, Oct. 13 feature family nights, with film and puppet shows from 7:30 to 9. Saturday and Sunday, Oct. 14, will have daytime showings from 10 a.m. to 1 p.m. and 1:30 p.m. to 5 p.m. The festival is free, though donations are accepted so the association may continue to offer new film lineups.

*Museum officials calls these "Adventures with Nature," also known as nature walks:

• Saturday, Oct. 13, 10:30 a.m.: Bill Keiller leads a walk along the bluff of Montana de Oro. You should bring binoculars and a sweater. And hotdogs and fixings if you want to cook from the fire Park Campground on Pier Ave. in Oceano. Three miles, two and a half hours.

• Saturday, Oct. 20, 10:15 a.m.; The docent Puppeteers offers an informative puppet show. Bring the kids. A film will follow. It's in the State Park Museum auditorium. One hour.

Also on that day at 2 p.m. is the California State Park Foundation Clam and Lobster Bake at Spooner Cove. This area has been honored to host the fundraising event for the first time. Tickets, available now, are in the $30 range. After the bake, Don Klipper and Bill Keiller will each lead seacliff walks. Two miles, two hours.

Also at that time, you can hike the high dunes of the Pismo Dunes Natural Preserve with Dick Simpson. Meet at the State Park Campground on Pier Ave. in Oceano. Three miles, two and a half miles.

You're holed up in your dorm room, wrapped in a text at your apartment and wondering when you'll get out to see this Central Coast you've heard so much about.

Plan to drop the book for a while and see what the Natural History Association of San Luis Obispo Coast, Inc. has to show you. The association conducts a constant flow of hiking tours, films and talks. Here are some of the October offerings.

Pledges sign against possible invasion

SAN FRANCISCO (AP) — Several hundred people at a demonstration outside the federal building Tuesday signed pledges to join in non-violent, civil disobedience actions if the United States invades Nicaragua or El Salvador.

The protest, which featured religious speakers and Vietnam War songs by Country Joe and the Fish, kicked off a drive to create a national "emergency response network.

"If we get several hundred thousand people across the country to sign, it might deter this invasion," said Ken Butigan, one of the organizers, told the crowd. A second purpose of the network, he said, is "we don't have to wait two or three years to build a movement against a possible U.S. invasion. We have something in place.

"Our goal is, hopefully, to get 100,000 people signed up nationally by the (Nov. 6) elections," said Robin Knowlton, a spokeswoman for the Northern California chapter of the civil disobedience movement. "About 300 signatures were mailed in before today and we'll have at least 500 more after this.

High court stops lower action in Disney

LOS ANGELES (AP) — The California Supreme Court on Tuesday temporarily halted enforcement of a lower-court order forbidding striking Disneyland workers from picketing near the amusement park's main ticket booths.

The high court's action comes one day after six union leaders were arrested for defying the Superior Court's restrictions and one day before Disneyland has said it will begin hiring permanent replacements for the 1,844 strikers.

"We are obviously pleased with the outcome," union spokesman Michael O'Boerke said of the Supreme Court's late-afternoon decision to stay enforcement of the picketing restrictions pending determination of the unions' appeal.

No hearing date for the union appeal was set. Under the week-old order by an Orange County Superior Court commissioner, picketers haven't been allowed near the park's main ticket booths, which are about a quarter-mile inside park property beyond its sprawling parking lots.

The groups contend they are permitted by state law and prior court rulings to picket in such areas a parking lots that are used by the public to access to struck facilities.

Cause of SF jet crash still not known

SAN FRANCISCO (AP) — Investigators said it will take "a long time" to uncover what caused a small jet to explode just after takeoff, killing three people, temporarily closing San Francisco International Airport and littering debris over a half-mile area.

The Gates Learjet burst into flames Monday night either in the air or in the crash moments after takeoff for Van Nuys, headquarters of the plane's owners, Clay Lacy Aviation Inc.

The company said Tuesday the plane had no flight recorder, an armored device carried on commercial airliners that monitors cockpit conversations and other flight data.

The company identified the pilot as Henry Power, who had 6,500 hours of flight time, and the copilot as Mark Johnson, with 2,500 hours. Both had air transport licenses, Lacy officials said.

The name of their passenger on the "non-revenue" flight was withheld until notification of relatives.

