Professional development limited by lack of funds

BY MARC MEHEDYT

A more extensive definition of professional development was released by President Baker in an administrative bulletin dated February 22, 1985. The bulletin and professional development in the political sphere was not at the forefront of the issues that had been previously discussed or how to achieve it. The implementation is less for the time off the clock.

The completion is signed by taking the difference between the budget to train and enhance the university's reputation on the course and another which can be used for training and development.
Opinion

Defense against lost cleaning deposits

Of the many facets of the proverbial term "college life," one of the most frustrating can be dealing with costly cleaning deposits. Students are told to clean an apartment until it shines and still not having their cleaning deposit returned are all too frequently heard, especially among students about to leave the area. But there is an alternative: the Advocate Inspection Service.

The service, under contract with the Human Relations Commission of San Luis Obispo, is a privately run company providing neutral, third-party inspections of rental units before and/or after tenants live in a rental unit. By having a statement of facts concerning the condition of the unit before and/or after the tenant moved in, the landlord and renter can come to an agreement that forces a dispute over a cleaning deposit or damage to a unit are greatly lessened. And both renters and landlords therefore have a chance of either losing their cleaning deposit or being faced with a damaged apartment or house. If someone drove through the garage before a tenant moved in, then a new tenant cannot be held accountable for the damage.

Once again the trustees of the CSU system have resorted to the usage of fake charm with almost no effective doubles. It would take three million dollars to remedy half of Cal Poly's office problems located in the School of Science and Mathematics. This is adequately the MPPF money this year for the CSU system.

Total budget cuts: For the CSU and UC system a $100,000 loss for each faculty member in the system a total of 1,000,000 cuts. The Advocate Inspection Service could be used in court as evidence. The 'owner of the service claims a dispute go to small claims court, the inspection report can be used in evidence. The owner of the service claims a dispute go to small claims court, the inspection report can be used in evidence. The owner of the service claims a dispute go to small claims court, the inspection report can be used in evidence. The owner of the service claims a dispute go to small claims court, the inspection report can be used in evidence.

As for the budget that are either still lessened and they won't have to consider that we are not asking the more.

Kids' Center says thank you

Editor:

The Children's Center children, staff, parents and Board of Directors would like to thank the members of our campus groups, individuals and classes for their very generous assistance with the Cal Poly Children's Center preschool playyard project. The time and energy spent by the following people demonstrates the invaluable support given to the Children's Center.

Alpha Gamma Rho: 8-10 men helped us do form work for the last of the project.
Sigma Rho: Moved tons of sand.
Sigma Alpha Epsilon: Printed and painted entire building.
Tau Beta Pi Engineering helped build and prepared entire form work.
Roger Keppel: T1 '28 classmate and student playground consultant.
Jim Goins: OHI 28 classmate and student playground consultant.
Cal Poly Plant Operations staff.
Dick Tappas gave invaluable advice and Plant Operations allowed the center to use equipment.

John Campbell

Better uses for merit money

Editor:

Letters

Response added to liberalism

Editor:

Those who found my May 10 opinion article on liberals "enter­ taining" undoubtedly found the responses even more so. On May 11, a reader requested I re­ flect "the humbly ignorant." The next day, two individuals requested that I replace the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don't understand" in the "I don't know" and "I don"...
Isreal withdraws from Lebanon

PARIS (AP) - Israeli Prime Minister Shimon Peres said Sunday that he had withdrawn Israeli forces from Lebanon's Bekaa Valley in accordance with the Paris Accords. The Israeli withdrawal will be completed on Thursday, the third anniversary of the invasion launch.

"On the third anniversary this week, the war in Lebanon will be completed," Peres said in an interview with Jerusalem broadcast on Europe 1 radio. "This will be the end of the war in Lebanon. There will be no Israeli army unit on Lebanese soil."

The prime minister added, however, "For several weeks, we will keep some soldiers (in an international manner in Lebanon) to help the South Lebanon Army... but no figure has been decided."

The South Lebanon Army is a mostly Christian militia that Israel has supplied and trained. As Israeli troops have pulled out of Lebanon in recent weeks, they have been turning over their positions to the militia, as part of a plan to create a security zone on Israel's northern border.

