Poly may get more bank tellers

By JULIA PRODIS

Students may have new automatic banking tellers from various local banks installed on campus within 1 1/2 years, said Executive Dean Doug Gerard.

Cal Poly is inviting bids from Wells Fargo and several other local banks and savings and loans who have expressed interest in installing an automatic teller on campus.

Presently there is one Bank of America automatic teller on campus, located in the University Union Plaza area. Bank of America is currently the only one on campus because when bids were taken four years ago, it was the only bank to agree to the terms of the contract set by the Associated Students. Interested banks were invited to participate.

At that time, Wells Fargo did not agree to the terms. The AS terms included assuming all costs of construction and installation along with $125 per staff writer automatic teller on campus. Much as $100,000 was invested by Bank of America into the program within 11/2 years, said Executive Dean Doug Gerard.

"I'm the eternal optimist," said Gerard, "but I doubt we'll see those automatic tellers installed until the fall of 1986." Gerard admitted that "not much thought" had been taken to find out which banks students would like to see represented on campus. The last poll in- diced that 65% of the students would like to see a Bank of America and Wells Fargo tellers in the University Union Plaza.

Other instant tellers may be installed.

Washington, D.C. internships benefit all students

By MARGARET BARRETT

Students in all majors can benefit from an internship in Washington, D.C., a faculty adviser said.

The John Culver, a political science professor, is the Cal Poly faculty representative for the Washington Center Internship Program, a non-profit program which is available to college students all over the country. It enables students to get practical experience in their fields of interest.

The internship program pamphlet starts out with these sentences: "A young man hurries down the hallway of the D.C. Superior Courthouse. As a representative from the U.S. Attorney's Office, he is tracing down the hallway of the D.C. Courthouse. As a representative of the press and legal authorities, a young man is working in the Washington, D.C., internship program. His job is to get students to places in which they can make it work and learn. "A person would have to be a lost soul not to be motivated by it. It's a whole other world."

This is not the story line from an episode of Barnaby Jones but a description of an actual Washington, D.C. internship program available to Cal Poly students.

Internships are available to students of all majors from political science to engineering to physical education.

Culver said that the main advantage of the program is that students get out of the classroom, where most education does not take place anyway. In Washington, students experience active rather than passive learning.

Culver said that the environment in Washington, D.C. is an excellent place in which to live, work, and learn. "A person would have to be a lost soul not to be motivated by it. It's a whole other world."

Washington Center internships interact with prominent Congressional staff workers, members of the press and legal authorities. Bryan Buck, a senior political science major, worked in Senator Pete Wilson's office during Fall Quarter last year.

In a report written by Buck on his experiences during the internship, he ends with this: "All in all, an internship in Washington, D.C., can be one of the most valuable experiences in one's lifetime. The opportunities for personal growth and career advancement are equal of greater to four years of college. Therefore, I strongly urge individuals considering working in Washington, D.C., to pursue this area of education."

Hold's placed on student records if ELM not taken

By SANDRA THORNBURGH

About 1,200 Cal Poly students who are required to take the Try Level Math Test but have not attempted to have a hold placed on their records in order to test them, said Dean of Students Pete Wilson.

That decision was made by an informal Cal Poly committee in order to enforce the ELM requirement, the CSU Chancellor's Office implemented in the Fall 1983. The committee consists of department heads and deans from each of the schools, the records office and the testing department.

"At the end of last year, we all got together and decided that we would start placing students on hold if they did not take the test," said Arthur Dekleine, a Cal Poly mathematics professor and the ELM adviser. "Deans from each of the schools on campus sent out letters to all of the students who had not taken the exam advising them to do so," said Dekleine.

Registration deadline for the test, which is mandatory for any student who entered school under the 1983-84 curriculum or after, is March 1. Students are exempt from the requirement if they scored 550 or better on the math section of the SAT, 23 on the ACT or three on the Advanced Placement Math test.

When the Chancellor's Office decided that every student would need to meet these basic math requirements and started to go through the program into effect, they did not give us any guidance as to what we should do to determine who had taken the test and who had not or who had taken it and failed it," Dekleine explained.

"When you get an order like that one without any funding, there is a certain reluctance to take on the additional workload and enforce it," Dekleine said.

