Children’s Center still may face $10,205 cut

By Jan Sprague and Julia Prodis

Despite the pleas from numerous student parents upset over the proposed budget cuts to the Children’s Center, the ASI Finance Committee to cut the Center’s budget by $10,205. The cut was made because of demands from other campus groups, a low percentage of student involvement in the Center, and increased structural growth,” said Finance Committee member Jeff Hunt. The Children’s Center offers full and part-time child care in a preschool environment with accredited staff to the children of student parents attending Cal Poly. It services two percent of the student-parents attending Cal Poly. It also serves as a laboratory for students in various majors doing internships and senior projects in the Center. The Children’s Center has been funded through ASI since 1974.

For the 1985-86 year, the Center received a budget of $20,000 more than they received last year. The Children’s Center wants seven and half-percent of the student-parents attending Cal Poly. It means increased structural growth,” said Finance Committee member Jeff Hunt. The Children’s Center offers full and part-time child care in a preschool environment with accredited staff to the children of student parents attending Cal Poly. It services two percent of the student-parents attending Cal Poly. It also serves as a laboratory for students in various majors doing internships and senior projects in the Center. The Children’s Center has been funded through ASI since 1974.

Parents at the meeting gave the ASI Finance Committee requests to receive an additional $2,000 to fund the Children’s Center. The Children’s Center is requesting $1107 from ASI General Insurance/Work Contingency Fund. This program offers non-credit mini-courses to students for a fee. The director of the program, Laura Barrow, says Recreation and Tournaments is expanding, needs more money for publicity and has great potential to generate revenue for the ASI within two years.

The Children's Center was again embroiled in a battle of the budget; a fight it has waged annually since its inception in 1973. The center seems to have lost this year when on April 24 the ASI voted to cut the center's budget by $16,205. Although the running of the center is prohibitive, mainly because the center is a publicly funded organization, it must remain as a cost-saving measure under current operating guidelines. Its budgetary demands have risen each year while the available funding has not.

At the last Senate meeting senators heard arguments from student-parents wishing to keep the center open. Many argued that without the center to take care of their children they would not be able to go to school. Some students-parents said they would single and returning to school to pursue a career necessitated by a divorce and motivated by a desire to help themselves to stay off welfare.

In opposition to the center focuses on its expenses and what is perceived to be its limited benefit to the greater student body. Only two percent of the student body have children in the center—a statistic commonly quoted by those opposed to funding the center.

However, you can help. If you know of someone who brought a tomato at the screen, please call Walt Lambert or Bob Walters at 542-2476. If the culprit is a friend of yours, remember this; they brought that egg and that tomato with the deliberate intention of vandalizing the theater, not to act which all Cal Poly students must pay for. Do they really deserve your pity?

Outside of feching each person, there is another need to counteract this type of malicious act in the future. We have been told by the Recreation Desk, which is projected to lose $14,467, and the Recreation Office, which is projected to lose $67,347.

Ken M. Wilson

Egg vandalism

Editor: It's really disheartening how one person can ruin something for everyone. Case in point: During the recent showing of the movie "Animal House," one or two individuals saw fit to throw an egg and a tomato at the screen. Result: A $2,000 replacement bill.

The tone of several recent letters published in the Daily could be characterized as Anti-student—specifically those of Professor Anderson. Now, Professor Anderson, can you truly bring yourself to write, "I was one of the people who dropped classes after the first two weeks of school..." That is one more important aspect for dropping classes. Enough! Professor Anderson, you have a duty to respect the students who have dropped classes after the first two weeks of school. 

You may conduct an opinion survey as a part of the curriculum.

Auction fund raises $1,500 in sales for non-profit operating
By Mary Anne Talbot
Staff Writer

The 10th annual KCPR auction brought in over $1,500 for the public radio station's 1984-85 operating budget, and caused a bidding war over a lunch date at Vista Grande with President Warren Baker, said the auction coordinator.

"We did pretty well," said coordinator John Thawley. "We did about $500 more than we expected, so I'm really happy."

Lunch with President Baker was auctioned off for $860. "We had some interesting bids on that one," Thawley said. A caller named Chuck apparently wanted the lunch date very badly and became angry when another caller, Thaddeus, repeatedly outbid him.

Thawley said that Chuck began calling in with threats for Thaddeus. A disc jockey who was taking bids at the time wrote one of the threats down. "I am a psychopath," the disc jockey's notes said. "I will kill them. I am insane. I swear it."