Arms sales threatens U.S./China relations

WASHINGTON (AP) - China's new ambassador to the United States, Hua Xu, says relations are good between the two countries, but he warned the Reagan administration that continued arms sales to Taiwan threaten ties to Peking, as the US. political relationship with Taiwan as problems between the two countries.

Han was cautious when asked at the start of the interview if he was satisfied when Beijing and Washington have been told that they will continue to cooperate when it comes to arms sales. Han said that he is considered to be a "crucial issue."

But he said U.S. relations with Taiwan, particularly arms sales, remains "very important."

"If there is any serious thing happening on the Taiwan issue it may cause a setback in our relations," he said. "For instance, if the United States is going to sell advanced arms to Taiwan it would be a clear violation" of an August, 1982 joint communique on the use of the security deposit, said the property inspector (quote), which is a "crucial issue".

"We feel that we are a valuable service to both parties," said Lynn Gambrew, author of the Advocate Inspection Service. "We are a witness to the actual move-out condition."

Property inspection by a neutral party protects both landlords and tenants by recording the actual condition of the property. This must the landlord and tenant come to an agreement on the use of the security deposit, said the property inspector (quote), which is a "crucial issue."

"This will be the end of the war in Lebanon. There will be no Israeli army unit on Lebanese soil."

**‘Babycakes’ business booming**

By KRIS REHER

"Babycakes" may be thought of as a silly name, but a group of dietetics majors have made the apple muffin one of the campus store's biggest selling breakfast snacks.

The Babycakes business started in the summer of 1984 as a senior project. The purpose of the project was to determine the feasibility of marketing a low sugar product through the campus stores.

Babycakes were then donated to the dietetics club for purposes of fund raising.

Each Wednesday morning at 7:30 a.m. the early crew begins preparations for production of Babycakes. Maureen Ternus, a junior dietetics major said the whole process takes about two hours.

"Two people come in between 7:30 and eight to get things ready," Ternus said. "And the rest of the six girls come in later for the mixing, baking and packaging."

Selling at 40 cents a muffin, the appeal of Babycakes is that they are inexpensive as well as nutritious. "People are getting a low sugar, whole wheat, in-between snack -- it’s better than eating a cupcake," Ternus said. "The calorie content had to be determined, but I would say there's between 150 and 200 calories in each one."

The name Babycakes was stumbled upon when the students originally developed the recipe. Christy Myers, a senior dietetics major came up with the name. "I made it up when we were first looking to get labels. Myers said. "Well, they're kind of cakes, and appearance reminds me of babies." Thus the name Babycakes was born.

Ternus said she has received chuckles from people hearing the name Babycakes for the first time. "Everyone always laughs about the name, but believe me, the cakes are better than the name," Ternus said.

Silly name or not, Babycakes are big sellers. Kathy Koch, a cashier at the Campus Store said they sell 200 to 250 Babycakes a week.

The Foundation sponsors the Babycakes project and therefore receives one third of its profit. The other two thirds is divided evenly among the six students.

Babycakes are also a part of the agriculture student enterprise projects. The students must enroll in a class. Agriculture students who participate in the Babycakes project and class are an opportunity for students to learn.

Dr. Kris Morey, faculty advisor to the dietetics club said the project and class are an opportunity for students to learn.

**AT&T donates a $20,000 ‘state of the art’ system to Poly computer science**

By BRUCE PINKLETON

Cal Poly officials formally accepted a $20,000 computer operating system donated to the Computer Science Department by American Telephone and Telegraph Co. at an open house demonstration held May 29 at the Alumni House.

The system, called "UNIX," was installed in the computer systems laboratory last month. Up to 16 students can use it at one time.

UNIX is a highly used operating system today. The donation will "allow students to use a computer that’s state-of-the-art," said Dr. Joseph Grimes, a computer science professor who helps direct the computer systems laboratory where the UNIX system will be housed. Dr. Charles Dana, a computer science professor who is currently teaching a graduate practicum course which has used the UNIX system, agreed with Grimes. The UNIX operating system is on a large number of machines: it is used on everything from very small personal computers to very large computers costing $1 million or more, said Dana.