Unlike the English Placement Test requirement implemented by the Chancellor's office, the ELM is not funded by CPE. Students must pay $7 each time they take the test. The additional time staff members need to administer the exam and keep track of testing results are not compensated.

"During the first year of implementation, Cal Poly students' only allowed to fulfill their requirement by passing one quarter of lower division math," Dekleine explained. "Now we are in a situation where we know what's going on. There are 1,200 students on campus who have not satisfied the ELM requirement and of those 1,200 have never taken the exam.

DeKleine pointed out that many of the CSU campuses are having the same problems as Cal Poly.

Our school is no means behind the times. Some are in the same position as we are some are ahead of us," he said.

In addition to implementing the exam, the Chancellor's Office also requires that students take the test, although they do not have to pass it, before the end of the first two quarters of enrollment. Students who take the test and fail it will not be subject to registration holds for Summer or Fall quarter, but are encouraged to seek remedial help in order to pass the exam.

One of our problems is getting students to get remedial help," Dekleine said. "Only 75 to 80 students have taken advantage of the help so far, and we expect about 1,800 student next fall will need help.

A new week remedial math course will be offered in the spring by Cuesta College on the Cal Poly campus for students seeking help. Also an ESL workbook, which contains sample problems, is available in the ECERl reading center.

The workbook helps students prepare for the exam by providing topics that help them know and sample questions.

Dekleine said.
Opinion

Education: At what cost?

The cost of education continues to increase year after year. Tuition, fees, housing, and the myriad expenses associated with the pursuit of knowledge can be very difficult for some students, and their families, to handle.

This is not something only way that many Cal Poly students make it through the year. Of grants, both federal and state, scholarships, part-time jobs and loans help those who otherwise cannot afford to go college.

The recent appointment of the new Education Secretary, William J. Bennett, recently unveiled the administration's plans for cuts in federal financial aid programs. Of these, the worst and most damaging may be the imposition of a family income ceiling of $32,500.

The low interest loans—payable by students after they graduate—make up the most used form of financial aid. It has been inferred in the past that this program may also be the most abused.

In his statements to the press last week, Bennett called for students to make a "divestiture of sorts: stereo divestiture, automobile divestiture, beach divestiture." Bennett suggests there are students who are not using their loan money for an education or who don't really need a loan in the first place. This is not news to most.

In addition to the income ceiling, a limit of $4,000 would be placed on the amount of aid a student would be eligible for. Of the cuts, though, it would further segregate the rich from the poor in the elite, expensive schools like the Stanfords and the Harvards.

The possibility also exists that there should be controls put in the battle to balance the federal budget and reduce the growing deficit. Those in Congress who are calling for a reduction in defense spending increases might be willing to give up a large sum of money for financial aid in return for military cutbacks.

Let's not be used by those who work for us. We must let our elected representatives know how we feel about this issue.

There are abuses in the system that can be eliminated without making cuts across the board. Write to your congressional representative and tell them that we will be watching how they deal with this issue. They will all have to come up for re-election one day soon.

Bookstores in cooperation with the ASI Senate have analyzed the prices of textbooks this spring. The analysis of the results of the sale of used books, about 38 months ago, led to the conclusion that it could reduce prices by 25-30 percent from publishers advertised price.

In a continuing evaluation of used book prices, the bookstore found that they could be reduced an additional two percent in 1985-86 an additional savings of $17,078 annually. Combining these two savings is total reduction in sell price of five percent. Eil Students and campus bookstores can benefit as much as $42,985 per year. This is not an insignificant amount.

Beginning with Spring Quarter, several bookstores will use textbooks at 70 percent of the current new textbook price.

Customers can also benefit from a Jan. 1 reduction in percent from publishers advertised prices on the purchase of non-text general books.

State agriculture director to speak at Cal Poly on ag problems in California

By LESLIE "S" LEASON

Former Secretary of Agriculture, Mr. F. N. Berryhill, will speak on the California agriculture problems confronting the people of California Thursday.

Mr. Berryhill is an independent and successful rancher and businessman, with a practical approach to problem solving.

An advocate of strong local control of government, Berryhill states that "government should do for the people only what they can't do for themselves."

