Xerox grants Poly $1 million in computers

By ROSEMARY COSTANZO
Staff Writer

The School of Engineering will be receiving over $1 million in state-of-the-art computers from the Xerox Corporation. "We are most appreciative of this substantial grant from Xerox because it will make it possible for the faculty and students of our computer science department to use state-of-the-art hardware and software in their coursework," said Cal Poly President Warren Baker.

One of the few ways we can obtain the computer systems needed to maintain the necessary margin of excellence in these programs is through the assistance of our friends in industry," he said.

Cal Poly is among 13 universities in the United States and England to receive a grant for computer hardware, software and services from Xerox.

Carl Wayne, University Grant Manager for the Xerox Corporation, explains the implications of a gift to the university. The computer equipment donated to Cal Poly, one of 13 schools in the United States and England to receive the state-of-the-art system, amounts to over $1 million.

Cornell University, Princeton, Cambridge, and the Massachusetts Institute of Technology are among the other schools receiving grants. The names of all the schools will be released next week through a national press conference.

The grant includes 25 of the newest, high-performance computer workstations in the Xerox inventory. In addition to the hardware systems, the grants includes extensive software programs and documentation, as well as installation and training for faculty and staff who will be working with the Xerox system.

Dean of the School of Engineering, Dr. Duane Bruley, said the new system will be installed in the department's Computer Systems Laboratory and should be ready for use in Spring Quarter courses.

Bruley said the system will be used for instruction in software development and engineering; telecommunications representatives, systems and hardware architecture. Students and faculty will be using the Xerox system for research projects in those areas.

"As a few days to get this grant as a tremendous step forward for Cal Poly," Bruley said.

He added that the attainment of this grant was the result of the team effort of officials of the university and Xerox.

Xerox vice president and regional manager, Gilbert Scott, said that his firm's grants to the 13 universities are the first large scale grants Xerox has made in the field of computer programming systems and networks.

We count heavily on Cal Poly and the other computer and engineering schools to provide a continuous supply of well-prepared computer scientists and engineers for our research and development activities," Scott said.

This grant will help assure us that the young people who come to us over the next several years and the universities will be familiar with our firm's computer and software systems.

"One of our objectives is to bring computer science education to the marketplace," said Scott.

"Recruiting at Cal Poly is a fundamental that we hope to understand our product, as well as assist students' learning. We want to extend our extension of our corporation's commitment to the community and to the students," said Scott.

Carl Wayne, the Xerox manager for the university grant program, said Cal Poly is one of the largest sources of hiring for Xerox's Park Center and Palo Alto area. Wayne said that grants such as this one will produce attractive graduates to the computer industry by recycling at Cal Poly we're confident that we're getting the best of the best in our Xerox.

Professor Neil Waldy of the computer science department described the Xerox system as the grandfather of Apple computers.

This system is viewed as outstanding. It will enable us to provide our students with state of the art education. It will be used on the computer, in Japanese.

Included in the package are peripheral computing systems that will provide the file management, laser printing, and communications capability needed to combine the workstations into an interactive network.

Student poll reversed

Faculty backs Mondale in presidential race

By LISA MCKINNON
Staff Writer

In a complete reversal of the results of the student presidential poll published in the Mustang Daily on Friday, 62 percent of the Cal Poly students who are registered to vote will support Walter Mondale in the presidential election tomorrow, according to a separate poll conducted by the Daily.

Thirty-five percent of the faculty who responded to the poll said they intend to vote for Ronald Reagan, and two percent said they were not registered to vote.

In contrast, 60 percent of Cal Poly students who are registered to vote and who participated in the student poll said they would support Reagan, while 26 percent said they would vote for Mondale. The Washington area. Wayne said that "the only sane choice, or at least the

decisions," added a Democrat Professorial Studies and Education professor who has crossed party lines. "Mondale is a wimp — a true politician. Ferraro has no idea what reality is. She sounds like an eternal idealist."

Fourty-two percent of the respondents were in the 25-35 age group, and 66 percent of them said they support Mondale. The majority of the 25-35 age group representing 15 percent of the poll, and the 46-55 age group (26 percent), also said they would vote for the Democratic ticket.

Reagan got a foot in the door with the 56 and over age category which favored him at 54 percent. Registered Democrats made up most of the respondents at 54 percent. Registered Republicans accounted for another 36 percent, and ten percent listed themselves as independents.

The Republican Party's earlier prediction that hordes of Democrats would cross party lines to vote for the Republican ticket this year apparently did not apply to the faculty at Cal Poly, according to poll results.

Only three Democrats said they were jumping ship to vote for Reagan. In fact, more Republicans (five) are going to vote for the Democratic platform than vice versa.

Meanwhile, 75 percent of the independents said they favor Mondale. "I'm voting for Mondale because of the budget deficit, " one said. "I can't afford Mondale."

