Students designing proposed faculty club

By GREGG SCHROEDER

A club for Cal Poly faculty members is being designed by fourth-year architecture students.

Faculty members have been interested in building a faculty on-campus for several years, according to Peter Behn of the architecture department.

Behn decided to use the idea as a class project for his fourth-year architectural design lab.

According to the lab syllabus, designers "need to understand all aspects of the planning process."

Students began the project by distributing a survey to faculty members to determine faculty needs.

Asked on the survey if there is a need for greater faculty interaction between all disciplines of the university, a physical education department answered, "Yes - very definitely."

There is very little interaction among the various departments. It's not unusual to meet someone for the first time who has also been here for 10 years. (All responses were anonymous.)

Distributed randomly to 150 faculty members in all seven schools, the survey included questions about what kind of atmosphere members preferred, what kind of activities members would like available and would members be willing to pay a membership fee.

The 40 faculty members that returned their surveys indicated they wanted a "colorful, casual, quiet and practical" atmosphere with facilities for "snacking, dining, social drinking and reading/studying." Seventy-two percent of those surveyed said they would be willing to pay a membership fee.

Eighty-three percent felt that membership in the club should be voluntary.

Statistics compiled show that between 450 and 770 faculty members would use the facility, with each member using it 3.5 times per week and 312 members using it per day.

The facility will also help to attract faculty to the campus, according to Behn.

"San Luis Obispo is so isolated. Visting professors find it difficult to socialize with other faculty members participate in," said Behn.

Heln said if more time had been spent on constructing the survey and had it been done more scientifically, the response might have been greater.

The responses also may have been colored by the shortage of instructional space on-campus.

With this point of view, we will do without and amend the original survey."

The design students plan to include facilities for dining, social drinking, conferences and lodging for visiting professors and lecturers in the facility. It could be used for summer conferences and be available to the public for receptions.

Means of financing the estimated 14,000 square foot, $1.4 million project have not yet been determined. The college hopes to interest the Cal Poly Alumni Association in supplying initial funds, use facility rental fees to pay for loans and membership fees to support maintenance costs.

The next step for the students is to design the facility according to the information collected.

When the project is completed students will invite people from various organizations, such as the Alumni Association, the administration, the University Club and the Academic Planning Center to review the proposed plan and determine if it is usable.

Behn said he wanted the class project to be as realistic as possible.

This is a professional design lab. Students put together all the work learned so far. It is a synthesis of all they've done.

ASI tackles student problems

By SUSAN DETHLEFSEN

Student senators set 10 goals for campus and student life improvements for the year during their annual Student Affairs Council retreat last weekend.

By GREGG SCHROEDER

The goals include providing input about the role of athletics at Cal Poly, taking concrete steps toward solving the problem of Greek Relations, has given an informational report on reasonable add/drop policy, improving campus traffic conditions, studying safety, insuring for all disciplines of the university, a physical education department answered, "Yes - very definitely."

There is very little interaction among the various departments. It's not unusual to meet someone for the first time who has also been here for 10 years. (All responses were anonymous.)

Live chess game slated

Morro Bay holds festival

By MICHAEL STUMP

"Chess live!" is a combination of chess and theater. Chess masters move costumed people who play the characters of chess pieces. The costumes of the royals are the rich renaissance styles, while the pawns, naturally wear the more simple contemporary styles. The costumes of the royals are the rich renaissance styles, while the pawns, naturally wear the more simple contemporary styles. The costumes of the royals are the rich renaissance styles, while the pawns, naturally wear the more simple contemporary styles.

The event is one of the highlights of this weekend's Morro Bay Harbor Festival.

"Chess live!" is a combination of chess and theater. Chess masters move costumed people who play the characters of chess pieces. The costumes of the royals are the rich renaissance styles, while the pawns, naturally wear the more simple contemporary styles. The costumes of the royals are the rich renaissance styles, while the pawns, naturally wear the more simple contemporary styles.

The jest of the first goal, said ASI Vice President and Student Senate Chairperson Marica Godwin, "in that there has been a lack of spirit at intercollegiate activities (Cal Poly tends to be less "in the know" about intercollegiate activities (Cal Poly tends to be less interested in spectator participation than other campuses."

"The Student Senate goal this year is to define what the correct number of spectators should be for different sports."