He is known as an energetic worker and civic leader who has helped his party as well as the community and agriculture.

His agriculture interests include 150 acres of wine grapes and almonds near Ceres, and 700 acres of walnuts, prunes, and almonds near Chico.

He has been president of the Grape Improvement Association and the Growers Harvesting Committee, director of the California Raisin Advisory Board, president of the California Association of Winegrowers, and vice treasurer of the Republican State Central Committee of California.

Berryhill has also been active in the Stanislaus County Farm Bureau, Council of California Growers, Greater Modesto and Ceres Chambers of Commerce, Lions Club and the Migrant Training Program Advisory Board.

He will be initiated as an associate member of the Cal Delta Chapter of Alpha Zeta during his campus visit.

Although the title of his Feb. 21 speech at Cal Poly is yet to be announced, he is expected to discuss the problems confronting California agriculture.

Planned to start at 11 a.m. in the Cal Poly Theatre, the program is being sponsored by the Student Council of the School of Agriculture and the campus chapter of Alpha Zeta, the national honorary society for students and professionals in agriculture.

Attendance is free and students are invited to attend.

De Lorean documents reviewed

DETROIT (AP) — De Lorean Motor Co. trustees will be allowed to review some 20,000 microfilmed pages of businesses documents taken from the New Jersey home of John Z. De Lorean, a U.S. bankruptcy judge ordered Tuesday.

The judge believes that the microfilmed documents will supply many important answers to questions about where the assets of the De Lorean Motor Co. went and will shed light on the liability of the directors and officers of the company, said Sheldon Toll, attorney for creditors of the bankrupt automaker.

The 24 microfilm reels, containing photocopies of documents found in 1983 in De Lorean's New Jersey estate, were placed under seal by a New York court and are now in the custody of a New York City microfilming company, Toll said.

Attorneys for De Lorean or his companies did not appear at Tuesday's hearing. Toll said.

Three Small Quakes In Three Days

BERKELEY, Calif. (AP) — Three mild earthquakes shook Northern California in as many days, with Tuesday's temblor centered about 20 miles south of Coalinga.

The University of California seismographic station recorded a quake at 5:38 a.m. Tuesday that measured 3.1 on the Richter scale. The shaker was south of Coalinga, site of a 6.2 quake that injured 47 people and caused more than $31 million in damage in May 1983.

At 4:19 a.m. Monday, the station recorded a 2.6 earthquake about 10 miles southeast of Berkeley. A quake measuring 3.5 rattled a nearby area about five miles north of Lassen Peak at 2:33 a.m. Sunday, a seismographic station spokesman said.

The Richter scale measures ground motion as recorded on seismographs. Every increase of one number reflects a tenfold increase in magnitude.

CSU admission rules may be revised slightly soon

SACRAMENTO (AP) — The California State University may soon revise admission standards slightly because a study found that only about 29 percent of public high school graduates meet current requirements.

The university system serves the top one-third of public high school graduates.

Ralph Bigelow, CSU's associate dean of educational support services, said that a "mostest revision" in the system's "eligibility index" has been submitted to CSU Chancellor W. Ann Reynolds.

Bigelow did not disclose specifics of the proposal, but suggested that it entails a slight lowering in grade-point averages, the Sammy Union reported Tuesday.

Bigelow said that an executive order from Reynolds to make the changes probably will go to CSU campuses before the end of the month and will affect applicants for admission next fall.

There is no conflict between the current revisions and a proposal that has been tentatively approved by CSU trustees to require incoming freshmen in 1984 to have completed a full college preparatory program in high school, Bigelow said.

The study that triggered the eligibility changes was conducted by researchers for the California Post-secondary Education Commission.

It found that the percentage of public high school graduates meeting the University of California's and the CSU's admission standards dropped during the seven years between 1976 and 1983.

The second half of the concert began with a version of the music from the Alfred Hitchcock movie "To Catch a Thief," written by Lynn Murray. The piece included two themes: "Francis' Theme," and "The Big Walks."

The concert concluded with a mixture of music styles, including baroque and blues, pop, and jazz. The piece was titled, "A Suite for Flute and Jazz Piano." Martin and Dalch�rter were aided by the talents of Cal Poly music teacher and bass player, Clifton Swanson and Rex McAfee, who played the drums.

