Experts debate controversial abortion issue

By THOMAS WILLIAMS

More than 200 people were exposed to both sides of the controversial issue of abortion Thursday night in a debate held in Chumash Auditorium.

The debate was sponsored by the ASI Speakers Forum and featured four panelists. On the pro-choice side were Carol Downer and Dr. Charles A. Bradley and on the pro-life side were Susan Carpenter McMillan and Dr. Carolyn Gerster.

Dr. Robert L. Cleath, a Cal Poly speech communication professor emeritus, was the moderator and introduced the debaters with a play on words calling for a 'pro-choice and vigorous debate.'

Speaking of the debaters Cleath said, "Three fertile minds have conceived ideas that will deliver and give birth to answers of the future. I am confident they will not abort their ideas. However, there may be some premature pregnancies. On the pro-choice side, they will present a full-term viewpoint on the topic of abortion."

After a burst of laughter from the audience, Bradley, medical director of Planned Parenthood and gynecologist who has been performing abortions since 1958, began the debate with his opening speech. In it he said that women need access to safe, legal abortions.

"Abortion has been with us forever and it will be forever," Bradley said. "Making it illegal will push women back to the ravages of unsafe, illegal abortions.

Gerster, former president of the National Right to Life, and private physician in Scottsdale, Ariz. said, "Physicians should not be executioners. 'They said the audience that her pro-life stand comes about as a result of the Hippocratic Oath that every doctor must take."

"I don't believe that my opponent understands that abortion is murder and many of the comments brought hisses from the audience.

Cal Poly police are limited in how they pursue the investigation. "We've advised the victims to phone in their lost credit cards and once someone uses them we'll have a suspect with a description," said Berrett.

Once the credit cards are used, said Berrett, the credit card company will send a description of the suspect, the items bought and a vehicle description.

The only other action that can be taken by police is to notify instructors of the thefts and advise them to lock their valuables in their desks if they expect to be out of their offices.

Wallet thefts reported at Poly

By DAN RUTHEMEYER

Two Cal Poly faculty members and a student had their wallets stolen on campus in the past several weeks.

According to Investigator Ray Berrett of the Public Safety Department, all three cases involved the victims leaving their wallets unattended for only a few minutes.

The faculty members had their wallets stolen when they left their offices for several minutes to do something else.

"They walk out of the office for a minute to do something and when they come back something is gone," said Berrett.

The third wallet was stolen when a Cal Poly student left it in an unlocked locker in the men's locker room.

Berrett said he believes that the thefts are committed by people who are just walking through the halls, but doesn't discount the possibility that one person may be involved in more than one of the thefts.

Because the thefts were isolated incidents and there are no suspects, Berrett said that Cal Poly police are limited in how they pursue the investigation.

"We've advised the victims to phone in their lost credit cards and once someone uses them we'll have a suspect with a description," said Berrett.

ASI elections begin; more needed to run for Senate

By KEVIN H. FOX

The selection of student leaders is a vital role of the Associated Students. It is an opportunity to present, themselves, to student bodies, candidates and to the campus large whichaspert - the position that the president legally holds.

Mike Mender, Steve Dunton and John Carroll will be working hard campaigning to get student attention and present their stands on various issues.

The chairman of the Student Senate awaits the winner of the vice president position which is being sought by only two students, John Sweeney and Mark Reshel.

The fundamental element of a democratic form of government is the representative, in Cal Poly's case, the student senators.

Of the 22 seats that are to be contested, there are 24 students who fulfilled all of the filing requirements and will appear on the ballot.

Steve Masuda, chairman of the ASI Elections Committee, said that this low number of applicants for the senatorial positions may cause some problems. In the School of Professional Studies and Education there is only one student running for four open positions.

Masuda said that the committee has not yet decided how to deal with the problem of too few candidates.

This condition also exists in the School of Science and Math and the School of Architecture and Environmental Design. Each of these schools has only one person running for two available positions.

Write-in candidates will be considered, but nothing has, as of yet, been finalized to deal with the situation.

Masuda said that a special election is possible but nothing will be decided until after the election.

