**Bomb threat closes library**

By JOHN BACHMAN

A bomb threat on Tuesday forced campus police to evacuate several hundred students and people and keep Robert E. Kennedy Library closed for more than two hours. No bomb was found.

Two telephone calls were made to the library and seven officers searched the building for more than two hours. The library was reopened at 2:35 p.m. when no bomb was found.

The first telephone call came at 10:30 a.m. to the library's circulation desk and starkly stated, "Do you know John Ruehl? He said it was a male voice that threatened to blow up the library.

According to Cal Poly Public Safety Director Richard Brug, the campus police started to evacuate the library but did not go from the content of the call that was made. The second call came at 11:30 a.m. and another call was received. This time in the library director's office. A man complained that the first call was not a threat and he repeated the bomb threat. The campus police then cleared the building, said Brug.

Even though the building was under police sanction from the start. You have a very eerie feeling. Brug said, but we got to be safe. We didn't feel it was a real threat, but no threat at all. We are not going to take anything for granted.

The officers searched the library again until 2 p.m. and there was no bomb. Bomb threats are fairly common, said Brug, but this threat was more than just a joke. Bomb threats are fairly common, said Brug, but this threat was more than just a joke.

"They can kill people with a bomb," said Brug. "So we take every threat seriously."

\[\text{Richard Brug}\]

This campus is a little better than most, said Brug about the state of bomb threats. We're going to work on some leads, said Brug. We'd like to catch the people who are doing this. The first call to the library was picked up by Ruehl. He like the campus police, didn't think the call was serious.

"If we had to move in, it said, Brug. "I would say no bomb. If I had to tell my life on the line, I wouldn't do it."

Students wait outside the Robert E. Kennedy Library while campus police search for a reported bomb. The library was reopened when no bomb was found.

**Civil rights activist calls for student involvement**

By T. WILLIAMS

When 900 people were told Monday night that they have the power to change the world, but that it is a big job and it is going to take time.

Dick Gregory, a 44-year-old comedian, author and civil rights activist, told a sold-out audience in Thurman Auditorium when they would stop letting themselves be reduced to "insignificant nothingness.

He said that society has been reduced to an annual level. If someone told you that smoking in your car would ruin it, you wouldn't smoke in the car no more," he said. "But those surgeons have been telling you for years that smoking's bad for your body and you won't stop. You care more about your cars than your body.

Gregory said that people don't have a damn about your voting machines. But you should because if I was in your garage, I would determine what kind of ride you would have, not you. Something's wrong.

He said that people are too passive and sit by idly when they know something is wrong. "You buy new clothes to look

Opinion

Concert committee: use your resources

Geography of Resource Utilization is a course on this campus that many students don’t know about.

The course title makes it sound simple, it is a class that deals with utilization of the resources of the earth. Although it deals more with natural resources and agricultural trends, a valuable lesson can be learned by all students at Cal Poly.

The concept of resource utilization is one that is often ignored in many of our “learn by doing” classes. It is replaced with the saturation of trivial details that rewards those students with good memories, not those who know how to use the tools that will be available to them in the real world.

The proper use of available resources is also an important skill that needs to be used by our student leaders.

A prime example of this is the ASI Concert Committee which is currently trying to work off a large deficit that it incurred last quarter.

In defense of the deficit, the lack of a facility large enough to accommodate enough concert goers to make a big name band possible has been used.

But there is a resource on campus that has been virtually ignored by almost all campus groups. Mustang Stadium has a capacity of more than twice that of the Main Gym were all concerts are currently held.

The financial impact of this is quite obvious, more than twice as many seats will equal twice as much money available for bigger named performers.

The Mustang Daily Editorial Board would like to encourage the leaders of the concert committee to aggressively pursue a stadium concert during Poly Royal weekend.

The reason why the stadium could not be used. Athletic shoes should allow facilities to be used by all responsible parties on campus.

The majority of residents within hearing distance of the stadium are students, thereby reducing the probability of noise complaints from the city.

Actively polling the students around the campus for preference of performers will ensure adequate attendance in the larger arena.

ASI concerts has the opportunity to provide the students with a big name performer at a reasonable price, while at the same time reducing it’s deficit.

With the proper utilization of the available resources there is no reason why the concert committee cannot fulfill it’s obligations to the students here at Cal Poly.

