Although the weather was calling students to the beaches, the textbook section of El Corral bookstore was busy once again this week as students look for new books for their Spring Quarter classes.

### Financial aid still available

#### Pell deadline May 1

**By SALLY KINSELL**

Is your wallet getting thin? It's not too late to apply for the federally funded Pell Grant for the 1984-85 school year. Said Clare Mascy-Ramirez of the Financial Aid Office.

The application deadline for this grant is May 1, 1985. Pell grants are available to eligible undergraduate students attending school at least half-time. Grants are available to eligible students; however, they should be applied for immediately. For the 1984-85 school year, said Mascy-Ramirez. It is not a requirement for grants to be awarded to undergraduates. Students are not required to pay it back.

"To give money to the students," said Mascy-Ramirez, "I feel this is an asset to the university and maybe having alcohol on campus could help solve this problem."

Schaecher and Ruby would not to see alcohol on campus. They believe that it would provide a greater familiarity of alcohol, said the senators.

Another rationale cited by the senators is that students who are involved in alcohol-related accidents would visit the campus. The senators believe that the current dry campus policy is unfair to students.

The senators also feel that the current dry campus policy is unfair to students.

*Alcohol policy questioned*

**By LEANNE ALBERTA**

A Cal Poly political science professor is being considered by Gov. George Deukmejian for a position on the California State University Board of Trustees. Dr. Joseph Weatherby, 49, is in a run-off for the annually appointed position with Dr. Robert Weatherby, 50, from Cal State Los Angeles.

The seven were selected by the State Academic Senate from a field of applicants throughout the CSU system. Deadline for application was November 1984.

From the applicants, each CSU campus nominated one or more candidates for the final selection. The Senate then chose the final two and submitted their names to the governor, who will make the final decision.

*Poly prof is CSU trustee finalist*

**By THOMAS WILLIAMS**

Dr. Joseph Weatherby was considered by Gov. George Deukmejian for a position on the Board of Trustees. Weatherby has been a member of the State Academic Senate for the past three years and he feels that pursuing a position on the board was a logical step.

"I've been active on the Senate for the past three years," said Weatherby. "I just want to be in a position to help the entire state system, as well as the Cal Poly students and faculty."

Weatherby admits that if he is chosen for the position, his workload will increase dramatically, but he doesn't intend to let that interfere with his teaching.

"I am a teacher first," he said. "Most teachers request a reduced course load when they take on extra-curricular responsibilities." Weatherby graduated from Cal Poly in 1965 and was a member of the State Academic Senate for the past two years.

As a trustee of the 24-member board, Weatherby would play a part in planning the budget, policies and academic programs for the entire CSU system. It is responsible for taking all of the money allotted to the system by the state legislature and distributing it appropriately to each of the campuses. The board meets every other month at the Trustees Conference Center in Long Beach to decide how they will spend the money and what it will be spent on.

"Rogers Kuhn, director of Public Affairs at Cal State Long Beach, who is in charge of the board," he said. "He is the House or Senate in the State Legislature." Weatherby graduated from Poly Royal buttons sold

**By TERESA M. WATSON**

Poly Royal is just around the corner and members of the Cal Poly chapter of the College of Agriculture Future Farmers of America will kick off the annual Poly Royal button sale today in the University Union Plaza at 11:45 a.m.

CFFA Button Sales Chairman Monica Bianchi will be directing the presentation of the first buttons to members of the administration, student leaders and members of the community to begin the official sale period for this year's collection.

Bianchi said that this is the 29th year that the CFFA has been conducting the sales of the $1 button.

Sales of the button will follow the ceremony in the Plaza and will be available at El Corral Bookstore, the Agriculture Education Department, and at several locations in San Luis Obispo.

There are 6,000 buttons available with proceeds going to support programs of the Agriculture Education Department and CFFA.

*Alcohol policy questioned*

**By LEANNE ALBERTA**

Student Senators Adam Schaecher and Earl Ruby yesterday began a survey that will attempt to gauge student opinion on the issue of alcohol on campus.

"We're going to leave surveys at strategic locations on campus like the Agriculture building, the Business building and the University Union," said Adam Schaecher, Student Senator, School of Engineering. "The collection box will be located in the ASI office.

Schaecher and fellow Student Senator Ruby, have proposed that alcoholic beverages should not be allowed to be sold at outdoor athletic events on campus.

"I don't feel that there's any reason not to have alcohol on campus," Schaecher said. "I feel the campus lacks the security and maybe having alcohol on campus
Opinion

Surveying campus alcohol possibilities

Yesterday two Student Senators began a student survey that may eventually lead to a change in the most controversial Cal Poly policy — alcohol on campus.

They are proposing a policy that would allow alcohol behind closed doors in the residences and the sale of alcohol at outdoor campus sporting events. Students can pick up a survey form at various locations around campus, including the University Union, business building, Student Center, and return them to a collection box in the ASI office upstairs in the University Union.

We wholeheartedly support their efforts to accurately gauge student opinion and later lobby for a responsible change in the current restrictive alcohol policy. But for a change to be made, students must participate. It's the same pre-election story — those who do not vote are not utilizing their right to have an affect on the policies that govern them.