With a laugh, Thawley said, "We were really encouraging people to outbid him." A caller named Scott finally got the lunch.

Other popular items were lunch for two with KCOY-TV news anchor Rick Martel and Deann Pangburn at Trader Nick's Restaurant, which went for $85, and a season pass for two at the Graduate, which was auctioned off for $84.

A two-hour KCPR Booster Bash with a light show from the Music Factory brought in $817, more than any other item.

"A lot of people were bidding higher on things than they thought they were worth, just to help KCPR," Thawley said. He said that some people called not to bid, but to donate money.

"One local business (Carmel Beach Restaurant) called in while we were on the air and donated dinner for two," he said.

Thawley said that he was pleased with the results of the auction.

"We had a lot of fun. It was just a ball. It was an enormous success," Thawley said.

Anyone who bought an item at the auction can pay for it at the KCPR studio, located in Room 201 of the Graphic Arts Building, during regular business hours.

Corea kicks with energy to start off Poly Royal
By Catherine Aaron
Staff Writer

Energy was the key theme running through the Chick Corea concert kicking off Poly Royal last Thursday.

Not the flashy, self-glorifying energy of an MTV video, but a seemingly deeper, more mysterious energy that the performers were absorbed and forgot themselves in.

Corea and his Electric Band were billed to play two 45-minute sets for lack of an opening band, but instead packed a dozen numbers into an hour and a half.

The audience sensed the power in Corea and his band's complicated musical interplay and tried several times to clap along with the trio's varying tempos. The band didn't seem to mind that they always went astray from the foundational beat.

Corea, a master keyboardist and composer, moved smoothly among various synthesizers, creating countless sounds and moods in rapid succession. He kept almost constant eye contact with bassist John Patitucci. Patitucci switched and swapped as he pounded cunning, unpredictable melodies out of standing and electric basses.

Drummer Dave Weckl provided both the percussive background and innovative solos as Corea and Patitucci explored jazz and rock themes. Although Corea is quick to spurn labels on his distinctive sounds, this improvisational style is known as "fusion" music.

At times Corea and Patitucci's instruments seemed to be conversing, arguing, harmonizing or competing as they expanded riffs of Latin, Spanish and Oriental flavor.

Corea conversed and joked amiably with the Cal Poly main gym's audience between the long pieces.

"I liked the audience...it was a real down-home crowd," said Corea. "They were appreciative and easy to play for.

After playing demanding music in a controlled, intense manner for 90 minutes, Corea denied feeling the least bit tired.

"It's therapeutic to use the body for expressing something: it's more like flowing. Not working. I feel energized, he said between mouthfuls of eating a banana after the performance.

The band went back on the road for a performance at The Golden Bear in Huntington Beach last weekend.

The concert was a presentation of the ASI Concerts Committee.

GrC gets new camera
By KEVIN CANNON
Staff Writer

The Graphic Communications Department recently received a donation of two state-of-the-art, fully automated computerized cameras.

"This is what we should be teaching our students," said Department Head Harvey Levenson. "It is the type of technology that they will use when they leave here."

The cameras, valued at $30,000, were donated by the Log E. Robertson company.

More than 100 different programs can be stored in the computer, any of which can be called back and used again or changed and modified.

Professor Joe Trux, said he feels that it will take a while to get used to the new automation. "This is not something you can learn overnight."

The cameras are currently used only for teaching purposes, but will eventually be used for major printing jobs. Trux plans to use them to print the Mustang Daily once all of the students have learned how to operate the equipment.

Trux said, "This camera produces a much sharper image and color is done easier and with more variations."
**CENTER**

From page 1

a child in the Children's Center. "But in order to offer these services to the community I need to finish my education, and I can't do it without the Center," said Smith. Smith.

Lynette Frediani, ASI Finance Committee Chairman, told the group that there are ways for the Children's Center to operate with the current budget cuts. "You can find other sources of funding," Frediani said. "There's also a $30,000 reserve for the Center that resulted from over-budgeting in the past." Ricketts said part of that reserve money is ear-marked for a new building. "We're housed in old army barracks now," said Ricketts. "And because we're a public agency, we are somewhat prohibited from soliciting funds. That's the reason we're here tonight. We need a base of support from ASI Without that, we can't operate." Ricketts presented the Senate with a resolution asking for long-range financial plan to insure University support and ASI protected support of the Center. It also asks the ASI to find a permanent facility for the Center and requests the University President's and the ASI's support and commitment to the program.

