By ROSEMARY COSTANZO

There is one task as important as the presidential campaign—perfecting Ronald Reagan to the Republican party, according to former Majority Leader Howard Baker, and that is to keep a Republican majority in the Senate.

Baker spoke to about 500 county Republicans this weekend, including about 20 members of Cal Poly College Republicans who held a Lincoln Day Dinner sponsored by the San Luis Obispo County Republican Central Committee.

Cantor Baker is uniquely qualified to make improvements in this country because of the size and activity within the Republican party, Baker said. "You (California Republicans) need to give the Senate a new Republican senator in 1986.

America's moment of greatness is not behind us, Baker said. "We have the brink of the opportunity to reduce the threat of nuclear war. If we stand strong and proper, we would watch a nuclear war.

The Republican party has proven that they don't want any understanding of governing. Baker said, "We are strong militarily and economically. President Reagan has kept his promise to unleash the economy to create new wealth and make America the envy of the rest of the world.

The Soviet generals are the players in this card game. The United States would ever strike the United States; the Soviet Union said, "It is not in the interest of America to start nuclear weapons production.

As the Soviet generals are the players, we have never heard that they would ever refuse to put anything on the negotiating table. I would be happy to get rid of every Minute Man missile but until the Soviets decide enough is enough, we will do all we can to keep them.

"Reality is that the Soviet Union is a Judeo-Christian society like us," continued St. John. "We have had Soviet subs within the three-mile limit right here on our coast. Do we wish to go without them anymore?"

"Let's assume that the Soviet Union has a type of boss that he tells the missile. Are we not satisfied until we improve the life of everyone in the country?"

"We need to get away from farm programs that failed and government shouldn't be working with social, farm and other programs, "Baker said.

"As party trustees of the great president, Al Gore, we are not satisfied until we improve the life of everyone in the country."

"What would happen if the Soviets were to strike against the American presidential nomination. "Unless you play Trivial Pursuit, you probably didn't know that, Baker said."

Baker said that he felt concerned toward Reagan's goals when he listened to his first inaguration speech but after seeing the spirit of America soar under President Reagan, his attitude toward Reagan began to change.

"It is not in the interest of America to start nuclear weapons production."

Reagan fan. In 1980 he ran for the house. He was wearing dark clothing with a ski mask, scarf and gloves at the time of the assault.

The victim was able to distract her assailant and run for help. The police is looking for a white, male adult approximately six feet tall and 175 pounds with brown hair and blue eyes. He was wearing dark clothing with a ski mask, scarf and gloves at the time of the assault.

The suspect vehicle is described as an older, possibly 1960s American-made truck, with metallic blue-green paint. The victim described the truck as black California license plate with gold lettering.

Anyone seeing the vehicle or the suspect is encouraged to contact the San Luis Obispo County Sheriff's Safety Department or the local law enforcement agency.

By ROSEMARY COSTANZO

"We have turned key, or key, or key, or key, the missile, which has been called the "Star Wars" system. "We can't reduce the budget when it comes to the secure future of this country. But defense has to be balanced with social, farm and other programs."

"The American people have a type of boss that he tells the missile. Are we not satisfied until we improve the life of everyone in the country?"

"We need to get away from farm programs that failed and government shouldn't be working with social, farm and other programs."

Profile on America's homeless

75 percent of the homeless are members of families. In all, one out of 13 American families is likely to experience homelessness in the course of a person's life time. These families are not the exception. They are part of the society. Homelessness is a fact of life in America, and it is our duty to acknowledge it. The purpose of this article is to bring attention to the plight of the homeless and to raise awareness about the issue.

The homeless experience constant movement and uncertainty. They are forced to live on the street, where they are exposed to the elements and have limited access to basic necessities. The government and the community have a responsibility to provide support and resources to help the homeless find stability and improve their lives.

One way to address homelessness is through affordable housing. Increasing the availability of affordable housing can provide a stable living environment for the homeless. Additionally, providing support services such as job training and healthcare can help people move from homelessness to self-sufficiency.