We support the issue at hand and the proposed policy changes. They represent an evolutionary, and relatively minor, change in Cal Poly policy; one that will move Cal Poly one step away from the Prohibition era.

It is no secret that drinking does occur in the dorms and that a sort of 'game' exists between residents and advisers to see who can smuggle in alcohol and who can be caught doing so. Some residents feel they are in significant friction between the two groups — to the advantage of no one. Reducing this friction by allowing those who legally drink to do so would improve the dorm environment for all involved.

There is also a case to be made for keeping parties on campus. Students who do not drive to a party do not have to drive back to campus after they have potentially had one too many.

The number of dorm residents over 21 years of age are admittedly in the minority, so the changes would not be sweeping. But they do represent an attitudinal change that affects everyone. By recognizing that students can take care of themselves, they just may eventually lead to a change in a most controversial Cal Poly policy: one that will move Cal Poly one step away from the Prohibition era.

They do represent an attitudinal change that affects everyone. By recognizing that students can take care of themselves, they just come along. He told me that, in grady, he felt he had been used by your people on a question of journal

The facility is sixty years old, and in dire need of paint everywhere! The ZTA girls came in and painted several large shelving units, cabinets, part of the bathroom and one large playroom.

These girls were enthusiastic, energetic, fast and dependable. The newly painted areas are clean, bright and shiny. Already staff, children and parents have commented on the difference.

And the Zeta painters are so proud of their work that they will be back next year with the active maintenance needed to keep the facility in good repair.

I would like to extend my sincere thanks to the Zeta Tau Alpha sorority for painting parts of the Children's Center and to the future members of the Children's Center preschool facility.

Input needed for alcohol survey

Editor:

I'm a senator for the School of Engineering and currently I am conducting a survey concerning student attitudes about alcohol on campus.

Students are available for four sessions around campus upstarts in the U.U. near the ASI offices; inside the front entrance to the Business Building, inside the second floor entrance to the ASI offices, and at the south entrance of Engineering East.

I would like to urge all students to fill out the surveys and return them to the ASI offices. Your input in this matter is very important.

Earl Ruby

Editor

School of Engineering
Big changes are needed at Poly

Editor:

Something has to change. Cal Poly is not a university. A university is something that sells out their football games, has a Greek Row and is a place where students wear their school's name on their sweatshirts; not someone else's (i.e., Stanford and USC).

Now don't get me wrong. I believe Cal Poly is strong in academia. But there is more to university than applied physics and calculus. Students here are too worried about their possible careers in the Silicon Valley to change anything. They just want a degree and to get out of here.

One of the things definitely wrong here has to be the dry campus rule. Everybody knows it is a fascist rule, but once they're out of the dorms, they don't care because it no longer applies to them. So realistically, the rule will never change, and that's too bad.

If it did, maybe tailgating would flourish. Thus, football games might even be attended.

Or a pub on campus could become a reality, creating more revenue for the school. However, all is for naught because no one will have enough incentive to be change.

Speaking of entertainment: what do we have? A theater that plays old movies is about it. I wouldn't mind going to a concert once in a while, or even a spor­ting event (I can't go to Cal Poly games; I can't find anyone who go with).

Maybe entertainment could be substituted with a Greek Row. The Greeks could actually have night parties without neighbor complaints. Just imagine, actually not having the chore of having to find fun.

But, like everything else, nothing will change. Why should Baker care anyway? It wasn't in his contract. Why should he let students drink on campus? Why should anyone be able to con­sume on campus?

Why do I have this feeling the CIA is behind that?

Charles Henderson

Dorm residents shouldn't 'splat'

Editor:

For the last quarter, the maintenance crew has been working very hard to beautify the campus by tree trimming, hedge clipping, sidewalk replacing, etc. I commend them on doing such a fine job. The reason I'm writing is that I would like to voice my disgust toward a group which counteracts the efforts of the maintenance crew. I refer to this group as the 'Tenaya Splat Committee.'

For about a quarter and a half, the 'splat committee,' which resides in Tenaya dorm, have been dripping miscellaneous foil from an upper-story window onto the sidewalk below. The food is left there to rot or for a paid employee of the state to clean up after them. I ask the committee to channel their energy somewhere else, because their present activity is detrac­tive and offensive.

The destruction which occurs from the committee's activities are the permanent stains which are embedded in the sidewalk. The ways that I know how to remove these stains are: having a student employee paint over them which looks ugly, replacing the entire slab of concrete, or treating the stains with a chem­i­cal solution.

The mess on the sidewalk is not only destructive, but obstructive and offensive to the people who use it daily. The an­noyance which prompted me to write this letter is the smell from a rotten egg that had been 'splat.' Later in the year, if the 'splatting' continues, the smell from the mess will attract flies which in turn will lead to more discomfort.

All of these solutions cost money which should be the re­sponsibility of Tenaya Hall to either find and charge the com­mittee, or pay out of their hall funds; instead of the university funds which affect the other stu­dents and California taxpayers.

