Nuclear response plan distributed to dorms

BY MARY ANNE TALBOTT

A handbook that details the response plan at Cal Poly in the event of an emergency at the Diablo Canyon Nuclear Power Plant is scheduled to be distributed to student residence halls Monday.

Faculty and staff received copies of the handbook last week, said Richard Brug, director of Public Safety.

"Faculty, staff and students in residence halls are generally the people we'll have to deal with," said Brug.

The plan was prepared by Environics Company of New York, which also prepared the master disaster plan last fall for Cal Poly.

Brug said the emergency plan was designed voluntarily with the aid of the County of San Luis Obispo, and was not mandated by law.

He explained that the campus is only twelve miles from the Diablo Canyon plant. If the campus was within a ten mile radius of the plant, an emergency response plan would have been required by law, Brug said.

Under the response plan, the Public Safety Department is prepared to notify the entire campus of an emergency and shelter 14,584 people. At any given time, said Brug, there are no more than 10,000 people on campus.

In the event of an emergency at the Diablo Canyon Nuclear Power Plant, students would be temporarily housed in those buildings designated as shelters. The safest rooms are those with the least external exposure.

Yellow signs that list the shelter rooms have been posted in each of the buildings.

Sixty faculty and staff have been chosen as leaders for the shelters. At least three leaders have been assigned to each sheltered in 13 buildings on campus. A response plan was scheduled to be distributed to dorm residents Monday.

Japanese language may be taught at Poly

By DAWN YOSHITAKE

The opportunity to link Cal Poly with Japan is the aim of a proposal that would add a Japanese language course to the Foreign Languages Department. Dr. William Little, Foreign Languages Department head, is requesting a joint venture with the Japan Foundation to offer a Japanese language course through his department.

The Japan Foundation is run by the Japanese government to promote Japanese studies in other nations, said John McKinstry, social sciences professor and Japanese cultural instructor.

The Japan Foundation would match funds with Cal Poly for three years to get the program started, said Little.

If the program is judged successful after three years, he said that the university would be responsible for hiring a tenure-track instructor and cover the costs of running the program.

His proposal will be submitted to the Foreign Languages Department, Dean Jon Ericson of the School of Communicative Arts and Humanities, Provost Tomlinson Fort, President Baker and Chancellory W. Ann Reynolds for approval.

McKinstry will be traveling to Japan this summer and will visit the Foundation to promote the proposal.

I've already met with the Japan Foundation head in Los Angeles and our schedules will overlap while in Japan, so we'll go to the Foundation together," said McKinstry.

He added that he was introduced to the Los Angeles foundation head by Kenji Izumi, an aid to Japanese Prime Minister Nakasone.

"They (Japanese) judge you by the person who recommends you. So if you don't have a name, you don't have much weight," said McKinstry.

He added that Americans should study Japan because it has a greater economic impact on the United States than European nations.

McKinstry hopes to have the program started by Fall Quarter 1986.

"When I was hired here, I assumed that being on the California coast there was an Oriental division in the Poly curriculum," said Little. "I was surprised that there wasn't. I think it's a newer focus of Poly to internationalize the institution."

A Japanese language course is offered through Extended Education but college credit isn't given for the course.

Although European languages are easier to learn than Japanese, Little said he expects the program to expand.

CSU fall applications increase

By DAWN YOSHITAKE

Applications for admission to the California State University system for Fall Quarter 1985 have increased 10.8 percent, but Cal Poly will not be affected by the increase.

CSU Chancellor W. Ann Reynolds announced that 114,739 students have applied for admission into the CSU system compared to the approximately 120,000 that had applied as of this time last year. Cal Poly, however, is not accepting any more Fall Quarter applications unless a student is already registered for the Fall Quarter.

Cal Poly Admissions Officer Dave Snyder said the increase is due to the success: location of the campus, academic programs and the operation of the plant. Snyder said that this could be anything from a brushfire five miles away to an airplane flying over the plant.

The second stage is an alert signaling any actual or potential safety problems. The third stage is a site area emergency, such as the release of small amounts of radiation.