Reporters Notebook

A day’s work for a liberal with a conservative commentary for National Public Journalist. John McLaughlin.

Named performers.

City of more than twice that of the main gym were all concerts were held. The focus of production of two television stations concert during Poly Royal weekend.

Things did not go as predicted.

McLaughlin Group and John McLaughlin’s show on the McLaughlin Group consists of four syndicated columns who discuss the hottest five or six news items of the week. McLaughlin acts as moderator. Most of the political spectrum is represented by the two conservatives and two liberals. McLaughlin tips the scale a bit in favor of his conservative comments. Needless to say, the show is never boring.

“We need your liberal input in the production meeting today.” McLaughlin calls to me from his office. (Being a Democrat.) “I am working in such an environment, if I said that Mondale was a Communist, I was being a bleeding heart!”

Production meetings are brainstorming sessions. In discussing what issue would be covered in one week’s episode of “The McLaughlin Group” questions would undoubtedly be raised. What did Brokaw lead with last night? What stories appeared on the front page of today’s Wall Street Journal? What clips do we have from the Today show? What are the issues this week?”

I was greatly disappointed in the omission of key details that it gave a drastically different and incorrect impression of what actually happened at our meeting.

Two of the reasons that we in our last Senate meeting gave a drastically different and incorrect impression of what actually happened at the meeting were that we had some concerns about the Foundation's operations and felt that students should be made aware of certain accounting subtleties of the Foundation. While these issues were discussed at our meeting, you failed to address them in your coverage of Foundation Accounting subtleties of the Foundation. While these issues were discussed at our meeting, you failed to address them in your coverage of Foundation Accounting subtleties of the Foundation.

Al's response that University Services is charged as a non-operating expense because it is not an operating expense, fails to address the basic question of why it is considered an expense at all. Students should be aware that money made in the bookstore, food services, etc. does not all go back into these areas but is also used to fund University Services, which include such areas as Public Affairs, Alumni Services, and Athletic Fund Raising. Kevin's next question, in fact, dealt with athletics.

Q. "When you state that the Foundation is being repaid that $300,000 that was given to the Athletic program out of University Services, aren't you really saying that the money is being written off by the Foundation?"

A. "It's going to be paid for by our operating departments."

Q. "Okay, but it's not really being paid to the athletic department."

A. "No.

Q. "Unless there is additional fundraising?"

A. "Right.

It is inconsistent for Amaral to say President Baker wants to be above board and have all his actions open to the public, and then refuse to disclose public information concerning the President's fund. It is misleading to suggest athletics will pay off its Foundation loan, when actually the Foundation is paying some, if not all, of this loan itself. Finally, it is simply untrue to imply that all bookstore earnings go back into the bookstore, when actually the bookstore, and other Foundation operations, fund University Services, which incidentally amounted to about $124,000 this year.

Thank you for allowing me the opportunity to set the record straight.

Steve Dunton
ASI Senator
School of Engineering

Fundraising policies criticized

Editor:

Remember the "skip a meal" event? Well it was a great success, mostly because of the dorm students. I call the event a success because we were able to raise $8,000 for Oxfam America, who in turn would buy hoses, pumps and seeds for African countries. The money is still in the hands of the Foundation due to paper work. The reason I am writing this letter is to let you students become aware of a certain policy. The policy was that whenever a club raises more than $85 in profit, they must give 10 percent of the money to the ASI, regardless of the cause of the fundraising.

In other words, raising money for a Greek society party is equivalent to raising money for a club to attend the world series. This is, of course, according to the policy, since both are treated the same.

The 10 percent taken from the club is "used for beautifying and improving the campus." In deed a reasonable cause. The unexpected result is that money comes to raising money for charity. Ten percent is taken away from the money that we have raised, is denying aid to people living on the edge of life and death and when weighed against beautifying the campus, our financial support must go with the people.

I hope that by the above paragraphs, I have been able to express my discomfort with this policy. I feel that the ASI should change its current policy and reconsider the way they gain funds for their purposes.

I would ask you the students, to express your feelings to the ASI also, since it is a student body organization.

Serge Mudikian
Easter you honor him, but you won't get rid of capital punishment. If Christ lived in this society, you'd all be walking around with electric chairs around your necks.

