Baker's cabinet discusses goals
By SANDRA THORNBURGH

Reinforcing the new breadth and depth requirements, developing an endowment fund for the arts and strengthening industry donations were discussed by President Warren Baker, industry leaders and faculty members.

These topics were emphasized at the day-long annual meeting of the President’s Cabinet held in Cal Poly’s University Union, said Darlene Slack, assistant to the director of development and liaison between the president's office and the cabinet.

"The purpose of the meeting is to promote the goals of the university, and the president in seeking public and private support for the programs of the university and promote an understanding of the distinctive role of Cal Poly and higher education," Slack explained.

Eighteen of the 39 cabinet members attended the meeting including senior level executives from Pacific Bell, Union Oil, Bectel Corp., TRW and Hewlett Packard. The cabinet is divided into five committees: faculty development, recruitment and retention, equipment and physical plant, depth and breadth, computing and information systems, and quality of campus life.

The committees meet with parallel campus committees, consisting of faculty members from all the schools, in order to discuss issues pertinent to their respective groups. Members of the campus committees are selected for their level and area of expertise in order to follow through on decisions made in the yearly meeting, Slack said.

"The most important issue was discussed by the committee on depth and breadth requirements," said Slack. "They have been concerned about the technical schools developing a global view of the world that as they move up the corporate ladder, they will be able to deal with a broader set of issues."

In order to reinforce the new requirements, a series of lectures will be organized in which representatives from industry will come and speak with faculty members about their perspectives on the need for breadth and depth courses.

In essence, what they are going to do is reinforce the need for breadth and depth requirements so that it will encourage faculty support," said Slack. Then, when faculty advise students about course requirements, they will be able to recommend what courses to take based on the experience of the professionals.

Deans Jon Ericson and Philip Bailey, cochairs for the breadth and depth committee, are working to address the issues.

Cost could be high for building
New offices sought to unify Foundation

By LEANNE ALBERTA

The Foundation is considering the construction of a new building to house its offices.

The idea was discussed at a recent Foundation Board of Directors meeting that reviewed capital facilities planning, said AI Amaral, executive director of the Foundation.

Amaral said that different Foundation offices are physically separated on campus and this can cause functional inefficiency.

"There are some specific things that do need to be seriously considered," he said. "The first one being the reconfiguration of the administrative and financial services function of the Foundation.

What that encompasses is my office, personnel office, controller’s office, business office and sponsored programs.

"Compressing the problem is the search for a new dean for the School of Science and Math. The new dean will take over the offices located in Fisher Science Hall which now house Amaral's office.

"Once the new dean is appointed that person may wish to occupy these offices," said Amaral. "Therefore I would be asked to vacate, and looking around the campus there’s not too many places I can think of where I could go.

"Secondly, the University Union has a dire need for a functional space and they wouldn’t mind having the current space occupied by the controller's office and the business office as areas they could use."

Amaral said the Foundation is considering building the offices on the second floor of the proposed student life center. We have done some preliminary work for a structure on a second floor.

"It would be a permanent construction contiguous to the classroom building," he said.

The cost is high for this type of undertaking.

"We’re talking about $128 a square foot and that’s based on gross square footage which means that’s not all usable space.

Please see FOUNDATION, page 3"

Tram and van may be added to escort service

By MARGARET BARRETT

Additions to the Interfraternity Council Escort Service who would include a van and a tram to drive students to the residence halls and to homes within a three-mile radius of campus was proposed to IFC by the ASI Student Relations Board.

The program called Student Transportation Escort Public Service (STEPs) may begin Spring Quarter, said Lashley Gleason, student relations board chairperson.

Implementation of the additions depends on whether a van may be obtained and if IFC promises to take over the program, as it did with the present escort service, Gleason said.

Disabled Students Services has already said its electric tram could be used at night to drive students to the dorms. Members of the Public Safety Department are trying to raise funds in order to buy a van. Another possibility would be to buy off-campus housing on Occidental or North Campus.

"Since the tram service is already in place, it is just an added bonus," Gleason said.

The disabled students van and a tram are being considered by the ASI as additions to the IFC escort service. Mike Terry of Alpha Epsilon Pi, inset, escorts Lana Fink.

Fund limit upped for Foundation
By LEANNE ALBERTA

Guideline revisions for the use of discretionary funds were discussed at a recent Foundation Board of Directors meeting.

The board has approved new guidelines for use of the funds, said Al Amaral, executive director of the Foundation.

Previously, two signatures were required for expenditures exceeding $50. That amount has been increased to $100.

