Funds available for clubs

By LESLEY GLEASON

Students with an idea for a project they think will benefit Cal Poly can now receive money from an ASI commission.

The Student Planning Commission has about $3,000 available for qualified individuals and clubs interested in projects to improve the campus.

To qualify, the project must be approved by the commission as beneficial to the campus. In addition, it is required to show that an attempt has been made to get money from different sources.

Once a project is approved by the commission, the Student Senate must approve the idea before money is allocated, said Joe McHale, SPC vice president.

McHale added that landscaping was an example given by McHale. He added that many senior projects could qualify for SPC funds. The commission recently gave money to the pledge class of the architectural organization, NCARAB, to assist it in making campus maps that will be posted in various locations on campus.

Other projects that were partly funded by SPC were the tapestries for Kennedy Library and construction of the bridge in front of the Agriculture Building.

The SPC is funded by the tax on campus. Other projects that were partly funded by SPC were the tapestries for Kennedy Library and construction of the bridge in front of the Agriculture Building.

Casualties on the campus battlefield

Hey, hey. Remember, let's be careful out there.

Michael Conrad as Sgt. Esterhaus, Hill Street Blues.

At almost anytime of day hundreds of cars, trucks and motorcycles compete with thousands of pedestrians for control of the campus roadways.

These roadways often look like a battlefield and believe it or not there are occasional casualties.

It appears that both motorists and pedestrians alike think that they are the rightful possessors of the asphalt arteries that crisscross the campus.

Based solely on the logic that a moving vehicle outweighs the average pedestrian by at least ten to one, the vehicles gain considerable advantage.

But it seems that many students, faculty and staff feel obliged to play a dangerous game of cat and mouse.

This is foolish and can only result in unnecessary injury to person and property.

Not only do those who walk, balance on the edge of disaster, motorists seem to disregard all semblance of courtesy, and safety.

Freedom of the press is probably one of the most taken for granted privileges in the United States and deserving of the attention you gave it.

Your dedication also commemorates the birth of the great American journalist, printer and writer, Benjamin Franklin. It was also a great proponent of the concept of freedom of the press.

$17,000 in ROTC scholarships is offered

by KEVIN CANNON

The Cal Poly Military Science Department has announced the availability of two and three-year Army ROTC Scholarships, worth as much as $17,000 each.

A select group of students received letters from the department advising them of their possible eligibility of the scholarship.

The grants, for study at Cal Poly during the 1985-86 academic year, are to be awarded on a competitive basis to highly qualified students.

Major Mike Robinson of the Military Science Department said, "Successful applicants will be those who have shown good character and motivation and possess leadership potential." Applicants must also be U.S. citizens who are in good physical condition and will be under 25 years of age when they complete their bachelor's degree.

Turn Warren, a sophomore in physics, said, "It means more to me than just the money, I feel very privileged, and very honored." Randall Miller, an engineering technology major said, "It fits right into my goal of becoming a commissioned officer." He added, "With all the help and encouraging I have received from people like Major Robinson, I feel like I have a special responsibility."

A new feature to the ROTC Scholarship program this year is that winners are not necessarily obligated to serve on active duty in the Army. Winners can serve full or part-time which allows the program to fit anyone's career plans.

Students receiving these letters are encouraged to act quickly since the application deadlines are Feb. 4 for the two-year scholarship, and March 4 for the three-year scholarship. Details and application forms may be obtained from the Military Science Department, located on the ground floor of the Dexter Library Building.

**Arts and Humanities Week set for Feb**

By LISA MCKINNON

Departments and student organizations within the School of Communicative Arts and Humanities are being asked to participate in CA & H Week, scheduled for Feb. 11-15.

"The purpose of CA & H Week is to give people a feel for our school, that it's here and that they should take advantage of it," said Linda Meehan, CA & H Week co-commissioner.

Meehan said that club and department within the school participate by sponsoring lectures, films, tours or displays so that a balanced series of events can be successful- ly scheduled throughout the week.