**FOUNDATION**

From page 1

alternate, there won't be one. Currently there is no alternate. DeMatteis said students are welcome to attend the monthly Foundation board meetings, adding that the last meeting was the only one any students have attended in the two years she had been on the board.

In order to keep abreast of students' views, DeMatteis said she attends student senate meetings, school council meetings, and participates in the Greek community and by speaking to other interested groups. Because of time constraints, she emphasized her need to rely on the student senates for feedback.

Also, anyone can contact me," said DeMatteis. Her mailbox is in the ASI office in the U.D. Asked if student suggestions are ever considered, DeMatteis said conflicts in order to accommodate Training, Interhall Council and food services have been ironed out by the formation of bimonthly meetings attended by representatives of both concerns.

Ricketts said the volunteers were briefed before meeting with Reagan. "The told us to save our political views for later," said Smith, "although Sam Donaldson from AIC new called out a point about Nicaragua. Reagan said he was "with the Peace Corps," in response to the intervention.

"Reagan quoted from the current USA for Africa record during his speech," said Smith. "Reagan commended, Peace Corps, it's a problem helping to make a brighter day. He said we've answered that call and wished us all good luck in our jobs, then shook everyone's hand.

-DeMatteis asked. "There are some things the student government can do, but all in all I think we have something to be proud of.

**MEETING**

From page 1

which programs the television show in the starstruck of the University Union. It plans on expanding the program to bring alternate satellite programs into Cal Poly auditoriums. The chairman of the group, Patrick Conboy, says the potential for profit for the ASI is great.

"Every suggestion is attended to," DeMatteis said. "The Foundation tries to listen to the students. If concerns are "presented in a business-like way, they can be entertained."

"Why fight the system when you can work with it?" DeMatteis asked. "There are some things people can do, but all in all I think we have something to be proud of.

-DeMatteis said.

MUSTANG DAILY

By Kevin Cannon

The majority of the students just wanted to know why they were attempting such a flight, Rutan explained back in 1981, he and his brother were looking for their next big challenge and came across this idea.

"Records make the milestones of aviation progress: the around-the-world, unrefueled flight is the last significant milestone of long-range flight," said Rutan.

Flying with Rutan will be his girlfriend, Jeana Yeager, who is an active pilot with a varied range of experience in different types of flight. Yeager currently holds several world records of her own, including speed and distance records.

Financing the Voyager is the major problem with the flight attempt. They are presently without government or corporate sponsorship. The only donations have come from interested individuals. Many of the questions were centered around the design of the aircraft.

The Voyager's two engines are conventional piston powerplants turning propellers. They are mounted in tandem, one on each end of the plane. The front engine will be shut down and its prop burned off to allow only the rear engine to sustain flight.

Rutan has designed an exceptionally long, narrow wing—similar in aspect to that of a sailplane. The wing spans 111 feet, comparable to the span of a Boeing 727 jetliner.

Lopez Lake's second annual Nature Festival will present two full days of natural history tours for the public this weekend. Two dozen Central Coast naturalists and resource experts will present tours, demonstrations and talks on a host of outdoor topics, including wildflowers, wildlife, geology, birds, astronomy, native plants, archology and more.

Programs will include early morning canoe trips to observe wildlife on the primitive Lopex Arm, nature boat tours and auto caravans to seek out rare plants and ancient fossils.

Demonstrations and exhibits this year will include an expanded photography display with photo contest winners, a Chumash Indian program, hawks and owls, native plants for the home garden, wild foods, and reptiles and amphibians.

Specialty walks will include photography sessions; Dana Vista hikes and trips to seek out insects and learn about the problems and management of California Oaks.

Again, this year Trio Vivo, sponsored by the San Luis Obispo Symphony, will play gentle music during Saturday's noon hour as visitors relax under Campbellos's massive oaks between tours. A special star gazing session will top off Saturday's list of events.

Tickets will be available at Lopez Lake beginning at 7:30 a.m. each festival day. Boat trips require a fee to cover rental costs. All other programs are free. Park entry is $2 per vehicle. Tickets are not needed for exhibits, demonstrations or concerts. Many tours will be repeated if the first sections fill.

