Add/Drop policy change won't be seen until Fall

**BY JULIA PRODIS**

The possibility of enacting a new Add/Drop Policy by Spring Quarter suffered a setback on Friday when the Student Affairs Committee of the Academic Senate voted unanimously to recommend the policy but not to enact it until Fall Quarter.

"I got so frustrated," said Kevin Creighton, ASI President, who was present at the meeting. "The wheels of bureaucracy take forever and ever and ever.

Creighton has been pushing for a two-week-add, one-week-drop period ever since 63 percent of those students voting in Spring elections last year voted in favor of the policy.

The Student Affairs Committee voted to endorse the policy with the provision that it would not take effect until Fall. The chairman of the committee, Bill Forgeng, a professor of metalurgical engineering, was concerned with the publication of Spring schedules that already have the present Add-Drop Policy printed. To give ample time for final approval or rejection of the policy and adequate time for scheduling printouts, Forgeng said that Summer Quarter was also too soon to implement it.

Also, Creighton has been pushing for a new Add/Drop policy modified this year. However, because of a recent committee vote, the policy probably won't be changed until Fall Quarter.

ASI President Kevin Creighton has tried to get the current Add/Drop policy modified this year. However, because of the conference vote, the policy probably won't be changed until Fall Quarter.

**Speaker criticizes architecture**

**BY DAN RUTHEMEYER**

Real architecture in today's world is nonexistent, said a Southern California architect.

John Lautner, who spoke Thursday to a crowd of 200 about today's architecture and some of his work, said that many buildings made today are only superficial facades.

"It isn't architecture at all, but rather something else," Lautner said. In addition to his high-tech designs, Anderson has done work for Herman Miller Inc., the City of Dallas Planning Department and Pacific Gas and Electric Company.

Lautner succeeds in getting the client to break away from traditional design concepts in order to create new ideas to design.

Lautner was known for his designs, Anderson has done work for Herman Miller Inc., the City of Dallas Planning Department and Pacific Gas and Electric Company.

While Lautner takes credit for making a house for a plot of land that had many rocks, he told the owner to dig down eight feet so that he could incorporate the rocks into his design.

While the additional digging cost the owner $80,000, it gave him a very unique house.

Once confronted by a client who wanted a beach house with a swimming pool, Lautner put in the beach house and the swimming pool.

"I don't want someone to tell me what some other architect said," Lautner said. "I just want to know what they want."

In another project involving rocks, Lautner had $150,000 worth of rocks brought in special.

"I don't want someone to tell me what some other architect said," Lautner said. "I just want to know what they want."

Better now than later

The adage “Better late than never” seems to be a rule that the Student Affairs Committee makes decisions by.

When the students were asked to vote on the new drop policy to allow changes in academic schedules after the drop period, they voted to extend it. However, this policy has not been implemented yet.

The reason behind this delay is the bureaucratic system. The Academic Senate has to approve the policy before it can be implemented. This process takes time and can be frustrating for students.

The three quarters I've accumulated in my journalism career have taught me that it's important to be flexible in order to get the information needed for a story. I've learned that sometimes it's not easy to get what you want, but it's important to keep trying.

The fact that the policy has not been implemented yet is frustrating, but it's important to remember that it will be implemented eventually. The students have already been waiting for this change for a long time, and it's only fair that they get it.

The Mountain Daily is a great source for current news and information. The editors and writers work hard to bring you the most up-to-date information possible. If you have questions or concerns, you can write to the editor at Mustang Daily, California Polytechnic State University, San Luis Obispo, CA 93407. Letters should be kept as short as possible, and they must include your name and address. Letters will be reviewed for length and style and omitted if libelous statements.

My name is Leanne Alberts, and I'm a senior journalism major and a staff member of the Mustang Daily. If you have any questions or concerns, feel free to contact me.

Reader says ordinance overdue

Editor:
Recently the Mustang Daily has run some editorials attacking the City of San Luis Obispo and its policies. As a twelve year resident of San Luis Obispo and a 22-year-old student attending Cal Poly, I feel obliged to make some comments.