It is crucial that we recognize the severity of the issue and work towards a solution. We must stop viewing the homeless as a problem to be solved and instead acknowledge them as members of society who deserve respect and support. Together, we can make a difference and create a more equitable society for all.

California's crop diversity reason for low farm debts

By TED LEWIS

California's farm debt is lower than that of other states because of the diversity of crops grown, said the California Director of Food and Agriculture Thursday.

"We are in better shape than most states because farmers in California are more diversified in the crops that they raise," Clare Berryhill said. "I am very bullish on California agriculture because of this diversity, farmers in California that have not gone in debt to the extreme should be able to weather the present money crunch.

Berryhill blamed the high value of the dollar for the problem farmers are having financing their farming operations.

The value of the dollar is so high because of the federal deficit and the low inflation rate. Because of these two factors it is beneficial for foreign investors to invest in the United States. Other countries will not allow foreign investors in their countries for these very reasons, said Berryhill.

The high value of the dollar means lower prices for the crops that are grown in the U.S. for export. The low prices for the export crops have the high interest rates making it difficult for the farmer, but California's agricultural diversity will pull California's farmers through the coming years.

The 1985 Federal Farm Bill will not have the effect on California agriculture that it will have in other states, said Berryhill.

"I am not very optimistic about the effect of the 1985 Farm Bill for California agriculture because it involves grain, wheat and corn," he said. "We are a deficit state in those crops as California farmers will not be benefited as much as farmers in other states by the 1985 Farm Bill."

The Kesterson Reservoir drainage problem is of extreme importance to the Department of Agriculture. The reservoir is a series of drainage ponds for the San Luis Drain system in the westside of the San Joaquin Valley. Environmentalists stopped the drainage into the Kesterson Reservoir because of the harm done to the wildlife by the salinity problem in the reservoir.

The best solution to the problem would be to construct a pipeline to transport the salinity into the ocean, but the environmentalist stopped the construction of the pipeline because of the effect it would have to the countryside," said Berryhill. "It is possible that 50,000 acres couldn't be farmed because of the salinity problem in those 50,000 acres that are now being farmed and a probable 500,000 acres if the drainage problem can't be solved. Some sort of technical way must be found to solve this salinity problem, but nothing concrete has been found yet.

Women's week events planned reason for low farm debts

By STACEY MYERS

Today's women are capable of filling many more roles than those of traditional housewife and mother, said the California Director of Food and Agriculture Thursday.

"I am very bullish on California agriculture because of this diversity, farmers in California that have not gone in debt to the extreme should be able to weather the present money crunch."

Federal official speaks on Ethiopian crisis

By LESLEY GLEASON

The Ethiopian government's lack of involvement in the food crises has led to uncounted deaths - thousands of people have died and just over seven million people are seriously affected, said a federal government official.

Tim Knight, the deputy director of the federal government's Inter-Agency Task Force for the African Food Emergency and the assistant director of the Foreign Disaster Relief program spoke to a Cal Poly crowd Thursday night about the African food crises and what the United States has done to help.

"The U.S. has addressed the African emergency and is responsive in a massive way, and I think it's something all Americans should be proud of," said Knight.

"The Inter-Agency Task Force's role is to identify where the people are and what they need, and then to get either food, medicine, or shelter to the people in a timely manner. "Unfortunately, in practice that is not easy to do," he added.

"Ethiopia is an enormous tragedy. I think it is the one place where I can say what you see on the ground, in the feeding centers and in the camps is actually worse than anything you see on television," said Knight.

"You see little kids that look like shrunk little men with almost no bellies and practically no flesh." For the most part the condition of the Ethiopians is caused by the lack of available food and the nonexistant distribution systems. Ethiopia's drought was

because, the leverage with Ethiopia is almost impossible," he said. Knight said Ethiopia's government spent $100,000 for their 10-year anniversary celebration, instead of concentrating the food crisis emergency, explained Knight.