Making early contact can also help a group get a more advantageous schedule and location slot for their event, Meehan said. The University Union is available for those interested in using it, but reservations need to be made with Mary Ellen Madsen, 544-0231, for more information.

**Rock'n'roll sale, posters benefit county program**

Thousands of new rock 'n' roll promotional and record industry memorabilia will be on sale on campus today and tomorrow.

The sale will be held in Mustang Lounge from 10 a.m. to 3 p.m. to benefit Special Olympics programs throughout San Luis Obispo County.

Some of the posters to be sold are of Van Halen, Bob Stewart, Billy Joel, Prince and the Rolling Stones.

All proceeds will go to the Special Olympics.

The Cal Poly Foundation is an influential organization on campus, yet many students do not understand what it is. "Basically the Foundation is a public benefit, nonprofit organization and a separate entity from the university," explained Al Amaral, executive director of the Foundation. "We have one basic purpose and that is to support the educational mission of this campus.

"We feel food service, bookstore service and research funding are all part of that support," Amaral continued. "The Foundation receives no state tax dollars so it must be self-sufficient.

The Foundation has 170 full-time employees and over 1,500 part-time student employees. Food service is the largest department under the Foundation with a budget that incorporates over $6 million a year. The Foundation is also in charge of El Corral Bookstore, the Campus Store, public affairs and personnel among other services.

There are eight members on the Foundation's board of directors including one student representative and one community member. The remaining members are faculty and administrative staff.

"We're the university's partner," Amaral said. "We never get involved in new programs without the university asking us.

Amaral said that although the Foundation is termed a non-profit organization it strives to make a profit. "The surplus income that is generated is plowed back into the system for remodeling buildings and for providing other services for students," Amaral said.

When asked why comparative items found in the Snack Bar are more expensive than at fast-food restaurants like McDonald's, Amaral said that the Foundation has higher expenses and fixed costs than McDonald's.

Noting the high price of textbooks, Amaral explained that the bookstore sells textbooks at the publisher's suggested retail price, which only provides a 20% profit margin.

"The ancillary things the bookstore sells provide its operating expenses," Amaral added. "The bookstore only orders what the faculty requests. It survives because of the sheer volume of books it carries and sells.

Amaral said that students who have complaints about the food service and bookstore should either talk to the store manager or attend the Foundation's advisory committee meetings.

"We're not perfect," Amaral admitted. "We make mistakes, but I feel we're responsive to the university's and students' needs.

Future projects the Foundation is considering include remodeling the Sandwich Plant, Snack Bar and Dining Hall. Also under consideration is a possible expansion of the Campus Store and a bookstore annex to be located near the Campus Store.
Students get discount on extension courses

By SUSAN EDMONDSON

Cal Poly students can get a special discount rate on extended education courses in legal office services and health administrative services.

The normal rate of $40 per seminar was reduced to $25 for regularly enrolled Cal Poly students.

Students can also receive up to 10 hours of transfer credit from Cal Poly courses toward their certificate of proficiency. A certificate will be awarded to students after 30 hours of instruction, instead of the usual 40 hours.

"I'm trying to do something for Cal Poly students," said Howard Vollmer, director of extended education. "This is the first time we've ever done this. We thought about it and we thought it was a good idea. We are testing it out to see if it works for students."

Vollmer met with Vice Provost Malcolm Wilson on Jan. 17 and Wilson suggested the discount.

"We figured out that since these classes don't have full enrollment, it's better to have a discount than to have empty seats," Vollmer said.

Although other certificate programs are available through extended education, the discount applies only to courses in legal office services and health administrative services. "Those two programs would be of most interest to students," said Vollmer.

The discount will be offered winter and spring quarters only. During the summer, extended education will evaluate the effectiveness of the discount and might continue to offer it next year.

Vollmer explained that the certificate programs might supplement the education that students get in regular courses.

