City noise ordinance goes to vote February

By T. WILLIAMS

A proposed noise control ordi­nance of San Luis Obispo is one step away from becoming a law.

Tuesday night, the City Coun­cil voted to introduce the pro­posed ordinance to print. That means that between now and the next council meeting on Feb. 5, the ordinance, or a synopsis of it, must be printed in the mass media for public review at least five days before the meeting.

Then, at the next meeting, there will be another public hear­ing and the council will vote on the ordinance.

Mayor Melanie Billig added two provisions to the ordinance that passed on Tuesday night.

The two provisions were that the noise-decibel limit report on a six-month, informal basis and that the report be reproduced after one year.

Chief Roger L. Neuman added, in favor of the ordinance and said that fairness and equality are what are we seeking. “That is our purpose,” he said.

The purpose of the ordinance is “to preserve the quality of life in the community that we all moved here for,” Neuman said.

Police Chief Roger L. Neuman promised that if the ordinance is approved the police department will do their best to enforce it fairly.

“The people have to trust the police department,” he said. “We will enforce the ordinance in a fair and courteous manner — I’ll stake my reputation on that.”

Neuman said the current noise ordinance, based on a warning system, was working but it lacks objectivity. With the present system, after the police receive a noise-complaint statement, they at­tempt to contact and warn a respon­sible person at that address.

If that is accomplished and the noise level is lowered, the police will not pursue it further. If the noise and complaints persist, a second warning will be issued, either over the phone or in person.

If the police have to respond a third time, a citation will be issued. However, Neuman said 85 to 90 percent of all noise vio­lations do not result in citations.

“We issue more warnings than citations,” he said.

Neuman said the only differ­ence between the proposed ordinance and the existing one is that the new ordinance would involve the use of a decimeter, an instrument used to measure noise levels. “It is time to have a new and comprehensive noise ordinance,” he said.

The decimeter would measure noise levels in both commercial and residential areas of the city in terms of decibels. By defi­nition, a decibel is a unit for measuring the relative loudness of sounds perceptible by the human ear. If the ordinance is approved, any member of the community generating noise that registers above 55 decibels on the decimeter could be cited as a violation of the law.

Linda Eberl, A.S.I. community af­fairs representative, called the pro­posed ordinance “a license to cite,” and said the 55 decibel limit was unrealistic for any col­lege community. “A car passing by registries 60 decibels,” she said.

Neuman said that not all vio­lations of the 55 decibel limit would be cited and violations ex­ceeding the limit by less than 20 decibels would receive the minimum citation.

The ordinance will be flexible,” he said. “Officers will still be able to use their discretion.”

Mike Pisenti, president of the Inter Fraternity Council, sup­ported Eberl and added that, “The decimeter would not be a deci­meter, it’s over the levels that have been set.”

Baseball tips for audience

By DAN RUTHEMEYER

San Luis Obispo youngsters were given some baseball tips Tuesday as part of a free clinic conducted by three members of the Los Angeles Dodgers.

The evening, which was part of the third annual Dodger Caravan, included catcher Mike Scioscia, Pitcher Tom Niedenfurth and second baseman Steve Sax.

A showing of the 1984 Dodger highlight film started the night off for the young fans. After the film, the Dodgers’ season from the first pitch to the last inning was reviewed.

Next, the Dodger catcher was the first of the stars to speak. He emphasized the physical and mental aspects of catching, throwing the ball from the knees and the impor­tance of blocking pitches that tend to get by the catcher.

The hurler also spoke of the events that led him to becoming a catcher at the age of 10.

“I was the biggest guy on the team and smallest at the back­est on the team and the only one they could get to put the gear on,” said Scioscia.

Speaking on how pitching is both physically and mentally demanding, Niedenfurth explained the relationship between pitcher and catcher and the mechanics of pitching.

Pitching is more with your arms than with your legs, said Niedenfurth.

He went on to point out the importance of a pitcher being

DODGERS SPEAK AT CAL POLY

By Staff Writer

The Los Angeles Dodgers spoke at Cal Poly Tuesday night as part of the annual Dodgers Caravan.

