Vice provost turns in resignation to Baker

By KEVIN H. FOX

The third highest-ranking Cal Poly administrator turned in his resignation last week to Cal Poly President Warren Baker. Vice Provost Malcolm Wilson will continue in his post until August, 1985 at which time he will look for new challenges.

"I'll miss many aspects of my job," said Wilson. "Every ten years I need a new challenge to grow with," he said.

Wieson has been with Cal Poly for 18 years -- the last 10 in administration. He has held a variety of positions ranging from administrative assistant to the associate dean of life, to student affairs, and finally to being named vice provost.

Academic planning, admissions, records offices and educational services are only a few of the areas of the university that Wilson is responsible for as vice provost. He said he will miss working efficiently and well within the complex California State Universi-

ty system. I will miss our personal associations, but decisions like these are part of normal decisions," he said.

Wilson said his plans are not set but said he may want to stay on with the university in some role. He said that job possibilities already exist and he will take his time in deciding what do next.

Looking back on his years at Cal Poly, he said the biggest change he has seen during his time on the job is that "the university has become the city.

"Our growth has brought us to the crossroads and we must now look carefully to the future," he said.

"This is a very popular campus and we have a good reputation. We have to determine when that repu-

tation is gained and where it came from," Wilson noted.

He said he hopes Cal Poly won't become an elitist institution. He said he feels that Cal Poly is in good hands to guide it after he leaves.

Ordinance fair to all

Mayor says noise rules are not anti-student

By GREGG SCHROEDER

The proposed city noise ordi-

nance is not just addressed to stu-

dents, but also to commercial and

vehicular noise problems, the mayor of San Luis Obispo said in a recent interview.

"The natures of the hills bounce sound back," Billig said. "It seems like certain in-

dividuals want to assume the city is an campus. We want to par-

ticipate in activities on campus. We do not think it's over either. "

"I think police (in San Luis Obispo) are known by students to be fair," Billig said.

Billig also commented on people being able to get waivers to the noise ordinance for special events.

"This is part of the humane aspect of the ordinance," Billig said. "We never want to make a law like a straight jacket.

Jeffrey Hunt, co-chairman of the Cal Poly Historical Society for Mondale-Ferraro, said he doesn't believe that Mondale's stance on affirmative action is ten years away from being even open, despite opinion polls that are now putting President Reagan in the lead.

"I don't necessarily believe in affirmative action's being a personal and moral one," said Perry. "The feel-

ing is that there is a doubt as to the future of the United States. And unemployment just seems right now will really reduce their cost in the long run.

Perry added, "I think students are supporting Reagan because of the economic recovery the nation has seen under his administration as opposed to the high inflation of the Carter-Mondale term. Students don't want to know that when they go out in the job market, they will have jobs available to them and be able to provide for a family they hope to have." Perry said that students want the stable economy the Reagan administration can provide.

"I don't think that the economic picture is as rosey as a lot of Republican candidates are painting it. The deficit is the highest, we've ever had in the history of the United States. Unemployment just isn't as low as it's claimed to be," Hunt said.

Hunt said that students shouldn't be concerned about Mondale's tax increase. "If you look at the structure of Mondale's tax increase, the main bracket of the taxes to be increased are for people making over $25,000 and students don't think any student coming out of Cal Poly or any university is going to be in that bracket.

On the issue of abortion, Hunt said that there appears to be a conflict between Reagan's stance and the students opposition to abortion. "Students are opposed to Reagan's view not strictly because it is to the government telling them what to do, but because abortion is a personal, moral, issue and government doesn't have the right to intrude on it." Perry said that abortion is the issue that many people have raised to be in the election so far.

"The question of abortion is not a religious question as much as it is a moral one," said Perry. "The feel-

ing is that there is a doubt as to when life begins. The benefit of this doubt should go to the unborn. The rights of the constitution should be afforded to those who are not yet born, and the president's view on abortion is to protect the unborn."

Perry said that the young people of America will re-elect Ronald Reagan because of Mondale's connection with the university and his ability to see right and wrong within the complex California State Universi-

ty system. I will miss our personal associations, but decisions like these are part of normal decisions," he said.

Wilson said his plans are not set but said he may want to stay on with the university in some role. He said that job possibilities already exist and he will take his time in deciding what do next.

Looking back on his years at Cal Poly, he said the biggest change he has seen during his time on the job is that "the university has become the city.

"Our growth has brought us to the crossroads and we must now look carefully to the future," he said.