The second goal, establishing a Greek Row, is still being discussed, said Godwin. Jackie Le Clerc, head of Greek Relations, has given an informational report to increase student awareness on the matter since it will become more involved later.

Godwin said the third goal, distributing a new add/drop policy, will be worked on mainly by the Student Affairs Council. She added that the initiative on the ballot last year showed 80 percent of the students polled wanted it to be changed.

The fourth goal is to look at traffic conditions on campus. Godwin explained, with the primary concern being on safety. One hazardous area that will be studied is the crosswalk in front of the Administrations Building.

The problem with the fifth goal, trying to produce a Student Opinion Profile book, is finding the time and the manpower. Godwin explained, "The senate realizes they need to research different ways to produce a book," she said.

The five other goals the senators set are: insuring for all disciplines of the university, a physical education department answered, "Yes - very definitely."

There is very little interaction among the various departments. It's not unusual to meet someone for the first time who has also been here for 10 years. (All responses were anonymous.)

Cherishing gifts

The sacrifice the Reagan Administration made by giving us the California Wilderness Act has never been fully told, nor its value estimated.

The way we cherish this gift, though, is clearly outlined. To proclaim as wilderness more than a million acres of farmland, as President Reagan did by signing the act Sept. 28, the president and his advisors hoped, after their efforts, "Not everything can be measured by a profit margin," they had to tell themselves. "Some things we must save for a future we will never see."

The administration OK'd the act by tossing dollars aside and straddling the slightly tarnished John Muirian philosophy of preservation. Maybe it wasn't always the best land to preserve, said Jane G. Smith Jr., regional forester for the Pacific Southwest Region of the U.S. Forest Service in San Francisco, quoted in Thursday's San Jose Mercury News.

He even suggested the act includes too much wilderness to manage, that more solution is more work in maintaining recreational areas.

That's our role. To receive this gift, users must be as unselfish as the Reagan Administration appears to have it in giving. When we, can we must volunteer to maintain the wilderness areas, for recreation, for their beauty, for our survival.

We must consider generations to come, and the chance they'll see the splendor we enjoy. It must always be on our minds. We must receive this gift graciously.

The tax man cometh

Businesses may survive Mondale's tax hike plan, but maybe not Common Man

USPS—At a Philadelphia press conference last week, Walter Mondale unveiled a plan which would raise taxes over all and, says Mondale, cut the deficit by two thirds in '86.

Mondale's plan would depend almost exclusively on higher taxes rather than the spending cuts he has already announced, the deficit as projected by the Congressional Budget Office, would fall from $263 to $86 billion at the beginning of a second Mondale term.

Corporations and the relatively well off would be the heft of the tax increases, though the increase would affect all households making more than $25,000 a year, or about 50 percent of all American taxpayers.

Mondale proposed $84 billion in spending cuts, but since there also calls for $30 billion in spending increases, his plan would save $24 billion over the next four years.

Mondale would cut spending increases in areas such as defense and health care, while he would spend more to increase "fairness" in the tax system.

Since the smaller deficits in his plan mean the country would have to borrow less money, Mondale said the President's promised deficit reduction would come to an additional $15 billion in spending reductions.

Sidesitting possible Republican accusations that his tax hikes are merely a preparation for a new round of expensive social programs, Mondale announced that all the money collected from his proposed tax increases will go into a special trust fund. Money from the fund could be used only for the "cure- not for the financing of the deficit- not for new spending or new programs."

The guiding principle behind Mondale's budget would be to "pay your way", no new spending to be done without an identified matching source of revenue. Revenue would not be either spending cuts or tax hikes.

Mondale, all my cards are on the table, the Democrat said, "Americans are calling your hand. In hopes of scoring points as he did earlier this summer, Mondale urged the President to reveal his plan for raising taxes.

Reagan responded that he had already presented his plans "more specifically than most other administrations. "His aides point out that in February the White House issued over 1,000 pages of budget documents detailing every policy and program forecasted for the next five years. The President will not offer no new ideas, he is in the business of deficit reduction, the fiscal '86 budget to Congress in January of next year.

And, aides say, there are currently no plans to raise taxes.

More specifically, Mondale would cut spending in areas such as defense and health care, while he would spend more to increase "fairness" in the tax system.