A 21-year-old Cal Poly student was injured and taken to the hospital last night when he fell off his bicycle while riding at about 25 mph.

Twenty-one-year-old Brian E. Bass, a junior business major, was traveling on the downgrade of Hachaday Road, near the corner of Kentucky Street, when he fell from his bike.

Bass was taken to Sierra Vista Hospital around 7:30 p.m. In­formation was not yet available on his condition, but a nurse supervisor said he was not critically injured.

By Margaret Barrett

Representatives from the Greek community expressed disappro­val with the San Luis Obispo City Council’s decision Tuesday night to call the pro­posed noise ordinance to print.

Walt Lambert, Coordinator of Greek Affairs, said he knew it was inevitable that the ordinance would pass. In fact he said three steps on its way to becoming law. After Tuesday night’s deci­sion, the ordinance must appear in the Telegram Tribune and be voted on at the next city council meeting on February 5.

“We did have a small victory in that enough concern was shown not only by students, but also business interests,” Lambert said.

About 20 Cal Poly Greeks attended the council meeting.

Mike Pisenti, President of the Inter Fraternity Council, a board representing fraternities on campus, told members of the city council that using the decimeter at the proposed level is not realistic in a college town like San Luis Obispo. He said different levels should be used and that higher acceptable noise levels should be allowed on weekends.

Another concern mentioned by Pisenti after the meeting was that the proposed ordinance does not make any exemptions for school-sponsored events.

“We do for community-sponsored ones,” Pisenti said he believed that exemptions were made for La Fiesta and the Thursday night farmers market. “No con­sideration is made for school­ sponsored events like W109, Pol­ is Royal or Rush. The students are part of this community and a big part,” Pisenti said.

DODGERS SPEAK AT CAL POLY

By Staff Writer

The Los Angeles Dodgers spoke at Cal Poly Tuesday night as part of the annual Dodgers Caravan.

A 21-year-old Cal Poly student was injured and taken to the hospital last night when he fell off his bicycle while riding at about 25 mph.

Twenty-one-year-old Brian E. Bass, a junior business major, was traveling on the downgrade of Hachaday Road, near the corner of Kentucky Street, when he fell from his bike.

Bass was taken to Sierra Vista Hospital around 7:30 p.m. In­formation was not yet available on his condition, but a nurse supervisor said he was not critically injured.

Officer Jeff Higgins of the San Luis Obispo Police Department said the rider had hit a rock or slotted gears causing the rear wheel of the bicycle to lock.

Bass flew over the left side of the bicycle onto the sidewalk and skidded on his face about 20 feet, Higgins said.

According to police, the business student was un­concsious for a short time and was disoriented and in shock when he was em­bursed and he suffered several other abrasions, Higgins said.
What is a free student press?

It is great to be able to say that the Mustang Daily is free to report on what is, which is sad to say, nothing. All college and university newspapers that are under the constraints of administrative policy. It has not always been true, however, that the Daily enjoyed sheer freedom.

During the 1980 presidential election, the Daily editorial board endorsed Democratic presidential candidate Jimmy Carter in an editorial. That issue was never released to the public. Under Section 2403 of Title 5 of the California Administrative Code, California State University campus newspapers, as auxiliary organizations of the CSU, are forbidden to endorse political candidates and issues as it sees fit...

The student press is important not only for the practical experience it provides for professionals of tomorrow, but as an example for all journalists of tomorrow, but as an example for all future journalists. It has an impact on an individual's feeling toward newspapers as they enter the post-collegiate world.

The folks who produce Mustang Daily are exceptional...
Diablo Update

Plant shut down for inspection and repair

By MARC MEREDITH

The Diablo Canyon nuclear power plant is presently off-line for scheduled inspection and maintenance prior to 100 percent operation.

Ron Weinberg, a spokesman for Pacific Gas and Electric, said the purpose for the halt in testing of the unit one reactor is to examine the bearings on the main turbine and to conduct routine maintenance.

At the conclusion of the inspection unit one will be brought up to 75 percent capacity, then to 90 percent and finally to 100 percent capacity, he said. This will begin in the next several days and completion is scheduled for early March.