"This is a very popular campus and we have a good reputation. We have to determine when that repu-

tation is gained and where it came from," Wilson noted.

He said he hopes Cal Poly won't become an elitist institution. He said he feels that Cal Poly is in good hands to guide it after he leaves.

Cal Poly students back candidates on TV

By ROSEMARY COSTANZO

Tonight the United States will know who will be president for the next four years.

Student leaders of the two major political parties appeared on NBC's tele-

vision backing their candidates on Saturday. The last weekend be-

fore the 1984 election.

Brian Perry, the San Luis Obispo Reagan Bush youth chairman, doesn't think it's over either. "I don't necessarily believe in affirmative action," he said. "We are doing very well administratively at Cal Poly. You are not taking into consideration what is going to happen in the next two years." Perry also supported Reagan decision on the deficit spending and issues involved in financing the national debt of the Reagan administration. He think that the short term gains we're seeing right now will really reduce their cost in the long run.

Perry added, "I think students are supporting Reagan because of the economic recovery the nation has seen under his administration as opposed to the high inflation of the Carter-Mondale term. Students don't want to know that when they go out in the job market, they will have jobs available to them and be able to provide for a family they hope to have." Perry said that students want the stable economy the Reagan administration can provide.

"I don't think that the economic picture is as rosey as a lot of Republican candidates are painting it. The deficit is the highest, we've ever had in the history of the United States. Unemployment just isn't as low as it's claimed to be," Hunt said.

Hunt said that students shouldn't be concerned about Mondale's tax increase. "If you look at the structure of Mondale's tax increase, the main bracket of the taxes to be increased are for people making over $25,000 and students don't think any student coming out of Cal Poly or any university is going to be in that bracket.

On the issue of abortion, Hunt said that there appears to be a conflict between Reagan's stance and the students opposition to abortion. "Students are opposed to Reagan's view not strictly because it is to the government telling them what to do, but because abortion is a personal, moral, issue and government doesn't have the right to intrude on it." Perry said that abortion is the issue that many people have raised to be in the election so far.

"The question of abortion is not a religious question as much as it is a moral one," said Perry. "The feeling is that there is a doubt as to when life begins. The benefit of this doubt should go to the unborn. The rights of the constitution should be afforded to those who are not yet born, and the president's view on abortion is to protect the unborn."

Perry said that the young people of America will re-elect Ronald Reagan because of Mondale's connection with the university and his ability to see right and wrong within the complex California State Universi-

ty system. I will miss our personal associations, but decisions like these are part of normal decisions," he said.

Wilson said his plans are not set but said he may want to stay on with the university in some role. He said that job possibilities already exist and he will take his time in deciding what do next.

Looking back on his years at Cal Poly, he said the biggest change he has seen during his time on the job is that "the university has become the city.

"Our growth has brought us to the crossroads and we must now look carefully to the future," he said.

"This is a very popular campus and we have a good reputation. We have to determine when that repu-

tation is gained and where it came from," Wilson noted.

He said he hopes Cal Poly won't become an elitist institution. He said he feels that Cal Poly is in good hands to guide it after he leaves.
The time is finally here. After all the campaigning, advertising and editorials on the presidential election, it is time for the people to go out and cast their vote.

I urge every registered student to do just that, vote for their choice for president of the United States, congressional and county leaders, and on the propositions.

In a student presidential poll conducted by the Daily, President Reagan won soundly over his challenger, another student. The faculty favored Democratic candidate Walter Mondale by 63 percent in another poll issued by the Daily.

Some polls have predicted that Reagan will sweep 47 or 48 states – possibly even all 50. Mondale has said, and keeps saying, that he won't listen to the polls, and that he can pull this election off.

What counts now is not what all the polls have been projecting, nor how the candidates fared on the televised debates, nor how many people showed up at Reagan’s and Mondale’s rallies...what counts now is how the people vote.

Some of the issues included on the ballot are Proposition 37, initiative for reapportionment. Congressional opponents of the 16th district, Leon Panetta and Patricia Smith Ramsey, have been involved in a heated campaign race and students’ votes can make an impact on who is elected to represent us in Congress.

Even if these issues don’t seem of interest now, students have to think beyond their college career to the world that they will be integrated into when they graduate.

Even if Reagan is slated for a landslide win, without the participation of the American voters, he could lose it all. Students can make a difference – the vote does count.

If students at Cal Poly and universities throughout the nation cast their ballots, their voice will be heard and have an impact on the election results. Students are the next generation of America’s leaders, and what they say matters.