As far as why there was such a low turnout of interested students for senate seats, Masuda thinks that the image of the Student Senate may not be one of a true democratic body. "Sometimes you can see, in the Student Senate meetings, voting that is done based on what people's friends are doing. It looks like it is not really a democracy, people don't want to be involved," he said.

Masuda added that his committee has made a few changes in order to increase student involvement in voting. Among these changes are the addition of a 4 by 4 foot sign at all of the voting locations.

The group will also reproduce the voting location signs on Dexter-Biddlewood lawn closer to the Business Building.

ASI ELECTIONS '85

He said that the booth in the Agriculture Circle will remain there, and not be moved to the library as has been called for by some student. He said the reason for this is that the Agriculture Circle spot serves students who want to drive up and vote quickly and conveniently.

Masuda estimated that last year there was only a low, 20 percent student turnout to vote but he feels the changes that will be implemented this year might make a difference.

The major emphasis this year will be getting out the news that elections are happening. Masuda said. "Students don't really know what is going on and they don't care.

ASI President Kevin Criagston said that there is a lack of any hard issues that will separate the candidates in this year's election. Just as last year the ASI Vice President Marcia Godwin felt that there were not much to separate the candidates. "All four of the major candidates for president and vice president who have seniors feel that there are no students who want to drive over the baseball field for four years," she said. "It will probably continue the work that was done by Kevin on the Student Senate."

**Alcohol won't create maturity**

Editor:

I understand students’ desire for being allowed to drink on campus. I enjoy drinking myself. But let’s be realistic. Binge drinkers Schaefer and Earl Ruby are fantasizing when they say a wet campus would promote a mature student attitude.

Let’s face it. Some folks can’t handle booze. Now I enjoy partying as much as anyone, but am repelled by the sight of a belligerent college drunk who thinks he owns the world.

Yet, I like the idea of an on-campus pub. If the school could afford the emotional cost of a liquor license, an on-campus pub should be looked into.

But lose the rest of these inspired ideas. I really make a great news story, but if someone’s not careful, these great news stories could end up sounding like the “legitimate campus-on-campus” stories we all read in our high school tabloids.

Rory Barbarow

---

**Students need to be 'whipped' from chiming**

Editor:

Our senators must have their heads on backwards. A wet campus is no alcohol would do nothing to make the student body more mature campus” — you’re crazy.

Have you ever walked through the U.U. grounds at 12 a.m. Have you seen all the sights — these minds are so juvenile they cannot even try to save their own garbage. It’s totally disgusting.

Have you ever been to a campus club meeting where the president of the club can’t even talk because these rude children keep laughing, talking and making “funny” jokes every time he tries to talk? Alcohol more available — sure would help you.

These kids don’t need alcohol — they need Pampers and someone to whip their butts.

Chris Macky

---

**Keep the bells from chiming**

Editor:

Some of us have 7 a.m. classes. Anything is difficult at that time — so why does the clock tower have to ring every 15 minutes? To keep us awake? I prefer to keep my sleepy attention on the fundamental theorem of calculus. I ask for the same consideration (“chime” schedule) as 8 a.m. students get. Ya know? Shut up!

Taralyn Prucha

---

**Kid commends care service**

Editor:

An open letter to all students, especially ASI members:

Thank you so much for providing me with a safe, educational and superior place spend my day that is close to my mother’s daytime activities. It was a big adjustment to spend time away from my mom. My Children’s Center has been so good for me, and so fun, that I can’t even cry sometimes when it is time to go home. I like the routine, and the routine, and I’m very glad I have it.

I want to keep my sleepy attention on the fundamental theorem of calculus. I ask for the same consideration (“chime” schedule) as 8 a.m. students get. Ya know? Shut up!

Brendan Landis
and his mom

**RA’s speak out on their position**

Editor:

As resident advisors during the 85-86 academic year we feel compelled to respond to the editorial letter written by Christian Speck on March 4, 1985. We agree with a number of points he made. RA’s resident position involves a substantial time commitment and at times exacts tremendous personal sacrifices.

And indeed, if one were to try to pin a “dollar per hour” figure on the position, it probably would approach Speck’s calculations through even making such calculation surely bepeaks a misunderstanding of the true rewards of the resident advisor position.

