Anti-apartheid rally to be held in UU Plaza

By DAWN YOSHITAKE

An Apartheid Awareness Rally will be held in the University Union Plaza this Wednesday to educate people on the strict racial segregation practiced in South Africa.

The rally will take place April 24 at 6:30 and speakers will include students, faculty and staff.

A table will also be available in the plaza to provide information on apartheid.

A coalition of concerned Cal Poly organizations will sponsor the rally. These groups include the Asian American Student Association, Iraqi Student Association, Campus Hunger Coalition, African American Student Association, Association of Graduate Students in Agriculture, Asian Student Association, and Iranian Student Association.

Rally organizer Daniel Sherrard said, "The idea is to spread the idea to Poly after attending an apartheid rally at the University of California at Berkeley."

"I was in Berkeley on business and went to the rally. There were 5,000 people at the rally and I thought, 'Well, didn't we have something here?'

She added Berkeley rally organizers announced April 24 as a date other campuses should hold their own rallies in order to link campuses across the nation together.

Apartheid protests cause refuge in African nations

By JAN SPRAGUE

"It's South Africa in a terrible bind," said Philip Nile, professor of mechanical engineering. "There is no easy way out of this problem for them."

Niles lived in Botswana's capital, Gaborone, and conducted solar technology workshops during Winter Quarter.

"Generally speaking, Botswana would like to isolate itself from South Africa's problems. After living there for four months, Niles said he thinks that the government of Botswana is fairly vulnerable to the activity of South Africa."

"The Botswana government would like to maintain its independence as a nation with a small population and a remoteness of its own."

"Although Botswana wants to maintain its independence, it is an isolated nation in a small region with a small population." Niles said.

"I've lived in Botswana and it is a beautiful place. I've been there for six months and I haven't had any problems."

"I have been in Botswana and it is a beautiful place. I've been there for six months and I haven't had any problems."

Many Cal Poly students claim they never had hay fever before coming to San Luis Obispo, where the many pollens in the air cause a seasonal nuisance for allergy sufferers.

"No one in my family has ever had hay fever, but about this time every year I get that sneezy and sneeze constantly almost every morning," said Karen Latimer, a senior graphic design major.

Latimer said the two cats at her house don't bother her, but springtime grass and other outdoor elements will trigger an allergic reaction.

Many students find relief at the Cal Poly Health Center, where they can buy over-the-counter remedies or see a doctor for prescription medications.

Dr. Robert Holzhauer, director of the Health Center, said there is a wide variety of allergy-relief medications available for different people's needs, but the best remedy is prevention.

"We have an abundance of wild vegetation pollinating here, so the intensity of exposure is much more than that of urban and suburban areas," he said.

"Allergic reactions can be caused by pollens from various trees and plants, freshly cut grass, certain animals and dust," said Dr. Robert Holzhauer, local allergist, explained that since most Cal Poly students are from northern and southern California, they are not used to pollens in the air from March through early summer.

"We have an abundance of wild vegetation pollinating here, so the intensity of exposure is much more than that of urban and suburban areas," he said.

"I went through a whole box of Kleenex in three days."

"It's South Africa in a terrible bind," said Philip Nile, professor of mechanical engineering. "There is no easy way out of this problem for them."

Mopati Ntsimanyana, an architect from Botswana and a visiting Cal Poly student, works on some drawings for a project called DRET - Botswana Renewable Energy Technology, he said.

"We have an abundance of solar energy," Ntsimanyana said. "And Botswana is in the center of South Africa, so it is a perfect place to build a wall politically. It is an ideal place for them."

"I'm just going through a whole box of Kleenex in three days."

"I've lived in Botswana and it is a beautiful place. I've been there for six months and I haven't had any problems."

By ERIC TURCOTTE

"I'll only take something if my eyes get so bad that I can't even go outside."

Health Center pharmacist Darrell Bennett explained that it is the antihistamine in medications that causes drowsiness.

"Antihistamines are part helping and part sedating, so for those who can't function using the drug they can prescribe a medication with little or no antihistamine in the content," Bennett said.