'Doll' rebuttal overdramatized

Editor,

Thank you, Brian D. Buc, for responding to my rebuttal to Robert Van Ootman's letter concerning the 'Doll' issue with such a soap opera melodrama. In my rebuttal, I did not allude to what I expected from Dr. Van Ootman's view, but to the facts as presented by me. It would seem that I was not clear in my rebuttal. I was not being bombastic, nor was I trying to be inflammatory, nor was I trying to offend. My original rebuttal did not attempt to be inflammatory, nor was it intended to be. It was merely a response to my feelings of insult to my academic integrity. Your response, however, has taken my rebuttal and turned it into a melodrama. This is not the way to handle issues in a professional manner.

Your article, 'Doll' Rebuttal',忽视了我的观点，您的话过于夸张。我的反驳并不包含任何恶意攻击，我的目的是澄清我的立场。在您的回应中，您似乎在想方设法让读者相信，我曾在我的反驳中表现出恶意。但事实并非如此。我并未要让任何读者误会，我的反驳是针对事实的。您的文章过分渲染了这一问题，使读者对事实产生误解。我期待一个更为客观和理智的讨论，而不是把一切都变成戏剧化的表演。

Sincerely,
[Your Name]
ASI takes issue with editorial

Editor: True to form, the Mustang Daily Editorial Board has printed an editorial which relies on blanket assertions rather than supporting evidence. The Daily’s May 1 editorial regarding the ASI Children’s Center is indicative of inaccurate investigations and shallow analysis.

Initially, the editorial states that the Children’s Center has been involved in budget battles since its inception in 1973. Yet, the actual picture portrays a different scene.

The Center’s budget has doubled during the past three years. The ASI Student Senate approved an addendum for the Center in excess of $8,000 in 1982 for construction. Moreover, the Children’s Center has the largest reserve ($31,000) of any ASI-budgeted group.

These examples are but a few which disprove the Daily’s assertion that the Center is under severe financial scrutiny. Moreover, when the director of the Children’s Center was asked at a Student Senate meeting to provide specific examples of severe financial scrutiny by the ASI (other than 1984-85) she was unable to find any specific examples except for 1973.

It is only appropriate that a new group be scrutinized before receiving a portion of student-generated income. Furthermore, it appears the Daily is suggesting that dollar amounts exceed $30,000 be disbursed by the Center without any research or scrutiny. I would sincerely hope that this never becomes the case.

Secondly, the Daily asserts that budgetary demands have risen each year while available funding has not. Actually, the Center’s budget went from approximately $20,000 to $28,000 within a span of three years. Additionally, the current budget is more than six times the allocation granted during the late 1970s.

Next the Daily argues that only two percent of the student body uses the Center. The percentage of students is actual—by one-half of one percent. This number of students currently enjoys onethousandth of the ASI’s $1.4 million budget.

In attempting to justify its position, the Daily states that senior projects, internships and academic activities received through the Children’s Center benefit students. Yet, this list where the Daily’s logic is flawed. Students do not, pay for chemistry labs, physics labs and other senior project opportunities. Why should the ASI pick up the tab for activities that should be clearly funded with state revenues?

I am in agreement that the ASI needs to develop a long-term financial plan for the Children’s Center. Moreover, I wholeheartedly support a Center on the Cal Poly campus. However, the question remains regarding the financial responsibility for such a facility.

In its editorial, the Mustang Daily failed to address several fundamental issues. First, there are other sources of funding such as the Instructionally Related Activities Board or private donors that may be pursued. Moreover, faculty prices should be increased. The ASI is currently subsidizing faculty at the rate $5 per day per child. While it costs the ASI $17 per day to keep one child in the Center, faculty pay only $12 per day.

A study by the Finance Committee revealed that comparable child care services in San Luis Obispo is $8 per day. The committee recommended that faculty fees be increased to $15 considering the prevailing rates in San Luis Obispo and the confluence for faculty to have their children in the Center.

The Finance Committee supports the Children’s Center. A student service. Yet, many students are unable to get their children into the Center because the facility is filled to capacity. However, faculty have their children in the Center during times when students are wishing to use this student-funded facility.

The Daily’s Daily reporter covering the Children’s Center (Jan Sprague) informed Jeff Hunt and me during an interview in Winter Quarter that this was the case when she initially tried to enroll her child in the Center.

It has been argued by those opposing the Finance Committee’s recommended budget cut that students would rather go to concerts and see movies than support a child care facility. In fact, the ASI Concerts Committee is budgeted to make money and, therefore, receives no ASI subsidy. The Children’s Center is funded to the tune of $20,000 even with the $10,205 reduction.