Mr. Speck’s criticism are unwar shocked that he has dwelled so far removed from reality. Speck is an RA on not merely the university alcohol policy enforcement (therefore beyond a resident. A resident advisor position is much more involved in her. She says without the emotional and financial support, this great off-campus care and love she would not be able to make it through school.

We are both really grateful for all the support that the Children’s Center provides us, and without it, we would both probably cry for a long time. Thank you for considering all the important parts of a program when important decisions are being made.

Brendan Landis
and his mom

**Gearing up for of elections another round**

What do the new audiovisual service, longer library reserve room hours, the new profit-making student telephone book and the cable television about to enter the dorms all have in common? They’ve all come together mainly through the work of the Cal Poly student government this year.

Student leaders — when highly motivated — can do something to improve the life of students.

That has been shown.

Many student leaders seem to tire halfway through the school year. Others seem to lack the will to change the school from the outside.

Once again it’s Spring Quarter, and time to elect a new batch of student leaders.

Campaigning for ASI positions opens today. Three hopes are vying for the position of president, and two for vice president.

And while several schools don’t have enough candidates for the number of Student Senate seats, the School of Agriculture has 10 candidates running for five open spots.

Students and the Mustang Daily Editorial Board both sometimes complain about the quality of their student leaders, but in the end, it is us who elect our representatives. We are responsible for what our student leaders will do for us.

The Editorial Board encourages everyone to carefully examine the candidates and their stand on the issues that affect students.

It’s us students who choose our student leaders, and we should up to us to select the person that is willing and able to make a difference.

Study and challenge the candidates during the presidential debate tomorrow in the University Union at 11 a.m. A question and answer period follows the debate.

Also watch the Daily each day for stories on the election. The candidates and issues will be featured each day in a comprehensive coverage of student elections.

Any student who wants to throw his hat in the ring and campaign for the open senate spots by write-in can do so. However, we hope it will be done in a serious manner, as viable candidates wanting to work for improvement.

---

ABORTION
From page 1
Gestation rebutted Bradley’s statement by telling the audience a story of a fetus that was aborted in Arizona after 32 weeks and survived. “The doctor was only given a letter of concern,” she said. “In Arizona there is a penalty for killing a baby before that age, but there is no penalty for killing a baby— it is a sick society.”

Downer’s rebuttal again focused on her opponents’ hidden motives. “They have hidden motives to increase the population,” she said. This brought groans and snorts of disgust from the audience, but Downer warned them to be wary of the pro-life message.

McMillan, used her rebuttal period to define what it is to be pro-choice. “After 32 weeks, a doctor went in with his hand and pulled a baby’s legs from their sockets — that’s what it is to be pro-choice,” she said. This brought a round of hisses from the audience. “They have hidden motives to increase the population,” she said. This brought groans and snorts of disgust from the audience, but Downer warned them to be wary of the pro-life message.

During the abortion debate, the audience was allowed to ask the debaters questions on the issue. Most question were directed to Susan Carpenter McMillan, a feminist against abortion.

The debate she made reference to the fetal organs and pointed out that all of them worked before birth.

However, this questioner pointed out the fact that lungs don’t work before birth and the audience exploded with applause. McMillan countered with a question of her own: “Then you don’t consider someone hooked up to a kidney machine a person?”

“Those are questioners’ hypotheses. "What does it feel like to kill a baby?" "Do women have the right to mutilate themselves?" "Will making abortions illegal safely reduce the number of abortions?"”

To the last question, McMillan replied: “Because this white, Anglo-Saxon woman is concerned.”

Another member of the audience sought to point out an apparent contradiction in McMillan’s argument. Earlier in the air to cheers and applause from the audience.

Moderator Cleath had to cut off the questions because of time and the debaters were given one minute each to reiterate their points.

Bradley said women need access to safe, legal abortions. Gestet said that we need to look beyond abortion and look at life.

Downer insisted that the pro-choicers are hypocrites and that they want to keep women barren and “pregnant in the kitchen,” and that which woman in the audience shouted, “and they’re making money doing it!”

McMillan ended the debate by expressing her concern for all of society including senior citizens, which brought more shouts from the audience.

FREE SPINAL EXAMINATION
Johnston Chiropractic Clinic Inc. is sponsoring a spinal check-up and Scoliosis Screening program as a public service. This service will include consultation, physical examination and a report of findings.