Rather than walking three or four hours to the food center in Ethiopia, people would rather walk to Sudan, a three to four day trip, to get supplies. People want to avoid getting picked up and moved by the government because of a resettlement program, Knight said.

"The Soviet Union provides arms, and certainly has provided that for Ethiopia," commented Knight. "The Soviet Union has done very little in the emergency assistance because by and large it is political," he said.

"The U.S. provided the most assistance last year in Ethiopia than anyone else," said Knight. Ethiopia has been getting all its assistance from volunteers.

"Ethiopia is the most frustrating to send shipments to, because the leverage with Ethiopia is almost impossible," said Knight. Ethiopia's government has not worked directly in that area.

"The U.S. provided the most assistance last year in Ethiopia than anyone else," said Knight. Ethiopia has been getting all its assistance from volunteers.

Both Poly track teams are hard on visitors

By KIM MILLER

The home track can not be credited for the men's team victory here Saturday, but the team's competitive spirit can. Cal Poly hosted the UC Santa Barbara and UC Davis only to best its guests UCSB 106-64 and UC Davis 100-39, but the races were more competitive than the scores.

In each race their are several races occurring. For instance in the 5,000 meter run, Brett Grif- fiths and Olympian Carmello Rios duked it out for the first place finish. Further back in the pack the real race was between Cal Poly runners Don Reynolds, Jim McCarthy and a runner from UC Davis.

Coach Tom Henderson said it was an outstanding performance by the athletes, a lifetime best.

The whole day went that way. Cal Poly racked up 29 personal best performances and three new national qualifying times.

There is no doubt the men like qualifying for nationals. Brett Griffiths, who qualified in the 5,000, said, "It's a relief, now I can run the 1,500 for a while. If I run the 5,000 too much I get burned out."

Henderson stressed the men race to win, not to qualify, and win they did. Even in the field events the competitors excelled. For the first time in Cal Poly history the men took first through fourth in the shot put, said coach "and we are not known for the shot put."

Henderson's athletes have won 16 All-Americans in 800 meters; Gladees Miller in 14:34.0, 14:58.0 and 15:10.0 respectively.

Kevin Jones ran a lifetime best in the 5,000 meters, the vault er suffered a broken wrist and a concussion. Otherwise, the meet went smoothly and no other injuries were reported.

Six the running events, Cal Poly took all but three top scoring positions. Henderson said that Erik Johnson ran a great double in the 100 and 200 meters. He scored a lifetime best in the 100 meters with a time of 10.5 and ran the 200 meters in 21.3.

Johnson went on to anchor the winning 400 meter relay in 42.1. The first three legs were run by Damon Shows, Chris White and Kevin Pratt.

In the 800 meters, Paul Hill, a transfer from Davis, ran the race in 1:54.3 and Richard Clark scored third with a 1:56.3. Both times were lifetime bests for the men.

The 5,000 meter race was full of activity. Four runners earn personal bests. Of course Grif­ fiths ran his best time in 14:31.5. Kevin Jones, Don Reynolds and Doug Golliher ran their bests in 14:34.0, 14:58.0 and 15:10.0 respectively.

It's rare to see the 5,000 run this early in the season, said Henderson, but this team is al­ ready--better than last year's team.

Henderson said that next year if Cal Poly has its new track the team will probably compete here often. Meanwhile, the only other home meet this season will be the Poly Royal Invitational in April.

Women on road to fourth title

By NANCY ALLISON

What can the Cal Poly women track team do for an encore?

It has already won four straight national championships and as if that weren't enough, the team isn't planning to share its annual title, putting perhaps its strongest team ever on the field.

What little suspense there is this year, seems to be provided by wondering if Poly can surpass its record setting 1982 team.

Unfortunately, the NCAA has changed its scoring method, so point totals will not apply. "In comparison," said head coach Lance Harter, "this team has the ability to surpass that (1982) team in 15 of the 18 events."