The mural on the exterior is a familiar sight on South Higuera.

By Debbie Ball

The place seemed deserted upon entering the front door at five o'clock. Looking around, the dominate feeling was that of a backward movement in time into a 1930s board ing house—a place the creators of The Sting could have used as a building model. Large picture windows that allow residents to view street activity line the front walls, and an old upright piano adds to the nostalgic feeling. The picture is completed with wood floors and high ceilings typical of the era.

Noises from the back rooms cause the curious visitor to proceeding in the investigation. However, after entering the kitchen the sense of bygone days disappears. Instead of finding Paul Newman and Robert Redford sitting at a table with a bottle of whiskey plotting their next move, the observer finds two Cal Poly architectural students struggling with industrial size mixing bowls and pots attempting to prepare the evening meal.

Mark Rawson and Greg Petroff, while cleaning.

Next door neighbor Nino Rabbin plays with Banser, who has lived at The Ark for about four years—longer than the current Ark residents.

Lists of chores are hung for dwellers each week. Walking into the exotic TV room, Bonnie Schreiber finds Greg Petroff not feeling too well.
cauliflower and chopping meat, explain that it was their turn to prepare the dinner.

Student housing to many conjures up thoughts either of dormitory living complete with rules and regulations that must be observed by each occupant or apartment dwelling with four people crammed into a two-bedroom unit in an atmosphere labeled as anything but sedate. However there is a place in San Luis Obispo that offers an alternative to typical students housing.

Christened The Ark by former student residents, the building at 158 Higuera is presently home for 13 Cal Poly students. "Each person has a night that they prepare the meal," Petroff said. "We have to buy everything, cook it and wash all the dishes."

The cooking duo said the whole operation takes about four hours. They added that once a routine is established, cooking for the 13 residents and guests isn't that hard.

"We usually start around four-thirty and have it cleaned up by eight-thirty," Petroff explained. Commenting on meal quality, both agreed that it was superior to what other students are probably experience.

"It's even better than you get at home," Rawson teased. "There mom always has those macaroni and cheese meals, but here everyone tries to make something special on their night."

Debbie Coleman, an architectural graduate of Cal Poly, enters the kitchen and adds, "Well, it all depends on who's night it is." Coleman, elected as the bookkeeper, then begins to explain how The Ark is maintained by the staff of students.

"Everyone has jobs," she said pointing toward a board that held chores descriptions and nametags, "and there's usually pretty good about doing them."

In his bedroom Dave Bannon works on a school project. His bed is up a ladder on the right.

Jim Gates prepares a Monday night dinner for nine.

Debra Coleman makes a call on the Ark's pay (and only) phone upstairs.

Poly Royal '85
Cal Poly Schools win awards

Opening Ceremonies
The sun shone brightly on the pep band as they played "Disco Inferno" and Musty the Mustang danced madly about with little children as big bunches of balloons were released into the air. Everyone in the University Union Plaza was smiling and snapping photos. Poly Royal had officially begun. Students and guests were welcomed to Poly Royal during a 35 minute opening ceremony. Poly Royal Special Events Coordinator Lynn Filice introduced the program, held Friday morning on the University Union stage. Vice President Emeritus Dr. Dale Andrews was the special guest and featured speaker at Opening Ceremonies. "I like to be an honored guest of this university because I think it's a great university," he said. "It's strange to be considered a guest here because I really feel like part of the family." Andrews worked at Cal Poly for over 40 years, serving as Coordinator of Special Education, Academic Vice President, School Dean, Acting President and Chief Executive Officer. Superintendent of Poly Royal Ray Reed, Poly Royal Queens Angela Darnell, ASI President Kevin Creighton and President Warren Baker also addressed the crowd. Baker said, "Ray Reed and the Poly Royal Board have done an outstanding job." He went on to describe what he saw happening at Cal Poly. "It's a teacher in a classroom with students learning. Poly Royal demonstrates the results of that teaching."

Agriculture
The Crops Science Department display on cotton and oil was named the top Poly Royal exhibit in the School of Agriculture. The display received third place in overall sweepstakes competition. A miniature replica of Eli Whitney's cotton gin, an oil press extracting oil from peanuts and a computer identifying seeds and seedlings were part of the winning exhibit. The committee who selected the winners gave us several reasons why our display was chosen first in the School of Agriculture," said Sheila Noyes. "Our display followed the Poly Royal theme of Minds in Motion, was educational, and had a logical flow of ideas," said Noyes, explaining why the display received first place. The popular Ornamental Horticulture display received third overall first place sweepstakes award. The exhibit displayed different types of plants and trees in an elaborately landscaped area.