Gregory mentioned that there are cultural differences between blacks and whites too and that being white is an attitude. "Being white is an attitude that you can't have unless you got big bucks," he said. "And wish black folks could be invisible for a day so they could hear what black folk say about the way they dance.

Gregory also stressed the importance of physical health. "Take care of your bodies -- they're all you got," he said. "If you stimulate the blood and keep your immune system in tact, then you won't be able to trick you anymore." Gregory took part in a 71-day medically supervised fast in 1981 to improve fasting methods and to show that the body doesn't need food, it needs nutrition. Ninety percent of everything you eat is plastic food.

It was Gregory's way of teaching in the states. "It figures that they'd have us the shortest month of the year. But he said that February is a bad month for blacks. "It figures that they'd give us the shortest month of the year," he also said. "That's the worst day of the year for blacks in Feb. 22. Could you imagine how degrading it is for blacks to have to celebrate George Washington's birthday -- he was a slave owner. That would be like the Jews celebrating Hitler's birthday."

Gregory was directly involved in the Civil Rights movement of the 1960s and said that it opened a crack in society and said, "God bless you. As the crowd gave Gregory a standing ovation at the conclusion of his presentation, he returned the applause to the audience and said, "And don't forget you've been sleeping with him."

The benefits to America would be that Costa Rica would continue to be a democracy, so they wouldn't have the problems of their neighboring countries," said Rathbun.

In April the United States State Department will make a decision on whether to build the college. If the State Department decides in favor of building the college, then bidding will start for the construction. It is estimated to cost 250 million or more, said Rathbun.

Once this happens, the first classes may start as early as January 1987, with 60 students. The enrollment would grow up to 400 people in an eight to nine year span, when all of the construction would be completed, said Rathbun.

"If (B.F.A. faculty committee) stay involved with setting up the college, then faculty would go down to Costa Rica to teach, as well as give advice on teaching instruction," said Rathbun. "Also teachers from Costa Rica could do some teaching in the states.

- Larry Rathbun
and materials science thrust because that's what the industry is demanding. He explained that chemical engineers are needed in the semiconductors field, in chemical waste treatment and in materials science.

Setting up a new department is a political thing, Bruley said. "It's a very sensitive subject because everyone is afraid the funding for it will come out of their hole, out of their budget." He said the School of Engineering is just beginning to survey the possibility of the new department, but that he wants everyone, students, faculty and administrators, to know the needs in the engineering industry and the importance of a university like Cal Poly meeting those needs.

Bruley obtained both his bachelor's degree and his doctorate in chemical engineering, with a "master's degree in mechanical engineering.

Bruley said the engineering master's degree program at Cal Poly is important because it provides contact with industry, with the forefront of technology, and this technology will benefit undergraduate students as well as graduate studies and the faculty.

The problem with the program now, Bruley explained, is that there aren't enough students to make it economically feasible, and this technology will benefit and attract more graduate students. Bruley said, the School of Chemical Waste Treatment and in the semiconductor field, in materials science. He explained that this technology will benefit and attract more graduate students.

In the Winter edition of the alumni newsletter, Cal Poly Today, Bruley said what action on salaries must be taken now. Bruley also favors improving the environment faculty work in and he said the new engineering building should greatly assist this.

The building, going up on the northern side of the library, will not only house the mechanical, aeronautical and civil engineering departments but the dean of the engineering offices and many laboratories. In addition, the space vacated by the aeronautical department will house the proposed applied R&D facility.

Bruley said he is currently involved in ordering about $1.8 million worth of equipment for the new building, as well as arranging for the transferring of existing equipment in early summer, when the building is due to be completed.

Bruley made sure to mention that the engineering school is no longer the School of Engineering and Technology, but simply the School of Engineering. The name change was made before Bruley arrived, during the reorganization that saw the mechanical and aeronautical departments split, the computer science move to the engineering department and the proposal of a computer engineering major. Bruley said he understood the reason for the name change to be that most engineering schools use the simple version.

Musical imagination will be speech topic

By KRISTIN RONCAPRATI

How we expand our musical imagination past the twelve tone scale will be explored by a musician and composer on Thursday.