WARNING SIGNS OF SPINAL MISALIGNMENTS
• Pain Latw aan Shoiidar
• Limited Range of motion
• Numberness in hands & arms
• Loss of Sleep
• Difficulty Breathing
• Numberness in legs & feet
If you suffer from any of these warning signs call immediately to the office. They’re pretty knowledgeable and can answer most questions.

By DAWN YOSHITAKE
If long lines for the Financial Aid office cause dismay, students may want to re-route their path to the University Union Plaza. Information and applications are available from financial aid counselors.

Coordinator Luann McDonald, for the peer counseling program, said four students will take turns in this quarter marking a table in the plaza to increase accessibility of financial aid information.

Citing reasons for the program’s success, McDonald said, “Some students don’t like to wait in long lines at the Financial Aid office.”

She added that students might feel peer counselors are more credible since they have gone through the financial aid process themselves.

To become eligible for a peer counselor position, students had to have received a financial aid award that included a work study package. McDonald said half of the financial aid that peer counselors receive is met with work study funds given to them for working as counselors.

After a selection is made, students undergo a training period of 15 hours during the Fall Quarter and attend update meetings throughout the year.

If they (counselors) can’t answer questions they’ll refer people to the office. They’re pretty knowledgeable and can answer most questions.

The four students serving as counselors are industrial engineering major Debbie Cohen, business major Debbie Cohen, industrial engineering major Evelyn Donate and mechanical engineering major Tu Le.

We’ll probably hire one or two more peer counselors for next year. We had four throughout this year and they plan to return next year too,” McDonald said.

The program began in 1979 and continued until 1983. It was discontinued for one year because a coordinator was not available. Since Fall Quarter 1984, when the program started again, 2,690 students have been assisted by peer counselors, McDonald said.

During Winter Quarter, four campus locations were used to help reduce the financial aid deadline rush on March 31.

“Now that the deadline has passed, there’s a decrease in traffic,” McDonald said.

She added that the one information table used in the plaza meets the needs of the students for Spring Quarter.

“It’s important to give students information in applying for financial aid next year,” McDonald said.

Peer counselors will be available 10 a.m. to 1 p.m. Monday and Wednesday and 2 p.m. to 5 p.m. Tuesday and 1 p.m. to 5 p.m. Thursday.

Volunteers sought for Special Olympics

By GREGG SCHROEDER

The San Luis Obispo County Special Olympics is seeking volunteers to help run the area track and field meet scheduled for May 3 at Arroyo Grande High School.

Linda Ugenti, volunteer coordinator for the meet, said the community is invited to attend any one of the four informational meetings planned to orient potential Special Olympics volunteers.

The meetings will be held at 7:30 p.m. at the following locations: •April 5 at the San Luis Obispo Recreation Building, Room 4, located on the corner of Mill and Santa Rosa streets.

Thirty-five years of service

By SALLY KINSELL

A professor in the Animal and Veterinary Science Department received an award for 35 years of service to Cal Poly during the annual service awards luncheon March 20.

Professor Richard F. Johnson was one of 228 faculty members and support staff who were recognized at the luncheon. He was the only member who was recognized for 35 years of service to the university, and received a tie tack with the Cal Poly seal to the university, and received a tie tack with the Cal Poly seal to the university, and received a tie tack with the Cal Poly seal to the university, and received a tie tack with the Cal Poly seal to the university, and received a tie tack with the Cal Poly seal.

Johnson, 64, was head of the Animal and Veterinary Science Department from 1969 to 1983, when he returned to full-time teaching. “I just wanted to get back with the students so I asked to be promoted to full-time teaching,” he said.

Johnson said that he plans to remain, Room 100, indefinitely. “I’ve enjoyed it. I wouldn’t have stayed if I hadn’t.”

“The world has a lot of places in the world, but there’s none that can beat San Luis Obispo.”

Before coming to Cal Poly to teach, Johnson taught in the Animal Science Department at Washington State University for two years and served in the United States Army for four years. He graduated from Iowa State University in 1942.

Among the other 227 persons receiving certificates and other awards honoring their years of employment at the university were six with 30 years of service, 16 with 25 years of service, 25 with 20 years of service, 106 with 15 years of service, and 74 with 10 years of service.

