SLO city council bans alcohol use in ten city parks

By Susan Harris

The San Luis Obispo City Council passed an ordinance Tuesday night banning the consumption of alcohol in designated areas of ten city parks despite efforts by ASI President Mike Mendes and many of his staff to exempt Santa Rosa and Meadow parks from the ban.

The City Council held a public hearing to consider amending the Municipal Code to prohibit alcohol in certain city parks without a permit. This move, the council hopes, will stop trances from drinking and littering in a public park or recreation area.

"Although I don't necessarily support the use of alcohol, we should reserve the right to let the students have their input in any decisions that affect them," Mendes said after the meeting.

And, with many Cal Poly students using the parks, Mendes said it was unfair to vote on the ordinance before problems just arising back from summer vacation and have not yet heard the proposal.

The City Council proposed to restrict the drinking of alcoholic beverages because of problems with trespassers in Mitchell Park.

Mendes, along with council members Robert Griffin and Ronald Dunin and other ASI staff, drafted an alternative ordinance excluding Meadow Park and Santa Rosa Park from those parks where alcohol would be prohibited. Their proposal asked for these two parks to be monitored to see if a ban on alcohol was really needed.

Mark Reichel, ASI Community Relations representative, said, "Mitchell Park is a fasting center of the community, but Meadow Park has never posed a problem." He emphasized that if a problem ever occurs, it is then that it should be corrected.

Alarmed that Poly students would be penalized from using the parks, Dean of Students Russ Brown came in support of the students' alternative proposal.

Crop science junior killed in freak accident in forest

By Susan Harris

A Poly crop science junior was killed September 3 in an accident while working on a cleanup crew after the Rat Creek fire.

William Philip Saaranzia, 21, was killed by a large root ball rolled down a steep hillside. He had been working with a chainsaw cutting up trees that had been moved by bulldozers when the accident occurred.

"He was looking into fire fighting as a job after graduation," said Dori Sigworth, his room mate. "This had been Saaranzia's first year as part of the 20-member team of Cal Poly students working with the U.S. Forest Service.

The crew, known as "Max II," helped cut fire lines and rehabilitate the burned countryside. Dead trees left from the fire posed a danger for hikers and it was the job of the Max II crew to dispose of them.

The crew members were working 10 miles from Big Sur on 60-degree slopes.

After a normal investigation looking into Saaranzia's death, the Forest Service concluded that it had been an unavoidable, no-fault accident.

Saaranzia, called "Big Phil" by his friends, was a valedictorian of Gustine High School, with a 4.0 grade average. He was also involved in the local 4-H Club.

Board keeps South African holdings

By Craig Andrews

The Cal Poly Foundation Board of Directors voted unanimously Friday to maintain Foundation investments in South Africa.

According to a study by the Foundation Investment Committee, the Foundation has stock in seven companies conducting business in South Africa. Foundation holdings in corporate stocks have a value of $3.86 million, $840,000 of which is invested in the seven firms.

The study recommended the board retain its present policy of social responsibility concerning investments. It also recommended the board promote the Sullivan Principles, six principles intended to guide the ethical practices of American-owned companies operating in South Africa.

The principles include desegregating of work facilities, equal pay, access to job training, equal protection of non-whites and improving the quality of life for employees away from the job.

In 1979 the Rev. Leon Sullivan, who authored the principles, enlarged the guidelines and asked companies to sign documents to incorporate the principles into their policies.

Mark Reichel, however, who authored the Student Senate resolution to divest, said the Sullivan Principles are a "Joke." The rating system used by the companies differs substantially in principles from the rating system used by the Foundation, he said. Rating systems are supposed to rate company commitment to social ethics.

All seven companies in South Africa the Foundation has stock in have committed themselves to the Sullivan Principles, said Robert E. Griffin, associate to the executive director of Foundation.

"We chose not to diversiform because all of our equities were well up on their Sullivan Principles rating. There was strong evidence that they were following through with what they promised to do," he said.

In a report on companies committed to the Principles was released last October, companies were rated for progress made in incorporating the Principles.