Terry Riley will speak at Thursday's Communicative Arts and Humanities series of "Imagining the Imagination: The Varieties of Contemporary Creativity," in Room 220 of the University Union at 11 a.m.

Riley's talk is titled, "Music From Kirana to California." He will focus his discussion on his recent works inspired by the Kirana School of Northern India.

Riley is a Guggenheim Fellow and holder of a National Endowment for the Arts award. He has written a number of compositions including, "Songs for the 10 Voices of the Two Prophets," "Celeste on the Night Plain for String Quartet," "The Medicine Wheel," composed for piano, voice, synthesizer, ocarina and tabla. "G-Song for String Quartet," "Song of the Old Runner" and "Songs From the Old Country."

It was Riley who introduced the first examples of minimalist or phase music in 1964. His piece was called, "In C" and has since been expanded by Philip Glass and Steve Reich.

Riley grew up in the Redding area and did not hear contemporary 20th century music until he was almost out of high school. He attended San Francisco State University and UC Berkeley, earning his living during college playing the piano at a Barbery Coast bar.

The program is being funded in part by a grant from the California Council for the Humanities, the state-based affiliate of the National Endowment for the Humanities.

We are winning. AMERICAN CANCER SOCIETY
Motorcycle club founded in 1947

Penguins native to Poly

By JULIA PRODIS

The Penguins are one of the oldest clubs on Poly campus. They've been active since 1947, starting their club by sponsoring motorcycle races on the Cal Poly campus. The club members would wear black leather jackets, unzipped over white T-shirts, so the club was characteristically named - Penguins.

The Penguins still have races on campus, but instead of starting behind the Agriculture Building, going up and through Poly Canyon, over Cuesta Ridge and back, the Penguins have trials, or obstacle course races, in the parking lots on campus. They have moved their long distance dirt biking to the Pozo hills, about 28 miles east of Santa Margarita. Almost every weekend, the 40 member club will either go to Pozo, or take a street ride.

The Penguins do more than just organize races and rides for themselves. They arrange a race for some of the greatest riders in the nation. Every year since 1950, the motorcycle club, consisting mainly of male engineering students, sponsors a High Mountain Enduro.

The 35th annual enduro will be on April 21 this year, with riders from all over the nation coming to ride their dirt bikes over 125 miles of mountain roads and open terrain in the Los Padres National Forest.

"The enduro we put on each year is the longest running enduro in California . . . we have quite a bit of national recognition," said Cliff Ranney who is chiefly responsible for organizing the event.

The Penguins have a budget for the High Mountain Enduro of $8000. Each year they make a profit of $3000 to $4000. Ranney said that much of this money is put back into the budget for the next enduro. "Some of it goes to parties, too," he said.

The Penguins are the only student-run club in the nation to sponsor an enduro of this size. The event is one of only 12 nationally sanctioned enduros.

The top 40 or 50 national dirt bike champions come from across the nation to participate in the Penguins' High Mountain Enduro. The late actor and motorcycle enthusiast, Steve McQueen, joined the race in 1964, though he didn't win.

The course over the last 34 years has changed in location each year. It is important that the riders not be familiar with the terrain. The 500 riders start out in groups of four every minute. The first rider over the finish line is not necessarily the winner, however.

The idea is to maintain set speeds over the entire course," said Ranney, "if the riders exceed or don't meet the set speeds, they gain points." The winner is the rider who has acquired the least amount of points over the entire ride.

The enduro requires a weekend of help from over 100 people, mainly volunteering students, search and rescue squads, and United States Forest Service monitors.

"We need people for check crews, roads, black jack, gate watchers (to keep the cows off the roads)," said former president of the club, Robb Duff.

The Penguins must go through quite a bit of red tape to put on the enduro. They must get approval from the U.S. Forest Service to use the property. This is quite a bit of work. The riders must get approval from the U.S. Forest Service to use the property. This is usually not a big problem as long as the club puts up the requisite $1000 bond in case of damages to

**MBA INFORMATION DAY**

**DATE:** February 13, 1985
**TIME:** 9 a.m.-3 p.m.
**LOCATION:** BA&E BUILDING (02), ROOM 120

**SCHOOL OF BUSINESS**

Today's college graduates face an increasingly complex business environment. You need up-to-date management techniques, advanced research findings, practical applications, and polished personnel skills.