Supporters of Reagan who participated in the poll, and 45 percent of them said they intend to vote for Mondale. All seven of the university's schools were included in the poll.

While some schools have more faculty members than other definite polarities developed in terms of who the majority of a particular school supported.

The School of Communicative Arts and Humanities backed Mondale by nearly 90 percent, for example. The School of Agriculture and Natural Resources said they would vote for Reagan.

An assistant professor from that school said they want an extension of Reagan because of the candidate's "Godly principles."

Another said simply, "I can't afford Mondale."

Supporters of Reagan who participated in the poll, and 57 percent of those mentioned that theirs was, "the only sane choice, at least the lesser of evils."

The first word that comes to the mind of the average student when Like all students, these fraternity and sorority members have!
Professor dies of heart attack

By MICHAEL MARTER
Staff Writer

There seems to be one in each department — a professor students consider their friend, a professor they continue to consult after they have finished his classes. The engineering technology department has lost theirs. Professor Robert K. Janeway died of a heart attack Oct. 28. He was 59.

"When you went to his office hour, you could ask him about anything — you didn't even have to have him for an instructor," said Jose Marquina, a student in a communications systems lab formerly taught by Janeway.

Students in the lab said they were shocked by his death. "It took us a while to accept the reality of it," said David Knab.

"He was probably one of the most understanding teachers in the department," said Pat Rodriguez. "He is just going to be irreplaceable."

After serving in the Navy during World War II, Janeway attended Cal Poly and received a bachelor's degree in electronic engineering in 1951. He returned to Cal Poly to teach in 1972 after a career in private industry. He also earned a master's degree in electronic engineering in 1973.

Janeway was active in a number of activities, both on and off campus. In addition to chairing many engineering technology department committees, he also served on the campus-wide commencement and curriculum committees. He was a member of the board of directors of the Montecito-Whitney Corp., a local electronics firm. Janeway was an officer in the local chapter of the California Society of Professional Engineers and was active at the state level as well. He also served on the advisory committee to the Cuesta College electronics program.

Bill Backer, engineering technology department head, said the death of Janeway was a great loss to the department and Cal Poly. "You lose the experience, you lose the know-how and you have to replace that with junior people," said Backer. "I really didn't realize how important he was."

Janeway had planned that Janeway played a key role in formulating the curriculum of upper-division communications systems classes and labs. Backer said replacing Janeway with someone of similar experience and ability will be difficult. The department has been advertising for a professor to fill a vacancy created two years ago and has yet to find a suitable applicant, he said.

A memorial fund is being organized by the Cal Poly Foundation in honor of Professor Janeway. Backer explained that he would like to see the fund evolve into a memorial scholarship. Anyone wishing to donate to the Robert K. Janeway Memorial Fund may do so through the Foundation.

Janeway's office-mate and fellow engineering technology Professor Mike Hawes said Janeway was "tremendously enthusiastic and cooperative and always ready to do extra work. They had shared an office since 1976. Hawes said he felt "a genuine sense of loss among students" and that "their turnout at the funeral service yesterday (Wed. Oct. 31) is a genuine indication of the respect and regard that was Bob's."

"Bob had a rapport with the students and faculty and the administration that was excellent — he was one super guy," said department head Backer.

Professor Mike Hawes said Janeway was "tremendously enthusiastic and cooperative and always ready to do extra work. They had shared an office since 1976. Police Bulletin

A trailer hitch was stolen Thursday, Nov. 1, from a car parked in the R2 residence hall parking lot, according to Cal Poly police reports.

The trailer hitch, which was attached to a 1984 Ford, was reported stolen at 11:25 a.m. by Investigator Ray Berrett.

Estimated value of the trailer hitch was $300.

Thief gets away in police chase

A thief who broke into a car and fled police in a stolen car was caught by police Friday morning after a police chase.

Sgt. Peter Deegan said police received a call at 1:20 a.m. Friday from a man near the South Campus Road who said he was being followed by a vehicle.

Deegan said police followed the vehicle, a 1980 Ford Mustang, to the R2 residence hall parking lot, where the car was caught by police.

Estimated value of the car was $3,000.

Police are trying to determine how the car was stolen.

Knickers姿态

El Corral will offer Jansport's Fall fashion line of outdoor wear. Already known for quality outdoor equipment, the line offers both style and quality at an affordable price. A great selection of men's and ladies' sweaters, jackets, and fleece, all in the latest fashion colors.

Thank you

The family of Robert K. Janeway wishes to acknowledge the kindnesses shown during their recent bereavement. The many flowers, contributions to the memorial scholarship fund at Cal Poly, cards, food and expressions of regard that was Bob's."