See DIVESTMENT, back page.
How would you improve registration?

by Kevin H. Fox and Kevin Cannon

Steve Ventures, physical education graduate student: I usually register late because I don’t have the money when they need it. I am usually able to get all my classes, though.

Rick Works, junior ornamental horticulturist: Make it a little easier to add classes, that’s the toughest part. It is so confusing. Add more classes of the basics.

Shanae Hertset, senior marine biology/physical education: I have more general education classes so that there isn’t so much over-crowding. Maybe they should delay the late registration fee for a week in case people have problems.

Joell Isaac, freshman biology: I’m a freshman so it’s pretty easy. I had no troubles. I got everything through CBR, my department sent me a notice with advice on how to do it.

Diane Drazo, first-year biology: Some of the graduating seniors didn’t even get their classes. If graduating seniors don’t get their classes they should get them.

Tom Klap, junior business: With a school this size it’s hard. I think they should have one day for students who didn’t get their classes to add. Maybe offer more classes and fix the priority system.

John, sophomore political science: I didn’t have any classes. More priorities were added for more classes. More priority classes, none of the 7 a.m. times. I heard that 3,000 people were turned down for English classes. They just need more classes.

Gotta minute

A New(s) Year’s resolution

HAPPY NEW(S) YEAR!

I know it isn’t January, but it is a new year. And with each new year comes a barrage of resolutions designed to end bad habits or start new ones.

I don’t intend to stop any of my bad habits and don’t have time to start anything new, so I guess I will kill two birds with one stone and resolve to tell you all about the new look of the Mustang Daily. Editor Donald Munro has come up with a new look and feeling for your campus paper.

New graphics and layout design, to be augmented by fresh, sharp reporting and writing are all designed to make the Daily regular reading for the Cal Poly community. Monday will bring Expanded Sports coverage of all athletic events, plus features on the players and coaches that make it happen on the field.

Tuesday will bring your attention with a special section organized around issues as the news on campus and off. You’ll get to know the people who influence our daily lives.

Lifestyle, bringing you the newest, most interesting or unique look at the lifestyle of students will brighten your Wednesdays.

Thursday will feature in-depth looks and analyses of issues concerning us all in the new Insight section.

For all of you, do this section is for you. Every Friday, the Daily will bring you a take-out section “to the entertainment happenings on the Central Coast."

LETTERS TO THE EDITOR

Professor provides fountain solution

Editor — An article by Janet Hassett appeared in the August 15 edition of the Summer Mustang in which she intimated: “University Plaza Fountain: Why didn’t anyone stop us from putting up the article as just another comment on the often discussed issue. After further thought I’ve decided to chime in on my own assessment of the situation as I see it, asking the question many times when I first came to Cal Poly — Why doesn’t the fountain in the U.U. Plaza work? I have also heard the same mechanical reasons given about pump problems, etc. that were written in the paper in addition to the hotheaded acts that I have on the top of my list to take care of."

According that the U.U. is the heart of Cal Poly, it is some degree and has its own budget, I doubt that the users of the U.U. Plaza have a say in its destruction. It seems that the UU management and the University should take collective responsibility for the image of this important space in the heart of the campus.

This is a space which virtually every student who comes on campus discovers. I can’t recall a time when I’ve passed through the plaza with a first-time visitor who hasn’t wondered and asked me about the fountain. There is particular interest when people come in addition to the hotheaded acts that I have on the top of my list to take care of."

Jim Drobinski, an ornamental horticulture student, remarked in the article that, “they should take out the fountain and put a grass area with some trees...” We have many of these kinds of spaces already on campus, the ‘for keeping the plaza a ‘landscapes’ bounded by trees...’ with a working fountain that lends excitement and ‘white’ sound to the plaza as it was originally intended. I don’t test this is too much to ask considering that the water can’t be left to flow, although the fountain will need some design modifications to make it safer and efficient. And, yes, it will cost something — but isn’t it worth it?