The tax indexing would stop for individuals making more than $25,000, the median household income. Tax indexing would stop for everyone above this level, so that inflation would automatically push taxpayers up into higher brackets. The final phase of Reagan's 1981 tax cut would be repealed for individuals making more than $45,000, and families making more than $60,000. Individuals making more than $70,000 and families making more than $100,000 would face a ten percent tax surcharge on their additional earnings. Corporations would pay, a minimum assessment of 15 percent.

Seventy-five percent of the tax increases would be borne by families making $60,000 or more, according to Mondale.

Mondale would cut $84 billion in spending over the next four years, by cutting $25 billion from defense, $9 billion from non-agricultural programs, including Medicare and "$9 billion from the budget overall through better management reforms. Mondale would cut the ticket military items such as the MX and the B-1 bomber and would reduce Medicare expenses by enacting special health concern programs. He does not, however, threaten that military or Medicare spending will nonetheless increase although at a slower rate then had been planned.

Mondale claims his plan is "tough, realistic," and "practical. But the word "realistic" historically has little meaning for candidates pledging to reduce the deficit. Candidates Reagan and Carter both promised to outline the deficit at the end of their first terms. Neither name close.

Letters

Students vents anger at change

Editor

Well, it has finally been decided. The Fish and Wildlife concentration in the NRM department will be moved to the biological science department. This move itself isn't too bad since we will be treated relatively better by our "new" department than we were by our "old" department, but what really burns me is that our faculty will not be transferring with us and consequently no longer teach our courses. Our faculty have had personal, hands-on experience with state, federal and private agencies before coming here to Poly. Their experience has enabled them to instruct students in such a way so that we may gain valuable skills and insights into the management of natural resources, which prepares us for employment with these agencies.

Our university has, in effect, chosen it for me. I did not want a major that emphasized skills you seek you had better find for yourself. If you want those management skills you had better find for yourself. I wanted a major that emphasized what it promises in its catalog and not be disappointed that this university has in effect, chosen it for me. I've written this letter to vent my frustration, which I know as shared by others. Furthermore, I wish to inform those students just starting out in Fish and Wildlife that if you want those management skills you seek you had better find another school because those skills will not be taught here anymore.

**ASLI Update**

The Science and Math Student Council is currently accepting applications for Student Senator for the 1984-85 school year. Prospective senators should have a cumulative grade point average of 2.3 or above. Applicants should be able to attend senate meetings at 7 p.m. on Wednesdays, Monday night workshops and Science and Math Council meetings. Applications are available in the ASI office, Room 217A of the University Union.

Also, the ASI Finance Committee will be interviewing students Monday, Oct. 16 at 7 p.m. in U.U. Room 220. There are vacancies for the following schools: Agriculture, Professional Studies and Education, Science and Math, and Business.

**ASI Films - A Program Board Member**

You'll laugh, cry, care, and you'll come to terms.

**LASA meets**

The Latin American Student Association (LASA) is presenting different events today from noon to 6 p.m. in the University Union, Room 226. Christine Marchant, foreign language professor, will be speaking on cultural events in Central America.

Admission is free to the activities and everyone is invited to stop by.

The LASA will also be holding an organizational meeting at 5 p.m. Tuesday, Oct. 16 in the Agriculture Building, Room 226.

Must win weekend
Men play two games

The post-season plans of the men's soccer team ride on Saturday night. If Cal Poly hopes to enter the NCAA playoffs, said its coach, they will have to beat the No. 1 team in the western region, Cal State-Los Angeles.

Having to Saturday, 7:30 p.m. in Mustang Stadium isn't enough. Cal Poly will also face the University of the Pacific on Sunday, 3:00 p.m. in Mustang Stadium.

"We can't lose any game to anyone," said Wolfgang Gartner. "If we get by LA State, then we have a legitimate chance."

Two teams from the western region are picked for the NCAA playoffs, and with the competition in the West, Gartner said Poly will have to win league.

After a slow start, Cal Poly has won its past four games, improving its league record to 3-2-1. "If we can beat this team," said forward and team scoring leader Jeff Mayer, "we have a great shot at winning league."

The key for the Mustangs Saturday night will be defense, said Gartner. Poly has not been shut-out and has scored only nine goals this season with three home runs. Jeff Meyers said the pre-season record is misleading.

A "real tough preseason," said sophomore Meyers. "We took on the best right away. The advantage of having a scholarship program, said Gartner, is programs can prevail.