"Previous testing went very well," Weinberg said, "we successfully performed all the scheduled tests on the agenda and are looking forward to completing the final tests and going commercial."

Barring any unforeseen problems, Weinberg said, the plant will operate at 100 percent capacity for 100 hours. At the end of this testing Diablo Canyon will become a fully commercial nuclear power plant.

"Previous testing went very well," Weinberg said, "we successfully performed all the scheduled tests on the agenda and are looking forward to completing the final tests and going commercial."

Harrington any unforeseen problems, Weinberg said, the plant will operate at 100 percent capacity for 100 hours. At the end of this testing Diablo Canyon will become a fully commercial nuclear power plant.

able to field his position well and
that winning isn’t the most im­
portant thing for youngsters.

"The most important thing is
that you enjoy playing the
game," said Niedenfuer.

The second baseman of the
Dodgers, Sax, was the last of the
stars to speak. He described his
role as a leadoff hitter as trying
to hit the ball right back where it
came from.

Unlike the other two players,
Sax talked about hitting being
almost all mental.

"Hitting is almost all mental
because there isn’t that much of
a physical difference between
batters," said Sax. "You have to
be relaxed when you go up to the
plate."

The evening ended as prizes,
which included autographed pic­
tures and baseballs, sports
and cameras, were given out.

The Dodger Caravan was
sponsored by the Coca-Cola Bot­
tling Company of Santa Maria,
the Telegram-Tribune and KVEC
radio.

As A Navy Pilot,
The Sky’s Your Only Limit.

Nothing else comes close to the excitement of Navy flying. And no other
job gives the same early leadership opportunities and
management responsibility.

As an officer and pilot in the
U.S. Navy, you get immediate
decision-making authority as well
as the practical experience and
technical training you need to make your
career take off.

It starts with Navy flight training which includes
state-of-the-art navigation, aerodynamics, and
computer know-how. It goes on to be one of the
most rewarding careers you can choose.

Those rewards include good pay, over $30,000 after only
four years, and generous benefits: 30 days’ paid vacation earned
each year, medical and dental care, low-cost life insurance
coverage, and many other tax-free allowances.

To qualify, you must have a BS or BA, be no older than 28, pass physical
and aptitude exams, qualify for security clearance and be a U.S. citizen.

Nationwide search brings Poly a new enrollment director

By NANCY ALLISON
Staff Writer

After a national search, a director of enrollment support services at Cal Poly has been found. Dr. Roger Swanson, dean of admissions at Arizona State University for 11 years, was appointed to the position by Vice Provost Dr. Malcolm W. Wilson.

The director of enrollment is a new position, yet takes over many of the duties of the former director of admissions and records position, which was held by Gerald Holley.

As director of enrollment, Swanson will be responsible for designing an overall enrollment plan for the university which includes efforts for the recruitment of new students. He will also be in charge of the offices of Admissions, Records, Evaluations, Relations with Schools, and Student Data Systems.

Swanson graduated from North Central College in Illinois with a degree in English, and earned his master's and doctorate in English from the University of Illinois. He was assistant to the chairman of the English Department at Illinois for two years and taught in the department.

While at Arizona State, Swanson supervised the Undergraduate Admissions Financial Aid, High School-College Relations, Orientation, and International Student Office. In 1981-82 he served as vice president of student affairs and for three years he was assistant dean at the College of Liberal Arts. He also served a year as a Rockefeller Foundation administrative intern in the Academic Vice President's Office.

In making the announcement of Dr. Swanson's appointment, Vice Provost Wilson said, "Dr. Swanson has significant knowledge and understanding of academic programs and processing at a major university."

Swanson enjoys his new position at Poly. "I have been on the board two weeks and have met some very nice people who are interested in the university."

Cal Poly dean heads state ag committee

By TED LEWIS
Staff Writer

The associate dean of the School of Agriculture has been named the chairman of a State Department of Education committee.

Dr. Larry Rathbun was chosen in November to head up the Agricultural Vocational Education Advisory Committee.

The advisory committee was formed by the state Legislature in 1983 to report on the problems of funding and advice on answers to the problems," said Rathbun.