So should the NCAA just hand Cal Poly the Division II crown now, and with the rest of the na­ tion's field for the second and third spot, "I wouldn't say that," said Harter. "Adding, "we're going to be awfully hard to beat."

The domination by the women isn't just luck, but planning two-to-three years ago, said Harter. "This is pretty much what we anticipated."

"To win a national champion­ ship, said Harter, the team needs talent, depth and luck. The re­ sultant home meet proved his team has all those qualities.

In the past four years, Harter's athletes have won 16 individual titles and grabbed 88 All-American points.

The team picked up where it left off last year, winning 10-of-16 events at the unscored Cal Poly SLO Collegiate Open Saturday on the Poly track.

The women took the top four spots in 800 meters: Glades Miller (2:07.8), Veronica Storvick (2:10.3), Alison Ehlen (2:10.9) and Laurie Hagen (2:11.4) grabbing first through fourth.

Poly also took the top two places in the high jump and 3,000 meters. In the high jump, Julie Weigman was first with a 5-4 jump. Rachel Bracy second, 5-2.

In the 3,000 meters, Carol Gleason won (9:37), Marilyn Nichols was second (9:41.6).

The Mustangs won seven other events: 400 hurdles (Sharol Hansen, 54.0), discus (Colleen Keavy, 124-4), 200 meters (Patrice Carpenter, 24.9, 400 meters (Carpenter, 56.2), 1,500 meters (Katy Manning, 4:32.8), shot put (Hanson, 30-11) and mile relay (Ehlan, Carpenter, Jordan and Haddy, 3:54.3).

The most impressive perfor­ mance, according to Harter, was turned in by Carpenter, the 1983 California Community College champion in the 100 meters.

Poly had four unattached per­ formers competing in the meet, who were on the Poly roster until March 18. Felicia Saville cap­ tured the 100 meters with a per­ sonal record time of 11.5, Deena Bernstein won the javelin with a season best toss of 163-7, and defending NCAA Div II hurdles champion CeCe Chandler placed 2nd in the 100 meters and 3rd in the 200 meters. All-America distance specialist Bobyn Root placed 2nd in the 1500 meters with a personal record of 4:37.7, and placed 4th in the 3000 meters.

Harter will take 24 athletes to the Budweiser/Atte Invitational this Saturday at San Diego State University. The Mustangs will go head to head with some of the best in the country in the Div II, including UCLA, USC, Cal Berkeley and the hosting Aztecs.
Women hoopsters split two over weekend

By DAN RUTHEMEREY

With its season drawing to a close, the women's basketball team won at home and lost on the road over the weekend.

Picking up a 69-64 victory Thursday over Cal State Los Angeles, the Mustangs offense showed good form by shooting 42 percent from the floor for the game.

Two nights and several hundred traveling miles later the Mustangs dropped a 85-72 decision to the Highlanders of U.C. Riverside.

In Thursday's contest the Mustangs trailed Los Angeles for most of the first half, but came on strong in the final five minutes of the opening stanza to tie the score at 32 at halftime.

"We went to the press at the end of the first half and that started to get things done for us," said McNeil.

Instrumental in Cal Poly's first half surge was guard Julie Jordan who came off the bench to score 11 and dish off three assists.

While the Mustangs shot 44 percent from the floor, the Golden Eagles were limited to 42 percent.

While the second half was characterized by Cal Poly and Los Angeles exchanging baskets, the Mustangs took a lead with two minutes left on the clock and held the advantage for the rest of the game.

By scoring six of their last eight points from the free throw line, the Mustangs retained their lead and picked up the 69-64 victory.

The ability of Cal Poly to make free throws coming down the stretch was a major factor in their win. The Mustangs converted on nine of their 12 second half free throws for a 75 percent clip.

"Going to the line at the end could work against you," said McNeil. "Chris (Hester) and Sherri (Atteberry) made their free throws so it worked in our favor."

Riverside, the Mustangs record on nine of their 12 second half free throws for a 75 percent clip.