He gave an example of a business student who wants a career in health but has no credentials. A certificate in health administrative services would give him a better chance at a job.

The first seminars for these programs begin on Saturday, Jan. 26.

- Introduction to health administrative services will be taught from 9 a.m. to 3 p.m. Jan. 26 on the Cal Poly campus. The instructor for this seminar will be Dr. James Nash, director of the Cal Poly Health Center.

- Legal terminology and writing will be taught from 9 a.m. to 3 p.m. Jan. 26 on the Cal Poly campus. Robert Griffin, an attorney and assistant to the executive director of Cal Poly Foundation, teaches this seminar.

The following courses are also offered through extended education, though not at a discount rate:

- Jewelry casting. 6-9 p.m., Wednesdays, Jan. 23-Feb. 20, Cal Poly campus. $60 plus materials.
- Competitive tennis: instruction and play. 5:45-8 p.m., Thursdays, Jan. 24-Feb. 28, Cal Poly campus. $65.
- Microcomputers: health applications. 7-10 p.m. Jan. 25 and Feb. 8, 8:30 a.m. - 4:30 p.m. Jan. 26 and Feb. 9, Cal Poly campus. $180, ($160 for certificate enrollees.)
- Winter wildlife of the central coast. 7-10 p.m. Jan. 25, Cal Poly campus and 8 a.m.-4 p.m. Jan. 26, Carizzo Plains. $35.
- Business start-up. 9 a.m.-3 p.m. Jan. 26, Lompoc. $60, ($40 for certificate enrollees.)
- Marketing analysis and planning for growth. 9 a.m.-3 p.m. Jan. 26, San Luis Obispo. $50, ($40 for certificate enrollees.)
- Basic autohypnosis. 9 a.m.-4 p.m., Jan. 26, Cal Poly campus. $45.
- Estate planning. 9 a.m.-3 p.m., Jan. 26, Cal Poly campus. $50, ($40 for certificate enrollees.)

Interested students should apply immediately because classes with a small enrollment may be cancelled. The discount is open to students on a space-available basis.

Extended education is located at Cottage One, Campus Way. To enroll, or for more information, call 546-2053.

Lab to study public issues

Dr. Kristin Roncarati

Social science and humanities faculty and students now have a laboratory to work in after giving research assistance to members of the San Luis Obispo and Cal Poly communities.

In return, the research assistance students are interested in and try to provide them with information.

The Center for Practical Politics, a non-profit, tax-exempt and non-partisan group developed through the Political Science Department, was described by Rodriguez as "an applied research organization."

The center will act as a vehicle for the study of important public issues and as a service to organizations within the SLO County.

"We want to do research that has a direct impact on the community," said Rodriguez.

The center's first project is to help students get information on starting their own businesses.

"There is a need on this campus for students to get information on starting their own business,” said Rodriguez.

This is the only contract the center has so far, but Long said others "will come through when people see what it is we're doing."

Long said that students in the social sciences and humanities have never really had a lab, and the center will give students the opportunity to work in real situations involving policy decisions and data research and analysis. "Students will have a better perspective of what it is they will do in a real setting," said Long.

"I see it as an opportunity that enhances their academic life.

The approach of the center is interdisciplinary, where each project is directed by a faculty member with a supporting project team, including members of the Political Science Department staff. Special consultants are to be contracted for particular projects depending on the availability of funds.

The center will allow for opportunities in applying social science concepts and analytical tools to problems in public policy, legislative, policy and public management.

The Center for Practical Politics is equipped to provide services on a contract or fee basis, and accepts grants aimed at specific projects, computer analysis, student research, and special speaker programs.

Collegiate Entrepreneurs organize club for exchanging business information

By Debbi Ball

A new ASI-sponsored club, the Association of Collegiate Entrepreneurs, is organizing at Cal Poly for students interested in business ownership and management.

Club president and co-founder, Richard Rodriguez said he feels the association will help students research all around education in the field of business.