The 12-member committee advises the State Superintendent of Public Instruction, Dr. Louis Honig, and the Legislature regarding policies on agricultural education for students in kindergarten through the 12th grade.

Eighty-seven percent of local school money is allocated by the state to insure that all school districts are given an equal proportion of the budget for education. The remainder of the money comes from within the local school districts that are not controlled by the state, Rathbun said.

The advisory committee has suggested ways of distributing a three-million dollar buget over the past two years for the Department of Education's Agricultural Vocational Education system, said Rathbun.

Business gets computers

By SUSAN EDMONDSON
Staff Writer

Five personal computers were loaned to the School of Business through a special program by IBM.

"The computers are helping "not some of our educational goals," said Dean Kenneth Walkers of the business school.

Cal Poly was one of the few schools chosen to receive temporary use of the IBM computers. Walter said the computers will be available at least until the end of this academic year, he added.

The school will have an option to buy the computers at a large discount at the end of the loan period. Three of the computers arrived in December during the break and two PC XT's will be arriving soon.

Business students and faculty are already using the computers in many courses, particularly economics and accounting.

Rathbun said he was glad Cal Poly lucky to have been chosen to receive the IBM computers.
Bells to toll in honor of WW II Jewish hero

By DONALD MUNRO
St. W writer

The ringing of the bells was organized by Haverim, a club of Jewish students at Cal Poly, in coordination with a worldwide observance by the Raoul Wallenberg Committee of the United States.

"We're honoring someone who was brave enough to face tyranny and beat it," explained Paul Lewis, president of Haverim. The club wants to make Wallenberg's name synonymous with heroism, he said.

Bells will be rung today in each time zone throughout the world to honor his humanitarian courage.

Wallenberg was a diplomat representing the Swedish government in Hungary during World War II, when the country was occupied by Nazi Germany. He used his influence to falsify documents and issue fake visas in order to sneak Jews out of Hungary and save them from the Nazi Holocaust.

He also provided protective housing for Jews so they could hide from the Nazis.

"All of them should have been killed under the Nazi plan," Lewis said.

Russian soldiers took Wallenberg into "protective custody" Jan. 17, 1945, and his whereabouts are still unknown. If still alive, he would be 72 years old today.

"Moscow has never given an explanation of why he was taken," Lewis said.

In 1981 President Ronald Reagan signed a bill making Wallenberg an honorary citizen of the United States, and pledged to work to secure his release.
WASHINGTON (AP) - The chairman of the Senate Finance Committee said Wednesday the Senate's deficit-cutting action this year probably will include some disguised tax increases and a limitation on future boosts in Social Security benefits.

"Clearly, yes," some tax increases labeled as something else are likely, the chairman, Sen. Robert Packwood, R-Ore., told reporters. He said he has a "hunch" Congress will not let the 16-cent-a-pack federal cigarette tax drop to 8 cents as it is scheduled to do next Oct. 1 under present law.

As for Social Security, "there is a pretty good chance" of limiting cost-of-living increases in benefits, he said.

"But there will be no cuts from present levels of benefits," he emphasized. "If you get $500 a month now, there is a guarantee you will get no less. That's a consensus." Packwood said.

President Ronald Reagan's plan to reduce the deficit is moving in a similar direction, recommending, for example, that the fee for insuring Federal Housing Administration mortgages be raised from 3.8 percent of the loan to 5 percent, and the Veterans Administration fee from 1 percent to 5 percent.

The president and most senior Republicans in Congress have found agreement on another issue: that higher taxes should be considered only as a last resort in the battle against the deficit. Nevertheless, Packwood said some disguised tax increases are likely.

In 1982 and 1984, after Reagan went solidly on record against raising taxes, Congress voted tax increases and the president approved them. They were not called tax increases but were labeled "revenue enhancements" and "loophole closings." Most of the burden fell on upper-income investors and corporations but several provisions -- including a reduced medical-expense deduction -- are being felt by wage-earners.

If taxes do become a target in the deficit fight, one possibility is extending the cigarette tax at 16 cents a pack rather than letting it drop by half later this year. "If I were betting, I have a hunch it would be extended," Packwood said.