Environmental Design
Anarchy triumphed over order this year at the Architecture Department's annual Design Village Conference during Poly Royal.

The sun shone brightly on the pep band as they played "Disco Inferno" and Musty the Mustang danced madly about with little children as big bunches of balloons were released into the air. Everyone in the University Union Plaza was smiling and snapping photos. Poly Royal had officially begun. Students and guests were welcomed to Poly Royal during a 35 minute opening ceremony. Poly Royal Special Events Coordinator Lynn Filice introduced the program, held Friday morning on the University Union stage. Vice President Emeritus Dr. Dale Andrews was the special guest and featured speaker at Opening Ceremonies. "I like to be an honored guest of this university because I think it's a great university," he said. "It's strange to be considered a guest here because I really feel like part of the family." Andrews worked at Cal Poly for over 40 years, serving as Coordinator of Special Education, Academic Vice President, School Dean, Acting President and Chief Executive Officer. Superintendent of Poly Royal Ray Reed, Poly Royal Queens Angela Darnell, ASI President Kevin Creighton and President Warren Baker also addressed the crowd. Baker said, "Ray Reed and the Poly Royal Board have done an outstanding job." He went on to describe what he saw happening at Cal Poly. "It's a teacher in a classroom with students learning. Poly Royal demonstrates the results of that teaching."

Agriculture
The Crops Science Department display on cotton and oil was named the top Poly Royal exhibit in the School of Agriculture. The display received third place in overall sweepstakes competition. A miniature replica of Eli Whitney's cotton gin, an oil press extracting oil from peanuts and a computer identifying seeds and seedlings were part of the winning exhibit. The committee who selected the winners gave us several reasons why our display was chosen first in the School of Agriculture," said Sheila Noyes. "Our display followed the Poly Royal theme of Minds in Motion, was educational, and had a logical flow of ideas," said Noyes, explaining why the display received first place. The popular Ornamental Horticulture display received third overall first place sweepstakes award. The exhibit displayed different types of plants and trees in an elaborately landscaped area.

Poly Royal

Royal.
The theme "Anarchy in Art and Architecture: Challenging Order with Creativity" prevailed in choosing a new location and a less competitive focus.

This year 43 student-built structures went up on the west architecture lawn instead of at the traditional Poly Canyon site.

The decision to move was not taken lightly," said architecture professor Brian Kesner, faculty adviser of the conference. "The students decided that it would be a good change to hold the village nearer everything else that goes on during Poly Royal.

With visitors able to see Design Village without taking the tram ride or waiting two miles to Poly Canyon, the department estimates that the usual attendance of 10,000 to 20,000 visitors was tripled.

Although recognition was given for special merit in several categories, there were no awards for "first" or "best."

"Design Village was a real success," said Kesner. "Most students have too much to do, and when they do have spare time, they'd rather recreate than create. We're dealing with a special minority of students."

Kesner said the theme not only encouraged students to be more thoughtful and creative, it forced them to.

Business

The School of Business picked up four awards for their efforts during Poly Royal this year.

SAM, the Society for the Advancement of Management, won best display in the School of Business for an exhibit they had showing pictures and describing what SAM does.

"One could walk in there and know exactly what the club does," said Lee Bergunder, faculty advisor for SAM. "They gave a good description of what SAM is all about."

The exhibit consisted mainly of pictures and explanations of events SAM has sponsored in the past year, he said.

SAM also won two University-wide awards. These were for the best club food booth in the University—S'Mores in Motion—and the best engineered car in the fun division of the Poly 500, said Mike Cleaver, Vice-President of SAM.

Communicative Arts and Humanities

The Art Department won two ribbons over the Poly Royal weekend for displays demonstrating the many phases of art work.

Department secretary Carol Ab- bey said the Art Department display in the Galeria won a blue ribbon for the School of Communicative Arts and Humanities for their display depicting the different art processes.

The Art Department was the only department within the School of Communication Arts and Humanities to win awards.