Discretionary funds are non-restrictive gift funds that have been donated to the Foundation as the support of the university in general or to a specific department or program.

"These funds are discretionary to the extent that there are no restrictions on them other than the expenditure must be something in support of the department or program," Amaral said.

The funds are commonly used for faculty travel and for the purchase of microcomputers for computer labs. Amaral said they are expenditures that are proprietary to campus authorized educational, social and business activities, and student aid.

Refreshments and entertainment in connection with meetings, conferences or events are covered by discretionary funds.

Payment of a membership in a community or professional organization is covered by discretionary funds when the membership is relevant to the department, school or school that receives funds.

The change in the guidelines was needed because of inflation, Amaral said.

"You can’t buy much for $50 anymore and $100 is more in line with what it should be," said Amaral. "It cuts down on paperwork."

"Please see ESCORT, page 3"
ABC unfair to undergraduates

Cal Poly undergraduate campus groups are being discriminated against under a false pretense.

A state-wide guideline of the California Alcoholic Beverage Control board deteys one-day liquor licenses to undergraduate groups. A local officer of the board said the policy was made "probably because most people (attending the party) would be under 21."

Not quite. The average age of Cal Poly students, from information received last spring and four years ago. Under the current guideline, in order for a fraternity or similar group to hold a party where liquor is sold, the license must be obtained by an alumni or post-graduate group.

Not only is this guideline based on a false supposition, but is not the ABC assuming responsibility on the part of undergraduate party-throwers to not uphold the California drinking age law?

Why is an alumni or post-graduate group automatically assumed to be more responsible?

Parties where liquor is sold happen all the time, and will continue to happen, license or not. We feel that by allowing all local undergraduate liquor groups to obtain liquor licenses, and legally sell liquor would be a far better state of affairs. All concerned would be far better off if parties were legal, out in the open and conducted with some degree of monitoring by the ABC.

We feel the Alcoholic Beverage Control board should take a long hard look at their "guidelines" and see if in fact they serve any useful purpose.

Letters

Pros outweigh cons in R.A. job

Editor:

We, the following resident advisors, are writing in response to a letter in the March 4 edition of the Mustang Daily. We would like to express another opinion.

It's true that the job takes up a lot of time, no one knows that better than we do. We agree that the R.A. comes under tremendous pressure at times. However, we have always found that our residence directors have been behind us 100 percent in everything we do.

While it is true that our job entails the enforcement of the alcohol policy, it does not give us the right to invade the privacy of a student's room on a "search and destroy mission." We are peers, counselors and above all friends to students who, in many cases, are away from home for the first time. We are not a police force and our main job objective is to be a role model and positive up building influence in people's lives. Rule enforcement is only a fraction of the job.

"We feel that our resident director and the entire R.A. program is an asset not only to the R.A.'s own living facility but also to those people who take on the responsibility of this very important job. Without the support we have received from the source -- the industry -- the program would not be what it is."

Why is an alumni or post-graduate group automatically assumed to be more responsible?

Parties where liquor is sold happen all the time, and will continue to happen, license or not. We feel that by allowing all local undergraduate liquor groups to obtain liquor licenses, and legally sell liquor would be a far better state of affairs. All concerned would be far better off if parties were legal, out in the open and conducted with some degree of monitoring by the ABC.

We feel the Alcoholic Beverage Control board should take a long hard look at their "guidelines" and see if in fact they serve any useful purpose.

from the source -- the industry which created it. The industry would alter its emissions and the problem would be stopped before it was started.

Now what all this has to do with parking is very similar. The parking problem is not being solved with more spaces. This approach is only inviting the problem to proceed. The solution is to eliminate the need for parking by eliminating the need to drive. You guessed it -- alter

native transportation!

This campus is supposed to be an environment of creativity and accomplishment. Parking lots are boring! Why not a bus system, or car pooling, or encouraging bicycling, or a new idea? Before any parking lot is built, I would like to see an attempt at attacking the problem where it starts.

Kirk Dominic

Editor:

We would like to respond to a letter presented in the Mustang Daily Feb. 28. This letter dealt with the possibility of losing many of the existing facilities in the games area of the University Union. Being located in a cluttered part of the paper near the end, many readers may have missed it.

The letter dealt with the potential ripping out of equipment on a major scale. This would be followed by new plans and new construction. These two tasks alone represent hurdles for the school from the community in the form of bureaucracy, approvals, time delays and high central coast construction rates. Not only will we lose the bowling alley, we lose pool tables, pinball and videogames. These are things many of us need for an escape occasionally.