It seems completely ridiculous to me that you are making such a big issue out of the noise ordinance law. This law is long overdue in the eyes of the community. Students, I agree, have rights, but so do the residents of San Luis Obispo. In the twelve years I've spent here, there have been hundreds of parties in town and several have been next door to my parent's home. Only once in all those years did my parents call the police, but there were countless times that we lost sleep because of thoughtless party givers and greets next door. Not once were we informed of an impending party. If the students at Cal Poly who gave these parties showed respect and courtesy for their neighbors in the first place, there would be no need to establish such a law. Continued abuse of the community can only be allowed for so long before the community fights back and this is truly a case of continued abuse.

Furthermore, you stated that Cal Poly students comprised half of the population of San Luis Obispo. According to the San Luis Obispo Planning Department, there are 30,000 residents in San Luis Obispo without the students. I wish you would at least get your facts straight before printing them.

Lastly, in your argument for the Greeks on campus you stated that this "quiet, sleepy little town would suffer greatly without the money brought here by students." Yes, San Luis Obispo would suffer, but it would survive. Cal Poly was not found due in the eyes of the community fights back and this is truly a case of continued abuse.

I tend to agree that the decibel level may be too low, but it has to start somewhere. Maybe in the future it will be raised if it is proven that noise levels in that range do NOT offend area residents. Only time will tell if the students can learn to respect the community that is making their stay here possible in the first place.

Thank you for listening to this situation from someone who's been on both sides of the fence.

Elizabeth Shaw

Writer called to define 'average' person

Editor:
This letter is in response to the letter from Douglas Rosenfeld published in response to my letter, which was in response to the letter from Al Polito in regards to the issue about printing the Log Cabin ad in the Mustang Daily. I'd like to thank Mr. Rosenfeld for the law lesson. He referred to the California Penal Code, section 311.5, subsection A, which defined obscene matter as matter that has shameful or morbid interest in nudity or sex, as determined by the average person.

I'd like Mr. Rosenfeld to introduce me to this "average person" so that I could get definition of obscene matter and then make myself a list of books, magazines, TV shows and movies that I should not see.

This should protect me. Thank you.

Michael Jarvis

Wear Glasses And Want To Fly?

Be part of the Navy aviation team - a Naval Flight Officer. As a flight officer, you'll be responsible for controlling complex, on-board weapons and navigation systems on sophisticated Navy aircraft. As a flight officer, you'll be given advanced technical training. You'll gain early responsibility. And you'll have the chance for worldwide travel.

QUALIFICATIONS: Minimum BA/BS degree summer graduates may apply. Applicants must be no more than 29 years old, vision correctible to 20/20. Relocation required. Applicants must pass aptitude and physical examinations and qualify for security clearance. U.S. citizenship required.

BENEFITS: Excellent package includes 30 day's earned annual vacation. Medical/dental/low-cost life insurance coverage and other tax-free incentives. Dependents' benefits available. Promotion program included.

CA&H week begins today
Open houses, films planned

By LISA MCKINNON
Special to The Daily

Open house at the Mustang Daily, a showing of the film "Doctor Strange Love" and general assembly to be attended by President Warren Baker are a few of the events planned to celebrate the first annual Communicative Arts and Humanities Week, which begins Monday, Feb. 11 and will continue through Friday, Feb. 15.

"CA & H Week is a matter of visibility and self-identification," said Bonnie Swanson, associate dean of the School of Communicative Arts and Humanities. She added that the students who have organized the week-long series of events are an energetic group who would like to make the school a more visible segment of Cal Poly departments, clubs and student organizations within the school will be participating in CA & H Week by offering open house, exhibit and lecture events throughout the week.

On Monday, Feb. 11, the art department will kick off the festivities with an exhibit of drawings, photographs and paintings available for viewing from 6 p.m. to 9 p.m. through Feb. 15 in the gallery foyer of the Art Department, Air Conditioning Building room 195.