"We also had a third place ribbon awarded to the 3D Club for their displays on campus during Poly Royal," said Abbey. The club exhibited glass-blowing, pottery designs and craft sale items. Art professor Henry WeSsels is the club's advisor.

"The art display in the Galeria will be there until May 15th," said Abbey. "It's a good chance for students to see an overview of the whole art process."

Engineering and Technology

The School of Engineering and Technology gave out three awards during Poly Royal.

First place was awarded to the Industrial Engineering Department for their numerous quality exhibits.

Second place was awarded to the Association of Computing Machinery, a club from the Computer Science Department.

Third place was awarded to the American Society of Heating, Refrigeration and Air Conditioning Engineers. This club is made up of members from both the Engineering Technology Department and the Mechanical Engineering Department.

Staff Writer

An estimated 126,000 people attended the 53rd annual Poly Royal this weekend, setting an attendance record, said a university spokesman.

Don McCaleb said that the attendance figure is derived from a traffic survey where the number of cars and buses arriving on campus are counted along with spot checks of people arriving on foot.

Considering the vast number of people on campus for the weekend event, McCaleb said he believes that everything ran smoothly.

"Given the number of people here it seemed that problems were relatively minor," he said.

Campus crime over the two day event was limited to three arrests for alcohol related offenses and one citation for the owner of a biting dog, said Investigator Ray Berrett of the Public Safety Department.

He said that criminal activities over the weekend were lower than previous years and that alcohol seemed to create a majority of the problems.

"We mainly had arrests for public drunkenness and for drunken driving, but nothing really major," he said.

In addition to the arrests for alcohol offenses, Berrett said that several citations were issued to minors for possession of alcohol.

These citations were issued mainly around the dorms and late at night.

Berrett explained that while there were several arrests and citations, all but two of them occurred after Poly Royal activities had ended for the night.

Aside from the problems of alcohol, Berrett said that a biting dog caused the biggest problem for the campus police.

"We had a dog bite somebody and it took two hours to catch him," he said. "That was really the worst situation we had." According to Berrett, a dog that was tied to a car in a parking lot broke its leash and bolted, passer-by Saturday afternoon. The dog then ran through the Poly Royal crowd and avoided police officers for two hours.

After trying to use a noose to restrain the dog, the police called in the animal control section of the Public Safety Department to tranquilize the animal. Before the tranquilizer could be used, however, a Poly Royal visitor recognized the dog and helped restrain him.

The owner of the dog was later cited for not providing water for the animal while it was tied to the car.

Berrett said that car burglaries during Poly Royal were not as much a problem this year as they have been in the past.

While there were a few cars broken into over the weekend, Berrett said that "last year we had some vehicles broken into Poly Royal, but this year there was only a stolen car cover," he said.

He said that considering the number of people on campus Poly Royal weekend went smoothly for police.

"People came up to enjoy the university and they did so without causing much trouble," he said.

The Military Science Department had a large responsibility directing all of the traffic flow in and out of the campus.

Also, several hundred people stopped to watch the repelling exhibition Military Science gave at the Fisher Science Building. The Record Team gave two shows a day to demonstrate repelling techniques and entertain the many passers by.

School Dean Russel said, "We didn't receive any bad comments at all about Poly Royal, only good ones.

Science and Math

The School of Science and Mathematics awarded its first prize for Poly Royal exhibits to the Chemistry Department for its work in displaying "molecules in motion."

Chemistry Professor James Westover said that he feels the displays accurately showed what the Chemistry Department is doing at Cal Poly.

Second prize from the School of Science and Mathematics went to the Biological Science Department for its zoology exhibit.

Women split up; still manage new records

Lifet ime bests set by 14 men at home meet

By Janet Haserot

For some people, breaking up may be hard to do. But not for the Cal Poly women's track team. While the men were setting 14 lifetime bests at the Poly Royal Invitational Saturday, 14 women split their talents.

Half went to the Mt. San Antonio College Relays in Walnut, the other half stayed here for the Cal Poly Invitational.

Cal Poly established three school records at Mt. SAC. Sophomore Glaeddes Priour broke the 3,000 meter record with a time of 9:16.12 for seventh place in the race. The school mark in the 1,600 meter relay was deferred by Pelosi Saville, Patrice Carpenter, Loreta Jordan and Veronica Storvick with a 3:57.80 clocking for second place.