Cal Poly has excellent instructors to teach the basics, and I feel the school does a good job helping students find their first job, Rodriguez said, "but there's a need on this campus for students to get information on starting their own business."

He said the club plans to fill this need by inviting successful entrepreneurs to speak at Cal Poly. Rodriguez added that students will also gather and discuss their ideas with others.

"It was a sharp group of students," Rodriguez said, "and they had a lot of good questions to ask.

The club organizers are looking into new international trade, the social graces and how to deal with people in a business situation, how to combine a marketing and successful career, and how to copyright inventions.

"They inspire their students to strike out on their own," said Rodriguez, "and explain all the work it takes to begin a business.

Rodriguez said the club will sponsor its first fund-raiser during Poly Royal.

"We want to have a row of booths at Poly Royal," he said, "and give members the chance to market new products. Then, a percentage of their sales will go back into the club."

Rodriguez said a small membership fee will also be added to support a club mailing list and to print flyers.
By ROBIN LEWIS

Down on the Rio Grande
in an ASI Outings canoe

Journalism major Robin Lewis shooting "Tight Squeeze" on the Rio Grande in Big Bend Na

Paddle, you puppies

It's New Year's Eve, and Brita and Greg, under the full moon and stars, are walking around the campsite. A real Waltz. A German Waltz. The moon above, which explains the behavior, is so bright you don't need a flashlight. The muddy Rio Grande slides by in the night, and across it is Mexico.

The muddy Rio Grande flows by in the night, and across it is Mexico. Brita and Greg finish the waltz, returning to the fire. Suddenly, Brita realizes that though it is before midnight in Texas, it is already New Year's Day in her German hometown. She yells, she shouts, she jumps up and down. She has made a connection the home she missed over Christmas and she is happy.

Anyway, Greg and Brita are arguing over who gets to lead, while the other four of us watch, shaking our heads. Brita is an exchange student from Germany, very smart and very hyper. The standing joke is we should tie all our canoes together and make her paddle. She is confused as to why Americans strongly dislike being called a "son of a bitch," but don't mind being called a "puppy" — the literal translation of S.O.B. She also does not know about the powers of green M&M's. The charm of cultural differences.

Brita and Greg finish the Waltz, returning to the fire. Suddenly, Brita realizes that though it is before midnight in Texas, it is already New Year's Day in her German hometown. She yells, she shouts, she jumps up and down. She has made a connection the home she missed over Christmas and she is happy.

You don't expect this much natural beauty of Texas. It's no great secret the Lone Star State enjoys a less than solid reputation as a home of natural wonders. In fact, it's usually cited as a standard of ugliness, as in the bumpersticker I heard someone shout last summer: "After Alaska, everything else looks like Texas."

But this could be Utah, or northern Arizona. Buttes and deep cathedral canyons and sloping desert fill Big Bend. The area is often called "three steps to the sky": river, desert, mountains. The rock of the Chisos Mountains is red, and the same kind of gravel suggesting a former cover of ocean found in California is here as well.

Coming downstream amidst this, Paula and I round a bend. Straight ahead of us are Mike and Liz, caught broadside against a snag in the middle of the river. We are swept into the small rapid, too late to beach the canoe. We paddle like crazy to skirt them on the left. I rudder, hard, and as we slide by their bow with just an inch to spare, I give Mike there a big smile.

Our passing puts them off-balance, and water comes over...
The canoe fills up with water, pinned across the current against a fallen tree. Greg, running back from his canoe, throws out a rescue rope. Liz, still with the canoe, attaches it to the stern, and Greg ties off his end on a tree. Then we form a chain and see one in the middle as the water comes up. Brita and Dan are watching all this and both are nervous. Dan is ready for the chute, but is trying to figure out how to get past the rock. Brita just wants to get the damn thing over with.