All in all, for the consideration of other people and the beauty of the campus, I ask the 'splat committee' to end its practices.

Ethics of bicycle story questioned

Editor:

I would sincerely like to hear your opinions and those of your readers on a question of journalistic ethics.

During this school year you ran a story about bicycles which were purported to be parked blocking wheelchair ramps on campus. The story included a photograph of a man pushing a wheelchair whose path was impeded by bicycles parked on the ramp. The man in the picture was Rory Cooper, a well-known local athlete.

The next time I saw Rory I brought up the story in the Mustang Daily. He told me that he felt he had been used by your newspaper and advised me to put more of the story in the picture. He felt he had been used by your newspaper.

My confidence in the news media has been shaken by learning that it is all right to stage news stories if they portray events which "happen all the time." Obviously it is not all right for your reporters wouldn't have found it necessary to stage it for their story.

My confidence in the news media has been shaken by learning that it is all right to stage news stories if they portray events which "happen all the time." Obviously it is not all right for your reporters wouldn't have found it necessary to stage it for their story.

I would like to urge all students to vote on the surveys and return them to the ASI offices. Your input in this matter is very important.

Zeta painters thanked for work

Editor:

I would like to extend my sincere thanks to the Zeta Tau Alpha security for painting parts of the interior of the children's Center preschool facility.

The facility is sixty years old, and is in dire need of paint everywhere! The ZTA girls came in and painted several large shelving units, cabinets, part of the bathroom and one large playroom.

These girls were enthusiastic, energetic, fast and dependable. The newly painted areas are clean, bright and cheery. Already staff, children and parents have commented on the difference.

Support from campus organizations means a great deal to the center. The Children's Center must maintain its own facility and without help from organizations such as ZTA, the Center would not be able to keep up with the active maintenance needed due to the activities of 45 small children.

It's nice to know campus organizations can be such a useful resource.

Abortion debate tonight at Poly

By THOMAS WILLIAMS

Abortion will be the topic of a debate tonight at 7 p.m. in Chumash Auditorium.

Four speakers will deliver eight-minute constructive speeches and then each will be given a four-minute rebuttal period. Following the speeches and rebuttals, the audience will be given an hour to ask the debaters questions from floor microphones.

The debate will be sponsored by the Speakers Forum of ASI and the speakers will be Carol Downer, Dr. Charles A. Bradley, Susan Carpenter McMillan and Dr. Carolyn Gerster.

Gerster, former president of Feminists for Life, is an active speaker on abortion and has appeared on over 200 radio and talk shows.

Downer is currently director of the Feminist Women's Health Center and Women's Choice Clinic of Los Angeles. She has been involved in the abortion rights movement since the 1960s and she founded and co-founded several organizations including the National Abortion Federation. She has also edited and co-authored several books on the subject.

Bradley is a medical director of Planned Parenthood of Santa Barbara County. He is associated with the American College of Obstetricians and Gynecologists and the American College of Surgeons. He is also a member of the Southern California Physicians for Choice.

McMillan, president of Feminists for Life, is an active speaker on abortion and has appeared on over 200 radio and talk shows.

Gerster, former president of the National Right to Life Committee, maintains a private practice as a physician in Scottsdale, Ariz. She has made several radio and talk show appearances.

Tickets for the debate are $2 for students and senior citizens and $3 for the general public. They will be available at the University Union ticket office at 5:30 p.m. tonight.

Humanities series continues

Pleasures of imagination is topic of speech today

By KRIS REHER

The pleasure of the imagination will be the topic of his speech today at 11 a.m. in room 203 of the University Union. He will relate his remarks to this year's theme for the series "Hearing and imagination: the Varieties of Contemporary Creativity and Conceiving of the possible.

Dr. Michael Orth, a member of the Cal Polylish faculty, will be the speaker for the 1984-85 Arts and Humanities lecture series.

Orth earned an undergraduate degree in psychology from the University of California, Santa Barbara, a master's in language and literature from Loyola Marymount University and a Ph.D. in English from Claremont Graduate School.

Orth has been a member of the Cal Poly faculty since 1967. In 1981 he was a Fulbright exchange professor at Université Strasbourg in France.

His presentations include "Living Utopian Literature by Tong Writing," "Games with Simulations for Teaching English," "Games and Grammar," and "The World of Work, Jobs and Careers in Adolescent Literature." Published articles have appeared in such periodicals as "The Journal of Technical Writing and Communication, Alternative Futures, California English, Pacific Skipper, and College Composition and Communication."

Other speakers and topics planned for the spring portion of the 1984-85 Arts and Humanities Series include:

- May 16 — Louis H. Markey, University of Texas, "Creation, Decreation and Deconstruction."

The series is funded partially by a grant from the California Council for the Humanities, the National Endowment for the Humanities, and is sponsored by Cal Poly's School of Communicative Arts and Humanities.

Disney searching for oldest undergrad

By KRIS REHER

The Disney Channel is searching for America's oldest undergrad.

In conjunction with the television premiere of "The Undergraduates," the Disney Channel is accepting applications from the oldest full-time undergraduate student attending a college or university in the United States today.