"I've lived in Botswana and it is a beautiful place. I've been there for six months and I haven't had any problems."

Nash advised allergy sufferers to consult their doctor and get relief medications appropriate for their symptoms.

"I can't afford to be put down," said allergy sufferer Nancy Diamond, another rally organizer, who was brought to the idea to Poly after attending an apartheid rally at the University of California at Berkeley.

"I was in Berkeley on business and went to the rally. There were 5,000 people at the rally and I thought, 'Well, didn't we have something here?'"
**Endorsements support Mendes**

**Editor:**
Randy Egner recommends that the Mustang Daily editorial board support Mendes. Steve Dunton for ASI President, Dally Tuaaday for ASI President, and April 23, 1985, do not have anything against Steve Dunton, and I hope there has nothing against the Mustang Daily. He is getting an extremely nice piece of propaganda that not only makes him look good, but makes the other candidates look inferior in order to have the Editorial Board permission to publish such a biased view of what is probably seen and read more then any other piece of propaganda. Who - the owner - I thought Cal Poly owned the Mustang Daily, and isn't Cal Poly all the students? I don't think the supporters of the other presidential candidates would let you publish a piece of material that could throw the election the other way, if they were the owners of the Mustang Daily. You can make your choice, but you can't make mine.

**Randy Egner**
Editor's note: Contrary to Mr. Egner's statement that the Mustang Daily is owned by Cal Poly, the Daily is solely supported by its own advertising revenues. Because the Daily is a lab, the Editorial Board is free to publish any opinion piece on the opinion pages, just as professional newspapers do.

**ASI senators support Mendes**

**Editor:**
As recently as the 1984-85 year, we have had an opportunity to closely observe the workings of student government and those individuals serving in government positions. After reading a recent line from an editorials by ASI, we have a vested interest in the continuity of an effective student legislative body for the upcoming year.

We feel that Mike Mendes is the individual who is most likely to lead an effective and cooperative student government for the 1985-86 year. Mike's combination of ASI experience and ability to organize people make him the best choice for ASI president.

As an ASI senator, Mike has been active in numerous government areas. He was selected as vice-chair of the senate based on his ability to communicate and motivate others. He was a member of the Student Affairs Committee, and a member of the ASI Administrative Commission. He acted as a proxy for the ASI student on the Student Affairs Council. He served for a period of time as head of the student government in -the absence of the ASI president and Vice-president and served very effectively in that capacity. He was active on his school council and was a member of numerous clubs throughout the University.

As ASI president, Mike would make an effective leader and bringing out the best in those people working with him. We support him and hope that the ASI president and strongly encourage students to cast their vote for Mike Mendes on Wednesday, April 25th.

**Endorsement by senators-elect**

**Editor:**
As newly elected ASI senators, we would like to thank our constituents for supporting us in the recent elections. We look forward for the ability to serve the interests of the student body for the 1985-86 year. We feel that in order for the newly elected senate to be a creative and effective legislative body, there must be an ASI president in office who possesses the ability to administrate, legislate, and most importantly, communicate with the people in student government and the student body as a whole. In our opinion, Mike Mendes is the presidential candidate who possesses the best package of these traits. We encourage all students who are interested in an effective and open student government to vote for Mike Mendes for ASI president on April 25th.

Thank you once again for your support. Make your voice heard for your choice for ASI president this Wednesday.

**Senators-elect Wendy Tannor, Kevin Swann, Laura Hummke, Keith Simon, Engineering, and Technology, Mark Lacey, Deena Laddrow, Tyler Hammond, Stan VanVleck Agriculture, Deena Olson, Cindy Browne, Science and Math**

**Student dislikes "Doll" cartoon**

**Editor:**
For several quarters, I have put up with the "Doll" entitied "The Doll." This cartoon has neither humor nor political satire, but last Thursday, David Klein stooped to a level which should convince the Editorial Board to remove "The Doll.

One picture depicted a threat on President Reagan's life. The other cartoon barked "Mr. Doll's Toy Store for Kids which is having a sale on plastic bags and old refrigerators.