The piece gave the audience a variety of musical styles and the performers took turns impressing the audience with their knowledge of their instruments, ending each selection with a vigorous combination of all four instruments.

Martin has studied with noted musicians, Louise Ditulio and David Shostak, and has made motion pictures recordings with the studios of Disney, Warner Brothers and Paramount Pictures. Dalch�rter has performed with the Philadelphia Orchestra, the Juilliard Symphony and the Toulouse Orchestra in France.

Piano, flute artists entertain Poly crowd

Juilliard graduates perform jazz, classical music

BY KRISTIN RONCARATI

Two graduates of the Juilliard School of Music combined their talents on the violin and piano last Thursday night, performing selected classical, jazz and blues pieces, as well as a small but receiving audience in the Cal Poly Theatre.

Musician L.A., sponsored by the Cal Poly Fine Arts Committee, was performed by Bruce Martin, Ralph Bigelow, and Natalie Dalch�rter, pianist, in a two part concert including the musical works of J.S. Bach, Cecile Chaminade, Francis Poulenc, Lynn Murray, Ingolf Dahl, Claude Debussy and Claude Bolling.

Martin followed up with a folkdance by Swedish musician Ingolf Dahl. The piece included seven variations which changed in both tempo and notes. Dalch�rter performed her version of "Clair de Lune," a popular classical piece written by Debussy.

Dalch�rter explained to the audience that the first time she ever played the Debussy piece, she was performing for 2,000 people at a ball. She said it was a coincidence that on that particular night a full moon was in the sky, and "Clair de Lune" translated into English means "full moon."

The pair concluded the first half of their performance with a Martin wrote the love song written Cecile Chaminade, the only female composer in the group of featured artists. The piece titled, "Corretto," was appropriates for the Valentine's Day performance because it is a "piece for lovers," Martin said.

The second half of the concert began with a version of the music from the Alfred Hitchcock movie "To Catch a Thief," written by Lynn Murray. The piece included two themes: "Francis' Theme," and "The Big Walks."

The concert concluded with a mixture of music styles. Including baroque and blues, pop, and jazz. The piece was titled, "A Suite for Flute and Jazz Piano." Martin and Dalch�rter were aided by the talents of Cal Poly music teacher and bass player, Clifton Swanson and Rex McAfee, who played the drums.

WASHINGTON (AP) - The Environmental Protection Agency may be forced to resort to horsepower of the four-footed kind to survey Western lakes on their vulnerability to acid rain.

President Reagan may be asked to decide whether the agency can fly helicopters to the lakes to take water samples for chemical analyses.

The Forest Service confirmed Tuesday that it was blocking the EPA's plans to use helicopters because federal laws protecting wilderness areas forbid all use of mechanical things inside them — and even ban low-level flights over them.

"In back of EPA, you can see other federal agencies that want to use helicopters for apparently legitimate reasons," said Jim Byrne, the Forest Service official negotiating with the EPA. "Tiny uses and constant uses erode the wilderness."

If the two agencies cannot agree, the president may be asked to decide late this spring whether the agency can fly helicopters to take water samples for chemical analyses.

"It is back of EPA, you can see other federal agencies that want to use helicopters for apparently legitimate reasons," said Jim Byrne, the Forest Service official negotiating with the EPA. "Tiny uses and constant uses erode the wilderness."

The example always used of this phenomenon is the more than 200 high-altitude lakes in the Adirondack Mountains of New York state that cannot support fish. Scientists know that some of these lakes have been acidified for thousands of years — but not how many.

Parts of the Southwest, the upper Midwest and high elevations in the Rockies and Sierra Nevada also are believed to have the soil that enables a lake to acidify quickly.

The EPA has completed its work in the East, and now wants to sample 888 lakes in the West. Of those, some 432 are in wilderness areas.

"It is back of EPA, you can see other federal agencies that want to use helicopters for apparently legitimate reasons," said Jim Byrne, the Forest Service official negotiating with the EPA. "Tiny uses and constant uses erode the wilderness."

The EPA could use a different chemical test that could be performed at lakeside, Byrne said, although that test carries more uncertainty in the results.