The winner of the search will receive a $1,000 cash prize, an expense-paid trip to New York City and will be guest of honor at Disney's Special Summer Show at Radio City Music Hall.

Applicants should send their name, age, address, telephone number, name of college or university and major to: Disney Undergrad Search, 860 Third Avenue, New York, N.Y. 10022. The Mustang Daily conducted interviews with three current oldest Cal Poly undergraduates, but was unable to obtain any information. We would like to do a feature story on him or her. If you think you're the oldest undergrad or know someone who is, contact the Mustang Daily.
A recent survey reveals that Cal Poly architecture graduates expect to earn $8 an hour to start, most success in Southern California, varying from $6 to $12 per hour. The report also includes pay rates in various types of firms and in eight major cities in California.

The survey showed that the type of firm had most impact on the starting pay than the firm's location, says Tov.

Tov's results and the advice from survey respondents are on file at the Architecture and Environmental Design Department's Instructional Resource Center.
Now excepting applications for the contract year.

Created and maintained for the mature, conscientious student who deserves a residence that offers privacy and quiet.

This feature photograph of the Mystery Spot in Santa Cruz won Mustang Daily photographer Margaret Apodaca a first place prize at the California Intercollegiate Press Association contest, held the first weekend of Spring break.

Poly successful at press contest
10 awards won by the Daily

By SUSAN DETHLEFSEN
Art Managing Editor

The Mustang Daily won 10 awards in a California inter­
collegiate press contest held in Santa Cruz during Spring break.

"We did very well against the
other more affluent schools," said Margarita Mills, editor of
the Mustang Daily, who attended
the contest. "I was very pleased
with the outcome of the con­
tests."

Approximately 300 students
from California Colleges and
Universities attended the two­
day California Intercollegiate
Press Association contest and
conference, which was hosted by
U.C. Santa Cruz. Fourteen stu­
dents from Cal Poly competed.

College and University news­
papers were asked to send their
best articles, photographs and
advertisements to be judged in the
'mail-in' competition.

Mustang Daily received five
mail-in awards including a first
place for best special section, se­
cond for best advertisement, se­
cond for best sports feature arti­
cle, third for best investigative news article and third for best front-page design.

Mustang Daily also won five
awards in the "on-the-spot" com­
petition. In this contest, 14 students from the Mustang Daily
depicted in various events such
as copy editing, photography,
news writing, editorial writing,
feature writing, sports writing,
arts reviews, front-page layout
and advertisement layout.

Margaret Apodaca, a Daily
photographer, won the feature
photo contest and Stephanie
Pingel, another photographer,
received second place in the news
photo contest.

"I was extremely suprised that
I won," said Apodaca. "I was
competing against 30 other peo­
ple and many had more and bet­
ter camera equipment. It just
shows that capturing the essence
of the story was the key, not the
equipment."

Duffy Caralon, a Mustang Dai­
ly ad representative, won first
place in the on-the-spot adver­
tisement layout contest. Judges
said that her ad was "the ugliest,
but the most effective" and that
they would never forget it.

Other on the spot awards were
received by David Kraft, who
won second in sports writing,
and Lime McKinnon, who won
third in the arts review contest.

"Considering our limitations as
far as funding and staff size cur­
tently about 30 students we did
excellent," said Mills. "The con­
test helped us learn how to write
better articles and produce a
better paper so that we can win
even more awards next year."

Test yourself.

Which early pregnancy test is as
easy to read as red, no—white, yes?

Which is a simple one-step test?

Which has a dramatic color change

**New car motor plant dedicated Four of five Californians support the death penalty**

**San Francisco (AP) — More than four out of five Californians support the death penalty.**

The poll reported that those surveyed said the death penalty served as "a protection against possible future crimes which might be committed by the guilty person."

The public also felt the death sentence "acts as a deterrent to other people who might otherwise commit a capital crime."

"A majority of the public rejects a third argument that the death penalty is society's way of getting even with the criminal for what has been done to the victim," according to the poll.

The last execution in California was in 1967.

began moving up to the 250,000 expected to grow to 2,500 by the former GM plant this year, workers, but the workforce is to be produced in May or June in the Midwest, next January when 'production in preparation for sales starting according to General Manager Bob Hendry.

The new 3.1 million square foot NUMMI plant, uses only about half the space of the former GM plant, which had two assembly lines operated by 7,000 workers before it closed March 4, 1982, Hendry said. The NUMMI plant was retrofitted and a new 180,000 square foot stamping building was constructed. The dedication ceremony was held up until all the construction was completed, Hendry said.

"The quality of the cars we've built is very, very high compared to other U.S. plants," said Hendry. "This plant is also much more efficient than most others in the United States."

The Nova being built for Chevrolet by NUMMI has "nothing in common" with previous Chevy Novas, Hendry said.

The four-door sedan has the same platform and power train as the Toyota Corolla and a similar model made for Japanese consumers called the Sprinter. However, there are differences between those cars and the Nova in their interiors and their exterior sheet metal. The Nova has three windows on each side rather than two and its hood slopes more.