They head back to their canoe, and Brita pushes them off. All the way to the opposite bank, Adrenalin. in the stern, paddles frantically to line up for the Squeeze. We have about given up itself up to the possibility of a flip, but they get straightened out and hit the chute perfectly. Dan rudders early, and Brita paddles hard, and they shoot right by the rock with more than two feet to spare.

We start passing gear across the river, and push off. The buttes of the Chisos are dusted with the white stuff. It's longjohn and parka weather. It's longjohn and parka weather.

We enter the canyon, sliding with the current into the heart of Mariscal Mountain.

The canoe fills up with water, and we wake up the next morning to 30-mile-an-hour winds and light hail mixed with some snow. The butter of the Chisos is dusted with the white stuff. It's longjohn and parka weather.

We decide to hide out in camp that day and not risk the wind-chill factor and rough going on the water. Mariscal Canyon, for which we have been waiting during the past 35 miles, is four miles downstream. It is visible from the bluff behind camp as a gash in the side of Mariscal Mountain. The canyon is the path of the river as it slashes through the layers of red rock, flowing perpendicular to the direction of the mountain's ridge. The Rio Grande trails in one side of the mountain and emerges on the other.

After a day of reading and hiking, the cloudburst begins to lift and the sun goes down. With no cover to hold down what little warmth has come that day, the temperature follows the sun and it gets colder than a puppy. That's real cold. We cook a quick meal and put one pup over another. We decide to hide out in camp that day and not risk the wind-chill factor and rough going on the water. Health Center Q's and A's

Rubella immunization good idea

Health Center questions and answers will appear every Wednesday in the Mustang Daily. Any questions should be submitted to the Health Center.

Q: I heard recently that every woman who thinks she will have children sometime in her life should have a Rubella vaccination. What is Rubella and is it something I should be concerned with?

A: Rubella is a mild illness more commonly known as German or three-day measles. Before availability of Rubella vaccine, it was seen mostly in small children. Now about 70 percent of all cases are seen in the late teens and college-age students. The disease which is fairly contagious, has no serious effects on most people. But German measles can cause severe fetal damage when a pregnant woman contracts the illness during the first few months of pregnancy. For this reason it is true that all women should have one of the following:

• A blood test proving immunity against Rubella.
• Proof of past Rubella immunization.
• Immunization. Immunizations for Rubella are available at the Health Center.

Q: What is a condom made of and can it be re-used?

A: A condom is made of a very thin latex (hence the slang name rubber) or sometime animal membranes. Condoms can only be used once.

Q: Can diaphragms be bought at drugstores?

A: Diaphragms come in a variety of sizes and must be fitted by a RN or MD, to match the anatomy of the user. Because of this they require a prescription. If a woman gains or loses 10 pounds, she should make an appointment to be refitted.

Q: My friend drinks a lot of beer during the week and on the weekend. I mentioned to him my concern about the amount he was drinking, but he told me not to worry because it was "only beer and beer doesn't count." Is he right?

A: You may have reason to be worried. Whether your friend drinks a 12 oz. beer, a 4 oz. glass of wine or a 2 1/2 oz. shot of straight liquor, he is still drinking the same amount of pure alcohol.

The 10% Solution.

It's simple. El Corral takes another 10% off most non-textbooks and magazines. Another 10% off! Another way that El Corral helps you fight high prices.

And starting this quarter, El Corral offers hardbound best and top sellers for 35% off.

Now save on books and magazines as well as supplies.

It's simple. You save money.

save 10% on most non-textbooks and magazines.

SF host of abortion rally, both pro and con groups

SAN FRANCISCO (AP) - Northern California mirrored the nation Tuesday with rallies recalling the 1970 Supreme Court ruling allowing abortion and focusing on an increasingly violent opposition to abortion.

Anti-abortion groups said they want 'pro-life' legislatures to outlaw the medical procedure used to end all but 400 million pregnancies in the last 12 years.