**DEVELOPMENT**

From page 1

Working conditions also affect opportunities for professional development. If a teacher has such a heavy teaching load that he or she cannot devote any time to research or professional organizations, then faculty members question how the university can expect professional growth.

Baker's bulletin says that this has been a major problem in the past. Today, that just recent faculty allocations have been increased, thus giving Poly a better student/faculty ratio. So, while the teaching load...

Finding a summer job in San Luis Obispo doesn't have to be a discouraging task. The Private Industry Council's Summer Jobs for Youth Program can place you in a variety of jobs with local businesses.

Carlson said that any of the 85 youth placed with PIC last summer were Cal Poly students and employers are usually glad to hire them.

"Cal Poly students have earned a good reputation; employers are generally very pleased with their work," she said.

One group of jobs were plaged last year by local businesses, including positions in restaurants, retail sales, manufacturing and hotels.

"The program can be used as another way to see what's available, so students can explore as many employment opportunities as possible," said Sexton.

Sexton said that about half of Cal Poly's summer work part time, and about 5,000 of those working students leave the area for the summer.

Carlson said the need for more oversight of the Union Advisory Board may be the job of the UEF and ASI relationship.

"There is a need to improve the UUAB," she said. "As the representative of the student majority, 'a member of the student majority board.'"

Carlson said the need for reconstruction became apparent after the UUAB was developed from the former University Union Board of Governors.

"ASI felt they should have more oversight of the Union because ASI holds the lease of the building," Carlson said. "But when the UUAB and the UEF, the Union Executive Committee, are not the only one to have a say in the structure of the UUAB, the Student Union Board, or the UEF, the Union Executive Committee."

The two committees deal with Union policies, operation and management, Carlson said, but the main problem is there is too much overlap between the UUAB and UEF.

"Not only do we overlap regarding decisions, but over half of the people on the current UUAB are members of the UEF."

Another problem with the current structure is said in the time it takes for decisions to be made.

"If a decision comes up, financially lets say, they would deal with it, the UUAB, UEC and the Senate," Carlson said. "It just gets to be a problem because by the time the issue gets to Senate for approval, key don't always have all the facts available to them.

Carlson's reconstruction plan would eliminate the UEF. The UUAB would then be made up of the Student Union Board, the first group will be a 14-member student board and the second UEF board.

"The SUB would develop the issues," Carlson said. "They'd go to the UUAB for approval, but this would insure campus-wide input."

The UUAB will continue to have faculty, administration and student representation with the addition of the ASI President and Vice President.

"The reconstruction would allow more ASI representation on the UUAB," Carlson said. "There's keeping all student government bodies more informed of Union and Senate issues."

Roger Conway, executive director of the Union said there is a need to improve the UUAB, UEC and ASI relationship.

"If the groups had not reorganized, and President Baker could make the final decision," Conway said. "And I've sensed from the students that they'd like a forum made entirely of students.

"Carlson hopes to have the new UUAB structure in operation by Fall Quarter. I'd like to see a model that's as unobtrusive as possible, preferably by the summer, and have the system in the works by fall.

A silent spectacular

By T. WILLIAMS

A world-renowned mime left about 200 people roaring with laughter after his performance in Chumash Auditorium Saturday night.

Yanci Bukovec, Hungarian mime, actor and former partner with Marcel Marceau, began his performance with a piece called "The Man and the Robot: the Robot's Revenge."

Dressed in black tights, ballet shoes and his face painted white, Bukovec portrayed an inventor working on his robot. After adding a few bolts and making some adjustments Bukovec went behind a black backdrop and came out the other side playing the robot, mechanically moving his head and one arm. With the other hand he pretended to be the scientist adding bolts and making adjustments.

He went back and forth between the roles until he thought he had perfected the robot. The robot had gotten out of control, though. The scientist tried to contain the robot but it punched him in the nose.

Finally the scientist controlled the robot, took out a part and the robot went limp. Smiling triumphantly, the scientist stood next to the drop and a hand reached out from behind it, as if the robot wasn't dead at all.

In the next act, "The Fish and the Fisherman," Bukovec played a timid fisherman trying to find the courage to bait his pole. With a disgusted look on his face and a quivering lip, he finally pulled a worm from the can and baited the hook with it. He wiped his hand on his shirt and then put it in his mouth.