A Master of Business Administration degree is a valuable qualification, wherever acquired. But the experience of taking your MBA at Cal Poly is something special. Professors in the Cal Poly MBA Program combine the latest management theories with real-world cases and problems.

You will work with other students from many different undergraduate majors. The program workload is heavy but you will be one in a class of highly motivated people destined to succeed both academically and professionally.

If you have a high potential, stamina and openness of mind to learn more about this special program, come to MBA INFORMATION DAY. Meet MBA students and faculty.

Go higher and get there faster with a Cal Poly MBA.

**ALL UNDERGRADUATES MAJORS WELCOME!**
Actor and motorcycle enthusiast Steve McQueen participated in the High Mountain Enduro in 1964. McQueen (right) finished sixth and is standing next to winner Bud Ekins. The enduro has been sponsored and organized by the Cal Poly Penguins since 1950.

the property, said member Frank Merson.

Once this is done, the Penguins must get permission by owners to use private property. Then the Penguins may have to answer to environmental groups.

In 1980, the Sierra Club brought a lawsuit against the Penguins contending that the enduro riders threatened native Prairie Falcons, an endangered species, during their mating season. The Sierra Club thought that the enduro would inhibit the breeding falcons.

"Some of the riders saw the falcons breeding during the race," said Merson, "so we won the suit." The weather is also a determin­ant of the race. "If it's too dry, the Forest Service warns of fire hazards. If it's too wet, Fish and Game is concerned with endangering fish in full-running streams," said Ranney. Another Penguin member, Chris Mellon, said that the club's relationship with the Forest Service and the Sierra Club is good because the Penguins make a strong effort to maintain and repair the scenic routes and trails after the race. "We're atypical. We're responsible for our environment," he said. Ranney, the Enduro Steward, said: "to an outside person, it looks like a one day deal. But we work for a whole year to put on the event."

When the Penguins aren't preparing for the enduro, they may have races on campus. The club has races both by Stenner Creek and in one of the parking lots in the library.

Glass Fusing

The glass fusing class is taught by George Jercich of the art department. Plaster molds are made in the clay studio and pieces of glass are broken or cut and placed into the molds. The molds are then placed in a kiln to be fused into glass wares.

Kristen Ehrlich, upper left, cuts pieces of glass to be put into a mold.

Thad Rodgers, left, ladles melted glass from a kiln.

Lower left, Jercich, places a readied mold into a kiln.

Lynda Adelson, lower right, lays broken lustered glass into a mold to be fused into a bowl.
Tracksters off to fast start after first meet

Two men set times fast enough for nationals, eight hit lifetime bests

By KIM MILLER

Despite the February cold, the Cal Poly men's track team walked away with two national qualifying marks and eight lifetime best performances at the Roadrunner Invitational last Saturday.

Teams from all three divisions competed in the unscored track meet. Coach Tom Henderson said the meet, held annually in Bakersfield, is designed to be the first meet of the season.

Kevin Jones, who led the Cal Poly cross country team to a fifth place finish at nationals last season, began the track season with a national qualifying time of 9:11.4 and first place in the steeplechase. The distance runner placed second in the 3,000 meter run, 14:38.6, only 1:97.6 seconds off of the national qualifying time.

Two school records may be in jeopardy if Jones has his way. The steeplechase record held by Carrollo Rios and the 3,000 meter record held by Jim Schankel may be shattered before the season ends.

The school record in the 3,000 belongs to Schankel when he ran a 13:48.10 in 1979. Rios set the top mark in the steeplechase in 1983 at 8:28.89.

Jim Halter qualified for nationals Saturday, too. He improved his lifetime best throw in the hammer by a mere nine feet with a throw of 142.2 meters. His goal for the year is to break the school record held by Tom Pagani set 24 years ago.

Halter added that Halter was the outstanding performer of the week by his teammates.

Halter was not the only one to improve his throw. Ron Beach hurled the iron balls 107.0 meters for his lifetime best. But Beach did not end his efforts there; he went on to throw the shot put 44.0 meters for his best throw ever.

Yet another field competitor achieved his best mark. Javelin thrower Dave Mosbacher threw the Javelin 134.0 meters Saturday.

Overall, this was the most successful season opener in several years. We appear to be on schedule to recapture the CCAA title and to reap our position as a national team and field power. Henderson said.