"The plane had no attention from us. It was a quick response," said the eyewitness, a former Air Force pilot who had just landed his plane at Butler, a private aircraft terminal at the north end of the airport runway system.

It was the first fatal accident at the airport since Sept. 9, 1969, when a mail plane headed for Boreka, Calif., plowed into San Francisco Bay killing the pilot.

"The plane had no attention from us. It was a quick response," the eyewitness, a former Air Force pilot who had just landed his plane at Butler, a private aircraft terminal at the north end of the airport runway system.

Washington (AP) — Researchers have found the virus believed to cause AIDS in the saliva of people who have a pre-AIDS condition or who have had contact with known disease victims, government spokesmen said today.

The work, done at New England Medical Center in Boston and the National Cancer Institute in Maryland, MD, confirms previous speculation that the disease might be transmitted through saliva as well as through blood and other bodily fluids.

However, Dr. Edward N. Brandt, assistant secretary for health and Human Services, said evidence to date indicates it is "very unlikely" that the disease can be transmitted from person to person through saliva.

"Although we have been able to isolate the virus from the saliva of people with a pre-AIDS condition and others at high risk of contracting AIDS," Brandt said in a statement, "all evidence indicates AIDS is transmitted only through blood, blood products and semen."

Federal health experts said today there was no reason for the public to be concerned about everyday contact with those at high risk of getting AIDS, including male homosexuals and hemophiliacs who use blood products to treat their blood-clotting deficiencies.

Of the more than 6,000 cases of acquired immune deficiency syndrome reported to date in the United States, none has been linked directly to transmission through saliva.

However, more than 100 cases of the incurable and deadly disease are linked to transfusions of blood and blood products from donors who had the disease or an immune system problem called pre-AIDS that shares some of the disease's characteristics.

AIDS is transmitted only through bodily fluids that can be directly to transmission through saliva.

"The wealthy are a very elusive group and we really don't know much about them," said Robert B. Avery, a researcher at the Federal Reserve Board and other federal agencies into how wealth is distributed in America.

The study is looking at all income groups, but is making a special effort to break through the secrecy behind which the wealthy in America have traditionally conducted their financial affairs.

"The wealthy are a very elusive group and we really don't know much about them," said Robert B. Avery, a researcher at the Federal Reserve Board and other federal agencies into how wealth is distributed in America.

Mr. Murderer will still get death sentence

Washington (AP) — Convicted Florida murderer Stevie Lamar Fields Tuesday lost a Supreme Court appeal of the punishment for the murder of Rosemary Janet Cobb, a 26-year-old student librarian at the University of Southern California.

He was sentenced to death for the murder of Rosemary Janet Cobb, a 26-year-old student librarian at the University of Southern California.

The justices rejected arguments that the murder of Rosemary Janet Cobb, a 26-year-old student librarian at the University of Southern California, was a one-time crime wave of violence.

Of the more than 6,000 cases of acquired immune deficiency syndrome reported to date in the United States, none has been linked directly to transmission through saliva.

However, more than 100 cases of the incurable and deadly disease are linked to transfusions of blood and blood products from donors who had the disease or an immune system problem called pre-AIDS that shares some of the disease's characteristics.

The initial findings are in a survey conducted by the Federal Reserve Board and other federal agencies into how wealth is distributed in America.

The study is looking at all income groups, but is making a special effort to break through the secrecy behind which the wealthy in America have traditionally conducted their financial affairs.

Reagan rules out Social Security cuts

WASHINGTON (AP) — President Reagan, responding to a challenge by Walter Mondale, ruled out on Tuesday any cuts or changes in Social Security benefits for current recipients or future retirees.

In an abrupt policy shift prompted by Mondale's suggestion at a Cincinnati campaign stop that Reagan might revamp the Social Security system, White House spokesman Larry Speakes said the president had authorized him to announce that he "will never stand for reduction in Social Security benefits for anybody."

Reagan's standard position: reiterated as recently as his debate Sunday night, with Mondale, has been that he would not seek to cut benefits for current recipients. But he had not specifically ruled out program changes that could affect the benefits of those not yet on the rolls.

"I am here to say that I have just spoken with the president, and Mondale ought to be ashamed," Speakes said. "He is out to frighten the elderly. The president will never stand for reduction in Social Security benefits for anybody who is now getting it or future recipients."

Mondale said in Cincinnati that he had bad re­ject any attempts to reduce Social Security benefits and challenged Reagan to do the same.