When he realized it, he started spitting it out, then licked his lips, shrugged his shoulders and nodded his head, thinking it didn't taste too bad.

The audience was in stitches.

The fisherman finally got a cast off, but when he sat down he fell asleep. A tug on the pole woke him and he reeled in a fish. At first he was proud, but when it died he was sad.

A piece called "Disillusion" was an innovative approach to mime that Bukovec said came from spending time in airports. Under black lights, he came out as a silhouette of a businessman waiting for a plane. He had a round head, tie, briefcase, shoes and big hands.

Somehow, Bukovec made the silhouette do things like walk up a wall horizontally, take its head off and hold it in its hand or have it float off like an airplane.

Bukovec performed another piece titled "Birth If You Will" because he said Marcel Marceau encouraged him to do a piece about earth.

The act unfolded with Bukovec using his hands to convey the beginnings of life. Slowly the hands worked and turned showing growth until finally a child was born.

Sixty students selected to study at universities abroad were honored Thursday at the annual International Programs reception held at the Alumni House.

International Programs, founded in 1962 sends California State University students to one of 16 countries participating in the program. Students experience the cultural aspects of the countries included in the 16 countries are Italy, Japan, Germany, New Zealand and Spain.

Dr. Richard Sutter, assistant director of International Programs said the program includes a broad spectrum of students majoring in such fields as biology, architecture and social science.

"We modeled our program to meet the needs of students in the CSU system," Sutter said. "For that reason, both Cal Polys have contributed a significant number of students.

Sutter said Cal Poly, San Luis Obispo has consistently contributed the highest number of students with architecture students dominating the programs in Italy and Denmark. Out of 450 students selected this year, approximately 60 were Cal Poly students.

"Over the years, if you look at the long term," Sutter said, "Cal Poly is probably the top contributor." Brian Lasazo, a senior architecture major leaves Aug. 30 for Cal State Florence in Italy.

"I'm looking for freedom in Italy," Lasazo said. "You keep repeating things here, every year, over and over again. This gives us a chance to be exposed to the cultures that we've been studying in our history classes.

Michelle Langley, a sophomore business major will be studying at the University of Madrid in Spain.

"I wanted to study in a Spanish speaking country because I want to study international business," Langley said. "I'm looking forward to getting to know how the Spanish government works and the attitudes they hold toward American people.

Lauren Mickins, a sophomore social science major will be studying French literature, cuisine and music in the European country.

"I hope to get into business and use French as my second language," Mickins said. "I've always wanted to do this, even in high school, but I thought I'd wait until I would appreciate it more.

Alumni of International Programs were also present at the reception. Mark Young, a senior architecture major returned from Cal Poly's program in Italy, with advice for students preparing to study abroad.

"I think that the main thing is to have an open mind to things outside our environment," Young said. "Studying abroad gives you a taste of things in a sense, that you want to see more.

Young felt his life in Italy was more free than in America. "In this environment, we worry about things too much over in Italy, you're free from constraints.

President Baker, in addressing the group said Cal Poly is lacking in a culturally diverse population. He attributed the problem to the state system's desire for enrollment of California citizens.

To compensate, Baker said he hopes to expand the programs abroad.

"I look back on my two daughters, both of whom had international experiences that changed their lives," Baker said. "I'd like to hear from you after the experience to gain a little knowledge from you.

participates in the International Programs were honored with a reception at the Alumni House last week. The program sends students to foreign universities in 16 countries.

Grant enables outreach program to continue work

By BRUCE PINKLETON

Cal Poly will be able to continue its Upward Bound program — designed to help students from under-represented groups get into college — thanks to a $139,000 grant from the U.S. Department of Education.

Upward Bound is a college preparation program for high school and junior high students. Through tutoring, academic counseling and various other activities, students are given the study skills and motivation needed to get into college and complete a postsecondary education.

To participate in the program, students must either come from low-income families or be the first in their family to attend college.

Upward Bound was originally started in 1968 and currently has about 200 programs nationally, said project director Richard Morales, who has directed the program at Cal Poly since its inception in 1983.

Cal Poly's program was started because "the people at Student Academic Services saw a need in the community," said Morales.