A Cal Poly President Warren J. Baker presented the awards during the luncheon in Chumash Auditorium. The event was sponsored by the University Club, a service and social organization for university employees.

London Semester Abroad information meeting set

A meeting for students interested in learning about the Fall 1985 London Semester Abroad program will be held on Monday, April 8, at 2:30 p.m. in University Union room 210.

The program is being offered to students throughout the California State University system in cooperation with the American Institute for Foreign Studies.

Dr. Robert McDonnell of the Cal Poly English Department will be participating in the Fall 1985 program. Courses offered in the London Semester Abroad program can be used for credit toward graduation.

Accommodations will be provided in Central London and a complete program of social, cultural and sightseeing activities are included.

Monday’s meeting is mostly informational and will include a question and answer period, said Carole Dreyer of the School of Communicative Arts and Humanities.

“There will be (detailed) brochures there for students that are interested,” Dreyer said.

Photo identification cards available during quarter

Cal Poly students, faculty and staff who do not have a university photo identification card — or wish to replace their lost card — may do so during Spring Quarter.

Photographers will be available Monday through Friday from 1:30 to 4:30 p.m. throughout the quarter in the office of Dean of Students Russell Brown, room 209 of the Administration Building.

Page Hagan, Brown’s secretary, said no appointments are necessary. Students must first pay a $5 fee at the cashier’s window (Administration 131E) and take the receipt to the photo I.D. staff. Faculty and staff charges will be paid by their respective departments.

Temporary I.D. cards will be issued for use until the permanent cards are ready, which is four to six weeks after the photos are taken. Permanent student cards will be distributed in the University Union Plaza and faculty and staff cards will be sent to the Personal Office for forwarding.

Hagan added that I.D. cards are necessary to cash checks on campus and to check out library and audio-visual materials.

The ASI, UU, and Children’s Center audits for FY 1983-84 are complete and copies are in the ASI Business Office if you wish to review them—UU 202.

day 8-5. Won’t you join in with your friends and be a good neighbor.

clippers, pruners, machete and chainsaw; gas up the pick-up, neighbor.

about joining in the fun afterwards.

backhoe, dozer and dump; oil up those elbows and be prepared to help the community in an event expected to bring widespread media attention. The activity has already been declared by the Panhellenic Council as their Spring philanthropy bringing support from their shower burns by enjoying a wide selection of television channels.

In the dining hall is repulsive. We need more money. Why should I put up with this? The students of Cal Poly need a voice that is not only heard, but listened to. The ASI has been working hard to improve the quality of life for all Cal Poly students, and we need your support to continue this important work.

The candidates for this year’s presidency are Elliot, journalism major, and Susan Elliott, journalism minor, as well as Steven Dunton, Mike Mendes and John Carroll. These candidates are motivated responsible individuals who are interested in pursuing significant student issues, working on pragmatically related projects (such as the amphitheater), and becoming involved at Cal Poly. If this sounds like you, stop by and pick up an application for involvement from Linda Lee Thoresen in U.U. 217-A.

Heading into my final quarter as ASI President, there are a number of projects which remain. However, in the 24-hour study area on-campus. Administrative plans originally called for library hours to remain unchanged when a large number of terminals were moved to the reserve room during the summer quarter. In our effort to ensure student access to computer terminals, we were also able to secure an all-night study facility.

We are always open to your constructive comments and/or criticism. Come by and see us.
Chris Parra, 10, was victorious in the egg toss at Phi Kappa Psi's annual Easter egg hunt, held at Laguna Lake.

About 200 youngsters turned out to scramble for eggs and candy Sunday at Phi Kappa Psi’s annual Easter egg hunt at Laguna Lake Park.

The Cal Poly poultry unit and Rosemary Egg Farm donated more than 800 eggs for the event, according to Jerry Hansen, egg hunt coordinator.

“It’s something we do every year to let the kids have fun and to show the community that we’re a lot more than just parties and noise,” Hansen said.

The real star of the day was the Easter bunny, played by fraternity member Mike Miguel. Some timid youngsters had to gather all their courage to approach him, while others pulled at his fur and asked him if his ears were real.

After all the eggs had been found, sack races and egg tosses ended the sunny afternoon.