The Finance Committee thoroughly researched and analyzed each budget request before making its recommendation. The $10,205 decrease in the Children’s Center budget was given complete review, and with overbudgeting occurring in past years, the committee strongly believed and unanimously recommended the $10,205 cut be instituted by the Student Senate. The Senate did not find reason to change the committee’s recommendation.

EMERGENCY

Evacuation or sheltering would take place unless the EOC advised it.

Cal Poly Radiation Safety Officer Thomas Schell said that the most serious emergency expected at the Diablo Canyon plant is the release of a radioactive "plume" of steam. "I would expect that we would have very minimal contamination," he said.

"Our first concern is internal exposure," Schell said. "Internal exposure is when people breathe in radiation or radioactive particles.

Any airborne particles that land on surfaces become an external source of radiation, Schell said. These particles are picked up when people touch the contaminated surfaces.

Schell said that the effects of radiation vary with the size of the person, and that children are the main concern.

"The whole concept is why expose anybody to anything when we don't have to?" said Schell.

Schell trained the 60 shelter leaders. He said that they were appointed by the deans of their respective schools and received two hours of training in radiation detection, radiation safety, emergency procedures, the biological effects of radiation and how to put people in the shelters.

"We kept it simple, because they're going to be busy," he said.

Schell said that he expected that after an emergency at the Diablo Canyon plant it would be safe to go outside after four hours, even under maximum radiation conditions. He compared radioactivity to clouds, and said that like a cloud formation, airflow would move the radioactivity past San Luis Obispo in about four hours.

An airborne jet could lead to a release of radioactive materials or any problem that could lead to the release or threat of release of radiation that requires an emergency response.

"This disaster plan was written on the premise of the worst possible disaster, even with a major meltdown," Brug said. If a site area emergency were to be declared, he said, the campus would be closed and all classes would be canceled. All faculty, staff and students who don't live on campus would be sent home.

Brug said that the campus would be closed before an actual emergency to allow those who don't live on campus to get home safely. "We have probably 500 students that live over (Cuesta) Grade, so why not get them out safely?" he said.

The Department of Public Safety would be in constant communication with the county Emergency Operations Center, which has direct contact with the Diablo Canyon plant. Brug said that he expected that after an emergency at the Diablo Canyon plant it would be

Manufacturers

will form panel

BY BRUCE-PINKLETON

Local manufacturing execu-
tives will participate in a panel
discussion sponsored by the
American Production and Inven-
tory Control Society on Wednes-
day, May 8 at the Madonna Inn.

"Current Manufacturing Ap-
lications and Trends on the
Central Coast," the title of the
discussion, moderated by Bruce
Barlow, Pourazaghaian, an in-
dustrial engineering professor.

Panelists include Mark Brittain,
vice president and general
manager at TRW Electronic Products Inc. San Luis Obispo. One of TRW's big-
gest projects currently involves
producing groundbase telecommu-
nications equipment for
military use.

Representing CTS Electronics Corporation in Paso Robles will be Mike Kohle, vice president and general manager. CTS is in-
volved in the production of elec-
tronichemical components.

Also speaking will be Jim
Winston, administrator in charge
of human resources and com-
mittee relations for Santa Bar-
bara Research Center in Santa
Maria. Santa Barbara Research
Center is involved with human
factors and engineering research.

The evening begins with
registration at 6 p.m. and the
Garden Room of the Madonna
Inn. Dinner at 6:45 p.m. is
optional and will be served. The
dinner costs $13.60 per person
and those who want to have din-
ner should call Jackie Smith at
528-8414 and make reserva-
tions by, Monday evening.

The panel discussion will be
held from 7:30 to 9. There is
no charge for those who attend
only the discussion.

Mixing traditions of East and West: two worlds

By DAWN YOSHITAKE

Before entering Kenji Izumi's apartment in San Luis Obispo, a sign posted on the front door requests guests to leave their shoes outside.

And upon meeting Izumi one also learns to leave all formality at the front door, even though his title is private secretary to Japanese Prime Minister Yasuhiro Nakasone.

Dressed in grey cords and a navy blue T-shirt, Izumi's youthful dress and appearance belies his age of 30 and the 12 years experience he has working for Nakasone.

Izumi said his career as Nakasone's private secretary began while he was a student at Keio University majoring in economics. During summer vaccation Izumi said he worked for the statesman, who had organized a small sect in the Democratic Party, before being elected as prime minister.