After writing proposals to the federal government and gaining the backing of the number of community service groups, Cal Poly was able to get a grant to start its Upward Bound program.

Between six and 20 Cal Poly students are involved with the program at any one time. Five of the students are paid and the rest volunteer their time, said Morales.

About 60 high school and junior high students are currently participating in the program, coming from as far away as Righetti High School in Santa Maria. Other schools participating in the program include Arroyo Grande and San Luis Obispo High Schools; Paullding Junior High in Arroyo Grande and Main Street School, a junior high in Guadalupe.

Once high school or junior high students express interest in the program, they are given a taste of things in a sense, that you want to see more.

Young felt his life in Italy was more free than in America. "In this environment, you worry about things too much over in Italy, you're free from constraints.

President Baker, in addressing the group said Cal Poly is lacking in a culturally diverse population. He attributed the problem to the state system's desire for enrollment of California citizens.

To compensate, Baker said he hopes to expand the programs abroad.

"I look back on my two daughters, both of whom had international experiences that changed their lives," Baker said. "I'd like to hear from you after the experience to gain a little knowledge from you.
Undergrad presents paper to prestigious graphics group

By KEVIN CANNON

The first undergraduate to present a paper at the annual technical conference of the Technical Association of the Graphic Arts is a Cal Poly graphic communications senior.

Mike Stein, a graduating senior in the Graphics Department recently presented a paper to over 100 people in a workshop at a conference of the Technical Association of the Graphic Arts (TAGA). TAGA is the most prestigious research organization of the graphic arts industry.

"I thought that if the paper was so good that I recommended to Mike that he submit it," said Dr. Harvey Levenson, Graphic Communication Department head. "Stein's paper was selected because of the quality of research and the implications that his findings may have for people that will be at the highest levels of corporations in graphic arts.

"I thought that if the paper was so good that I recommended to Mike that he submit it," said Dr. Harvey Levenson, Graphic Communication Department head. "Stein's paper was selected because of the quality of research and the implications that his findings may have for people that will be at the highest levels of corporations in graphic arts.

"I thought that if the paper was so good that I recommended to Mike that he submit it," said Dr. Harvey Levenson, Graphic Communication Department head. "Stein's paper was selected because of the quality of research and the implications that his findings may have for people that will be at the highest levels of corporations in graphic arts."

The conference took place in St. Paul Minnesota and ran from May 5 through 8.

Levenson attended the conference and said, "Mike was literally swamped with questions and requests for his paper from the audiences."

Professor Gary Field of the Graphic Communications Department also attended the conference and said, "It was very exciting, well researched and well paced."

Field added, "He made two interesting points and created much lively discussion."

Stein said, "It was fun, but a lot of work more than any class I’ve ever taken."

60’s activist, singer to discuss her protest music

By BRUCE PINKLETON

Activist-singer Buffy Sainte-Marie will discuss her contribu­tion to protest music in the 1960’s on Monday, June 2 from 1 to 2 p.m. in Chumash Auditorium.

Admission is free and the public is invited to hear Sainte-Marie, a native American Indian, who sang and spoke about living conditions on Indian reservations in the 1960’s.

Sainte-Marie is known for her protest songs such as "Universal Soldier," "Now That the Buffalo Have Gone" and "My Country 'Tis Of Thee People You’re Dy­ing For."

She recorded a number of albums on the Vanguard record label including "Fire, Fleet and Candlelight," "Little Wheel Spin and Spin," and "Illuminations." She is a writer and musician with a background in the Indian reservations in the 1960’s and 1970’s.

"We’re very excited to have Buffy Sainte-Marie come to be­cause she’s such a talented and versatile performer."

Eating disorders are becoming epidemic

Anorexia, bulimia can cause despair, guilt and death

By KELLY MOORE

Eating disorders are potentially life-threatening conditions becoming epidemic in this country. If they are not quickly recognized and treated, they can lead to lifelong physical and emotional damage.

Anorectic starvers and bulimic binge-eaters can cause irreversible damage to their bodies. Many die each year from complications. The guilt, depression, confusion and misery experienced by those who have these conditions is overwhelmingly overwhelming and can lead to agonizing feelings of hopelessness and despair.