NEW YORK (AP) - A federal jury decided Wednesday that Time magazine defamed Ariel Sharon in a cover story about the massacre of Palestinian civilians, then resumed deliberations to determine whether the former Israeli defense minister was libeled.

The finding meant that the jury had decided in favor of Sharon on the first of three issues, all of which must be resolved in Sharon's favor for him to win his $50 million libel suit.

Just after 11 a.m., the jury of four women and two men announced in court that the Feb. 21, 1983, Time story defamed Sharon because it meant he "conceptually intended" Christian Lebanese militiamen to massacre Palestinian civilians in 1982.

In other words, your answer to the first question is "yes?" asked U.S. District Court Judge Abraham D. Sofaer. "Yes," said jury foreman Richard Zog.

The jury, which met for 15 hours -- minus meal breaks -- over three days, went back to the jury room immediately to deliberate on the remaining issues of falsity and malice.

A small smile cracked Sharon's face when the ruling was announced. His beaming wife, Lili, turned to the reporters across the aisle and winked. One of Sharon's ever-present Israeli security guards also turned and smiled at his boss.

Later, on the courthouse steps, Sharon said, "I'm pleased that we won on this point. I was sorry that Time magazine is charging that the jury did not understand plain English."

Ray Cave, Time's managing editor, said, "Time continues to believe, totally believes, its story is correct."

The story over which Sharon sued said he reportedly "discussed" revenge for the assassination of Lebanon's Christian president-elect, Bashir Gemayel, with Phalangists a day before the Christian militia massacred hundreds of Palestinians in Israeli-occupied West Beirut.

Dell'Arte to perform

A travelling comic troupe is coming to town. Saturday evening at 8:00, January 19, the Dell'Arte Players Company will perform a play combining music, vaudeville and acrobatics in the Cal Poly Theatre.

The players will present a biting satire of the medical profession in “Malpractice or Love’s the Best Doctor.” The play is freely adapted from the classic comedies of the 17th century French dramatist Moliere.

The plot focuses on Sagnarelle, a merchant, and his attempts to marry his daughter, Lucinde, to a doctor so he can provide financial security and medical care for his declining years. When Lucinde feigns illness to fool the match,

"The Flamingo Kid," a nice coming-of-age film which had ample opportunity to exploit its setting in a 1963 East coast beach club but didn’t, and which actually has a story to tell.

That’s not to say that “The Flamingo Kid,” a film for prudes. It’s just an enjoyable story about Jeffrey Willis (Matt Dillon), who is testing his wings during the Activity Hour. But listening to a demo tape or by

**The Flamingo Kid**

its change

ascends the usual

even less sure after he is befriended by Phil Brody, the rich part-owner of the El Flam­ingo.

Brody shares Jeffrey’s interest in playing Gin, and soon Jeffrey is sharing Brody’s philosophy that college is overrated and that God put salesmen on the earth to take people’s money. College looks even less attractive when Jeffrey thinks Brody will give him a salesman position at his sportscar showroom whenever he asks for it.

Jeffrey thinks Brody will give him a salesman position at his sportscar showroom whenever he asks for it. (At his house he eats a bath oil he has to get a respectable tan in order to fit in with the surround­ings!) The biggest initiation is saved for the last, however, when Jef­frey joins in a Gin game against Brody in what Brody himself calls, “A baptism into the game.” Disillusioned with the false front Brody has put up, Jeffrey does his best to win with everyone watching.

Dillon is well supported in the film. Richard Crenna (Brody), plays the mentor-gone-bad role with considerable finesse, and Hector Elizar is great as the lov­ing father who is protective of the dreams he has for his son. Janet Jones is perky and attrac­tive as Jeffrey’s girlfriend from California. What few problems there are in this film seem to come from its pacing. Garry Marshall directed and Neal Marshall wrote the screenplay, and both Marshalls tend to linger on certain scenes too long.

The film is sprinkled with in­itiation rites. As a new El Flam­ingo employee, Jeffrey is forced to jump from a balcony into the waves while the other valets, cabana boys and two-hackling lifeguards watch. He also gets to drive Brody’s spiffy red Ferrari as the two discuss business. And

as the pale boy from Brooklyn, he has to get a respectable tan in order to fit in with the sur­roundings!