With two minutes to go and the game close, McNeil called a time out to organize the Mustang Offense. When the teams came back out on the floor, Riverside ran off four quick points and the Mustangs had to resort to fouling.

Traveling to Riverside for Saturday's game, the Mustangs were looking to avenge an earlier point lead going into the final stanza.

While the Mustangs held a 13 point lead going into the final four minutes of their game with Pomona; they almost threw it away before Van Winden sunk his game-deciding free throws.

Cal Poly started Friday's game hot as it took an early lead before allowing Pomona to climb back in with 16-16 tie at half.

Early in the second half Van Winden and forward Nate Hatten led the Mustangs in scoring with a season-high 29 points.

Hatten led the Mustangs in scoring with a game-high 16 points, while Van Winden finished with 11 points and nine rebounds.

"It was a see-saw battle and no one was in control until Riverside came away at the end," said McNeil. "There wasn't more than a two point difference until the end."

Carol Mills led the Mustangs in scoring with a season-high 29 points and nine rebounds, while Farmer added 11.

Making good on the Cal Poly foul, the Highlanders built themselves a lead and didn't allow the Mustangs back into the game.

Men also split, take close one

By DAN RUTHEMEREY

Playing two games on the road over the weekend, the men's basketball team picked up a split as it gets set to prepare for its final game of the season.

Converting on a pair of free throws Friday with seven seconds left on the clock, Jim Van Winden preserved a 40-37 Mustang win over Cal Poly Pomona.

The Mustangs then traveled to Riverside to take on the Highlanders where they lost by a 54-43 margin.

While the Mustangs held a 13 point lead going into the final four minutes of their game with Pomona; they almost threw it away before Van Winden sunk his game-deciding free throws.

Cal Poly started Friday's game hot as it took an early lead before allowing Pomona to climb back in with 16-16 tie at half.

Early in the second half Van Winden and forward Nate Hatten went on a tear to give the Mustangs a lead that they held throughout the final stanza.

Hatten led the Mustangs in scoring with a game-high 16 points, while Van Winden finished with 10 points and eight rebounds.

Pomona was led by Matt Fitzgerald who tallied 12 points and Eddie Brown who added 11 points and six rebounds to the Broncos' losing cause.

After Saturday's loss to Riverside, the Mustangs record has now dropped to 4-9 in the CCAA and 11-11 overall.

They will play their final game of the season Thursday against Chapman College on the road.

Sports
Gymnasts get back at SB

Women use year’s best performance to win at home

The Cal Poly gymnastics team pulled off its best performance of the year Friday in the Main Gym, winning its home meet over Santa Barbara and Cal Poly Pomona.

The Gauchos beat Poly twice this year, but Santa Barbara didn’t bring its full team, finishing last with 105.7 points.

The Mustangs scored a season-high 165.6 points, easily topping Pomona’s 156.1. * * *

Gymnasts get back at SB

The Gauchos beat Poly twice this year, but Santa Barbara didn’t bring its full team, finishing last with 105.7 points.

The Mustangs scored a season-high 165.6 points, easily topping Pomona’s 156.1. * * *

The Mustangs dominated both matches, winning all positions in straight sets on Friday and sacrificing only one match Saturday.

Former Arroyo Grande star Paul Landry easily defeated John Spirtas of Riverside 6-2, 6-0.

Taking the lead with a five-run rally in the bottom of the eighth inning, the Cal Poly baseball team was on its way to its seventh win of the season before visiting Cal State Hayward struck for two runs in the ninth to gain the victory.

The victory improves the Mustangs’ early season record to 4-3 and once again illustrated Cal Poly’s inability to hold a lead.

The Mustangs jumped out in front of Hayward in the bottom of the first when they scored a run on an error by Riverside’s leadoff hitter Monty Waltz. Picking up three more runs in the second inning, it seemed as if Cal Poly would have a field day with Lawrence Pelletier, Hayward’s starting pitcher.

After the second inning Pelletier settled down and held the Mustangs scoreless for the next five innings.