"After graduation I went to work in his office. Same title (as now), but position was completely different. I was the youngest in the office," said Izumi.

He added that his responsibilities were the same as now, but older employees are given more respect and higher status.

Izumi said his job requires him to write descriptions of policy, make connections and raise money.

Before Nakasone was elected prime minister in 1982 by the Diet, he had 12 private secretaries, said Izumi.

Once elected, Izumi said the government gave Nakasone five more secretaries who the prime minister then appointed to a ministry.

Izumi said he expressed an interest to Nakasone that he would like to visit the United States and had previous experience dealing with other foreign countries, especially Southeast Asia.

"He (Nakasone) said, 'I hope you could be in the United States it's a good idea. Don't worry about matters in Japan...if you can be in the United States you got time. It's better to stay as long as possible and learn American affairs.'" Izumi said.

Through a contact in Japan, Izumi said San Luis Obispo was recommended as a place to live.

He added the trip was his first visit to the United States other than the Hawaiian Islands.

Izumi moved to San Luis Obispo last August and his apartment reflects a mixture of east and west with cloth prints of kabuki characters and posters of Levi's tall advertisements decorating the walls.

While living in the United States, Izumi said he is expected to make contacts, learn about American culture, the language and ideas of the future generation.

Students attending universities now will affect future foreign policy, economics and trade, he said.

"We have to know the next generation and have to be friends forever," Izumi said.

A barbecue was held at his apartment recently to meet with students who are taking a Japanese culture class at Cal Poly.

"I asked them about Japanese culture. 'They don't understand Japanese people,'" said Izumi. "I was surprised (by the number) these students who want to know more about Japanese people."

Izumi arranged a contact between the Los Angeles head of the Japan Foundation, which is funded by the Japanese government, to increase study of their nation in foreign countries, and Professor John McKinstry who teaches the culture class at Cal Poly.

Izumi said he hopes the Japan Foundation will work with Cal Poly to get a Japanese language program started here.

"American students know little about Japan's geography and it's important to know, because California is the closest continental state in America for trading with Japan, said Izumi.

Izumi is taking English classes at Cuesta College and has tentative plans to move to Washington, D.C. this August to make political connections.

Although Izumi said he wants to learn Chinese and maybe travel to China after his stay in America. He said he hopes to become a statesman in Japan but has not made a decision on which to pursue after his stay in Washington. D.C.

While in America, Izumi said he has found Americans very friendly, the transit system very dirty, and the food..."not very good."

Don't Leave Home!

TRW has career opportunities for you right here in San Luis Obispo.

At TRW Electronic Products, Inc. we've assembled one of the industry's finest engineering teams at our total-capability (design-manufacturing) facilities. Our diverse projects and world-class resources provide unmatched opportunity for qualified candidates.

Poly students play lumberjack for a day

Students may still be recuperating from a lumberjack competition hosted by the Society of American Foresters during Poly Royal weekend.

Above, Smokey the Bear competed in the ax throw event. Left, Brad Paula had some trouble crossing the floating log bridge on the obstacle course. Far left, Gigi Cardoza had second thoughts before she made her move. Below, Cardoza competed in the single bucking event. She finished in one minute, seven seconds.
Imagination: a religious view

BY SUSAN EDMONDSON

Imagination is an instrument of God, an Episcopal priest told a crowd of about 50 people Thursday.

The Rev. Miles Renear, a pastoral assistant at St. Stephen's Episcopal Church, discussed imagination, God and man in a speech for the Communicative Arts and Humanities Lecture Series. "Imagining the Imagination: The Varieties of Contemporary Creativity." "Imagination is not only the tool of human beings that we can use to heighten our own awareness and expand our orders of perception, but that imagination is also an instrument of God," said Renear. "Most religions have no difficulty with imagination," he said. Renear added that there is no physical description of Jesus Christ in the Bible. "Our own image of Jesus... tends to come to us from Renaissance paintings and a lot of Sunday school art which we just cannot crowd out of our minds."

Renear said the Christ figure as a ladder of God becomes a vehicle for the revelation of God's nature and purpose.

Renear has led gestalt psychology therapy groups and for 31 years he was a Protestant chaplain in California state hospitals. He earned an undergraduate degree from Brown University in Rhode Island and a master's degree from the Episcopal Divinity School.

The Rev. Miles Renear: "Most religions have no difficulty with the concept that we can approach the divine only by imagination."
A double bogey is par for the course.