Why do we feel this move is drastic and premature? If we are not mistaken, major purchases and renovations were just done to the bowling alley. The records of high attention tend to show that the students support the facility like it is. The alley and games area is always busy especially nights and weekends. These existing facilities are needed to support our college life and atmosphere.

We feel the University Union Advisory Board (UUAB) needs to alert the student body to a little better as to their actions and the policies it is implementing. We, the student body, are the checks and balances of these groups and their members such as Roger Conway. When we become more aware of these things we will speak up so that those leaders and decision-makers will realize as Spock once shared with us the needs of the many outweigh the needs of the few, or one.

CABINET
From page 1

ing on a format for the series which will hopefully begin this spring, Slack said.

Four major donations from industry and the need for maintenance funds were highlighted by the equipment and physical plant committee. A $1 million grant from Zerox for the computer science department, a three-year, $500,000 gift from Hewlett Packard for the School of Engineering, a laser color separation scanner from H.C.M. Graphic Systems Inc. and a four-color computerized press from Heidelberg West of Germany for the Graphic Arts Department were among the donations given to Cal Poly last year. Although the donations are beneficial, the committee pointed out that the university has no money for operation and maintenance and those funds are as important

as the grants themselves," she explained.

The committee for quality of campus life is concerned about broadening the experience of students by offering more visual and performing arts activities, Slack said.

"It is a matter of being committed and having more resources available to bring to campus more speakers, art displays, musical programs and performing arts groups," explained Slack. In order to do that an endowment fund has been started for the arts which will hopefully receive more support throughout the year, Slack said.

"One of the things that I have a concern about is that I'm not personally anxious to see the Foundation spend even $70 or $80 a foot on a modular facility that may only be able to be in place for a couple of years or maybe five years and then have to be moved," said West. "In the long run if that's going to be a likelihood we may be better off to go ahead and bite the bullet now and do a permanent facility."

FOUNDA
From page 1

space," Amaral said. "That includes hallways and doorways so it's pretty expensive.

"Another option could be a modular office space, which is perhaps semi-permanent. Another option is office trailer space and there's nothing wrong with with office trailer space, functionally anyway."

All the options are being evaluated, and no decisions have yet been made, said Amaral. He hopes to have a firm plan by the end of the academic year.

However, Howard West, president of the Foundation Board of Directors and associate executive vice president, questioned the idea of constructing semi-permanent buildings.

"I'm not particularly anxious to see the Foundation spend even $70 or $80 a foot on a modular facility that may only be able to be in place for a couple of years or maybe five years and then have to be moved," said West. "In the long run if that's going to be a likelihood we may be better off to go ahead and bite the bullet now and do a permanent facility."

"Crimes of the Heart" poignant story of people

By DONALD MUNRO
Staff Writer

After looking at the schedule of plays for the 1984-85 Cal Poly theater season, Theatre and Dance Department Head Roger Kenvin decided he wanted to do something different. Classical plays including Shakespeare's "Macbeth" and Molière's "The Miser" dominate this year's schedule, and Kenvin decided a refreshing contrast was needed.

The result is "Crimes of the Heart," a contemporary comedy-drama which opens tonight in the Cal Poly Theatre at 8 p.m. Other performances are Friday and Saturday, March 8 and 9; and Thursday, Friday and Saturday, March 14-16. Tickets are $5 and are on sale at the University Union ticket office.

"It's about three sisters in Mississippi," he said. "The sisters are wonderful human beings, and they're also a little bit zany." The play is set entirely in the family kitchen in the sisters' house in Hazlehurst. They have gathered on the occasion of their grandfather's impending death.

The eldest sister, Lenny (played by Jamie Jackson) is a 30-year-old spinster worried about being an Old Maid the rest of her life.
**Rob Reiner hits true romantic comedy with ‘The Sure Thing’**

By LISA MCKINNON

**The Sure Thing**, the latest in a growing crop of teenage coming-of-age films, is actually more about the tribulations, joys and uncertainties of the surex thing: falling in love as opposed to just losing one's virginity, and having sex.

Indeed, the young “hero” in this movie has already done that. And at the ripe old age of 19, Walker Gibson (played by Bill Murray), comedic finesse by John Cusack, is primarily worried about being past his prime, since his attempts to bed high school cuties have failed miserably throughout senior year.

Small wonder. Gibson, born like a nice enough fellow, but his opening lines have all the sensitivity of a Brillo pad. He asks one girl at a graduation party, “How would you like to have a sexual encounter so intense it could change your political view?”