Speakes said that even if inflation should change the present healthy outlook for the Old Age and Retirement trust funds, the president is not plan­ning on cutting benefits, now or in the future.

He ignored questions about whether that could lead to increases in Social Security payroll taxes, for which Reagan often has criticized the Carter ad­ministration.

Speakes also pledged that current and future Social Security recipients would receive all cost-of­living increases to which they are entitled under cur­rent law.

Speakes refused to discuss plans for the Medicare program for the elderly, which is in growing financial trouble, as Social Security was before a bipartisan commission proposed — and Congress accepted — revisions in the system last year.

Duarte said Monday that the armed forces high command had agreed to his proposal for the talks. Radio Venceremos made the original proposal for the talks the day before, in a broadcast that Archbishop Arturo Rivera y Damas took to Duarte on May 18. The rebel broadcast said Duarte's announcement at the United Na­tions was in response to that letter.
Spikers No. 1
Women make history, move to top of NCAA poll

by JILL PERRY
staff writer

The Cal Poly women's volleyball team is hoping history will one day repeat itself. One day.

The 16-2 spikers were rated No. 1 in the Oct. 9 NCAA poll, after one week at the No. 3 position. The team also moved up in the Tachikara Coaches Poll from No. 5 to No. 4. "This is historical. It's the first time we've ever been rated No. 1," head coach Mike Wilton said Tuesday.

Although Wilton was obviously pleased with the newest results, he knows to keep perspective about the significance of the poll. "Of course the only poll that makes any difference is the one at the end of the season. It's a close race. It's definitely wide open and there's a lot of season left," he said.

The team members themselves were also pleased to be thought of so highly by the coaches and administrators who decide the rankings. "It's neat to have the encouragement of other people," outside hitter Kelly Strand said. Defensive specialist Christi Hale felt the new poll placed more pressure on the team. "It makes you want to prove to everyone else that you're the best," she said. But setter Dede Bodnar and middle hitter Carol Tschaser both felt the team had earned the honor. "It's about time," they echoed.

The Mustangs will be playing the Pepperdine Waves this Saturday in the gym at 7:30 p.m. There is no cost to students with valid ASI cards.

Lynn Kessler goes high for the spick during practice. Kessler and teammates have a 16-2 record this year.

CAMPUS INTERVIEWS
October 19, 1984

SAN DIEGO (AP) — The Detroit Tigers last appeared in the World Series in 1968. The San Diego Padres not only are making their first trip to the World Series, but 1984 marks their first taste of post-season play.

The World Series began Tuesday night and it features a matchup of two managers who already have met once in the World Series, in 1972. That was when Detroit's Sparky Anderson was with Cincinnat i and San Diego's Dick Williams was with Oakland.

Williams won that time; Anderson did not win the first of his two World Series until 1975. Regardless of who wins this time, however, history will be made. One of these managers will become the first to win a World Series in each league.

Since this is an even-numbered year, the designated hitter will be used in the World Series. Other than having to find a DH, San Diego comes into the World Series with a set lineup, while the Tigers use a lefty-righty platoon at three positions — DH, third base and left field.

The matchups:

FIRST BASE
Darrell Evans, a left-handed hitter, is the Tigers regular first baseman, unless he plays at third base in Anderson's platoon. When Evans is at third, another left-handed hitter, Dave Bergman plays first. Steve Garvey, Most Valuable Player of the National League Championship Series, is the Padres' first baseman.

Evans hit only .232 during the season but drove in 63 runs and hit 16 home runs. Bergman was a .273 hitter with 44 RBIs and seven homers. Garvey had a subpar year, hitting only eight homers, but batted .284 with 98 RBIs. He had seven RBIs in the NLCS.

Give Garvey the edge.

SHORTSTOP
Alan Trammell has a sore shoulder, but he managed to be effective at shortstop for the Tigers during the playoffs, when he hit .364. Gary Templeton sparked San Diego's Game 3 victory.

Trammell hit .314 with 69 RBIs and 14 homers, while Templeton batted .258 with 35 RBIs and two homers. Call this a tossup.

CATCHER
Lance Parrish of Detroit is one of the best in either league, while Terry Kennedy of San Diego has struggled this season. Parrish led the Tigers in homers with 33 while driving in 98 runs. Kennedy had 57 RBIs and 14 homers after driving in 97 runs in 1982 and 98 in '83.