Advocates of the right to abortion encouraged peaceful acceptance of legal abortion, but they predicted more of the violence that has resulted in 20 incidents of bombings and arson attacks on abortion and family planning clinics around the nation Tuesday with rallies throughout Bay area clinics since November.

California Right-to-Life founder Camille Giglio of Walnut Creek organized a weekend rally there that attracted about 300 pickets, and rallied about "the most violent manifestation of man's inhumanity to man."

Anti-abortion groups started their observances of the anniversary of the high court's abortion decision with a morning mass at St. Aloysius Church in Palo Alto, where approximately 60 people joined in a "prayer walk" to the North Santa Clara County Courthouse.

Church pro-life coordinator Robert Loomis said the purpose was to draw attention to the "permanent" abortion victims. He said young women having abortion "would only serve to criminalize it."

Supporters said ending legal abortion "would only serve to criminalize it."

Dorothy Ehrlack, executive director of the Northern California American Civil Liberties Union, argued that ending legal abortion would promote "the violence of back alley abortions."

Phone rate hike request could mean higher bills

SAN FRANCISCO (AP) - Pacific Bell made a formal request Tuesday for the $1.362 billion rate increase that it announced last fall, and said the average increase for its 8.2 million telephone customers would be 29.86 percent if the entire request was granted.

The state Public Utilities Commission is scheduled to begin hearings in April on the rate request, sought for the start of 1986.

Pacific Bell has already applied for more than one-third of the increase - $517.5 million - for the first two phases of the "general rate increases."

Any amount of the $517.5 million granted by the PUC would be deducted from next year's rate increase. The utility applies for general rate increases every two years.

The $1.362 billion is the largest rate request ever sought by Pacific Bell. Last year the utility asked for $1.3 billion and got $834 million on Jan. 1, 1984, and $131 million more on July 1, raising basic residential rates more than 10 percent and doubling the cost of a pay phone call to 20 cents.

Pacific Bell wants the commission to follow the same two-step procedure for 1986: first, decide how much money the utility needs, and charge the same percentage to all but low-income "lifeline" customers; then, apportion the increase among the various types of phone service rates later in the year.

The company announced the amount of the requested rate increase last September and estimated then that it would require a 30.9 percent surcharge.

About 44 percent of the request, $596 million, is for "capital recovery," which Pacific Bell says it needs to modernize equipment and compete with other companies following the breakup of the nationwide Bell System.

Smith leaves Canada for interview in Belushi case

LOS ANGELES (AP) - Cathy Evelyn Smith, accused of murdering comedian John Belushi with a cocaine and heroin overdose, arrived here Tuesday for an interview with police and a court appearance after waiving her court appearance after waiving extradition from Canada.

Miss Smith, 37, of Toronto, was questioned by police in California on the day Belushi's body was found. She was released after a 23-month challenge to extradition from Canada.

The $1.362 billion is the largest rate request ever sought by Pacific Bell. Last year the utility asked for $1.3 billion and got $834 million on Jan. 1, 1984, and $131 million more on July 1, raising basic residential rates more than 10 percent and doubling the cost of a pay phone call to 20 cents.

Pacific Bell wants the commission to follow the same two-step procedure for 1986: first, decide how much money the utility needs, and charge the same percentage to all but low-income "lifeline" customers; then, apportion the increase among the various types of phone service rates later in the year.

The company announced the amount of the requested rate increase last September and estimated then that it would require a 30.9 percent surcharge.

About 44 percent of the request, $596 million, is for "capital recovery," which Pacific Bell says it needs to modernize equipment and compete with other companies following the breakup of the nationwide Bell System.

After rough start, grapplers in form

By DAVID KRAFT
Special to the Daily

The Cal Poly wrestling team, which started the season in slow motion, is starting to put things into high gear.

The Mustangs were 1-6 to start the season, and 3-9 as recently as 10 days ago, but three wins over quality opponents have the Mustangs thinking of an NCAA berth instead of wait 'til next year.