**GRADUATING ENGINEERS, WHEN YOU STEP OUT INTO THE WORLD, YOU'LL WANT TO WORK WITH THE BEST TECHNOLOGY AVAILABLE.**

You're about to take a very important step in your career. Where you begin can make a world of difference. Of course, you want to be challenged and work in a stimulating environment. You want to work for a company that will hand you meaningful responsibility and recognize your contributions.

Step out with the best. Consider your future with Martin Marietta along the central California coast at Vandenberg. Here, at the future launch and recovery site for the U.S. Space Shuttle, you'll be challenged by some of the most demanding assignments available in space and defense systems.

What's more, Martin Marietta's matrix organization will provide you unusual flexibility in determining your career path and accomplishing your personal goals. The options are yours to develop your talents in laboratory research and development, field test and analysis, project management, and technical administration.

NASA's manned maneuvering unit is just one of many responsibilities we have on the Space Shuttle Program. And the U.S. Shuttle Program is just one of hundreds of long and short range projects you may experience at Martin Marietta.

To qualify for one of these unique growth-oriented positions, you should have a degree in one of the following:

- Electronic Engineering
- Computer Science
- Business Administration
- Mechanical Engineering
- Electrical Engineering
- Industrial Technology

We also have opportunities available in Baltimore, Maryland; Orlando, Florida; New Orleans, Louisiana, and at our world headquarters in Owings Mills, Maryland. We have opportunities in California, Colorado, Illinois, Louisiana, Missouri, New York, and Texas.

If unable to interview at this time, please send your resume to: Dave Elliott, College Relations Coordinator, Dept. CP55LO04185, Martin Marietta Aerospace, P.O. Box 1681, Vandenberg AFB, CA 93437.

If you're about to step out in the world, look into all that Martin Marietta can offer. We'll be one large step for you, and one giant leap for your career.

MARTIN MARIETTA

---

**A ruling by the Federal Trade Commission last year limits production at the NUMMI plant to 250,000 cars for General Motors.**

However, the plant is free, to meet this year's goal, Hendry said.

About 600 of the 60,000 workers, who will hand you over new 3.1 million square foot NUMMI plant, was completed, Hendry said.

"This plant is also much more efficient than most others in the United States."

The Nova being built for Chevrolet by NUMMI has "nothing in common" with previous Chevy Novas, Hendry said.

The four-door sedan has the same platform and power train as the Toyota Corolla and a similar model made for Japanese consumers called the Sprinter. However, there are differences between those cars and the Nova in their interiors and their exterior sheet metal. The Nova has three windows on each side rather than two and its hood slopes more.

---

**We'll be on campus April 18, 1985**

If unable to interview at this time, please send your resume to: Dave Elliott, College Relations Coordinator, Dept. CP55LO04185, Martin Marietta Aerospace, P.O. Box 1681, Vandenberg AFB, CA 93437.

If you're about to step out in the world, look into all that Martin Marietta can offer. We'll be one large step for you, and one giant leap for your career.
DOING EVERYTHING IN OUR POWER TO PUT YOUR CAREER ON LINE.

TOPAZ

A leader in power conditioning technology for over 25 years, TOPAZ designs, manufactures and markets a broad line of peripheral equipment which protects computers and other sensitive devices from electrical power disturbances. We are looking for graduates in a variety of disciplines who are ready to put their skills and innovative thinking on line.

- Electrical Engineering
- Manufacturing Engineering
- Industrial Technology

San Diego location offers you a unique choice of lifestyles. While Southern California has always been known for a multitude of outdoor activities, it is also rapidly becoming a high-technology center for the nation.

If you want to join the leader in power conditioning technology and are ready to take a straight line from school to a challenging career, plug into TOPAZ. We're doing everything in our power to put your career on line.

ON CAMPUS INTERVIEWS

Monday, April 15

If you are unable to meet with our representatives, please forward your resume to:
College Relations, TOPAZ, INC., P.O. Box 81187, San Diego, CA 92123.

After an all-day comprehensive production schedule, the Daily Mustang's Sherrie Holmdahl and Tom Freed get the first copies of the
Photos by Connie Adams

Daily work never ends

It is a 24-hour process.

Each morning the Mustang Daily is "mysteriously" appears all around Cal Poly in newstands for students to read. What follows is an explanation as to how this phenomenon occurs.

If a beginning must be chosen it would be with the advertising department.

• 8 a.m. — The advertising representatives start laying out the ads they have sold. By noon they are finished and proofed for mistakes.

• Noon — Deadline. Reporters have finished researching and typing their stories into the video display terminals. A few reporters are still at the computers working on late-breaking stories. Photographers have also finished taking pictures and are starting to develop their film.

• 2 p.m. — All stories should be done. The editor gets the layouts from the advertising representatives and starts to layout news stories around the ads. Copy editors, the sports and special sections editors are reading the stories reporters wrote, checking for typographical errors and libelous statements.

• 3:30 — All the stories are read, and the paper is laid out. Now headlines and photo captions are written.