Soviets halt missile deployment

Moscow (AP) — Soviet leader Mikhail Gorbatchev said he wants to meet with President Reagan and has ordered a halt until November in Soviet deployment of medium-range nuclear missiles in Europe, the official news agency Tass reported Sunday.

Gorbatchev said the Soviet Union's decision on further missile deployment after that time "depends on whether the United States follows our example. Will it stop or not the deployment of its intermediate-range missiles in Europe?"

Tass quoted the new Soviet leader as making the statements in an interview with the Communist Party newspaper Pravda.

It did not say when the interview was conducted, or indicate a publication date.

In Santa Barbara, Calif., where Reagan is vacationing, presidential spokesman Larry Speakes said: "If they want a freeze, fine. It's not enough."

Speakes said the Soviet Union already has a 100-missile advantage in Europe and the Gorbatchev plan would not affect scheduled deployment of American missiles. "Stability requires that a balance be established at the least possible point," he said.

Asked if Gorbatchev's remarks made a summit more likely, the spokesman replied, "No, I don't think there's anything...that moves it any further than it was."

He said Gorbatchev's statement did not go beyond what he had conveyed privately to Reagan and that negotiations will get under way at some point for the first top-level superpower talks in six years.

Vice President George Bush carried a letter from Reagan to Gorbatchev when he attended the March 19 funeral in Moscow of President Konstantin U. Chernenko. The White House disclosed the letter invited the new Soviet leader to the United States. Reagan has indicated he would be willing to meet Gorbatchev at the opening of the U.N. General Assembly in September.

In the Tass report, the news agency said Gorbatchev discussed the possibility of a summit with Reagan and quoted him as saying: "The question of such a meeting was dealt with in my correspondence with President Reagan. I can say that a positive attitude to such a meeting being hold was expressed from both sides. Its time and place will be the subject of subsequent arrangement."

Gorbatchev said the correspondence discussed ways to improve relations between the superpowers.

"We offer the government of the United States to conduct the matter in such a way that it would be seen to all our peoples, to other countries, that the political courses of the U.S.S.R. and the United States are oriented not at hostility and confrontation but at the search of mutual understanding and peaceful development," he said.

He was quoted as saying that the Soviets also wanted to demonstrate their goodwill by halting deployments of medium-range missiles which the Soviet Union has said were necessary to counter NATO deployments of U.S. missiles in Europe.

"We are prepared to demonstrate our good will again. And starting with this day, and I want to emphasize this, the Soviet Union is introducing a moratorium on the deployment of its intermediate-range missiles and suspending the implementation of other reply measures in Europe."

"The duration of this moratorium is until November of this year," he said.

NATO says the Soviet Union has deployed 414 triple-warhead, intermediate range SS-20 missiles in on the Europe. The deployment of 572 new U.S. Pershing II and cruise missiles in Western Europe is designed to counter the Soviet deployment.
Polo team bumps and bruises chasing title

Women spend their time, money trying to win NCAA title for Poly

BY JOHN BACHMAN

Imagine riding a horse and trying to hit a ball while someone is attempting to break your kneecap.

The polo team, from left, Sue Callender, Jamie Berpo and Therese Payton.

Most of the schools are from the East. Cornell and UC Davis are the favorites, according to Hale, but most of the schools are strong.

Pulled muscle keeps Connors from showdown with McEnroe

CHICAGO (AP) — Jimmy Connors, who was scheduled to meet top-ranked John McEnroe Sunday in the final of the $325,000 Volvo Tennis Chicago tournament, was forced to default because what was described as a torn muscle in his lower back.

It was the first time in more than a decade of professional tennis that the 32-year-old left-hander failed to take the court.

"It's never happened that I never played. Maybe that's it," said Connors, who was seeded No. 2. "I played too many times, hurt in the past, it's finally caught up with me." Connors, who earned $20,000 for second place, warmed up for about 15 minutes before electing to withdraw. McEnroe took home $50,000.

"I guess I got a little bit of an Easter prize," said McEnroe after being handed the winner's check. He said it was the first time he's ever won a title by default.

Connors came into the final with a 16-4 record and without a title victory this year. He lost to Ivan Lendl in the final of the Paine Webber Classic at his last tourney appearance, and was twice a semifinalist in 1984.