FACULTY OPINION POLL
From page 1

"Reagan is the lesser of two evils and he seems to have a better grasp of the country's needs at this time," wrote one 56 and over Humanities professor. "Mondale is not much to non-Americans and, non-wealthy policies, therefore, are detrimental wealthy American," countered a

Several respondents expressed concern over Mondale's possible choices for cabinet and Supreme Court appointments if he is re-elected. The assumption is that because many of the Supreme Court justices are up, Reagan will be able to appoint a majority of ultra-conservative replacements during a second term. Rather than worry over what may happen in the future, however, many faculty are looking back on Reagan's record and they like what they see.

For one Reagan supporter it is Mondale's "background" that is objectionable. "Mondale is not qualified for the job and he is not over-committed to so many organizations, unions, etc. for endorsements that he couldn't function in an intelligent way," said a Republican engineering professor.

Skill, there are others who look back with trepidation at Reagan's actions as both governor of California and president of the United States. Said one professor, "No one who remembers what Reagan did to the California State Universities could possibly support him. He is shallow, does not know enough, and will say anything to get elected. I think he has perpetrated the major political deception of our time."

As happened with the student poll, the faculty made comments both about the qualifications of the candidates and their apparent personalities.

While Reagan's supporters touted him as, "the best one!" and berated Mondale for his "wishiness," Mondale's backers replied in kind by listing their candidate's virtues and going for Reagan's judgial.

"Reagan is an actor with an oversimplified view of how the government operates," said a Republican Mondale supporter.

"Mondale has integrity, a real league added, "Reagan is the opium of the people."

 Assisting in the poll were poll writers Kim Miller, Leanne Alberta and Brenda Black.

WHAT'S MORE IMPORTANT
AN OLD JOKES ABOUT THE
PRESIDENT'S AGE?
OR THE REALITIES OF THE
NUCLEAR ARMS RACE?

In the second debate President Reagan glossed over the main issue of the evening with an old joke about his age. But there is no glossing over of the facts.

1. We have 11,000 nuclear weapons aimed at the USSR. They have 10,000 aimed at us.
2. As few as 500 nuclear explosions could trigger a "nuclear winter" that would destroy the basis of life as we know it.
3. The 400-800 billion "star wars" defense scheme proposed by Mr. Reagan is judged by most experts as too easy for the USSR to side step with relatively minor adjustments in their offensive weapons systems, the same as happened to the French with the Maginot line at the beginning of World War II.
4. The most likely accomplishment of spending 400-800 billion dollars is that the hair trigger on nuclear malfunction or personnel error by either side. Any computer science student can testify to the likely occurrence in complex systems of computer malfunction.

WOULD YOU TRUST YOUR LIFE TO A RUSSIAN COMPUTER?

In contrast Walter Mondale would pursue equitable and verifiable arms control agreements that would protect the security interests of both the US and the USSR.

Concerned University Students Faculty and Staff
P.O. Box 1664 San Luis Obispo, California 93406

It is possible to end the nuclear arms race if we and the Soviets can agree to work cooperatively for mutual security. Ending the arms race could provide for a stable deterrence for both the US and the USSR at significantly reduced levels of nuclear armament, and it would avoid the waste of resources that will otherwise be spent on new weapons systems.

Most importantly it would enhance the likelihood for life and civilization to continue on this planet. Vote for Mondale and Ferraro.

There are no glosses to the facts.
Women lose two come away with heads held high

by JILL PERRY

Scores are not always the best indicators of the winners of a game. If a team comes out ahead of the pack in every aspect, but has no pride in the performance, the win means nothing. The Cal Poly women's volleyball team won the National Invitational Volleyball Tournament at UCLA last weekend in terms of its performance, not score.

"This is the first time I can recall that we got this far in the quarterfinals and walked out of there without our tails between our legs. Our tails and heads were up this time," coach Mike Wilson said after his team's busy weekend.

The No. 3-ranked spikers came out of their fifth tournament with three wins and two losses, pulling the team's season record to 27-5. Wilson expects to raise that to 30 wins this weekend when the Mustangs will play three home games. The competition begins Thursday with a match against U.C. Irvine after the spikers beat Irvine last Thursday in three straight, then the University of Nevada at Las Vegas will travel to Cal Poly for a match Friday and please see SPIKERS, page 7.
**Mustangs come up short**

By ROSEMARY COSTANZO

It was a typical Cal Poly/Boise State matchup, right down to the last second.

A desperation bomb with two seconds remaining in the game went from the arm of Mustang quarterback Jeff Byars and right off the fingertips of Damone Johnson who was standing in the corner of the endzone. This incomplete pass ended the game in a Boise state victory, 14-10.

"I'm sure proud of our kids, I think they played like hell," said Mustang head coach, Jim Sanderson. "Boise State is by far the most physical team we've played so far.