• 5 p.m. — The stories are sent, by computer, to the typsetting room across the hall from the Mustang Daily Editorial Office. University Graphic Systems employees start pasting the typset copy and photographs onto the layout boards.

• 7:30 p.m. — Somewhere between now and 9:30 p.m. the paste-up is finished. The length of time depends on how many problems have occurred, such as a missing photograph or wrong size headline.

• 10 p.m. — The paper finally "goes to press" and is printed by UGS.

• 7 a.m. — The process starts all over.

The ASI, UU, and Children's Center audits for FY 1983-84 are complete and copies are in the ASI Business Office if you wish to review them—UU 202.

STUDENT HEALTH SERVICES

CUMBERLAND CENTER

TO 3350 CAMPUS WAY

472-3111

O. Where can I go for help when I park my scooter in a tree at 3:00AM?

A. We provide 24 hour emergency care, so you can always come to the Health Center. All emergency care is priced for students but when you have a Health Fund there is no charge.

QUARTERLY HEALTH CARDS ARE ON SALE AT $27/QUARTER. THEY CAN BE PURCHASED AT THE HEALTH CENTER OR STATE CASHIER.

*Dr. Beewell hints—There are no co-payments or deductibles with the Health Fund.*
Play “Mimes” to be presented Friday

A student written and acted play “Mimes” will be presented Friday in the Cal Poly Little Theatre at 8:00 p.m.

The play was written by Cal Poly student Brian Burrell and deals with the opposing forces of artistic creativity and practicality in the mind of an artist. Each of the nine actors represents a different facet of the artist’s mind. Eventually the creative part of the artist’s mind takes over, or wins the battle between the two opposing forces and becomes “Mimes,” the principle character.

The play is presented in seven acts with two scenes per act. The first scene of each act represents the conscious side of the artist’s mind with the actors speaking. The second scene of each act represents the unconscious side of the artist’s mind, with the actors not speaking but accompanied by music by Cal Poly graduate Tracy Biller.

Tickets for the play are $3.60 and will be available at the door.

Stations to simultaneously air aid hit

LOS ANGELES (AP) — “We Are the World” hit No. 1 on Billboard magazine’s charts Wednesday as at least 6,000 radio stations planned a simultaneous global broadcast Friday of the star-studded single to ease hunger in Africa and the United States.

The album featuring the single made by 45 American music superstars, meanwhile, got off to a flying start by selling more than 1 million copies in less than three days, Columbia Records announced.

The broadcast of the single will occur at 10:50 a.m. EST on Good Friday.

At least another 1,000 stations abroad in Canada, England, France, West Germany, Spain, Holland, Australia, New Zealand, Finland, Italy and Guam plus the Voice of America and Armed Forces Radio Network will also play it this Friday, he said.

The single, made in an historic all-night recording session Jan. 28 following the American Music Awards, fell short of predictions that it would skyrocket to No. 1 in two weeks, but Noonan said sales in the single’s fourth week were strong and seemed likely to last.

More than 3 million of the seven-inch $1.98 version of the single had been sold, while just over 500,000 of the longer 12-inch, $4.98 single had been sold, Columbia Records said.
WASHINGTON (AP) — The Senate on Wednesday rejected S8-34 legislation that would have extended federal jobless benefits for six months as it prepared to consider a bill to phase out the program for $39,000 unemployed Americans.

Senate Majority Leader Robert Dole, R-Kan., said he was "fairly certain" President Reagan would sign the $160 million phase-out bill as long as it contained no amendments to extend the program.

The phase-out bill, approved in the House on Tuesday, was to go to Reagan before the Easter-Passover recess begins Thursday.

Under the phase-out plan, unemployed workers already receiving benefits as of this week would continue to get their checks after the program expires. If Reagan vetoes the bill, no checks can be written after Saturday; even if workers had not received the full 14 weeks of checks.

But Packwood said the phase-out, estimated to cost $160 million to $180 million, is the costliest proposal Reagan and Dole agreed to as part of a deal that would let the three-year-old program die.

Because of a publicity gag order in the case, attorneys on both sides refused to comment on reports that Svetlana and Nikolay Ogorodnikov had been offered a chance to plead guilty to one count of espionage each in return for dismissal of other charges against them.

As part of the deal, a time limit would be imposed on their sentences, the sources said. The couple, scheduled to stand trial next Wednesday, face possible life prison terms if convicted of espionage.

The sources said Nikolay Ogorodnikov was resisting pleading guilty to any of the charges, and they suggested that his wife wouldn't enter a plea unless her husband did the same.

The sources said the talks between opposing counsel were routine in any criminal case an appeared destined for failure. They said a similar offer had been made to the co-defendant former FBI agent Richard W. Miller, early in the case. Miller rejected the deal, they said.

Ogorodnikov, 51, and his 34-year-old wife are scheduled to stand trial next Wednesday if they refuse to plead guilty to any of the charges against them.

Britain have an eccentric lot, it is partly because the British cherish their traditions long after they have outlived their usefulness. Thus in the age of the atomic clock, the bell still comes down the pole every day at Greenwich Observatory signaling the stroke of noon to non-existent ship captains on the Thames.