The History Department will combine forces with the history club in sponsoring a showing of "Doctor Strange Love," a film classic starring Peter Sellers, Monday night at 7. The film will be shown free of charge in University Union Room 218.

On Tuesday, Feb. 12, the Mustang Daily offices will be open to students and faculty who are interested in finding out how the reporting and editorial staffs produce the Daily. Members of the Society for Professional Journalists, in conjunction with the Daily editors and staff writers, will be available to answer questions from 10 a.m. to 2 p.m. in Graphic Arts building room 226.

Students and faculty are also invited to attend a meeting of the Cal Poly Model United Nations in UU Room 216 at noon on Tuesday. The MUN provides practical experience for students interested in international affairs. With over 60 colleges and universities participating and more than 1300 delegates representing 145 nations at tri- yearly conferences, the MUN class-club generates learning opportunities for the 30 Cal Poly members.

In addition to an all-day blood drive in Chumash which starts at 10 a.m., the Wednesday, Feb. 13 schedule includes a debate to be presented in UU Room 219 at noon by Cal Poly forensics group Pi Kappa Delta.

Also scheduled for noon on Wednesday is a mime program featuring Cynthia Nazzaro and Fran Dukehart. The show, sponsored by the Cal Poly Theatre and Dance Department, will take place in the arts Atrium of the San Luis Obispo County Courthouse.

From 1 to 3 p.m. on Wednesday, the Music Department will present an exhibit on composition and music on the lower floor of the Cal Poly theater building.

The schedule of events for Thursday, Feb. 14 will begin with a general assembly in UU Room 220 from 9 to 10 a.m. Area high school and community college students have been invited to bring the assembly to the assembly, where President Warren Baker and Communicative Arts and Humanities dean Jon Ericson are expected to speak on the benefits of attending Cal Poly.

A lecture on "Music From Kiruna to California," will be presented by Terry Riley as part of the Arts and Humanities lecture series at 11 a.m. Thursday in UU Room 220 Riley's talk will deal with the Masters of the Kiruna School in north India and their influences on his own work with synthesized sound.

On another musical note, the Cal Poly Jazz Band is scheduled to perform at 11 a.m. Thursday in the UU Plaza.

Also planned for Thursday is the Political Science Department open house, scheduled to take place in Faculty Office Building room 105 from 11 a.m. to 1 p.m. Refreshments will be available.

The CA & H Weekaffle drawing will take place in the UU Plaza at noon on Thursday.affle tickets cost 50c and prizes include albums, clothing, ASI movie tickets and dinners at local restaurants.

A lecture sponsored by the Philosophy Department will follow at 12:30 p.m. in UU Room 220. In "What is Retributive Justice?" University of California, Riverside professor Oliver Johnson will speak on the philosophical aspects of punishment.

Cal Poly English professor Max Durandt will give a preview of his Eng 253 course in a seminar entitled "Romanticism and the Modern World" in UU Room 216 at 3 p.m. on Thursday, Feb. 14. Durandt will introduce the syllabus for the Spring 1985 sections of the course, discuss his teaching methods and encourage student input on the course's structure.

Pi Gamma Mu, in conjunction with the Multi-Cultural Center, is sponsoring a discussion of the cultural differences between the African and American educational systems on Thursday at 7 p.m. in the San Luis Lounge.

Last but not least on Thursday, the Theatre and Dance Department invites students and faculty to attend an open rehearsal of "Crimes of the Heart," the Winter Quarter Cal Poly production, in the Theatre Building room 212 from 7 p.m. to 11 p.m.
Executives to speak on campus

BY SUSAN EDMONSON

Executives from 15 major corporations will speak to a variety of classes and participate in panel discussions today and Tuesday for the 19th annual Cal Poly Business Seminar.

"It's a really good professional training ground — working and speaking with the executives and feeling comfortable with them," said Craig Ryder, a senior business major and executive chair for the event.