Despite taking a month away from the game, Connors came to Chicago as the No. 2 ranked player in the world.

Connors' trainer, Bill Norris, called the injury a torn muscle and said the problem began in Connors' tough quarterfinal win over Brad Gilbert.

He said Connors aggravated the injury in a semifinal win Saturday over third-seeded Andres Gomez.

To the delight of a nearly packed house at the Pavilion, McEnroe played an exhibition match against Eliot Teltscher, the No. 5 seed in the tournament and an early-round loser.

"There's nothing like a home opener. Whether it's at home or on the road," Yogi Berra, the Yankees manager, once said.

The rest of the 26 major league teams play Tuesday.

The crowd in Cincinnati should be lively, anxious to see what Rose can do in his first full season since returning to his home town. He's in hot pursuit of Ty Cobb's all-time hit record of 4,191.

"I'm not going to worry about the record until I'm close enough that I can break it that day," Rose said. "No one has ever gone 95-for-95 in a game."

Mario Soto will start the opener for the Reds at Montreal's Steve Rogers, trying to rebound from a 6-15 record during an injury-riddled 1984 season. The game will be the Expos' first under Manager Buck Rodgers.

Detroit got off to a 35-5 start last year, finished the regular season with a 104-58 mark, swept Kansas City in the AL playoffs, then routed San Diego to win the World Series in five games.

The Tigers will send ace Jack Morris against Cleveland's Bert Blyleven in a matchup of 19-game winners in 1984.

Many AL teams, trying to prevent a repeat of last year's Tiger runaway, strengthened themselves with off-season acquisitions.

New York added Rickey Henderson, one of the best leadoff hitters in baseball. Baltimore spent million of dollars to sign free agents Fred Lynn and Lee Lacy and pitcher Don Stanhouse.

Toronto, which blew more leads after the seventh inning than any team in the majors last year, finished the regular season with a 74-88 mark. The Blue Jays got relievers Bill Caudill and Gary Lavelle.

Detroit, not to be outdone, traded for pitcher Wally Terrell. The Yankees will have 46-year-old knuckleballer Phil Nekro as starter against their traditional rival, the Red Sox.

Boston, which has a new manager in John McNamara, is starting with Dennis "Oil Can" Boyd on the mound.

In the nuclear Navy, you learn quickly. Over half of America's nuclear reactors are in the Navy. And that means you get hands-on experience fast. You get rewarded fast, too. With a great starting salary of $22,000 that can build to as much as $44,000 after five years. And with training and skills you'll use for a lifetime.

Then, whether you're in the Mediterranean, the Pacific or the Atlantic, wherever you move around the world, you'll be moving up in your career and in the Navy.

Find out more about an exciting future that you can start today. See your Navy Recruiter or CALL 800-327-NAVY.
Poly knocks off Chapman

Mustangs take first in league by beating No. 2

The No. 3 ranked Cal Poly men's tennis team used the come-from-behind play of Dave Reynoldson and a win by the doubles team of Bob Zoller and Brain Baas to upset 4-5 Thursday the No. 2 ranked Chapman team.

Mustang Reynoldson was down 2-6 in the third and deciding set of his match with hard-servidg Terry Davis. He broke Davis' serve twice, rallying to win 7-6.

Cal Poly had lost to Chapman earlier in the year and the win moved the Mustangs into first place in the California Collegiate Athletic Conference.

The Mustangs, 17-2 overall after beating Chapman, will probably move up from their No. 3 rankings in the NCAA Division II.

The win in singles by Reynoldson gave Cal Poly a 4-2 lead in the contest, and Zoller and Baas won their doubles match to give the Mustang five matches for the win.

Sue Callender is the veteran on the Cal Poly team.

POLO

From page 9 learn what you can do and what you can't do.

The team receives no money from the university and team members pay part of the tab for horses, equipment and transportation.

The rest is paid by polo patrons who help support the team.

"They treat us quite well," said Callender.

The championship is single-elimination.

"We expect to do quite well this year," said Callender.

The team roster was established in September. The team practices twice a week at local stables, traveling twice a month to Moorpark to practice with Hale. She lives in Moorpark.