The Stanford Cardinal will attest to that after the Mustangs handed them a 28-16 drubbing Saturday night in the Main Gym to complete a three match streak last week. Previously, Cal Poly came from behind in the last 1:46 to beat Cal State Bakersfield 22-20 and shut down Portland State 48-15.

The quick turnaround moved the Mustang wrestlers to 6-9 on the year going into the home dual meet tonight against Fresno State. The first bout is set for 7:30.

The win over Stanford exhibited the Mustang weakness and strengths this season — inconsistency at the lighter weights and spectacular performances at 177 pounds, 190 pounds and heavyweight.

Down 15-13 to the Cardinal, 177-pounder Dan Romero earned a convincing 15-9 win over Tom Mullen. Romero was in control throughout, and head coach Vaughan Hitchcock called the senior's performance his best of the season.

From there, the Mustangs called on their dynamic duo of Roger Sayles and Mark Tracey to cap things off. Sayles, now 17-2 on the season, pinned Kurt Kassulke of Stanford in just 1:46 to give Cal Poly an insurmountable 22-15 lead. Sayles led 10-1 at the time of the pin.

For good measure, Tracey, a 190-pounder wrestling at heavyweight because of the Mustangs' lack of depth, pinned Frank Lyles in 1:44. The win was Tracey's third of the weekend, including the match winner Thursday night at Cal State Bakersfield.

Hitchcock is confident that his team has turned the corner after the slow start.

"My general plan was for us to start slow, but not that slow," he said. "We're starting to wrestle better now, and things are falling into line."

The wrestling team will host Fresno State, tonight, 7:30 p.m. After a slow start, the men won two dual meets last weekend.
Hoopsters fall twice in LA

Five game streak ends with losses

By DAN RUTHEMEYER

The men's basketball team dropped a pair of games this weekend to even its conference record at 2-2 and dip into a four-place tie within the conference.

Poor shooting and costly fouls were characteristic as the Mustangs' five-game winning streak came to an end. The losses came to Cal State Northridge on Friday, 66-45, and to Cal State Los Angeles on Saturday, 43-46.

In the Friday game, the Mustangs started off on the wrong foot as they shot 33 percent from the floor in the first half. While making 18 field goals to the Matadors' 19 by the Matadors, the Mustangs committed 31 fouls to Northridge's 20. The Matadors took advantage of the Mustang fouls and sank 28 of 39 (71 percent) from the charity stripe.

"We created those fouls because they spread us out on defense and we fouled them," said head coach Ernie Wheeler. "They shot really well from the line."

Forward Nate Hatten was the high scorer for the Mustangs, getting 10 points in the 34 minutes he played. James Neville, who has been struggling, had his best night of the season, scoring nine points.

Hoping to bounce back from their loss, Wheeler took his team to Cal State Los Angeles for a Saturday game with the Golden Eagles.

This time Cal Poly shot 41 percent in the first half and a low 32 in the second half. While its shooting was again poor, it still wasn't enough to cause the loss.

The Mustangs converted on 14 field goals as did the Golden Eagles, but failed to shoot as well from the free throw line. Los Angeles made good on 15 of its 18 free throws while Cal Poly was only able to sink eight of their 14 attempts.

Leading the Mustang scoring was forward Derrick Roberts who netted 13 points and pulled down 10 rebounds, a team high. Guard James Wells tallied eight and Hatten finished with seven.

The Mustangs will try to improve their record Thursday when they take on Chapman College at 7:30. Saturday they will play host to Cal State Dominguez Hills at 8:05.
Men win rodeo at home

The Cal Poly men's rodeo team slung first in its rodeo held on campus this weekend. The women grabbed third.

The men took first in three events — bareback and saddle bronc riding and steer wrestling — having to settle for less than second in only one event, the all around.

For the point total, the team's count points scored by even men. The rest score individual points as club members, which don't go towards the team total.

The Poly men took the top four spots in steer wrestling: Steve Nilmeyer first, Allen Gill (club) second, Tom Gentner (club) third, Allan Reiff (club) fourth.