And every night at the Tower of London, Beefeater guards in red coats and frilly collars enact the following tableau:

Sentry: "Halt, who comes there?"
Chief Yeoman Warder: "The Keys."
Sentry: "Whose keys?"
Chief Yeoman Warder: "Queen Elizabeth's keys."

Sentry: "Pass Elizabeth's keys and all's well."

The Tower hasn't held a prisoner since the Nazi defector Rudolf Hess was locked up there in 1941. Cynics might suspect the rituals are kept up to attract tourists. Certainly not, retorts Jonathan Hawkins, manager of the Eccentric Club, where London's upper-crust oddballs hang out. "If they did it only for tourists, they wouldn't do it every night including dreary winter nights when there's not a tourist in sight," he said in an interview.

And Brig. Kenneth Mears, deputy governor of the Tower, argued that whether it still housed prisoners was immaterial. "The only reason it hasn't held a prisoner since 1941 is that we haven't had a war since. If we did, the tower might be used as a prison again." Meanwhile, he said, "we have formal ceremonies that just have to be done. It's a question of 700 years of English history."

And since legend has it that if the ravens ever desert the Tower, disaster will befall Britain, six ravens are kept on the premises, their wings clipped to keep them from flying away.

Jilly Cooper, who writes about English society, believes that English eccentricity springs from the aristocracy, because it alone feels secure enough to parade its idiosyncrasies without being held up to public ridicule.

To her, the finest example of this was the father of the late prime minister Sir Anthony Eden hurling his barometer out of the window one rainy day shouting: "See for yourself, you bloody thing!"

April Fools' Day sometimes seems like a parody of a parody and this year even the government joined in. Foreign Secretary Howe's official diary for April 1 included..."attending "a fish-hanging ceremony at Billingsgate Market" — which no longer exists."
New Reggie Jackson

By KEN PETERS

PALM SPRINGS, Calif. (AP) — Reggie Jackson’s storied baseball career appeared to be drawing to a close in 1983. This spring, he looked as if he could go on forever.

Jackson, who turns 39 in May, says he has renewed confidence and enthusiasm, a sharp contrast to the way he felt last spring.

“When I came into the spring last year, I knew I was going to have to play and perform,” Jackson said at the California Angels’ training camp. “There was a lot of pressure on me, everybody was wondering if I was through.”

“I feel a lot more involved in the game when I’m playing in the outfield.”

Jackson

Jackson had suffered through his poorest season in 1983, when he hit .194 with only 14 home runs and 49 runs batted in.

Kings may move to Sacramento

Kansas City gets OK from NBA

NEW YORK (AP) — The Kansas City Kings request to move to Sacramento, Calif., was approved Wednesday by a special committee of National Basketball Association owners.

However, it said the league should reserve the right to relocate the Kings if Sacramento does not build a suitable arena by the 1987-88 season.

The decision by the five owners must be ratified by the full 23-member board of governors, who will meet in New York on April 16.

The Kings, currently in last place in the Midwest Division with a 39-45 record, announced in January their intention to relocate, citing what president and general manager Joe Axsell called “generally weak support over the years.”

Gregg Lukenbill, who heads the Sacramento-based group that purchased the team in June 1983, said the Kings lost $1 million last season and had projected losses of $1.8 million this year.

Baseball league playoffs may have seven games

PALM SPRINGS, Calif. (AP) — Negotiators for major league baseball players and club owners reached agreement Wednesday to expand the league playoffs from five to seven games beginning this season.

Don Fehr, acting executive director of the Major League Players Association, and chief management negotiator Lee MacPhail jointly announced the agreement following a one-hour afternoon meeting.

The main topic of disagreement — distribution of an additional $9 million in television revenue from the two extra games in each league — was resolved for the time being. The two sides agreed to place the money into escrow next Sept. 16 if the overall issue of splitting broadcast revenue isn’t resolved by then.

“These escrowed revenues would remain a matter for negotiation as a part of the total agreement which is now being negotiated,” an announcement distributed by the two parties said.

Joe Lansford traded, will join brother in Oakland

PHOENIX, Ariz. (AP) — Joe Lansford, younger brother of Oakland A’s third baseman Carney Lansford, joined the Oakland organization Wednesday when the A’s and San Diego Padres traded minor league players.

San Diego received infielder Tim Pyznarski, 25, who missed most of last season because of a shoulder problem. Pyznarski hit .28 home runs two years ago in Class AAA Las Vegas arm team last season.

The most productive reliever in baseball career appeared to be right field, rather than in the designated-hitter role. Jackson’s hold for the past two seasons.

“I feel a lot more involved in the game when I’m playing in the outfield,” Jackson said. “I’ve been hitting the ball well and there seems to be a correlation. I feel not as productive in the DH role.”

Jackson, who frequently has said he admired Angels’ Gene Autry, said it would be fulfilling if he could help the club win its first league pennant.

“Of course, you want to win anytime you go out there,” he said. “We had a chance to win in 1982 Angels lost to Milwaukee in the League Championship Series, but we didn’t.”