After all, how many of us have already spent 14 years of high school — and irregular running water running down the edge of Cal Poly — and not just water systems, over-running systems, over-taking us on slopes and compacted sand faces — by the Mechanical Engineering building, for example? And other reasons there might be, as well."

I would like to see a solution to the U.U. fountain problem so that an end can be put to the complaints I’ve been hearing for the past twelve years — and we can try not to explain the situation to everybody we run into. Please use the plaza and particularly its fountain as an icon for our campus — but in a small price

Hurricane Gloria nears East Coast states
MIAMI (AP) — Hurricane Gloria, one of the most powerful storms to hit the Carolinas since Hurricane Hazel in 1954, spared the Bahamas and headed for the East Coast on Wednesday as it spun across the sea with 150 mph winds.

Officials in coastal states began taking precautions, and campers were evacuated from one coastal island. A hurricane watch was posted for North Carolina's vulnerable barrier islands and parts of Virginia and South Carolina.

"Some place along the East Coast of the United States is going to be threatened by this storm, and very quickly," if the storm's path doesn't change, said Neil Frank, director of the National Hurricane Center in nearby Coral Gables.

Death toll reaches 3,500 in Mexico City
MEXICO CITY (AP) — Rescue workers saved two small babies trapped for more than five days in a hospital runway by two major earthquakes, and President Miguel de la Madrid pledged that rescue efforts would go slowly to protect others who still may be alive.

Mayor Ramon Aguirre's office said late Tuesday the death toll had reached 3,500 from the quakes last Thursday and Friday. The Health Department reported 11,000 injuries.

The mayor's office reported 1,700 earthquake victims hospitalized — 1,100 more than the Mexican government listed a day earlier.

Storeowner sells lottery tickets too early
SAN FRANCISCO (AP) — A grocery store owner popped the balloon on the heralded October 3 grand opening of the store by selling tickets as soon as he got them.

Nearly a thousand tickets were sold at Steve Stephen Smith's Market Tuesday and several paid out winnings of $2 to $5 with a $300 jackpot due October 20, The store owner said "Jeze, we were afraid of this," said Chon Gutierrez, assistant director of the $1 billion-a-year lottery that was to have started with extravagant parades and ceremonies.

Smaller violated the lottery rules he said, but added he was unclear whether any laws were broken. The store owner said he didn't care if he lost his lottery license.

Falwell ordered to pay $5,000
SACRAMENTO (AP) — A judge has ordered the Rev. Jerry Falwell to make good on his promise to pay $5,000 to a gay leader if he could produce a tape recording of an attack by Falwell on a gay community church.

Municipal Court Judge Michael Ullman said Falwell, leader of the Moral Majority, had denied on a Sacramento TV talk show last year that he had attacked the Metropolitan Community Church and offered Jerry Sloan $5,000 if he could produce the tape.

Sloan gave the judge a tape in which Falwell referred to the church as "sodom-and-gomorrah" and part of a vile and satanic system (that) will one day be utterly annihilated, and there will be a celebration in heaven."

Faculty shortage forces cancelled classes
By Mary Anne Talbott

Lack of faculty to meet student demand is the main problem behind canceled classes, said three department heads.

The English department canceled 19 class sections and added 11. Department Head Dr. Mona Rosenman said that according to CAF figures, 3,334 students who wanted English classes couldn't get them. "What I have to do is juggle around low enrollment classes of eight or nine students, cancel them, and add more sections where I see hundreds that couldn't get in," she said.

Rosenman said the main reason there aren't enough classes is lack of faculty to teach them. The state gives the university a faculty allocation for each year, and each instructor can teach 12 hours of classes. This limits the number of students that can be accommodated each quarter, she said.

In addition to regular faculty, English classes are taught by part-time lecturers and graduate student assistants. Even so, there aren't enough instructors, Rosenman said.

She added that the room shortage on campus compounds the problem. When a class is canceled, its room is assigned to a different class. Then, if someone is later found to teach the class, a new room has to be found as well.

"The classes would have to meet at 7 a.m. or from eight to nine at night, and students don't like those times," she said. "Some sections of English 114 (freshman composition) are meeting at 7 a.m."