Dave Bassinger recorded a lifetime best 400 meters with a 49.15 second run.

Chuck Fanter and Reynolds both ran personal bests in one of the more competitive fields.

Please see TRACK page 8.
Women qualify swimmers, hope to be in top 15

BY JEANETTE ROADES

Last weekend, the Cal Poly women’s swim team traveled to 31 State Long Beach in search of a win, only to lose at the very end.

After Nancy Stern’s 400 intermediate win, the Mustangs were down 76-19 with only the 400 freestyle relay left. Liz Linton, Sandy Faron, Sue Williams, and Joan Mary Laubacher combined to win the event, only to see Long Beach win with the overall score of 76-61.

The Mustangs started the month off with an easy 76-19 triumph over the University of Pacific. After Joan Mary Laubacher collected her wins in the 50 and 100 freestyle, teammates Liz Linton followed suit with first place finishes in both 200 and 500 freestyle.

With a record of 5-2, the swimmers are getting ready to face strong competition from Cal Northridge, Davis, and South Florida at the NCAA Division I Championships in Florida on March 13-16.

National Qualifiers from Cal Poly are Kim Foster 200 and 400 intermediate; Nancy Stern 100 and 200 breaststroke and the 400 intermediate; and Linda Tucker in the 400 intermediate and 200 butterfly.

Coach Traci Serpa expects her team to place in the top 15 out of the 40 teams competing in the national competition.

Say “I Love You” with wine...

Cork ‘N Bottle will help you pick out just the right wine or champagne to romance your sweetheart. To help you afford the best we’ve reduced prices on some favorite wines.

Come in today! Valentine’s Day is a good time to say thanks to your Secretary, Mom, Dad, Friends. Roomates too.

Valentine Specials regular $4.50 to $10.49

Swimmers looking to reap gold at nationals

Men start to taper off, go against tough competition in next meets

BY JEANETTE ROADES

Fired-up is the spirit of the Cal Poly men’s swim team.

With an overall record of 6-3, the Mustangs are swimming past their competition.

Earlier this month the Mustangs travelled to University of Pacific to romp over the Tigers 52-43.

Rich Swoboda contributed with wins in both 200 intermediate and 200 breaststroke.

Last weekend the Mustangs fell to Claremont (Mudd) despite the efforts of Brian Wilkinson, the only double winner in the 100 and 200 breaststroke.

According to first year Cal Poly coach Traci Serpa, the loss was primarily due to injuries.

The team is starting to taper now, said the head coach, so as to swim its fastest times at the NCAA Division I Championships on March 13-16.

DELRAY BEACH, Fla. (AP) — It was a dream come true for Mike Leach — and a nightmare for two members of Sweden’s Davis Cup team.

“I was unseeded, unheralded and a noisy country boy, and I won the NCAA tennis championships in 1982, beating Brad Gilbert in final.” Leach said.

“When I went from the NCAA to the tour, I was the guy walking around the lockerroom getting autographs. There were guys I read about growing up.”

“A couple of weeks after I joined the tour, I went on the court against Vitas Gerulaitis. I was actually shaking on the court. He beat me so fast he didn’t even shower.”

With a serve faster than his quips, Leach pounded second-seeded Mats Wilander 7-5, 6-2 Monday to move into the quarterfinals of the inaugural $1.8 million Lipton International Player Championships, a two-week event, with identical 128-player singles draws for men and women.

Also falling Monday were fourth-seeded Anders Jarryd of Sweden, seeded 12th here, 6-3, 6-2; fifth-seeded John McEnroe, seeded 15th, 6-1, 6-3; and second-seeded Jimmy Connors, seeded 8th, 6-3, 6-4.

Other winners on a card that was curtailed by rain included Gerulaitis; seeded 12th here, Scott Davis and Sweden’s Jan-Ove Waldner, seeded No. 3 seed, Tommy Turnbull of Australia, who lost to Yugoslavia’s Andrae Temessari, 6-4, 6-3.

Says Mustang distance freestyler Bob Prappa, “The team is looking very well — I’m proud to be on it, and we’re going to eat Orlando alive!”

Poly swimmers will be making their final appearance of the season this Saturday against the Fresno State Tigers at 2:30 pm in the outdoor pool.