Voting counts

What goes into the making of the president in 1984

The election polls are open from 7 a.m. to 8 p.m. today. There are polling places set up throughout San Luis Obispo, and punching holes in the piece of cardboard ballot only takes five minutes. In five minutes the election could be decided.

Let your voice count. Vote today.

Last Word.

The Mustang Daily encourages readers’ opinions, criticisms and comments on new stories, letters and editorials. Letters and press releases should be submitted at the Daily office in Room 226 of the Graphic Arts Building, or sent to Editor, Mustang Daily, GRC 226, Cal Poly, San Luis Obispo, CA 93407. Letters should be kept as short as possible, must be double space typed and must include the writers’ signatures and phone numbers. To ensure that they be considered for the next edition, letters should be submitted to the Daily office by 10 a.m. Letters reserve the right to edit letters for length and omit obnoxious statements. Press releases should be submitted to the Daily office at least a week before they should run. All releases must include phone numbers and names of the people or organizations involved, in case more information is needed. Unsigned editorials reflect the viewpoint of the Mustang Daily Editorial Board.

Disclaimer

Mustang Daily
The choice of the times is Mondale-Ferraro

Editor:
The choice that American voters will be called upon to make on Tuesday is probably the most important choice in the foreseeable future. The decision as to who will succeed our first-term President and how the nation will be administered will be a crucial issue. The choice will determine the future of the country.

The U.S. Supreme Court has ruled that the unborn child is not a living person, so anti-abortion activists are questioning the legality of abortion. However, the Court has not stated that abortion is illegal. The decision is based on the idea that the unborn child is not a living person, so it is not protected by the 14th Amendment.

Abortion is American Holocaust

Editor:
Abortion is an action done without thinking through the consequences. It is the responsibility of every citizen to oppose abortion. The decision of the Court has been based on the idea that the unborn child is not a living person, so it is not protected by the 14th Amendment.

Pro-Choice Assumptions

Editor:
Pro-choice assumptions have been based on the idea that the unborn child is not a living person, so it is not protected by the 14th Amendment. The decision of the Court has been based on the idea that the unborn child is not a living person, so it is not protected by the 14th Amendment.

Binded by license to kill

Editor:
I would like to respond to a letter printed in the Nov. 2 issue concerning abortion. First of all, if you are not pro-life, then you are pro-death or pro-abortion. The writer claims that this is not so, but can be explained by the lack of humanity in the arguments behind the myth of neutrality. You are believing a myth if you think that you can oppose abortion, against the destruction of life, without being pro-life or pro-abortion.

Licence to kill

Editor:
Every woman has their own set of morals, and acted according to them. This world would be a better place. You are free only when you live within the parameters of freedom, and your morals are only acceptable when they are also within these same parameters.

Prop. 39 alternative to irresponsibility

Editor:
Proposition 39 is the culmination of a six-year effort by the people of California to make the legislative districts in our state fair and competitive. In 1978, the voters of California passed Prop. 6 which directed the legislature to create fair districts in our state fair and competitive. In 1982, after the 1980 census, the voters rejected the districts by a margin of two-thirds majority with Proposition 39.

We're the best. Literally.

**Poly continuation rate highest**

**By ROSEMARY COSTANZO**

About half of the freshmen that begin their college career at Cal Poly will graduate here.

And Cal Poly has the highest continuation rate of the 19 schools in the California State University system.

According to statistical data on enrollment trends compiled by Tim Daniels, director of Institutional Research, 45.5 percent of first-time freshmen, followed through seven years at Cal Poly, graduated. An additional 9.8 percent transferred to another California State university and graduated, for a total undergraduate graduation rate of 55 percent.

The lowest continuation rate for the same seven years went to California State University in Sonoma, which had just over 18 percent of first-time freshmen graduate. About 10 percent transferred to other schools and graduated to bring its total continuation rate just under 30 percent.

Cal State Los Angeles graduated about 24 percent of its first-time freshmen, for the second lowest rate in the system.

This year there are just under 16,000 students attending Cal Poly—43 percent of the population. Just ten years ago, women accounted for only 28 percent of the enrollment.

Women outnumber men in 20 of the 61 majors offered at Cal Poly. There are two men majoring in home economics to 437 women. In the science-related majors women outnumber men in biological science, environmental and systematic biology and microbiology. There are also more women writers at Cal Poly: In the journalism department there are 178 women to 73 men. There are 53 women majoring in English, 104 women majoring in English, and 60 women majoring in agriculture women outnumber men in agriculture science, food science, and in diet and food administration.