Boise State rusher Jon Francis brings the ball into the endzone on the next play. Boise running back Jon Francis breaks into the endzone for a touchdown on the fourth down with six yards to go in the third quarter.

The Mustangs lost their 10-0 lead in the third period with a punt block by the Boise coaches this time. The first time all night the Mustangs reversed the decision, said Sanderson.

They reversed the decision. Sanderson. Then another call took the Broncos out of punt formation and gave them the ball. A Mustang was called for roughing the kicker, Sanderson said after the ball was placed a Mustang player blocked the kicker, which is legal. "Had he clipped him or hit him in the face I could see the call. But there was nothing violent about it. At that time in the game it was really a tacky thing. The play went from a punt to their ball and of course they run the clock out.

Boise State quarterback Hazen Choates planted a 15 yard pass into the hands of receiver Tony Hunter for the Broncos' second touchdown of the game. The kick was good and Boise State went up 14-10. And that's the way the game ended.

Boise quarterback Choates has a great night throwing though, he completed 14 of his 19 attempts with no interceptions, Byars threw one interception and completed 11 of 29.

Boise fumbled five times, losing possession twice. The Mustangs also lost two of their three fumbles. Cal Poly racked up five penalties, giving Boise 31 yards, while Boise gave up 57 yards in seven penalties.

The Mustangs were the 1980 Conference champions, the true opportunity for us to win the football game." I'm sure proud of our kids, I think they played like hell," said Mustang head coach, Jim Sanderson. "Boise State is by far the most physical team we've played so far.

Boise quarterback Choates has a great night throwing though, he completed 14 of his 19 attempts with no interceptions, Byars threw one interception and completed 11 of 29.

Boise fumbled five times, losing possession twice. The Mustangs also lost two of their three fumbles. Cal Poly racked up five penalties, giving Boise 31 yards, while Boise gave up 57 yards in seven penalties.

The kick by Boise Larry Hunter was good to cap off the 75 yard drive on 9 plays. The score at half-time was 10-7.

**Spikers**

from page 5

the UCSB Gauchos will play here Saturday night at 9. The Thursday and Friday games begin at 7:30 p.m. and there is no cost to students with valid ASI cards.

Last weekend’s tournament began with three wins, the most significant of which was against the menacing Brigham Young, 15-13 and 15-14. Prior to the match Friday, Poly and BYU had played twice, the Mustangs took the first game at the San Diego Tournament and BYU won in its home court in Provo, Oct. 19.

The BYU match was not a high point of the tourney, however, as the spikers’ season-long concentration problem was accentuated. “We played worse than we did when we were in Provo. Fortunately, they played worse than us. We just toughed them out.” Wilton said.

The other two wins came against the Lamar Cardinals from Texas, 15-5 and 15-10 and U.C. Northridge, 15-7 and 15-1, also on Friday. Then Saturday the Mustangs met up with the USC Trojans who are consistently ranked among the top two of the Tachikara and NCAA volleyball polls and who suffered their first loss of the season from Cal Poly back in September.

The first game was extremely close 15-14 and the competition was fierce, but moving into the second and third games something happened on the Mustang side of the court. Serving became an unbelievable barrier as the spikers missed 15 serves to the Trojans and USC took the chance to wrap up the match with two wins at 9-15 and 9-15. The difficulties could have resulted from crowding on the floor of Pauley Pavilion, which was divided into four courts, leaving little room for servers who normally serve far behind the service line.

It was a pretty good match and at times we played real well, but somewhere in the third game we started missing serves and that caused us to lose our confidence,” Wilton said. “Serving is the single most important factor and it just shows we were not focusing on the game.”

The Mustangs were then runners up in a pool which a UCLA sports information director described as one of the toughest in the tournament. Since they came in second, they were pitted against the winner of the adjacent pool, which was the University of the Pacific.

Fourth-ranked UOP was ap-

Ellen Bugalski battles at the net in an earlier match. Bugalski and teammates came way from the weekend National Invitational Volleyball Tournament with a 3-2 record.

Currently seeking revenge as it took time in disposing of Poly in two games straight 15-11 and 15-12, Wilton attributes the loss to a lack of consistency. “UOP just played at a steadier rate than we did, we need to become a steadier ball club,” Wilton noted. “We’re going to have to stop relying on what I call our great heart.”

UOP continued its steady playing to become the tournament champions, as they beat Hawaii in the semifinals, 15-8, 15-15 and 15-3, gave up one game to USC, but took charge in the next two games, 10-16, 16-16 and 15-3.

Wilton had praise for those players he thought gave superior performances last weekend, including middle hitter Carol Tschasar, “She really played well. She really made her presence known and came of age this weekend,” he said. He also noted that outside hitter Kelly Strand and setter Dede Bodnar made exceptional contributions in the tourney, “In the two tough matches against USC and UOP they really shined.”