What is in Klein promoting with The Doll? First he encourages violence against our president and then he promotes the idea of allowing children to accidentally kill themselves. It isn't enough to have babies aborted, so now he encourages the use of toys which allow even older children to be murdered.

I think that we have had enough of The Doll, so how about more anti-violence or political satire which don't disregard the precariousness of life.

Robert Van Ommering
of Irving, said Ntsimanyana. "Denying black South Africans access to the economy only perpetuates the problem. As a qualified architect, I would earn three times less in South Africa, simply because I am black." Ntsimanyana said he feels there will be no peace in South Africa until apartheid is dissolved, yet he has little hope for changes in the near future. "The South African government has refused all proposals ... the U.N. has been trying to put pressure on South Africa, but nothing has been solved." Ntsimanyana said he feels South Africa's government will continue to maintain its stand against equal rights for the black population.

There is an organization working to stamp out apartheid in South Africa known as the African National Congress. The organization is outlawed in South Africa, but has several branches in various countries, said Ntsimanyana.

Ntsimanyana, who neither smokes nor drinks, says he will return to Botswana and hope for the end of apartheid in the neighboring South Africa.

PE major Chris Wolfley helps El Corral customer Karen Seiler pick out some sports vitamins.

By DAWN YOSHITAKE

A Cal Poly physical education major is marketing and distributing a product which will give students a little more vitality and the Athletic Department a little more money.

Chris Wolfley and Cal Poly head football coach Jim Sanderson introduced the All American Sports Vitamins April 1 in the El Corral Bookstore. Half the profits the bookstore makes from vitamin sales will go to the Athletic Department. The department will also get an unspecified percentage of all national sales of the vitamins.

"The vitamins are for people who are really serious about sports and active people. Students here are very active," Wolfley said. "Vitamins are beneficial for anyone who is an athlete or is up until 3 a.m. studying — under stress people burn up a lot of vitamins."

Seven types of vitamins are sold by Inter-Sports and include a protein powder made of 90 percent protein, a multi-vitamin packet, a pre-workout packet and a post-workout packet, a 1000 milligram vitamin C, a quick energy vitamin made of bee pollen and wheat kernel, and a vitamin that can be used as an alternative for aspirin.

Wolfley said he decided to help market the products after trying the vitamins and learning how the Athletic Department could increase their budget. He added that the vitamins' backer is a Cal Poly graduate and currently KCPR.

KCPR

Come over To Denny's

America's fastest growing chain of family restaurants is opening soon in San Luis Obispo and we have immediate openings on all shifts for Waiters, Waitresses, Cooks and counter help. You'll receive top pay, medical, and life insurance, profit sharing, paid vacation and great working conditions. To find out more, apply in person between the hours, of 9 AM & 4 PM at;

has, children attending the
university.

"It’s another form of in-
come for the department, in-
stead of relying on a national
budget for colleges," Wolfley
said.

He explained that
marketing the vitamins will
help his career goal of becom-
ing a physical education ad-
ministrator or coach.

"If we can prove this kind
of market will work and sub-
sidize a college’s athletic
budget, then for my senior project
I’ll go ahead and research what
had to be done and go ahead and
get this product to col-
elleges," Wolfley said.

members of the Society of
Automotive Engineers will travel to Texas to par-
ticipate in the Mini Baja, a contest for
student-designed vehicles.

By DAWN YOSHITAKE

Members of the Society of
Automotive Engineers will battle the Texas terrain this Wednes-
day as part of an intercollegiate
Mini Baja vehicle competition.

A four-man team will leave to-
day with a red-framed, balloon-tired, 250-pound vehi-
cle that looks like a miniature
dune buggy, which they designed
for the competition.

Project head Jeff Mammand
said, "The competition gives
engineering students an oppor-
tunity to apply their classroom
knowledge and get hands-on ex-
erience." It is a race at the University of Texas
(Paso Robles) during the three day
event.