Women make up 43 percent of recreation administration there are 16,000 students attending Cal Poly. There are 511 Mexican-Americans enrolled, and 284 who transferred to another California state university, for a total of 613 men. White students constitute about 60 percent of Cal Poly's population. Of the 11,986 enrolled at Cal Poly 938 are black, less than 1 percent. Women make up 43 percent of recreation administration there are 80 percent of first-time freshmen Men dominate all majors in the department of engineering and architecture. In architecture there are 696 men. There are 68,000 women enrollees in construction management to 106 men. In mechanical engineering there are 20 women to 101 men. There are 50 women majoring in mechanical and 593 men.

Supervisor 5th District

Friends and Voters:

Since my decision to run for Supervisor of the 5th District, I've had many experiences. Let me share some of my thoughts and experiences with you.

The residents of District Five have been gracious and friendly to me and my wife, Yvonne. We've met you at meetings, supermarkets and 'door to door' visiting. Your courtesy and interest have made this a rewarding experience. Win or lose I intend to continue friendships we've made during the campaign.

Many of you, from different interests and backgrounds, have expressed legitimate concerns. This has made me more aware of the diversity of viewpoints that exist. Campaigning and listening to you has confirmed the fact that all views must be heard and considered—taxpayers, county employees, students, seniors, renters, low officers—to name a few. You've taught me a great deal.

To my friends and supporters that worked for me in numbers that still surprise me—beyond and above the call of duty—I thank you. This kind of support is a humbling experience.

In this beautiful country and in our great free country, participation is the B est Sandwiches in Town Since 1969.

A Poly professor's research on diet and heart disease could change the way we think and eat.

By KIM MILLER

Diet is a major factor in the prevention of heart disease, and a Cal Poly professor is studying the correlation between fat intake and the occurrence of the nation's most lethal disease.

Dr. Mary Pedersen has spent the past year and a half here studying the body's fat metabolism process, and the effects of fat on the heart.

"I really think nutrition is the area to study from a health point of view," she said.

Pedersen hopes her research will lead to standard recommendations for fat intake. Presently the American Heart Association advises no more than 30 percent of a person's caloric intake be consumed from fat.

"Rats are the animal model we are using to study the heart muscle. A heart profusion system allows me to study the metabolism of fats by the heart," she said.

The rats are killed painlessly and their still-functioning hearts are connected to the heart profusion system, Pedersen explained.

"We are learning how fats are metabolized in the body. By understanding this, we can understand how to reduce the risks of heart disease," she said.

Darrell English, field coordinator for the American Heart Association, said 949,610 people died of heart disease last year. "But heart disease is on the decline because it is a choice of life-style," he said.

English explained there are two types of fat: cholesterol and unsaturated fats.

"Cholesterol is found in animal fat, foods like milk, fatty meats, butter and cream," he said.

Cholesterol forms a plaque throughout the cardiovascular system, building up over the years to form arteriosclerosis, known as "hardening of the arteries." Diet and exercise prevents this build-up, he said.

A condition of arteriosclerosis can lead to a heart attack. The American Heart Association lists this condition, as well as hereditary factors, smoking and high blood pressure as one of the leading factors in the prevention of heart disease, said English.

He added that heart disease killed more people last year than all other causes of death combined.

"By eliminating or decreasing these factors, people decrease the chances of getting heart disease," Pedersen said.

Dr. David L. Ivans said a lot of research has already been done in this area, although he said "certainly not all of the issues are settled."

Ivans said the increased awareness of health issues is playing a role in the reduction of heart disease in the last several years.

"Nutrition represents one of the major areas of preventive medicine," he added.

Pedersen's interest in nutrition for the prevention of disease began while she studied biology as an undergraduate at the University of California at Santa Barbara, where she graduated in 1973.

She continued her studies at the University of California at Los Angeles studying nutrition with a lipid biochemistry minor. Pedersen received her Ph.D in 1980.

The National Institute of Health provided her with a fellowship to work on postdoctorate work on the subject of arteriosclerosis.

Pedersen began teaching dietetics, methods of teaching nutrition, senior projects and graduate students in 1981.

She said students who want to get involved in the research should contact the child development/home economics department.
By Karen Kraemer

The Cal Poly women's cross country runners captured the individual and team titles at the NCAA Western Region Championship last Saturday.

Senior Robyn Root lead the tight pack of Mustangs across the Riverside finish line, securing the individual title. Poly finished five runners in the top eight places.