“A 67! That’s great!”
“Yeh, but then I choked and shot a 77 on the back nine.”
“Oh.”

Whenever I play golf people always ask what my handicap is. I tell them it’s my putting, though my driving isn’t so hot either. Sure, sometimes I hit a beautiful drive that lands right on the green. Even then I had a hole-in-one once. Unfortunately, a shot from the fourth tee doesn’t count on the 9th hole. Golf is supposed to be relaxing. You try to relax when your tee shot just broke the clubhouse window.

I’m what baseball players call a spray hitter. When I’m up at the tee, the ball could go in any direction. In fact, I have such a wide repertoire of hooks and slices that the Dodger hired me to teach their players how to hit the opposite field. Maybe if I stopped hitting like Rod Carew I could keep hitting the ball straight.

Nah, as long as I’m hitting like an all-star I might as well take advantage of it. I can have a tee custom-made for my swing-three feet tall. Then I won’t have to go out to the driving range anymore. I can just go out to Dodger Stadium and take batting practice.

The great thing about golf, as opposed to baseball, is that if you miss the ball you can say it was a practice swing. I’d like to see Reggie Jackson try that excuse on an umpire when he strikes out.

Playing golf when I’m on the course can be dangerous, but when I’m off ‘fore,’ I’m not warning people to watch out for my putts. I took on the last green.

No, when I hit a drive they turn on the air raid siren and everyone in the vicinity drops to the ground and covers their head. When I hit the course, they pass out helmets and chest protectors.

Every golfer has heroes. Ben Hogan, Jack Nicklaus, Torre, Wanger. My favorite golfer is Gerald Ford. I like Gerry because he hits the ball with such deadly accuracy. In fact, he almost never misses a target—a tree, a sand trap, a lake, another golfer. You’ve never heard of Arnie’s swing, have you? Well, we’re called Ford’s Frenzy. We’re willing to sacrifice our bodies to keep Gerry’s ball from leaving the fairway.

Some people take a drop when they hit into the rough. I usually need a three. I hit into the rough so often I carry a Weed-Eater in my bag. I stopped playing courses with a lot of trees because the chainsaw got too heavy to carry around. I spend so much time off the course, I bought a golf cart with four-wheel drive. I hit into so many sand traps, my partners carry beach chairs and Frisbees. When I say I have a bad lie, it means my partners are always carrying my golf bag.

When you are capable of shooting a ten on a par-three hole, it takes forever to play 18 holes. I won’t say that I’m a slow golfer, but when I call the clubhouse for a starting time they tell me to come at 3 a.m. and bring a flashlight. I let so many people play through the course looks like an expressway.

When I hit a shot I don’t leave divots. I leave craters. Sure, I’m courteous and replace the divots, but I’m getting kind of expensive; having a dump truck follow me around the course. Last week I made a divot so big they filled it up with water and called it a lake. When you play golf like I do, you have to take pride in the little things like leaving only three holes for three holes or hitting your tee 40 yards.

Golfing is such a great sport for me because it fits in with my other hobby: ironwork. You can see my creations at some of the finer courses around the country. Just look for the Ben Hogan chipping wrapped around a tree. They’re mine.

I love playing golf with people who really take the sport seriously. We’re out playing a round and they’ll ask, “Is this the old fast green?” Are you kidding? If they didn’t know it every day, the greens would be knee-high in a week. Or they ask, “Which way does this green break?” I’m not sure. I suppose we’ll have to wait for an earthquake to know that...Just the other day, some one asked me if I had a sand wedge. I said, “Ham on rye of cheese?” And what are these bunkers they’re talking about? I just keep expecting German soldiers to open fire, see me mow the lawns, and say “We’re walking the lawn.”

Somewhere I’d like to build a golf course of my own. All the fairways would be made of artificial turf. A guy like me could hit the ball 150 yards in the air and get another 100 yards on the first bounce. My course wouldn’t have sand traps and lakes and stuff. No. I’d have real hazards like mine fields and toxic waste dumps. I’d also make the holes bigger. But then again, with the way I putt, I’d have to build a green around the Grand Canyon.

Andy Frohmer is a senior journalism major and a card-carrying member of the American Psychiatric Association of Golfers Anonymous.
Kite breaks out of slump, leads tourney all the way

CARLSBAD, Calif. (AP) — Tom Kite, the leader all the way, closed the door on any would-be challengers with a front-running, 3-under-par 69 and scored a six-round total of 273-210 to win the MONY Tournament of Champions.