The EPA believes the Forest Service could permit use of helicopters under its power to permit mechanized work if data are needed quickly that would "change the way you manage the area," Byrne said.
Sailing club plans cruise

SANTA ROSA, Calif. (AP) — An illegal, three-day flood of 400 million gallons of waste flowed Tuesday from trimming sewage ponds into one of California's most beautiful rivers, fouling the drinking water source for 8,000 residents.

It will take at least nine days before the 22-mile stretch of the Russian River, from Santa Rosa to the Pacific Ocean at Jenner, 60 miles north of San Francisco, is clean again, according to Ben Kor, assistant executive officer of the North Coast Region Water Quality Control Board.

The non-stop flow of sewage through Friday at more than 10 times the legal rate of one percent of the river's flow could result in stiff penalties against Santa Rosa, Kor said.

At a public hearing March 6, the board is expected to impose fines and perhaps restrictions on future sewage connections, a move that might slow or halt growth of one of the state's fastest-growing cities.

After meetings between the city, the county, state health agencies, the illegal dumping was permitted rather than risk a worse spill this spring or summer during the tourist season, Kor said.

Workers completed a temporary pipeline to bring drinking water to 5,000 people in Guerneville shortly before the sewage pond valves were opened at noon, Kor said. Another 3,000 riverfront residents will have water trucked in or will have to boil their well water. Water for some 22,000 other residents along the river will be unaffected, Kor said.

The release was delayed after officials discovered Monday they had laid faulty pipe.

Staff Writer
Cal Poly's women's tennis team enjoyed its first conference win last weekend in the southland when it met two conference opponents. The Mustangs are 2-3 overall: 1-2 in conference after losing to Cal State Northridge 9-0 on Friday, bouncing back to beat Cal State Los Angeles 8-1 Saturday.

The netters played well all weekend, according to coach Orion Yeast, but were faced with too tough of competition from Northridge.

“Our women played well against the CSN, but they were much stronger this year. Northridge should win the conference, but I think we can pull out a second place tie with Pomona, if we beat them later on this season.”

Sally Russell at No.1 singles had the closest match of the day, losing 6-7, 6-4 and 7-5 to the Matadors' Marla Reid. Russell battled through the match, losing the last two games of the third set 3-3.

“Sally has improved 50 percent from last season and is playing with authority and determina­tion,” said Yeast. “If she continues to play thiswell, she will undoubtedly win a bid to the Na­tionals.”

Kathy Oralhood also gave an impressive performance, losing a close three-setter at No.4 to Kel­ly Grattan. 6-7, 6-1 and 3-6.

“Kathy played very competitively, although she was fighting the flu all weekend,” noted Yeast.

Things were reversed the next day when the team disposed of Cal State Los Angeles, 8-1.

Poly's newly changed No.3 doubles team of Gigi Barbe and No.5 singles Wendy Elliot proved to be a strong combination, defeating Los Angeles' senior duo of Lisa and Lynn Arai, 6-1, 7-6.

“Gigi Barbe at 3 doubles is a big asset to the starting line-up. She's a steady, eager player,” said Yeast.

Another impressive freshman for the Mustangs is No.3 Cristin Leverte, who according to Yeast, has a steady, hard hitting groundstroke game that is tough to touch.

The netters will confront yet another conference opponent, Chapman College, this Friday, 1:30 p.m. at home.

The team goes on the road Monday, Feb.25 to UC Santa Barbara against Westmont College, whom it handily beat here on Feb.12.
Hot shooting brings split

Women downed by strong team, beat Northridge

DAN RUTHEMEYER

With an offense that ran hot and cold, the women's basketball team managed to earn a split of two conference games over the weekend.

While the Mustangs were dealt a 92-60 defeat at the hands of Cal Poly Pomona Thursday, they rebounded two nights later to down the Matadors of Northridge, 82-68.

In the Thursday game, the Broncos of Pomona treated the Mustangs to clinic on why they are ranked 11th in Division II. Getting many easy shots from inside, the Broncos shot a sizzling 60 percent from the floor for the game.

With scoring from all 12 of their players, the Broncos demonstrated their deep bench and strong offense.

"I've seen kids who haven't scored before make baskets tonight," said Mustang coach Marilyn McNeil, "everyone shot well.