By recording a 16:57 for the 5000 meter course, Root ran, according to Coach Harter, "a perfect race to continue a super season." Reported throughout the season as the most consistent Mustang runner, Root has scored in every outing for the Mustangs.

"Robyn continues to improve each week and capped off the race with not only a personal best time but also a strong finish," said Harter.

Despite a passing cold between five of the seven Poly runners, the Mustangs finished the race with one second between the first and fifth scores.

Sophomore Katy Manning, who has consistently been in the top three in every competition, finished second (16:57). Converted middle distance runner, Jill Ellingson, finished fourth overall, third for the Mustangs with a time of 17:14. Fourth and fifth for Poly were Jennifer Dunn, fifth overall in 17:19 and Lori Lopez (eighth) overall in 17:22.

"Many feel that Jennifer cannot compete to her maximum when the pressure is on, but after today she removed all doubts," said Harter.

"Prior to the race, we agreed that Jennifer needed to place in the top two with either Romany or Manning to give us the right to move on. We pulled it off for home and moved up to place fifth overall," said Harter.

"We had about five not only finishing first in the regionals but also a strong finish," said Harter. "Robyn continues to improve each week and capped off the race with not only a personal best time but also a strong finish," said Harter.

"Despite a passing cold between five of the seven Poly runners, the Mustangs finished the race with one second between the first and fifth scores.

The Poly runners will be looking for their third consecutive national title in Jackson, Mississippi on November 11. Saturday's finish is Poly's fourth straight western regional title.

Fraternities start football playoffs

By MICHAEL STUMP

Alpha Upsilon and Alpha Sigma fraternity football teams have made it to the top of their leagues in Inter-Fraternity football; both teams were undefeated with 4-0 records in regular league play.

Delta Tau and Delta Sigma Phi took second in the two leagues. Both teams finished with 3-1 records. The playoffs will be Nov. 18 and will match Alpha Upsilon and Sigma Phi against Delta Sigma Phi at 10:30 a.m. and Alpha Sigma against Delta Tau at noon.

Alpha Sigma has one of the best last two years, according to Dennis Leun, who plays defensive end and guard.

"If we win again, we get to keep it," he said. "If a fraternity wins any sport three years in a row they get to keep it.

Leun contributes the success of the team to a lot of luck and a lot of talent.

"We have been playing like the 49ers played last game," he said referring to the way they pulled off a win against the Cincinnati Bengals in the last minutes. "We're going to have to get out heads together because there are some really tough teams.

Leun said football is not the only sport Alpha Sigma achieves at. "We are socially, athletic minded. We want to win.

Alpha Upsilon Coach Bob Grits, said they put a lot of emphasis on football. "It's an opportunity to work together and do something productive." He said it has been a long time tradition in their fraternity.

Many people on the team are football knowledgeable, said Griffin. We have a lot of organized players. I played four years in high school. We have four or five players have played for Cal Poly and other junior colleges.

The end of regular season results for League I are: 1st, Alpha Sigma Angeles; 2nd, Delta Tau; 3rd, Lambda Chi; 4th, Alpha Epsilon Pi; 5th, Phi Sigma.

The results for League II are: 1st, Alpha Sigma Angeles; 2nd, Delta Tau; 3rd, Lambda Chi; 4th, Alpha Epsilon Pi.

The playoffs will be Nov. 18 and will match Alpha Upsilon and Sigma Phi against Delta Sigma Phi at 10:30 a.m. and Alpha Sigma against Delta Tau at noon.

Harriers run sick, but still qualify

By KIM MILLER
Staff Writer

Despite illness, the men’s cross country team ran well enough at the regional meet at UC Riverside last weekend to qualify for the upcoming national competition.

Although the seven-member team ran without the benefit of Dave Livingston, the team placed third behind UC Riverside and UC Davis.

On November 17, the top three teams from the western region will travel to Clinton, MS, for the national cross-country race. Kevin Jones placed second overall, first for the Mustangs, in the 10-kilometer course with a time of 30:46.05. Jones will be competing for a spot on the All-American team at the meet.

Brent Griffiths finished seventh at 31:12.06 over a course the team ran without the benefit of Sean Crowley. Griffiths was forced to edge out a racer from Portland State.

The team had a two week rest to prepare for the national meet. Some of the racers like to travel to important meets, although some runners find the break in routine to be a hindrance to their racing abilities.

The CCAA conference is considered to be the dominate factor in the national competition, but the meet will display the talents of the finest runners in Division II college competition today.