Kite, in a rare slump when he came to this event, acquired the tournament record-matching 64 in the opening round, led by a two-shot margin going to the back nine and took it out of doubt with a four-foot birdie putt on the 15th.

When he rapped that one in, he had a five-shot lead with three holes to go. From that point on, it simply was a chase for second place.

Mark McCumber eventually claimed that position with a 70 and a 281 total. Scott Simpson dropped back to third when he bogeyed the final hole for 73-282.

Mark O'Meara, who had an eagle-2 on his way to a 67, and U.S. Open champion Fuzzy Zoeller, with a 73, tied for fourth at 284. He had a last-round 73.

Tom Watson, the defending champion, was the first man off the tee in the final round, and pushed his winnings for the tournament to $149,982.

The Padres pulled within 9-8 after scoring single runs in the fifth, sixth, seventh and eighth innings, but the Cubs scored three unearned runs in their half of the eighth after a two-out error by Templeton at shortstop.

Templeton misplayed a grounder by Davey Lopes, who then stole second. After Leon Durham walked, Keith Moreland drove in a run. Tim Stoddard walked. Jody Davis, Cey and Dunston to score two more runs.

Garvey hit his fourth homer in the first and Templeton his second in the second. Netles made it 4-4 with a two-run shot in the third, and he hit his fourth of the season in the fifth.

The Cubs tied it, with four in the bottom of the third and went ahead to stay with four more in the fourth.

Cey hit his third homer to open the third. Dunston doubled, went to third on a pinch single by Gary Woods and scored on Bob Dernier's sacrifice fly before Sandberg hit his third homer.

Dunston hit his first homer in the fourth, and three walks loaded the bases for the Cubs before Leon Durham singled in two and Moreland hit a RBI single. Chicago added a run in the fifth on a walk to Dunston and triple by Dernier.

**Oakland five-hitter beats Boston 6-3**

**OAKLAND, Calif. (AP) —** Carney Lansford drove in Oakland’s first three runs with two homers, and Chris Codiroli and Jay Howell combined on a five-hitter to give the A’s a 6-3 victory over the Red Sox Sunday.

Lansford’s second homer, a two-run drive in the sixth, snapped a 1-1 tie. Dwayne Murphy singled off Bruce Hurst, before Dave Kingman homered to make the score 3-1.

The A’s scored an unearned run in the seventh, when Alfredo Griffin delivered an RBI single.

**Six-hitter gives Giants a 5-0 win over Cardinals**

**ST. LOUIS (AP) —** Dave LaPoint tossed a six-hitter and had a key double to lead the San Francisco Giants to a 5-0 win over the St. Louis Cardinals and break a four-game losing streak.

LaPoint, 1-4, struck out six and walked two.

Two errors by shortstop Jose Rijo, 4-1, in the second helped San Francisco grab a 2-0 lead. Chili Davis doubled, Chris Brown walked and two errant pickoff throws by Andujar put them on second and third.

Gary Rajsich’s ground ball scored Davis and Brown came home on Rob Deer’s sacrifice fly.

**Tisdale says he will forgo his senior year for NBA**

**NORMAN, Okla. (AP) —** University of Oklahoma basketball star Wayman Tisdale said Saturday that he would bypass his senior year of eligibility and make himself available in next month’s National Basketball Association draft.

Tisdale, the only player in college basketball history to be named first-team All-America his first three years, announced his decision at a packed news conference at the university.

The 6-foot-9 Tisdale was named The Associated Press’ Big Eight Player of the Year three times.

Tisdale said after long, careful, prayerful consideration, I’m making myself available in the NBA draft. However, I intend to continue my education at the University of Oklahoma.

There had been much speculation recently about the intentions of Tisdale, one of the most popular players in the Sooners’ sports history.

During the last games of the season, fans chanted, “One More Year,” and billboards proclaiming the same sentiment appeared in Oklahoma City and Norman.

During Tisdale’s stay at Oklahoma, the Sooners made three consecutive appearances in postseason play. Oklahoma led the nation in scoring and won the Big Eight championship and postseason tournament this season before losing to Memphis State in the NCAA Midwest Region final.

Tisdale, a member of the 1984 gold-medal-winning U.S. Olympic basketball team, holds the Big Eight scoring record with 2,661 points. He averaged 25.6 points and 16.4 rebounds a game during his career.