Failing that approach, Gibson, and his buddy Lance, a college freshman who is ready to strike out on his own and leave his past behind, go their separate ways. Lance to school in California (the “land of waves and babes”), and Gibson to an Ivy-covered university in the East.

Things do not go as planned, and Gibson continues to strike out despite the advances of every female he meets around him. Meanwhile, his buddy Lance sends him photographs of a tanned and scantily-clad beach bunny with the inscription, “This is the ugliest girl in California.”

The screenplay, written by Steven Bloom and Jonathan Roberts, contains all the requisite fraternity house pranks, swimming pool parties and mass consumption of alcohol. But what constitutes of college girls movies which have been filling the theaters lately.

For one thing, it comes from a reputable source. Rob Reiner, perhaps best known for his role as Meathead on television’s “All in the Family,” has directed “The Sure Thing,” the second film, close on the heels of “This is Spinal Tap” in parody of rock and roll band documentaries.

The result is a production that turns the theater — which is fine as a prerequisite fraternity house documentary. Reiner has come up with a good, eminently watchable film genre, however, Reiner does include one ‘morning’ shot and another which shows the leading lady hanging topless out of a car from behind.

Further, the film chronicles the events which lead the main character (Gibson) to understand that sex and love don’t have to be mutually exclusive, and can be, in fact, even more satisfying together.

Things start changing for Gibson when he joins a carpool to California for Christmas break and finds himself stuck with two Young Republican types who try to cajole him into singing old show tunes along the way. Matters deteriorate further when he discovers that Alanis Brudiford, a preppy type who has no time for the English composition course, is also in the carpool too. She can rendezvous with her equally proper, preppy UCLA boyfriend.

There is already plenty of antagonism between the two, but being cooped up in the same car for hours only worsens the situation. Eventually, Gibson and Al can’t, however, by finding that the carpool only halfway through the trip. The troubles they encounter together afterward serves as a basis for their friendship and, hopefully, a blossoming romance.

“The Sure Thing” is one of the few films of late which is able to live up to its ad line of “romantic comedy.” By mixing a good dose of humor with the rom-com trappings, it proves to be a good match for those who are interested in understanding the situations which have been filling the theaters lately.

For example, it is genuinely funny — something a lot of these sorts of films attempt but fail miserably at. For another, there is no gratuity about the sexual encounters. For another, there are no gratu­itous shots of bare breasts anyway, although the title se­quence borders on the voyeuristic by showing closups of the Sure Thing rubbing herself down with some oil. In a bow to the unwritten laws of the teenage

Jewish Olympics for Cal Poly gymnast?

By DAN RUTHEMEYER

A Cal Poly gymnast will compete in April for the opportunity to represent the United States in Israel this summer.

Jana Lehman, a sophomore architect major, will be one of 80 Jewish gymnasts competing for six spots on the U.S. team for the Maccabiah, which is often referred to as a Jewish Olympics.

Although Lehman expects the competition to be tough, she is looking forward to the chance to compete with other fine athletes for the right to represent the United States.

"I'd love to make the team," said Lehman. "It would be a good experience and a lot of fun."

While Lehman must compete in all the separate gymnastic events to qualify for the Maccabiah, she believes her strongest event to be the balance beam.

Former United States competitors in the Maccabiah have included 1984 gold medal gymnast Mitch Gaylord and 1972 gold medal swimmer Mark Spitz.

Lehman, who is from Beverly Hills, competed in gymnastics through a club and her high school before coming to Cal Poly.

Although Lehman expects the competition to be tough, she is not about ready to count herself out.

"The competition should be a lot tougher than I'm used to, but I think I have a chance," said Lehman.

The tryouts for the U.S. gymnastics team will be April 20-21 in Maryland and will have the nation's top Jewish gymnasts in competition.

Lehman, who has never competed in a meet as widespread as this, has been a mainstay of the Cal Poly gymnastics team for the past two seasons.

Although Lehman expects the competition to be tough, she is confident in her abilities. She has a swim meet this Saturday.

"The competition should be a lot tougher than I'm used to, but I think I have a chance," said Lehman. "It would be a good experience and a lot of fun."

The Jewish Olympics, also known as the Maccabiah, will be in late July in Israel this summer.

Jewish gymnasts competing for the United States will have to represent the United States in the Maccabiah, which is often referred to as a Jewish Olympics.

Although the tryouts are over and will include the events from the past two seasons, the Maccabiah will be in late July and will include the events common to the traditional Olympics.