Dillon shows that his acting ability actually do stretch beyond the tough punk he usually plays (“The Outsiders,” “My Bodyguard”). He manages to make Jeffrey look ambitious and unsure at the same time, but his best moments come when he shows us Jeffrey’s naiveté. (At Brody’s house he eats a bath oil bead thinking it’s some sort of candy, with hilarious results.)

The performance is sponsored by the ASI Fine Arts Commit­tee.

**We’re Not All Pomp And Circumstance.**

Some companies give recent graduates a fancy title and not much else.

At Applied Magnetics, we value your ingenuity. We give business and engineering graduates the opportunity to assume significant responsibility early in their careers by placing them in a position to make key decisions that affect the way we do business.

If you’d like to find out more about us, just drop by the Placement Center and read our literature.

If you’re interested in discussing the many challenging career paths we have available, please sign up for an interview.

We’ll be on Campus on January 24th.
Motion is made to keep children from courtroom in LA molestation case

LOS ANGELES (AP) — The defense moved again Wednesday to close the preliminary hearing in the McMartin Pre-School mass-molestation case, as a bill to exempt children from facing the seven defendants in court was stalled in the state legislature.

Municipal Court Judge Aviva K. Bobb said she would rule before any of the children takes the witness stand, tentatively scheduled for Thursday.

The request to close the hearing was the fourth made by defense attorneys Davis and Davis during the seven-month-old preliminary hearing.

The motion came after Davis concluded his cross-examination of an "unprecedented agreement" who had examined 34 children from the Manhattan Beach preschool. Davis contends Ms. Heger asked the children biased, leading questions.

Ten percent fee increase for state colleges urged

In one year alone, between 1981 and 1982, the state university fees jumped more than 41 percent, from $222 to $320, state education officials said.

"This bill represents a consensus after years of conflict on the issue," Maddy said.

The proposal covers only four-year schools, and does not include California's 107 community colleges, the two-year schools that were hit by extensive cuts in Gov. George Deukmejian's first budget plan for the 1983-84 fiscal year.

Education Commission, the lawmakers said.

Since 1980, student fees at the University of California have nearly doubled, from $776 an academic year to the current $1,556.

Senate leader anti-Bird

Sacramento (AP) — A bipartisan group of 14 Senate leaders Wednesday urged a 10 percent fee-increase limit for the state university system and the University of California, saying their plan would ensure "gradual, moderate and predictable" cost hikes.

The proposal, which would go into effect in the 1986-87 school year if approved by the Legislature, was unveiled by Sen. Ben Maddox, R-Fresno; Walter Stiern, D-Bakersfield; and Nicholas Petris, D-San Francisco.

All serve as members of the Senate's legislative subcommittee that considers educational funding in the governor's state budget proposal.

The plan, in the form of a bill, would replace the "unprecedented agreement" between student groups, colleges, the governor's Finance Department, the Legislature's nonpartisan fiscal analyst and the California Postsecondary Education Commission, the lawmakers said.

"The court is in trouble. Rose Bird is in trouble, because that court has been far too political," Nielsen said. He contended that Supreme Court decisions that shut down a Republican reapportionment initiative and a balanced budget initiative were "politicized decisions.

"The court is in trouble. The court has been politicized. Rose Bird is in trouble, because that court has been far too political," Nielsen said. He contended that Supreme Court decisions that shut down a Republican reapportionment initiative and a balanced budget initiative were "politicized decisions.

Republican Gov. George Deukmejian has announced that he'll vote against Ms. Bird, and Bill Roberts, Deukmejian's former campaign manager, is running a campaign group that wants to oust the chief justice.

But Nielsen denied that the anti-Bird campaign was turning into a GOP effort to create vacancies on the court for Deukmejian to fill, saying there would be an anti-Bird campaign if Deukmejian had lost to Democrat Tom Bradley in 1982.

"Rose Bird was seriously challenged when, Jerry Brown was in office," he said, referring to her narrow election victory in 1978. "It makes no difference who the governor is."