PITCHING
The Tigers have one of the best rotations in baseball. For the World Series, they'll use right-handers Jack Morris, 19-11, Dan Petry, 16-8, and Milt Wilcox, 17-9. The Padres will start with left-hander Mark Thurmond, 14-6, followed by right-hander Ed Whitson, 14-8, left-hander Tim Lollar, 11-13, and right-hander Eric Show, 15-9, although he was bombed twice in the playoffs.

Just from the rotation, the Tigers appear miles ahead.

In the bullpen, the Tigers have Willie Hernandez, a lefthander who earned 32 saves with a 2.3 ERA. The Padres' top reliever is Rich Gossage, who had 33 saves and a 2.90 ERA. They also use left-handers Craig Lefferts and Dave Dravecky, a converted starter, and right-hander Andy Hawkins.

The Padres have a slight edge in the bullpen, but the Tigers enjoy a slight edge overall.

Campbell traded to Saints for No. 1 pick

NEW ORLEANS (AP) - Earl Campbell, the powerful Heisman Trophy winner who ran back for the Houston Oilers, was traded in a surprise deal to the New Orleans Saints for No. 1 pick in the National Football League draft.

Campbell entered the 1984 season as the nation's most productive runner in NFL history. Coming into the season, he had carried 1,883 times for 8,296 yards - a 4.4 average - with 68 touchdowns but he's had far harder times this season with the Oilers, carrying 96 times for 279 yards, a 2.8 average. He has scored four touchdowns.

Phillips said that the Oilers made the offer after noon Tuesday, when Ladd Herzig called Pat Pappas the Saints' director of football operations.

"Obviously, we are glad to get him," Phillips said. "I've never had too many good players. This trade gives us a heck of a backfield.

El SEGUNDO, Calif. (AP) - With the status of quarterback Jim Plunkett uncertain because of a torn stomach muscle, the Los Angeles Raiders brought former backup passer David Humm into camp Monday.

Plunkett tore the muscle on his fourth pass of Sunday in a 26-14 win over Seattle at the Coliseum. His backup, Marc Wilson, completed 12-of-30 passes for 151 yards and to go to a team of this caliber is just, well, the only thing that could have been better as if it happened 12 weeks ago.

Plunkett ended his 12-year holdout last week, but not before fines and missed paychecks took $100,000 bite of his $240,000 annual salary.

LA calls Humm, both QBs injured

MINNEAPOLIS (AP) - The Vikings will receive the Raiders' sixth-round pick after the Vikings traded quarterback Brad Van Pelt's wish card true Tuesday when the Vikings traded him to the Los Angeles Raiders. Van Pelt, 33, was sent to the Super Bowl champions for two draft choices just 15 minutes before the National Football League trading deadline at 3 p.m. CDT trading deadline, Vikings Coach Les Steckel said.

The Vikings receive the Raiders' sixth-round pick after the Minnesota native linebacker Brad Van Pelt's wish card true Tuesday when the Vikings traded him to the Los Angeles Raiders.

Van Pelt, a five-time Pro Bowler refused to join the Vikings after being traded July 12 by the New York Giants for running back Tony Nathan.

He held out for 12 weeks, asking to be traded to teams in Florida or California for post-career business opportunities.

"That's what I was looking for, No. 1 and to go to a team of the Raiders caliber is just, well, the only thing that could have been better as if it happened 12 weeks ago.

Kaplan Killowatt and his dog Energy are fighting to cut energy waste at Cal Poly!

Hey Cal Poly Greeks:

The 5th annual Energy Conservation Competition is here. Last year all 25 Greek Houses participated in the six-month contest. Over $100,000 was saved and we're hoping for an even bigger savings this year.

The success of last year's contest was greatly attributed to the Energy Conservation Incentive Programs. Teams are representatives from each of the 22 Greek houses who have come together to save energy while also getting to know other Greeks on their diets. This year we have expanded the program to include many more Greeks in the competition.

Greek Houses can also win big bucks by saving energy between October 1, 1984 and March 31, 1985. Find out how your house can be a Kaplan Killowatt and get started now with these helpful energy tips for your living room.

1. Take shorter showers
2. Dress lightly and turn off room When leaving room
3. Use extra use of appliances lor example barbeques
4. Blow dryer and stove
5. Clothes which are dry in the dryer take longer to warm, and close them in but trial and spring days to keep rooms cool