**Derby winner might not run in Triple Crown race**

**LOUISVILLE, Ky. (AP) —** Spend A Buck, the Kentucky Derby winner, is headed toward a rich syndication, but his next race is in question.

The colt could race in the Preakness May 18 in a second step toward trying to win the Triple Crown or he could run in the Jersey Derby May 27 at Garden State Park, where a victory would be worth a $2 million bonus.

“We won’t announce it today,” owner Dennis Diaz said Sunday of any decision, on Spend A Buck’s next race. “We won’t make it today.”

Diaz said he was talking to William Farish, a Kentucky breeder, about selling an interest.

Spend A Buck, the third fastest winner of the 114-mile Kentucky Derby in 111 years, is training for the Triple Crown, which also includes the Belmont Stakes June 8.

“I don’t think the Triple Crown would improve his syndication any more than winning the Jersey Derby,” said Bob Quigley, general manager of Garden State Park, which is offering the $2 million bonus.

“Making him the second-leading money winner would do just as much.”

The bonus and the $600,000 winner’s purse in the Jersey Derby would put Spend A Buck, who has won $1,308,409, second only to John Henry (winner of more than $8 million) in career earnings.

The bonus arrangement is $1 million for any 3-year-old who wins the Cherry Hill, Garden State and Jersey Derby or $2 million if he wins those three plus the Kentucky Derby.

So Spend A Buck, who will be flown to Garden State Park Monday, must stay there and win the 1¼-mile Jersey Derby if Diaz wishes to collect the bonus.

Or he can make a short trip to Baltimore for the 3½-mile Preakness.
Portland wins one off LA, 76ers sweep their series

The Portland Trail Blazers stayed alive in the Western Conference semifinals by defeating the Los Angeles Lakers 116-107 Sunday. Los Angeles still leads the series 3-1. Mychal Thompson scored six of his 17 points in the final 20 seconds, including four straight foul shots, to help Portland down Los Angeles.

Game 5 will be played Tuesday night in Los Angeles, where the Lakers have won 21 straight games.

Clyde Drexler had 15 points, 10 assists and seven rebounds for the Blazers. He also keyed a trap defense that forced Los Angeles into 28 turnovers.

Portland wins one off LA, 76ers sweep their series

Andrew Toney added 23 points and 11 assists to help host Philadelphia wrap up the best-of-seven series in four games.

The 76ers will now take on the winner of the Detroit-Boston series, which is tied at two games apiece. Detroit evened that series by beating Boston 102-99 Sunday.

Denver played at Utah on Sunday night in the other Western Conference semifinal. Denver went into the game leading that series 2-1.

Milwaukee, which reached the second round by defeating the Chicago Bulls, led 71-63 with 4:53 to play in the third quarter. But Philadelphia, which advanced to the second round by eliminating the Washington Bullets, then outscored the Bucks 26-4 for an 87-77 third-period lead.

The 76ers boosted the lead to 97-77 with 7:01 left in the game. Milwaukee never got closer than five points in the fourth quarter.

Pro Scorecard

Padre owner says Wiggins out for year

SAN DIEGO (AP) — San Diego second baseman Alan Wiggins, undergoing treatment for a cocaine addiction, says he can be ready to play baseball in 30 days, but the Padres say he won't be playing for them.

Padres President Ballard Smith said Saturday the club would not use Wiggins for the rest of the season, regardless of what the infirmary's progress in drug rehabilitation Smith would not speculate beyond 1985.

The player's agent, Tony Atanasos, said a trade of Wiggins, who was the Padres' leadoff hitter, stole 70 bases and scored 106 runs for the National League champions last season, was "a viable possibility."

"That was discussed very briefly" Saturday, Atanasos said.

Wiggins, 27, checked into an undisclosed drug rehabilitation center April 27 after failing to show up for the Padres' April 25 game against the Dodgers at Los Angeles.

Wiggins was arrested in 1982 for cocaine possession and was suspended from baseball for 30 days by then-Commissioner Bowie Kuhn. Smith said that upon Wiggins' return to the team he would be dropped from the club if he got involved with drugs again.

During a news conference Saturday, Smith appeared to hedge on that, saying that if Wiggins' return to the club if he got involved with drugs again.

"What we said in 1982 was part of the reason why we're here," Smith said.