Nielsen said he would prefer that the Republican Party stay out of the anti-Bird campaign, but he said he would vote for properly funded anti-Bird resolution next month at the GOP state conven
Birth defects linked to chemical leak

SAN JOSE, Calif. (AP) - Sheriff's deputies have linked miscarriages and birth defects occurred at a rate two to three times higher than normal in 1980 and 1981 in a neighborhood where the water supply was contaminated by toxic chemicals, health officials said Wednesday.

Although two three-year studies of the contaminated area failed to establish a clear link between the abnormalities and an underground chemical leak, contaminated drinking water could not be ruled out as a contributing cause of the defects, a state health official said.

Dr. Kenneth W. Kaiser, chief of public health programs for the state Department of Health Services, said investigators may never know what caused the miscarriages and birth defects in the south San Jose neighborhood of Los Paseos.

Security extreme for Superbowl teams

SAN FRANCISCO (AP) - A helicopter, a small army of police and private security agents, a 4-foot fence with barbed wire and standoff riot squads are part of an elaborate plan to protect the Super Bowl teams and fans at the game.

"We hope for the best and plan for the worst," said National Football League security director Warren Welch. Authorities expect about 118,000 people to attend Stanford Stadium on Sunday.

Officials involved in guarding San Francisco 49er players and coaches and the public from enthusiastic fans and others are reluctant to discuss details such as numbers of police or costs.

"Let's just say we have great big guys to protect those great big guys," said San Francisco deputy police chief and Super Bowl security chairman George Emil. The 95,000 who plunked down $60 and a lot more for a ticket to attend the game can get an idea of what to expect.

First of all, according to Stanford public safety director Marvin Herrington, the closest glimpse of players that fans are likely to get is on a TV set.

"They're coming in by bus and the crowd won't be able to get near them either coming in or getting out," he said.

Home team fans may be discussed when they find their seats, but the NFL specifically programs ticket sales so fans are away from the field to dampen the enthusiasm of someone who might want to get onto the field," said Emil.

Take the Rotation Route to an Informed Career Choice
In Engineering at Santa Barbara Research Center

Few seniors and new graduates know exactly what they want to specialize in. How about you?
Even fewer know what the various jobs in engineering really involve. How about you?
Solution: rotation.
Our Rotation Program can help you make the right choice, and give you an overview that will be a lifelong benefit...

We're Santa Barbara Research Center right here in Goleta. A recognized leader in infrared and other technology for space and other applications. A fast-growing, independently operated subsidiary of Hughes Aircraft Company. We no longer build airplanes at Hughes, but we can help you build a great career.
If you qualify for Engineering Rotation (U.S. citizenship required) you will work six months each in four different technical areas.
You see, it is in our interest as well as yours for you to find here the career position for which you have the greatest aptitude and challenge.

So take the first step now in applying for our Engineering Rotation Program. Proof of U.S. Citizenship Required for Most Positions. Equal Opportunity Employer M/F/H.

Sign up in the campus Placement Center for an interview January 24th.

REGINA FRAWLEY

Netters look to improve
By NANCY ALLISON
Staff Writer

For the past two years, the women's tennis team has captured the conference title and placed in the top 10 nationally. The team this year hopes to better those accomplishments, says coach Orion Yeast.
With six returners from last year and six new players, Yeast says the netters are not short of talent.
Returning from the top six last year is Mustang MVP Sally Russell, who played No. 2 singles and No. 2 doubles, and Kathy Orahood, who was undefeated all season long at No. 4 singles and No. 3 doubles.
Also back for the Mustangs is red-shirt Laurie Magin, who transferred from East Texas State where she was ranked nationally in the top 20. Regina Frawley red-shirted last season after transferring from Cal State Northridge, as did senior Carol Mellberg, who transferred after playing at the University of California Santa Barbara.
Rounding out the returnees are Jennifer Stockman, who played No. 1 single for Poly in 1982 and No. 4 singles and No. 2 doubles in 1983. Sophomore Patti Hilliard, who was an asset for the netters last year at No. 2 singles and No. 3 doubles will be out this season, due to knee injuries.