The biggest factor in Jackson’s rebirth, enthusiasm apparently has been Manager Gene Mauch’s decision to use him frequently in right field, rather than in the designated hitter role.

“We had a chance to win in 1982 Angels lost to Milwaukee in the League Championship Series, but we didn’t.”

Joe Lansford, 24, is a first baseman who hit .287 with 25 home runs and 80 RBI for the Padres’ Class AAA Las Vegas arm team last season.
The Cal Poly baseball team split a double-header with Chapman College Tuesday, winning the first game 11-9, dropping the next game 5-4.

The split gives Cal Poly a 4-5 league record and fourth place in the California Collegiate Athletic Conference. Cal State Dominguez Hills is in first place in the CCAA, with Cal State Northridge in second.

Rightfielder Monty Waltz and second baseman Rob Lambert were the heroes of the opening game win for Cal Poly.

Up until the seventh inning the Mustangs were behind, trailing 9-3 after seven.

But after being walked three times in the previous at bats, Chapman had no choice but to pitch to Monty Waltz when he came to bat with the bases loaded.

Waltz hit a 2-1 pitch for a grandslam home run, giving the Mustangs a one run deficit.

Chapman was unable to score in the eighth inning, but that didn’t stop the Mustangs.

With two on, Rob Lambert hit a home run, giving the Mustangs an 11-8 lead.

Chapman earned one run in the ninth making the final score of game one 11-9.

The winning pitcher, Steve Burch, is now 3-0 this season. Burch is from Santa Maria and went to Hancock College before coming to Cal Poly.

The Mustangs immediately fell behind in the first inning of game two as Chapman scored one run.

A single run scored by Matt Mustang Monty Waltz now has 10 home runs.

King put Cal Poly on the scoreboard, but the competition proved too tough. Chapman moved out to a 5-1 lead by the fifth inning. Two came the sixth and one in the seventh, before Cal Poly lost 5-4.

Waltz appeared the star, earning the seventh-inning run on a solo home run, his second of the day.

It was Waltz’s tenth home run this season, tying him with Joe Zagarino and Tink Reynoso for most home runs hit in a season. Both men hit ten in 1974. Waltz has 24 games to break this record. He is also in the running for breaking the RBI record currently held by leftfielder Jason Maas who drove in 57 last season.

Waltz currently has 52.

The Mustangs will travel to Chapman for three games this weekend. They will return to SLO Stadium on April 9 and 10 to host Cal Poly Pomona. Both games begin at 2:30 p.m.
Waltz gets a friendly welcome after hitting grand slam.

Sutton new head coach at Kentucky

LEXINGTON, Ky. (AP) — Eddie Sutton, after saying he wouldn't leave Arkansas for any other job, was appointed Tuesday to succeed Joe B. Hall as Kentucky basketball coach.

Sutton, who took Arkansas from the basement to the top of the Southwest Conference, brought his college coach, the great Henry Iba, formerly of Oklahoma State, along for the announcement.

Sutton wore a Wildcats' tie provided by Cliff Hagan. Kentucky's athletic director.

"When you think about basketball, that's Kentucky," Sutton said, noting that he grew up in Kansas listening to Kentucky games on the radio. "It's the only job I'd leave the University of Arkansas for.

"When (Kentucky President Otis Singletary) called me, believe me, I would have crawled all the way to Lexington," he said. "Fortunately, I was already here for the Final Four."

Sutton, 49, became coach at Arkansas in 1975 after five years at Creighton and quickly turned around the Razorbacks' program.

If you are seeking a technical career beginning with excellent training leading to future growth, we would like to meet with you.

YOU PROVIDE THE TALENT AND INITIATIVE--
WISNER & BECKER CONTRACTING ENGINEERS WILL PROVIDE THE OPPORTUNITY.

Our Systems Technologies group is involved in the design, fabrication and installation of computer aided system, telecommunications, rail transit signaling and supervisory control and data acquisition systems.

Our Heavy Construction group is involved in mechanical and electrical installations on powerplants and industrial processing facilities, which includes mechanical equipment installation, piping, electrical and instrumentation work.

WE ARE SEEKING GRADUATES WITH DEGREES IN THE FOLLOWING AREAS:

— COMPUTER SCIENCE (SCIENTIFIC APPLICATIONS)
— ELECTRICAL ENGINEERING (ELECTRONIC EMPHASIS)
— ELECTRICAL ENGINEERING (POWER)
— MECHANICAL ENGINEERING

WE WILL BE ON CAMPUS
FRIDAY, APRIL 19, 1985
PRESESSION: APRIL 19 7:00 P.M.

IF YOU ARE SEEKING A TECHNICAL CAREER BEGINNING WITH EXCELLENT TRAINING LEADING TO FUTURE GROWTH, WE WOULD LIKE TO MEET WITH YOU.

The Card can help you begin to establish your credit history. And, for business, the Card is invaluable for travel and restaurants. As well as shopping for yourself. Of course, the American Express Card is recognized around the world. So you are too.

So call 1-800-528-4800 and ask to have a Special Student Application sent to you. Or look for one on campus.

The American Express Card. Don't leave school without it.***