The seminar is sponsored by the Society for the Advancement of Management and the Business School. The theme this year is "New Horizons Through Communication."

Some of the companies represented in the seminar are Shell Oil, PG & E, Lockheed, IBM, Chevron, and Arthur Anderson Company. Ryder said some of the executives enjoyed the seminar so much last year that they are returning for a second year.

"No other campus has anything like this and that's why I think the executives are really impressed at what a good job we do," he said.

Three panel discussions will be held today and one panel discussion will be held on Tuesday. The panels consist of three to four executives who give a basic background of themselves and their jobs for about ten minutes. About 30 minutes are allowed for students to ask questions of the executives.

The four panel discussions are:

- Finance — "Corporate Finance," 9 a.m. Monday in University Union Room 220.
- Management Information Systems — "Computing for Tomorrow," 10 a.m. Monday in University Union Room 220.
- Accounting — "The Language of Business," noon Monday in University Union Room 220.
- Marketing — "Careers in Marketing," 11 a.m. Tuesday in Room 225 of the Architecture and Environmental Design Building.

In addition to participating in panel discussions, executives will also speak to classes in many departments. "We have people going to the Graphic Communications Department, the Journalism Department, people going into industrial technology, construction. Everything is really related to business eventually," said Ryder.

A control board in the lobby of the Business Administration and Education Building lists the times and locations of classes with executive speakers. Students are invited to attend any of the speeches even if they are not enrolled in the class.

Students are also invited to a cocktail party with all of the executives at 6 p.m. tonight in the wine cellar of the Madonna Inn.

The seminar concludes on Tuesday with a luncheon in Chamise Auditorium. Dean O. Morton, executive vice president and chief operating officer at Hewlett-Packard Company, will be the keynote speaker.

Love your Valentine carefully this week

BY DONALD MUNRO

Valentine's Day is traditionally a time of romance and fun, but it can also be a time of stress and anxiety for people who are single or in a relationship.

The Health Center also wants students to take time to think about contraceptive responsibility and the consequences of sex without protection.

"Love Carefully Week" begins today and runs through Thursday, Feb. 14. Activities will include speakers, a movie and free birth control information.

"We do this to make people more aware of their relationships," explained Terry Hebert, a senior recreation major and peer educator group at the Health Center.

A defense against cancer can be cooked up in your kitchen.

There is evidence that diet and cancer are related. Follow these modifications in your daily diet to reduce chances of getting cancer:

1. Eat more high-fiber foods such as fruits and vegetables and whole-grain cereals.
2. Include dark green and deep yellow, green, and purple vegetables rich in vitamin A.
3. Include cabbage, broccoli, brussel sprouts, kohlrabi and cauliflower.
4. Be moderate in consumption of salt-cured, smoked and nitrated foods.
5. Cut down on total fat intake from animal sources and free oils.
6. Avoid obesity.
7. No one faces cancer alone.

Curriculum criticisms by panel, should include nine basic study areas

WASHINGTON (AP) — Col-
lege curriculum has been so
watered down that "almost any-
things goes" and the bachelor's
degree has lost its intrinsic
value, a panel of prominent
educators said Sunday.

"The curriculum has given way
to a marketplace philosophy: it is
almost anything goes," the panel said.

The report came as part of a three-
year study by an 18-member task
force charged by Dr. Robert H. Curtiss,
the association president. The panel urged
colleges to adopt "a minimum required cur-
riculum of nine basic intellectual,
artistic and philosophical experi-
experiences." It described the nine
basic skills as:

- The ability to think abstract-
ly and perform critical analysis.
- Literacy in writing, reading,
speaking and listening.
- Understanding numerical data.
- Historical consciousness.
- "Intellectually at ease with
science.""Values, or the capacity
to make informed and responsible
choices."
- Appreciation of the arts.
- Communication in oral and
multicultural experiences.
- Study in depth. The senior
thesis, a year-long essay or simi-
lar projects give students "the
joy of mastery" and the reali-
...
Weinberger calls on NATO to support the proposed 'Star Wars' technology

MUNICH, West Germany (AP) — U.S. Defense Secretary Caspar W. Weinberger said Sun­
day there can be no retreat to plans from develop a space-­
based defense system that would protect the United States and its European allies from nuclear missile attack.