In bareback riding, Ed Jordan placed first, Steve Bidelman (club) second. Brian Rossier (club) was first in saddle bronc riding, with John Mitchell (club) taking third.

In calf roping, Tony Currin placed second, Nilmeyer third and Gentner third.

Nilmeyer placed third in the all around, Currin fourth.

The team received its main competition from West Hills, which finished 10 points behind Cal Poly with 470 points.

The women's team grabbed third in its meet. First place went to Hart, second to Merced.

The women's top finisher was club member Rachelle Rianda, finishing second in the breakaway.
Women forget to pack offense

Split road games behind defense

By DAN RUTHMEYER

The women's basketball team traveled south this last weekend to take on Cal State Northridge and Cal Poly Pomona, it forgot to pack its offense.

The Mustangs went into the games averaging 63 points in conference games, but were only able to muster an average of 46 points a game as they split their two southland contests, setting their record at 7-10.

Thursday's narrow 50-48 victory over Northridge was won on the merits of a strong defense and the scoring of forward Gigi Geoffrion. Shooting only 21 percent from the floor in the first half, the Mustangs were down by seven at the intermission.

Behind the jump shot of Geoffrion, the Mustangs came out in the second half and shot 43 percent from the field to edge Northridge by two points. Geoffrion finished the game with a team high 16 points and nine rebounds.

On Saturday the Mustangs traveled to Pomona to take on the Broncos where they again showed their lack of offense. The Mustangs shot bad in the first half, making only 30 percent of their shots. This time, however, things didn't get any better.

After shooting low in the first half," said head coach Marilyn McNeil, "I thought that we would do better in the second half as we had done against Northridge, but instead we shot only 25 percent."

The Broncos shot only 34 percent from the floor and ended up winning the contest by a score of 54-41.

The game was marked by sloppy offenses on the part of both Cal Poly schools. Pomona turned the ball over 28 times while San Luis Obispo turned it over 31 times.

Leading the Mustangs in scoring in Saturday's game was Trish Groo who tossed in 14 points and Pam Rhodes who added 13. Geoffrion, who scored big two nights before, failed to net any baskets as did Sherri Acton and Sue Farmer.

While the Mustang offense has been missing, the defense has showed that it is alive and well. After giving up an average of 68 points a game over the first two CCAA contests, the Mustangs allowed only an average of 51 points over the two game road trip.

"I think that we are playing the kind of defense that can beat anybody in the league," said McNeil. "Anytime that you can hold a team like Pomona to 54 points, you know your defense is doing well."

McNeil also believes that if the defense can maintain its consistency and a little more offense can be generated that the Mustangs can quite possibly beat the Broncos when they play again.

"I told the girls that if we can play that kind of defense when we play in San Luis Obispo that we can beat them," said McNeil. "The inability of the forwards to score consistently is what McNeil sees as the problem in the Mustang offense.

"We have to get some play from our forwards," said McNeil. "Somebody on that list has got to start showing up.

One of the forwards that has been in a slump is Farmer, who is the top scorer on the team with a 10.8 point a game average. In the first conference game Farmer scored a team high 18 points, but since then she has had games of four points, six points and zero points.

"Farmer might be putting too much pressure on herself," said McNeil. "She is in a slump and having a hard time getting out of it."

As the Mustangs look for the key to their slumping offense, they will get set to play a home game Saturday against Cal State Dominguez Hills, 6-45 p.m.
Campus Clubs

ALL GOLFERS may attend the first golf club meeting of '85. Officer elections and tournament plans will be discussed. Meet in the golf house at 7:30. Call 544-2677 for information.

THE琎INNATE SOCIETY will hold its weekly meeting in Room 286 until 7:30 p.m. Fellowship, Ski Equipment, VIOKO, NONT, and VETWOMAN PARTY will also be held in the same room at 9:00 p.m. Attend all events in white attire.