Mammand said the competi-
tion will be tough with some of
colleges coming from the car-
industry city of Detroit, Mich.

"Last year only one car out of
24 finished the entire four-hour
endurance race. This year our car
will be the one to finish and win," said Mammand.
He added that the club will
have a better chance at winning
the endurance race because of the
car’s suspension.

"The suspension in the car is
the best thing. We plan to keep
the pedal (acceleration pedal) to
the floor and just steer through
the course," said Mammand. The
car’s suspension is part of
Mammand’s senior project for
his mechanical engineering
degree.

All cars are required to use a
stock engine and Mammand said
the only determining factor of
who will win the speed race de-
dpends on the weight of the car
and the driver. He added that the
car’s top speed is 32 mph and has
an eight horsepower engine.

All four SAE members, Jeff
Mammand, Rob Vanderlip, Mark
Grant and Tracy Stavig, will be
competing in the Mini Baja race
for the first time, however it
won’t be the first time the club
has entered the Mini Baja com-
petition.

The single-seat vehicle was
built by eight SAE members
from bolt to finished frame.

The project began last summer
with two members spending
three days a week working on the
car. Eventually six other club
members joined the project.

“That’s what it takes to get a
winning car," said Mammand in
reference to the time spent on
constructing the car.

SAE has four sponsors and
Mammand said the car’s tires are
being donated by Goodyear. He
explained the company was look-
ing for an off-road vehicle to
promote their All Terrain Vehicle
tires.

A road test at the aerospace
hangar was completed last week
and all the defects taken out
said Mammand. He said the car
was driven through pot-holes, a
slalom course and driven off a
man-made jump.

He added, however, that the
brake system is awkward to use
but is in working condition.

He explained their car was
designed by scaling down the
size of other vehicles normally
used in off-road races. Mam-
mand’s senior project likewise
followed that process.

"There’s so many things I’ve
learned from this project that
can be applied to anything. I’ve
learned to be dedicated to a pro-
ject."
**Tracksters perform well**

Top marks by men leave them close to host Fresno

By KIM MILLER

Outstanding performances by a determined men's track team did not ward off the Fresno State Bulldogs Saturday, April 20.

Coach Tim Henderson said the meet was close. Through the first ten events the team was winning and in the end the Mustangs did defeat Cal Poly, 94-82; Long Beach State, 113-45, in dual scoring.

In four way scoring the Mustangs were third. The results were Fresno State, 80; Cal State Los Angeles, 56; Cal Poly, 52; and Long Beach State, 19.

If the point totals are not impressive, the individual performances were. Henderson said that for the second time Anthony Muly was voted the outstanding performer of the meet. His 6-10 leap earned him the sixth position on the Poly all-time list and he now leads the California Collegiate Athletic Association conference by four inches.

In the sprints, members of the Poly crew are now ranked four of the top five in the CCAA. Jerry Hernandez qualified to compete in the national meet, cutting ten seconds off his previous best marks.

In the 1500 meter run Brent Griffiths qualified for nationals with a personal best of 3:50.31 for a third place finish. Griffiths' time positions him tenth on the Poly all time list.

Hurdler Dave Johnson is now the Poly's number one man in the 1500, 1600, 3000 and 5000 meter runs.

In the shorter races the Mustangs excelled as well. Hurdler Dave Johnson is now the fourth best 110 high hurdler in Cal Poly history. His 14.4 finish makes him third in the CCAA and second in the California Collegiate Athletic Association conference.

In the 800 meters, Paul Hill recorded a personal record, national qualifying 1:51.76 time. He now ranks third in the CCAA and ninth on the all time list.

Damon Showes and Kevin Pratt both earned personal records in the 200 meter sprint. Ranked fourth and sixth in the CCAA.

Shows finished fourth, 21.4 and Pratt came in sixth at 21.6.

The mile relay crew finished third with a time of 3:13.53. The team is now ranked second in the CCAA.