Please see TENNIS, page 15

WHERE IS THE CELLAR?
WHAT IS THE CELLAR?
Patti Hilliard hitting away. The women are looking to improve on high finishes the past two years.

No official charges in Moses case

LOS ANGELES (AP) - An hour after Edwin Moses, an Olympic hero set on defending his reputation, denied charges of soliciting and drug possession at a press conference, the charges weren't charges anymore.

Moses, reading from a prepared statement, said Tuesday he was mortified by events and that he had strived to build a positive image throughout his life.

One of 82 people arrested during a weekend sweep of Hollywood by police, the two-time gold medalist also said he was confident he would be cleared of criminal charges.

However, Deputy City Attorney Mike Wilkinson said just over an hour later that criminal charges in the incident that occurred early Sunday morning had not yet been filed.

Wilkinson had announced erroneously Monday that Moses, 29, was charged with soliciting a female police officer for prostitution and for possessing a small amount of marijuana.

"As of now, the case is still being investigated for filing," and no decision has yet been made on whether to charge Moses. Wilkinson said Tuesday.

"Cases like this are generally handled in a few days from when we get them. We expect a decision (on whether to file charges against Moses) within a few days."

Clear skies predicted for Super Bowl

SAN FRANCISCO (AP) — The National Football League has banned umbrellas from the stands at Sunday's Super Bowl, but the more than 80,000 fans at Stanford Stadium will have no need for them, the National Weather Service said Wednesday.

Lead Forecaster Jan Null predicted partly cloudy skies and temperatures in the mid 50s for the 3:15 p.m. PST kickoff, cooling to about 50 by the end of the game between the San Francisco 49ers and the Miami Dolphins. Winds are expected to be variable at less than 10 mph.

The chance of rain: less than 10 percent.

"It's a continuation of the fair weather we've had over the last week and a half," Null said, noting that a large area of high pressure has kept storm systems at bay.

"It is slowly weakening, but it looks like there will be enough high pressure left to keep the state dry through Sunday," he said. "If it were to rain, it won't be until early next week."

The NFL has announced that fans won't be allowed to bring umbrellas into the stadium, rain or shine.

"I understand that during one of the game shows, there are going to be about 500 children with red, white and blue umbrellas forming a flag on the field," Null said. "It would be ironic if it rained and they were the only ones in the stadium with umbrellas."
TENNIS

From page 12

Battling it out with the veterans are six new players this year. Freshman recruit Cristine LeVerte was ranked No. 21 in Northern California and coach Yeast said, she "has penetrating ground strokes and the potential to be a top intercollegiate player."

Kim McCracken, who promises to be a strong doubles player, transferred from Santa Monica City College where she was an all-city player.

Walk-on Wendy Elliot from San Jose, was ranked No. 16 in Northern California in 1983 and will add depth and strength to the team, said Yeast. As well Kathleen Branda, a senior from Irvine, who will finish her last year of eligibility with the Mustangs.

Freshmen Kristina Vitols and CC Barbe both had impressive high school tennis careers and will round out the Mustang squad.

The six singles positions and three doubles positions have not been determined. "It is just too early and too competitive at this point to tell how the ladder will come out," said Yeast.

Kathleen Branda approaches the net for a volley during practice on the Poly courts.

Alternatives to SF game

SAN FRANCISCO (AP) — Despite what the National Football League may think, there probably are a few souls who won't be glued to their televisions for the Super Bowl. Some people who don't even care who wins.

For them, Northern California is still a great place to be for the week leading up to Super Bowl XIX — the much-ballyhooed clash between the San Francisco 49ers and the Miami Dolphins.

For instance, if you don't plan to attend the game at Stanford Stadium or watch it on TV on Jan. 20, you can do such things as run an eight-kilometer road race, tour the Liberty Ship SS Jeremiah O'Brien at San Francisco's waterfront, or attend a performance of "Cinderella" by the San Francisco Ballet.

But it's tough to get away from football, even if you don't watch the game. On Saturday, the Exploratorium is featuring Super Bowl Science, with exhibits and films that relate to football.