The soccer team has drawn 600 to 700 people for games, said Gartner. The soccer team must compete with the No. 1 rated volleyball team for attendance.

"I'm happy with it, considering we get no pre-game publicity," said Meyers. "We're no pre-game publicity."

Lollar uses arm and bat

There seems to be as much interest in what Tim Lollar can do with a bat as in what he can do with a bat.

Because of San Diego's lack of depth in designated hitter, Lollar, the Padres' left-handed starting pitcher in Game Three of the World Series, faces the unusual position of hitting for himself against Mike Wilcox and Detroit on Friday night in Tiger Stadium. Such a decision by Manager Dick Williams might mean Lollar's depth at designated hitter, Lollar, has a batting order with three home runs and 15 RBI.

The 'key for the Mustangs any game to anyone," said Wolfgang Gartner. "If we get by LA State, then we have a legitimate chance."

Poly hopes to trample Vikings

No. 1 defense

By ROSEMARY COSTANZO

Maybe it never rains in California but the same is never said about Portland, where Cal Poly will meet Portland State Saturday in their second Western Football Conference game.

Mustang head coach Jim Sanderson has called the Vikings the most improved team in the Western Football Conference this year. They are big and strong on both sides of the ball. They throw the ball all over the park," said Sanderson.

The Vikings will be led by quarterback Terry Sumrfield who has completed 122 passes at 7.0 touchdowns. He has throw 13 interceptions.

With the Mustangs leading the Westerners in passing defense and scoring defense and Portland State leading in total offense and scoring offense, the battle lines are drawn for this match-up.

Quarterback Jeff Byars throwing during practice. The Mustangs have struggled offensively and have relied on defense to keep them in games.

**FOOTBALL**

From page 5.

for the first touchdown of the game - with just under four minutes remaining in the third quarter. Herzoff brought the score to 7-3 with his eighth successful point after attempt of the season.

Mustang punter Kevin Emigh, a sophomore from Walnut Grove, booted the ball deep into Bronco territory several times to help keep Santa Clara out of scoring position.

His best kick of the night traveled 64 yards and left the Broncos scrambling on their 1 yard line. The Bronco offense came back strong after the Cal Poly touchdown. Just six seconds into the fourth quarter Santa Clara’s Vaughn scored on a 10-yard quarterback keeper to put his team back on top.

The kick by Doug Davidovich was good, bringing the score to 10-7.

The Broncos held onto the lead until late in the fourth quarter when Keckin scored with his run around the left end.

A strong defensive play by quick tackle Steve Gibson in the fourth quarter helped keep the Broncos down.

Mustang left corner back Greg Thompson picked off a Bronco desperation pass with less than 30 seconds remaining for the only interception against Vaughn.

The Mustangs gave away 80 yards with 10 penalties. The Broncos also had their share of illegal action in the form of 5 penalties worth 45 yards.

The Mustangs gained 17 first downs to the Bronco 15 and Cal Poly racked up 100 yards on the ground in 71 carries.

Mustang fullback Joey Kolina gained 93 yards on 15 carries. Keckin completed five of his ten attempts for 87 yards. He threw one touchdown pass.

The Mustang defense held the Broncos to 288 yards on total offense; 124 on the ground and 164 in the air.

The Cal Poly receiving corp was led by wide receiver Clarence Martin who snagged 5 receptions for 94 yards. Wide receiver Sheldon Moore caught 2 passes for 23 yards and tight end Damone Johnson grabbed 2 for 15 yards. The Mustangs caught a total of 166 yards in passes.

For the second consecutive week the Defensive Player-of-the-Week in the WFC was a Cal Poly player. The honor went to defensive end John Cummins. Cummins had eight tackles, five solo, including two quarterback sacks for losses of 14 yards.

The Mustangs homecoming takes place next week when they host Cal State Northridge.
Get to the answers faster. With the TI-55-II.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions - more functions than a simple slide-rule calculator has. You can work faster and more accurately with the TI-55-II, because it's preprogrammed to perform complex calculations - like definite integrals, linear regression and hyperbolics - at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula.

Included is the Calculator Decision-Making Sourcebook. It makes the process of using the TI-55-II even simpler, and shows you how to use all the power of the calculator. Get to the answers faster. Let a TI-55-II show you how.