Next Saturday marks the Poly Royal Invitational meet and the last home meet of the season. The meet will begin at 11 a.m. with the running events starting at noon.
No. 1 ranked men beaten
Tennis team preparing for tourney, loses to Gauchos

GOLETA — After a season of rising to the occasion, the Cal Poly men's tennis team lost 8-3 Sunday to UC Santa Barbara, a team it had previously beaten in five straight matches.

The Mustangs, said coach Hugh Bream, weren't overconfident, but perhaps down after working their way to a No. 1 ranking in NCAA Division II.

"When you play a 30-match schedule," said Bream, "it's hard to get up for every match. I felt we were a little flat."  

Cal Poly is 24-3 overall and had beaten UC Santa Barbara by one point in its last four matches. Some Gaucho seniors hadn't beaten the Mustangs in their career, said Bream, and they played with revenge.

"They were very intense," said Bream.

The three winners for Cal were Paul Landry and Rob Pritikow in singles, and Brian Bass and Bob Zoller in doubles.

The Mustangs were coming off a 5-4 win over Long Beach State.

Friday, a team ranked No. 11 in Division II.

"It was a match we were really pleased with," said Bream. The Mustangs split 3-3 in the singles. Landry, Zoller and Mike Giulietti collected wins. The Mustang No. 1 doubles team lost; but the No. 3 team — Dave Reynolds and Jim Robison — pushed the Gauchos to a tiebreaker 9-6.

Four Mustangs will compete in the Ojai Tournament, called the most prestigious in California by Bream. Landry and Zoller will compete in the singles, and Pritikow and Bass in the doubles.

Six of the top twenty teams in the nation will be competing at Ojai, said Bream.

Rain, cold and Northridge all ruin day for the women netters

While the rain and cold dampened the spirits on the Mustang women's tennis team side of the net Saturday, Cal State Northridge seemed to be basking in the sun.

The Matadors, putting up with rain delays and nasty San Luis Obispo weather, beat Cal Poly 8-2.

Kim McCracken, the No. 4 Mustang player, won her first match 7-6, 6-2, but was the only Poly player to win.

The No. 1 Mustang, Sally Russell, extended the nation's No. 6 ranked player from Northridge, Marla Reid, 4-6, 6-2. Russell, ranked No. 22 in the country, is one of three Cal Poly players to go to the Ojai Tournament next weekend.

The doubles team of Laurie Magin and McCracken, losers Saturday to the country's No. 8 ranked Matador team, will also be traveling to Ojai.

The Poly doubles team is ranked No. 13, and Magin will also be playing in the tournament in singles.

Magin lost in three sets and wagged her finger at CIG Barbe and Regina Frawley also lost in straight sets.

The other two doubles teams — Kathy Grabow/Elliot, and Russell and Frawley — also were defeated in straight sets. The Mustangs, said the coach, couldn't maintain their intensity.

"The team started confident," said Orion Yeast, "but couldn't pull it out in the clinching sets."  

The Mustang overall record is 1-6, 7-4 in the California Collegiate Athletic Association.

The next home match is with UC Riverside on April 30.

A's owner again warns he may have to move

OAKLAND, Calif. (AP) — Oakland A's owner Roy Eisenhardt is again warning that his team may move because of financial difficulties.

"We're worried about it," Eisenhardt said in a San Francisco Chronicle interview published Monday. "I see my revenues stay the same and my expenses going up. Our lease expires in the future. I have to do something, and I can't sit with the status quo."

The A's owner has threatened before to leave the area if he is unable to get a new stadium. 

Eisenhardt is again warning that his team may move because of financial difficulties.

"It was a match we were really pleased with," said Bream. The Mustangs split 3-3 in the singles. Landry, Zoller and Mike Giulietti collected wins. The Mustang No. 1 doubles team lost; but the No. 3 team — Dave Reynolds and Jim Robison — pushed the Gauchos to a tiebreaker 9-6.

Four Mustangs will compete in the Ojai Tournament, called the most prestigious in California by Bream. Landry and Zoller will compete in the singles, and Pritikow and Bass in the doubles.

Six of the top twenty teams in the nation will be competing at Ojai, said Bream.