Weinberger said that President Reagan's proposed Strategic Defense Initiative — popularly dubbed "Star Wars" — would raise the hope that "peace can be maintained not by the threat of nuclear destruction but by a strong defense that could not on­ly deter, but defeat, the most awful offense of all."

The secretary's remarks came in a speech that Weinberger was scheduled to deliver to an annual debate of leading North Atlantic Treaty Organization defense of­
icials, diplomats and foreign policy specialists.

Bad weather delayed Weinberger in London and his address was delivered by Assis­
tant Secretary Richard Perle.

In London, U.S. Embassy spokesman Sig Cohen said Weinberger flew to Munich Sun­
day and spoke behind a curtain for two hours after a two-hour delay caused by technical pro­blems due to freezing weather.

The real issue with Star Wars, you might argue, is whether Europeans will become hostages to the Soviet Union as the United States retreats to an illusory fortress across the ocean," Weinberger said.

But he added: "There is no for­
tress, and there can be no retreat. America could not sur­
vive, nor live, in a world in which Europe was overrun and con­
quered."

Responding to critics who say the strategic defense program will be too expensive and accel­
erate the militarization of space, Weinberger said the plan "would provide insurance against a world in which the Soviets — and the Soviets alone — could brandish their sword from behind the protective shield they are contin­
uing to develop.

U.S. officials have been trying to assure NATO allies that the Star Wars program, if found to be technologically workable, would also protect Western Europe.

U.S. Sen. Gary Hart, D-Colo., another conference participant, criticized the space weapons plan, saying it would be dangerous and military problem — namely, the nuclear arms race.

Hart also said the deficit-squeezed U.S. government has not yet decided how it would foot the estimated $26 billion bill for Strategic Defense Initiative research over the next five years. U.S. representatives at the conference have invited the European allies to take part in the research effort for the plan.

In the opening speech Satur­
day, West German Chancellor Helmut Kohl said the strategic defense program had motivated the Soviet Union to return to arms control negotiations.

But French Defense Minister Charles Hernu said in another address the plan would trigger a dangerous new drive for offen­sive arms to "overwhelm" a space defense.

A survey of European leaders in Bonn, Paris, Brussels and London by the Congressional Research Service has found that most government officials in Western Europe favor continued research on the space defense program but are overwhelmingly opposed to its deployment. The New York Times reported Sun­
day the survey, requested by Sen. William Proxmire, D-Wis., found the European leaders favored the research partly as a hedge against possible Soviet breakthroughs and also because they believed it cannot be stop­
ped, the newspaper said.

CBS to call star witness in libel case

NEW YORK (AP) — Lawyers for CBS will call one of their most important witnesses to the stand this week in their defense against retired Gen. William C. Westmoreland's $120 million libel suit, CNN anchor Frank C. Col. Gains Hawkins, who was in charge of estimating enemy strength for Westmoreland's staff in Vietnam, was interview­
ed out for a report to President Lyndon B. Johnson and other policy makers.

Hawkins, scheduled to begin testifying late Monday or Tues­
day, was Westmoreland's defense witness who was highly placed in Westmoreland's command in the fall of 1967 when the final figures were being thrashed out for a report to President Lyndon B. Johnson and other policy makers.

On the broadcast, Hawkins argued for months with the CIA over what the enemy strength would be and he got the message that "we can't live with a number higher than a cer­
tain level," — Hawkins said in another documentary, "The Uncounted Enemy: A Vietnam Deception," which is the basis of the general's suit.

Many of the network's other witnesses have testified that they believed Westmoreland im­
plied a ceiling on estimates of enemy strength, though they did not have first-hand knowledge.