Outscoring the Mustangs 18-4 in the opening minutes, the Broncos forced the Mustangs to take several early time outs to reorganize their game plan.

"We could see that Pomona was getting something going," said McNeil. "We just tried different things to get our people going.

After the initial Pomona scoring sprees, the Mustang defense settled down and temporarily slowed the Pomona scoring attacks.

Shooting only 32 percent from the floor in the first half, the Mustangs found themselves down by 11 at the halfway mark.

Pomona had a red-hot second half, shooting a blazing 66 percent from the floor to build on their halftime advantage.

With five reserves in for the final seven minutes of the game, the Broncos continued to add to their insurmountable lead.

When the clock expired, the Broncos had come up with their 17th victory of the season by downing the Mustangs 92-60.

Leading scorers for the Broncos were Vickie Mitchell with 20 points and 17 rebounds, Sheri Jennum who tallied 14 and Janine Phillips who added 10.

The Mustangs were led by Carol Mills who notched 18 points and Sherrie Atteberry who tossed in 13.

Bringing in a 2-6 record, Cal State Northridge came to town Saturday to play the 24-0 Mustangs who had lost their last four games in a row.

Shooting a high 40 percent from the floor in the first half, the Mustangs jumped out to a 40-27 halftime advantage behind the 10 points of Blackburn.

While Northridge cut the Mustang lead to seven at one point in the second half, the Mustangs were not to be denied.

Men start behind, but make up ground fast

BY KIM MILLER

It's difficult to win a track meet when a team lacks participants in events. But then again, it's hard to lose a meet when a team has a multi-sport crew like the Cal Poly Mustangs.

Last weekend saw Cal Poly set out 65 points behind Occidental College and San Diego State University before the first event gun ever sounded. By the day's end, however, Cal Poly effectively shut out Occidental 97-66, losing to San Diego's long jump, javelin, discus, shot put and relay races.

Coach Tom Henderson reframed from taking his steakhouse to Saturday's meet, even tough the steakhouse is our strongest event, he said. Kevin Jones, Mike Miner, Jerry Herdndes and Robert Fine were low on gas that weekend, preparing for next weekend's scheduled home meet.

Injuries left the team unprepared to tackle Occidental's San Diego's long jump, javelin, high jump and triple jump events.

CAGERS

From page 9

For they ran off eight unanswered points to take a 62-47 lead with 11 minutes remaining.

"It was tense at the first part of the second half, but then we had a series of steals and some good passing," said McNeil. "I was impressed with the way we played." Henderson added that nine team members "were close to the list of his abilities, he will be very difficult to beat," the coach said. He added that both of McCarthy's times were season best and fast times for this early in the season.

Once again Jim Halter showed his strength in the weight events. He won both the hammer and shot put with throws of 174-10" and 51-3" respectively. Halter placed fourth in the discus with a throw of 135-8.

Henderson said that overall it was a good meet. The team scored 17 seasonal bests and two personal best performances.

Todd Cramer pole vaulted 15 feet — his lifetime best, giving him a fourth place finish. Bruce Storms placed third for Cal Poly in the 5,000 with a time of 14:58.97.

The track team can be seen in the first of only two home meets next Saturday, Feb. 23. Cal Poly will host the University of California at Santa Barbara and UC Davis. Field events are scheduled for 11:00 a.m. and the running events noon.
SUMMER JOB OPPORTUNITIES

MAYBE YOU BELONG AT FOREST HOME THIS SUMMER.

And maybe not.

Forest Home will be hiring over 140 College-age men and women for short-term volunteer positions at one of the largest Christian Conference Centers in America.

But not everyone is up to it.

Some energy, commitment, and a willingness to minister in a variety of ways. Maybe the job requires a huge dishwasher or sitting on tables. Maybe it's a summer job in accordance with a lake. Maybe it's teaching you people about the love of God. (Yup, this is only PART of the job.)

If Forest Home sounds like the kind of challenge you're up for this Summer, find out more.

Interviews for Summer Staff will be at:

February 21

date

1:00-7:00 p.m.

time

Grace Church, Osos & Pismo

location

Appreciation and information will be available.

for Call: Carol Bridges-Forest Home for an interview appointment (714) 794-1127