The final school record to fall was the 3,000 relay which was broken by Storvick, Lori Lopez, Alison Ehlen and Priour with a time of 8:40.11 for a third-place finish.

Also at Mt. SAC was Renby Root, running a lifetime best and national qualifying time of 34.38.9 to place fifth in the 100 meters. Teammate Marilyn Nichols finished 13th in 30.49.4, also a national qualifier. Cee Chandler bled a 1:54.46 to finish fourth in a hot 100 hurdles field. It was just 1:01.06 shy of her lifetime best. Deena Barne
tin placed seventh in the javelin with a toss of 167.3. Katya Manning ran a 4:58.1 to finish fifth in the 3,000 lopoms, while Lori Lopez plac
ed 10th in the 2,000 meters (6:00.0) behind Priour in 9:22.00 for another personal record and qualifica
tion.

Meanwhile back at home in the Poly Royal, the Mustangs picked up another NCAA qualifying time when Kathy Hardeland placed se
cord in the 1,500 meters in 4:36.20. Hardeland came back later to set a personal record in the 400 meters, finishing second again with a 1:26.16.9. Lifetime bests were set by Cary Janisse (58.99) in the 400 meters, Julie Hooks (37.4) in the shot put, and Michele Seck (1:02.52) in the 3,000 meters.

Winning performances were turned in by: Kathy Kahn (18.1”) in the shot put, Tressie Gibbs (58.84) in the 400 meters, Rachel Bray (5-4) in the high jump, and the 1,600 meter relay 4:03.24 made up of Gibbs, Bray, Jamriska and Jill Ellingson. Redshirt Denise Woodard won both the 200 meters (22.65) and the javelin (149”), the latter being a meet record.

The men's track and field team also performed well at the Poly Royal Invitational. Well enough to have four athletes surpass the NCAA Division II qualifying stan
dard, and 14 set lifetime bests.

Weightman Jim Halter won the shot put in a meet record 64-9.9, while Jon Martin came back to toss another qualifier in placing third in the hammer at 165-8. Dave Hancock qualified in the hammer with a toss of 168-8, good enough for seventh place.

In all, six meet records fell. Fred Schumacher broke the Poly long jump record with a record-setting leap of 22-11.6. Scott Martin set the hammer with a record-setting heave of 221-1, snapping John Goldhammer's 1979 record of 179-5, and the meet record of 179.5 by Dave Dobus in 1983. Dan Lester in
turn won the javelin with a toss of 236-9, breaking Steve Redder's 1983 mark of 230-1.

Mustangs still in race for league title

Sweep keepers ball- alve alive in title hunt

By Lynette Frediani

The Mustang softball team strengthened its bid for a regional NCAA Division II playoff spot in a showdown Saturday against UC Riverside.

Cal Poly, pleased in the friendly Poly Royal crowded, claimed the first game 5-2. Then grabbed the second 2-1.

The doubleheader sweep puts Cal Poly one game behind national champion Cal State Northridge.

Coach Danny Martindale said Cal Poly will be notified Monday if it will host a post-season tournament. martindale.

"I will be very surprised if we are not competing in regions," said Martindale.

Cal Poly is ranked sixth in the nation in Division II and still has a chance to be the California Co
collegiate Athletic Association champion.

"If Northridge loses one of its remaining two games against Cal State Dominguez Hills, Cal Poly will tie with Northridge and assured a playoff spot in regionals," said Martindale. "If Northridge loses both games, we will be conference champions." The Mustangs took command in the fourth inning in their first game against Riverside. Senior third baseman Angie Zoll doubled in Sandy Sundberg and Lisa Johnson to put the Mustangs up 2-0.

Lisa "Bounce" Houk knocked a sacrifice which scored Zoll to put the Mustang fourth

inning total at three runs.

Kecia Gorman and Jill Hancock continued the Mustang streak in the fifth inning by hammering bunters. The solo homers put the Cal Poly scoreboard on the board.

Cal Poly garnered seven hits and was errorless in the first con

test. Lori Norcia was 2-for-4 and Susan Berthelsen was 2-for-3.

Randle Hill picked up the win on the mound for the Mustangs.

Riverside had six hits and one error. The Mustangs smacked seven hits and played error free in the second contest, taking the lead in the first inning to put Poly ahead 1-0.

The fifth inning when Houk knock

ed a sacrifice which scored Zoll to put the Mustang fourth