ANRED (Anorexia Nervosa & Related Eating Disorders, Inc.) was founded in 1979 as a public non-profit organization with the goal of providing information on anorexia nervosa, bulimia and other related eating problems. Since that time ANRED has worked to serve the needs of individuals suffering from eating disorders in San Luis Obispo County.

Sometimes eating disorders are associated with psychosomatic conditions. The main causes seem to be psychological and emotional; although physiological factors are also involved, some individuals are more vulnerable to the development of anorexia and bulimia than others.

The central issue of anorexia nervosa and bulimia is not food. The issues underlying eating disorders are much more closely related to poor self-esteem, unrealistic high expectations of the body, a fear of gaining weight, a desire to be in special and unique and a struggle to win power, control, admiration and respect from the family and society. The food behavior is merely the method the individual has chosen by which he or she hopes to gain these goals. Both starving and bulimic individuals may use symbolic ways of rebelling against authority and expressing anger.

Known as the starving disease, anorexia nervosa is defined as pathological starvation. It is often the result of a period of grossly erroneous self-perception of the body. The word "anorexia" literally means "loss of appetite," but recovered anorectics will admit they were always ravenously hungry in the midst of their self-denial. They are sometimes obsessed with thoughts of food and will collect recipes and cookbooks, they may cook gourmet meals for family and friends yet, they will never deviate the meals themselves.

The most noticeable characteristic of anorexia nervosa is a weight loss of 20-25% of normal body weight plus loss of menstrual periods.

The anorectic may then, thin nail. Nails become brittle and grow very slowly. Their en- tire metabolism slows down and the body uses what it has. They may continue to eat but their food is either thrown up or absorbed. These purging episodes usually are once every three or four weeks. Causations between the ages of 17 and 25 from migraines to upper and upper class homes are less commonly seen to anorexia.

Treatment of an anorectic is a long road. Before any kind of psychotherapy can be effective the body must be restored to a minimum level of health.

Up to 15% of all anorectics die. The remainder usually remain stuck in their condition until their therapy has begun, and even then the road is long. Physical and mental health can be long and difficult. Treatment is classified into four categories: (1) Hospitalization to prevent death and to restore the body nutritionally, (2) Behavior modification to implement weight gain, (3) Individual psychotherapy to build positive self-esteem and a sense of power, (4) Family therapy to help the child through the normal process of growing up and making decisions without family guidance.

The longer anorectic symptoms are ignored or denied, the longer the struggle back to health and a normal life will be.

The following are signs of an anorectic sufferer: Voluntary starvation often leading to emanation and sometimes death; rigid dietary for the sole cause of dramatic weight loss; menstrual periods may not begin if anorexia occurs before puberty; or if they have begun will stop, excessive exercise, hands, feet, and other parts of the body are always cold; dry skin, thin hair; downy fuzz may appear on the outer parts of the mouth.

The person is depressed, irritable, deceitful, hostile and sullen; obsessed interest in food, exercise and other aspects of life; strange, bizarre eating habits; usually a perfectionist; occasional binge followed by fasting; self-induced vomiting and/or laxative abuse; she or he is tormented, withdrawn; sexual activities are absent; alcoholic abuse; she or he is tormented; withdrawal from friends and family society; demands anything is wrong; frightened of independence, timidity and adult responsibilities; and finally, does not want to be controlled in any way by others.

The health center offers private and personal counseling for eating disorders since a majority of anorexia nervosa and bulimia suffers are college-age students.

A person who may have these symptoms or knows of someone, may call the hotline number at 544-6162. All calls are private and personal.

THE SECOND EDITION

The Second Edition Copy Center is a full service center designed to meet the coping needs of the University Community. Services include reductions, enlargements, overhead transparencies and copies made on white, color and resume paper. The Second Edition does both spiral and velobinding.

Balanced varsity hitting too much for former players

Jf women's volleyball coach Mike Wilton wants to begin next season low in the polls so his team can work its way up to No. 1, Saturday night's performance in the Main Gym was no way to start.

Despite having seven players, the varsity team showed what a spring worth of practice can do and downed the alumni 3-1 before 450.