As the broadcast, Hawkins said Westmoreland's staff, which argued for months with the CIA over the enemy strength, estimate should be, had gotten the message that "there's no point to a defense plan" that Westmoreland "disputed the truth about Vietnamese Com­
munist strength in order to maintain political support for the war." But Hawkins is the only defense witness who was highly placed in Westmoreland's command in the fall of 1967 when the final figures were being thrashed out for a report to President Lyndon B. Johnson and other policy makers.

Hawkins, scheduled to begin testifying late Monday or Tues­
day, was Westmoreland's defense witness who was highly placed in Westmoreland's command in the fall of 1967 when the final figures were being thrashed out for a report to President Lyndon B. Johnson and other policy makers.

Seeded players fall
Lloyd, Wilander advance in Players

DORAL, Fla. (AP) — The No. 2 seeds — Chris Evert Lloyd and Sweden’s Mats Wilander — continued their winning ways, while three seeded players tumbled Sunday in the $1.8 million Lipton International Players Championships tennis tournament.

Kathy Rinaldi eliminated No. 8 Zina Garrison and West Germany’s Bettina Bunge ousted No. 14 Pam Casale in women’s play, and hard-hitting Mike Leach upset No. 10 Jimmy Arias in the men’s singles.

In a night match, the women’s top seed, Martina Navratilova, met Sweden’s Caterina Lindqvist with the victor moving into the quarterfinals.

The singles winners here on the hardcourts of Laver’s International Tennis Resort will pocket $112,500 each. The tournament, the only non-Grand Slam event with a two-week format of 128-player fields for both men and women, is jointly owned by the men’s Association of Tennis Professionals (ATP) and the Women’s Tennis Association (WTA).

No. 12 Barbara Potter defeated Switzerland’s Lilian Drescher 2-6, 6-1, 6-0; No. 7 Hana Mandlikova of Czechoslovakia handled 13-year-old Mary Joe Fernandez 6-3, 6-0; and No. 10 Carling Bassett of Canada downed 14-year-old Gabriela Sabatini of Argentina 6-0, 6-4.

Rinaldi advanced into the fourth round.

Decker drops out from leg cramp

EAST RUTHERFORD, N.J. (AP) — The injury to star-crossed Mary Decker Slaney in the Vitalis-U.S. Olympic Invitational track and field meet might be more serious than first believed, her coach, Dick Brown, said Sunday.

Slaney was forced to withdraw from the women’s 1,500-meter race Saturday night with just over two laps remaining with what at first appeared to be a severe cramp in her right calf.

Ireland’s Eamonn Coghlan, named the meet’s outstanding male athlete, increased his four-year indoor winning streak to 15, including seven this year, rallying to beat Sydney Maree in the mile in 3:52.37, the fastest of the indoor season. Maree finished second in 3:52.40, the second-fastest ever by an American.

Dave Reynolds hits a backhand.

No one can stay up with netters
Men take fifth straight easily

By NANCY ALLISON

The Cal Poly men's tennis team has a dilemma — they can't seem to find any competition. The netters won their fifth straight match Saturday, defeating Santa Clara at home, 7-2.

The win brings the Mustangs' record to 5-0, 2-0 in conference. Poly's Brian Bass made his debut at No. 1 singles after suffering injuries from a bike accident.

Poly took four singles points, with wins at No. 3 through No.6 and captured all three doubles matches.

"We played real well in the lower singles positions," said coach Hugh Bream. "Paul Landry (No. 4 singles) has lost only seven games in his last four matches, which is an example of how dominating we have been in the middle of our line-up."

The Mustangs experimented with new doubles teams at No. 1 and No. 3, with positive results. Rob Pritzakow paired with Tom Salmon to beat Don Ballew and Pat O'Connor, 7-5, 7-1, and Brian Bass slipped into the No. 3 spot with Bob Zeller to beat Santa Clara's Paul Lecardo and Steve Otten 6-7, 4-6.