Lipton tourney moves into quarterfinal round of play

Muscle tear sidelines distance runner

EUGENE, Ore. (AP) — Mary Slaney will be sidelined for three to six weeks with a muscle tear in her right calf, the Eugene middle-distance runner’s coach said Monday night.

The former Mary Decker is in his home in Eugene. He said she tore some muscle fibers when she cut across the finish line Saturday.

Ms. Slaney suffered the injury in the U.S. Olympic Invitational meet Saturday in Fast Rutherford, N.J., during the 1600 meters, a 6-1, 6-4 victim of No. 3 seed, Gunnarsson in the men’s singles.

“The injury was not a very serious injury ... and she went through 100 percent of practice this weekend.” Brown said. “It is not a very serious injury ... and she was able to go through 100 percent of practice this weekend.”

According to first year Cal Poly coach Traci Serpa, the loss was primarily due to injuries.

“Miss Slaney suffered the injury in the U.S. Olympic Invitational track and field meet Saturday in East Rutherford, N.J., during the women’s 1,500-meter race,” she said.

Liz Fairbanks performs dive during a recent home meet. Both the men’s swim team will be home on Saturday.
I, a draft pick last summer. And tonight in the Olympic Sad-
relay invitational and two Cal
lists of events. The Roadrunner
9:52.9 finish, fourth overall.
and Edmonton’s Andy Moog of
the Prince of Wales Conference,
the Clarence Campbell Con­
rasso of the Buffalo Sabres and
rookies Civis Chelios, a Montreal
their All-Star Game debut

Lemieux of Pittsburgh, the No. 1
Muller, a forward with the New
Track of the American team at the
Winter Games
McCarthy ran the 1600 meter
Edging out. out the Taft Runn­
ing Club by a mere 1.7 seconds.
Poly runners finished at
10:39.0.
Henderson said that all per­
formances improved over the
Green v. Gold meet held here
three weeks ago. The next
scheduled competition is Feb. 16
at Occidental College. Further
along in the first of two home
meets to be held on Feb 23.

For a moment. Ray Mancini,
the former lightweight champi­
saw stars.

Movie stars.
He had a chance to play the
lead in a television movie — “I
Walk In His Shadow. The Ray
Boon Boom Mancini Story.”

“I was very tempted to say,
‘ heck with the fight game,’ ”
the 23-year-old Mancini said.

But Mancini put a shot at ac­
ing on hold in favor of a shot at
regaining the World Boxing
Association 135-pound class title
from Livingston Bramble Feb.
16 at Reno, Nev. The movie, now
in production, will be shown
by CBS on Father’s Day, June 16.

So the role of Mancini will be
played by 18-year-old Doug
McKeon, who played the boy in
On Golden Pond.” Robert Blake
of TV’s “Baretta” fame will play
his father, Lenny “Boom Boom”
Mancini, the No. 2 lightweight
contender in 1942, whose career
was interrupted by World War II
and who never got a title shot.
At first, Mancini wasn’t con­
sidered for the role of himself.

“My agent told them they ow­
ed me a reading for the role,”
said Mancini. “But they said,
He can’t do it.”

“When I went to read for it,
the director said, ‘Hey, do it
again. That was pretty good.’
I got three readings.
And he won the part.
Ray, we want you to do it,
the director told him.
‘Is there any way to push
the fight back?’
‘Is there any way to push the
movie back?’ Mancini asked.

There wasn’t, since shooting
was scheduled to finish two days
before the fight. So Mancini con­
sidered foregoing the fight he has
wanted so much for so many years
in order to do the movie — his
first attempt on a first-round
upsetting of Art
Nev.

Mancini’s first title shot came
when he was stopped in the 14th
round by Alexis Arguello, the
World Boxing Council champion,
Oct. 3, 1981, at Atlantic City,
N.J. Arguello, who has retired
for the rematch with Bramble.

There'll be other roles for me
hopefully,” said Mancini of his
missed opportunity.

But Mancini did play an in­
direct role in the movie.
McKeon went to Las Vegas
while Mancini was training there
for the rematch with Bramble.

“He worked out with me and I
showed him a few things to make
him believable,” said Mancini,
while the ring never has acted
like anything but a fighter
dedicated to winning.