Some of the alumni team, coached by Tino Reyes, a former Wilton assistant who has just taken a coaching spot with Oregon State, showed signs of its non-play. Said Wilton, "Some of the alumni were a little rusty," he said. "They definitely came to play. They came out and put on a good show."

Wilton watched from the sidelines and his current assistant, Craig Cummings, coached the varsity, which won 15-5, 15-10, 12-15 and 15-3.

Last year's 33-8 team was ranked No. 1 in the nation during the season before being upset by Fresno State at a regional in San Luis Obispo. Five returning starters have a tough schedule next season, playing most of the nation's best teams, including home games with UC Los Angeles, University of Southern California and University of the Pacific.

"Our schedule next year is a blockbuster," said Wilton. New freshmen will complete the roster, but Wilton said the new players are an unknown commodity.

"I feel pretty good about the new players," he said. "We've got seven kids who can do a good job."

"The concern is how many of those new kids can contribute." Cal Poly will probably be ranked around No. 5 in the national polls at the start of the year, said Wilton.

The varsity was led in hitting Saturday by Carol Tschasar with 12 kills in 25 attempts and three errors. Ellen Bugalski also had 12 kills with 31 attempts and five errors.

Kelly Strand had 12 kills in 29 attempts, five errors.

Setter Vera Pendergast was complimented by Wilton for her versatile setting that gave the varsity its balanced hitting attack.

The alumni was led by Chris Collette's eight kills in 19 attempts with two errors. Susan Forte had five kills and 11 attempts. Collette finished for Cal Poly playing in 1981, Forte in 1979.

"I think she has got what it takes," said Wilton of Auginbaugh's bid to make the Olympic team. The United States team usually runs a fast-paced, sophisticated offense, which is suited to Auginbaugh's style of play, said Wilton.

Curry was 'startled' by students, hesaid.

Prosecutors began playing the
first tape recorded interview of
murder suspect Kenneth Wayne
Curry Friday in San Luis Obispo.
Supervising Attorney lawyer
Judge Warren G. Colton defined a
motion to suppress the existence
of the tape by her denial of
sheriff's detective, before the
People's attorney.

Twenty-seven-year-old Curry
of Templeton, is accused of
murdering nổi and Yolanda
Alia on Cuesta Ridge last May.
Curry charged with two counts
of homicide, committing robbery
with the intent to kill in the
course of the robbery and multi-
ple murder.

In the recordings, Curry ex-
plained he was startled when
two shadowed" appeared behind
him while he was targeting
shooting at his TV Tower Road
Casey, and a man and a woman
asked if he
would help them push their
Volunteer fire fig.

Curry told sheriff's deputies his
fingerprints would be found on
the front of the car and on a
pail in the garage.

He also told them he
heard a radio broadcast in
Spanish just before the
holding.

He approached them
immediately.

He said the
was the last to see the
station.

Deputies questioned Curry at
the scene-for about four hours
before he was brought to the
county Sheriff's Department for
further questioning. This
was the first three of six
days of recorded interviews with
Curry.

When shown a photograph of
Braun, Curry identified him as
a man he had not named on
Cuesta Ridge.

He could not positively
identify Ada, because he said her
house was wet and he was
look

at something else.

The trial will resume Tuesday.

By Susan Edmondson and
Gregg Schuender

Municipal Court Judge Harold

DESIGN

From page 1

They also propose adding

pavement and five or six different
kinds of coffee to the sale of ice
cream cones. Under the proposal
the sale of sundries would be
discontinued.

To make better use of the

space the group has proposed to

have double-decker bus and

French windows put in to give an
open-air feeling, said Phelps.

The floor designed for the ice
cream parlor would be

shackled down and white to
give the place a vibrant look.

We wanted this to be a place
where you could escape and have
fun," she said. "We wanted to
make it so as to invite people in.

In designing the proposed
Italian restaurant, the design
group had several criteria it had
meant. It had to design several
eating levels, floor space for
dancing and durable chairs and

tables.

The restaurant, proposal in-
cludes seating capacity for 94,

butcher block tables, vinyl par-
quet floors in the dancing area

and carpeting in the eating area.

We have chosen an alluring
and exciting design for the

restaurant," members of the
group said.