Decker Reynolds and Paul Landry remained in their No. 2 position where they were undefeated this season. They overcame Frank Seitz and Jeff Christenson in a close match his debut at No. 1 singles after suffering injuries from a bike accident, but could not overcome Santa Clara's Jeff Christenson, who won 6-1, 6-7, 10-8.

Poly took four singles points, with wins at No. 3 through No. 6 and captured all three doubles matches.

Both hoop teams drop two weekend games

Women beaten easily by No. 19, then downed in overtime by SD

By DAN RUTHEMeyer

Dropping a pair of games over the weekend, the women's basketball team had its record slump to 7-14 with only five games left in the season.

After getting whipped, 83-63 Thursday by No. 19 Cal State Dominguez Hills, the Mustangs returned home Saturday only to be edged by non-conference opponent University of San Diego, 119-47.

In Thursday's defeat at the hands of Dominguez Hills, the Cal Poly defense was brutally assaulted by the physical offense of the Lady Toros.

After allowing an average of only 62 points a game to conference opponents, the Mustang defense buckled under the pressure of the strong Dominguez Hills offense, giving up 83 points.

Although Cal Poly had beat the Lady Toros earlier in the season, they did so without having to face DeAndra Johnson, the Toros' starting center. Scoring 18 points and pulling down 13 rebounds Thursday, Johnson led the vengeful Toro attack.

"Johnson really made a contribution for them," said Mustang coach Marilyn McNeil. "She made the difference for them."

While the Cal Poly defense had trouble holding off the potent Dominguez Hills attack, the offense was led by the double figure scoring of four players.

Carol Mills and Sherry Attebery each tallied 13 points for the Mustangs, while Trish Groo and Gigi Geoffrion each netted 12.

In the Saturday game against San Diego, the Mustangs came out hot as they scored the first six points and held the San Diego offense scoreless in the first six minutes.

While getting accustomed to the cold San Luis Obispo weather, the San Diego Toreros outscored the Mustangs 20-6 to start the upper hand.

Although they made the first six points, the Mustangs did little in the first half as they converted on only eight of their 18 shots. The first of this poor shooting, the Mustangs found themselves down 29-19 at halftime.

In the second half, the Mustangs scored 13 unanswered points and they found themselves back in the game.

A jump shot by Groo with 3:30 left on the clock tied the game at 45 and had the Mustangs looking for a come from behind victory.

The Toreros wouldn't give up easily, however, as they took a 49-47 advantage with only 22 seconds remaining.

A desperation shot by Mills at the buzzer didn't fall and Cal Poly had come up one bucket short, 49-47.

Leading San Diego in scoring was Mary Stanbra who tallied 16 points and pulling down 13 rebounds.

The Mustangs were led by Attebery who added 18 points and pulling down 13 rebounds.

Once again, the Mustangs were victims of their own mistakes as they committed 22 turnovers and some untimely fouls in squandering a second-half lead and letting the win slip away in the final moments of regulation play.

Given a reprieve, the Toreros made most of their overtime opportunity, outscoring the Mustangs, 7-2, to take the victory.

Mustang forward Nate Hatton lead all scorers with 20 points, while center Jim Van Winder

FREE SPINAL EXAMINATION

Johnston Chiropractic Clinic, Inc. is sponsoring a spinal check up and Scoliosis Screening program as a public service. This service will include consultation, physical examination and a report of findings.

WARNING SIGNS OF SPINAL MISALIGNMENTS

- Recurring Headaches
- Dizziness, Blurred Vision
- Neck, Shoulder & Arm Pain
- Low Back & Leg Pain
- Pain Between Shoulders

- Numbness in Hands & Arms
- Loss of Sleep
- Difficult Breathing
- Numbness in Legs & Feet

If you suffer from any of these warning signs call immediately to prevent possible advancing complications. This Free Spinal public service is for a limited time only, by appointment, please.

Men continue to fall, lose seventh straight

The Cal Poly men's basketball team went on the road over the weekend with hopes of climbing the conference ladder. Unfortunately, the only direction it did go was toward the cellar.

The Mustangs lost their sixth and seventh straight California Collegiate Athletics Association games, dropping decisions to Dominguez Hills and Chapman College.

Despite shooting 61 percent from the floor and outscoring Dominguez Hills 27-23, the Mustangs faltered in overtime, 59-54.

Flutie doesn’t leave bench
USFL uses videotape to review calls by officials

By TIM LEPORE
AP Sports Writer

INDIANAPOLIS (AP) — Ralph "Flutie" Flutie didn’t leave the bench after a quick start in the first quarter. Early in the fourth period, the East was shooting only 38.4 percent from the field.

The West never trailed after taking a 34-33 lead late in the first quarter, although the East managed five ties after that.

George Gervin followed Sampson in the West scoring column with 23 points, 15 of them in the first half, while Earnie "Magic" Johnson had 21 points and 15 assists.

For the East, Isiah Thomas had 22 points, Larry Bird 21 and Magic Johnson 18. Bird’s basket after a quick start in the fourth quarter sealed the East’s 96-90 victory over the West.

The membranes of the National Basketball Association All-Star Game’s Western Conferenceเกม drop the losing streak Sunday over the cold-shooting Eastern Conference.

Valuable Player of the game, from pago 9

The 7-foot-4 Sampson, who with fellow All-Star Akeem Olajuwon, forms the Houston Rockets’ imposing "Twin Towers" offense, also had 10 rebounds. He was named Most Valuable Player of the game.

The losses dropped the team’s 139-117 overall and 0-7 in CCAA play.

Flutie, the Heisman Trophy winner from Boston College, stood on the sideline as expected Saturday night during the New Jersey Generals’ 21-7 loss to the Tampa Bay Bandits.

Gene Bradley and then Ron Reaves took the signals for the Generals. And Reaves wound up being ruled the quarterback in the USFL’s first experimental use of a television replay.

"We were a little surprised that the appeal had been denied. If the ruling had been reversed, no time out would have been assessed," Lepore said after the game.

Lepore said the replay experiment would be tested again in Saturday in Houston’s game at Birmingham; then the league will decide whether to use replays during the season.

"I sort of like the idea that I would see, "’Flutie’ was responsible for this,” Lepore said. "But it’s a little too early for that.""
Rainout leaves women unready for tough rival

BY NANCY ALLISO

The Cal Poly women's tennis team dropped its first conference match to sister school Cal Poly Pomona at home on Saturday 6-3.

The Mustangs were scheduled to play U.C. Riverside Friday, a match that could have better prepared the netters for their Pomona encounter, but the rain prevented it.

As a result, the netters went into their match with the com­mon first-match jitters, playing on the cautious side.

"We were a little tentative in singles," said coach Orion Yeast, "but I'm not taking anything away from Pomona—they come here to play tennis, and that's what they did."

Polly's three wins came from No.1 singles player Sally Russell, who had no problem with Pomona's Pat Choomgern, 6-2, 6-4; and from No. 6 singles Kim McCracken, who was the only Mustang player to win in both singles and doubles.

McCracken won the first set in singles 6-0, but then ran into trouble in the second set, falling 6-0. She fought back in the third to close out the match 6-3 against the 'Bronco's Melanie Leong.

Polly still had a chance going into doubles, but the netters could win all three of the matches.

In No.1 doubles, Kim McCracken and Laurie Magin pulled out a tight three-set victory, 6-2, 6-3, 6-3, but the No.2 and No.3 doubles didn't fare as well.

Sally Russell and Cristin Laverte (No.3) lost 6-2, 6-4 to Saundra Rodriguez and Melanie Leong where No.3 doubles Kathy Orahoad and Wendy Elliot were ousted by Pat Choomgern and Julie Gillespie 6-1, 6-1.

The netters are hoping to improve their record tomorrow when they play Westmont Col­lege here at 2:00.