"The problem here is a little worse than at other schools, but it is a state-wide problem."

— Tal Scriven

REMEDIAL MATHEMATICS COURSE
Course Title: Math 29.2, Review of Elementary Algebra, Offered on the Cal Poly Campus by Cuesta College for Cal Poly students.

Prerequisites: An unsatisfactory Entry Level Mathematics Requirement (ELM) in all other areas, not for a remedial mathematics course.

Credit: 2 semester units (not transferable to Cal Poly).

Registration Fee: FREE

Time: Section 1. Mon. and Wed. 10:15-11:15 AM (320/325)-12/4/85

Section 2. Tues. and Thurs. 9:15-10:15 AM (320/325)-12/4/85

Room: Science 8-05 (Bldg. 52 Cal Poly Campus)

Questions: Contact the Mathematics Department.

ELM EXAMINATION DATE: there will be an ELM Exam open to enrolled students on Thurs., Dec. 5, 1985.

ENTRY LEVEL MATHEMATICS (ELM) TEST REGISTRATION TEST DATE DEADLINES

OCtober 4, 1985

December 6, 1985

April 25, 1986

July 11, 1986

OCTOBER 19, 1985

January 4, 1986

May 10, 1986

July 26, 1986

The ELM test is designed to assess the basic skills of entering CSU students in mathematics. The CSU Executive Order states that all entering students must complete the ELM Requirements before the end of the first two quarters of enrollment. Failure to do so will result in probation and disqualification. Registration forms and the EFT-ELM information bulletin can be obtained from the Test Office located in the Counseling Services Bldg. An ELM workbook can be purchased from the bookstore.
Choosing a long distance company is a lot like choosing a roommate.

Living together with someone for the first time can be an "educational" experience. And living with a long distance company isn't any different. Because some companies may not give you all the services you're used to getting from AT&T.

For instance, with some companies you have to spend a certain amount before you qualify for their special volume discounts. With some others, voice quality may vary.

But when you choose AT&T, there won't be any surprises when you move in. You'll get the same high-quality, trouble-free service you're used to.

With calls that sound as close as next door. Guaranteed 60% and 40% discounts off our Day Rate—so you can talk during the times you can relax. Immediate credit for wrong numbers. Operator assistance and collect calling.

So when you're asked to choose a long distance company, choose AT&T. Because whether you're into Mozart or metal, quality is the one thing everyone can agree on.

Reach out and touch someone.

AT&T
The right choice.
By Laura Rosanblum

A Boston pops style music festival, a half-time performance at an L.A. Raiders game, spring concert tours throughout California and half-time shows at Mustang football games are all part of the busy careers of members of the Cal Poly symphonic and marching bands.

Led by Director Bill Johnson, the Cal Poly bands appeal to students of all majors. "There's no music major at Cal Poly, so we try to tailor the band program to fit all schedules," said Beth Schaefer, a sophomore animal science major and the promotion coordinator for the Cal Poly bands.

According to Schaefer, incoming students are sent brochures which they fill out and return to the music department if interested in participating in either the symphonic or marching band. Traditional tryouts do not take place.

"Students are given an informal interview and asked to play a couple scales and the first bars of the Star-Spangled Banner," said Malia O'Brien, a sophomore business major and the vice president of the Cal Poly bands. "If you played in your high school band there's no reason why you shouldn't get into our band," she said.

"Symphonic band needs a more mature sound," said Schaefer, "but nobody should be nervous. The director sees where your weaknesses lie so he can help you."

The Cal Poly bands are more socially oriented than other college bands according to O'Brien. "We try to be really tight socially so that we can get along and play better."

Although the bands have more new recruits this year than in past ones, they would like to add a few members to the symphonic band and increase the size of the marching band from 75 to 100.

Interested students can receive more information in Room 216 of the Music Building or show up to the practices. The symphonic band practices on Mondays and Wednesdays from 4 p.m. to 5:30 p.m. and the marching band meets on Tuesdays and Thursdays from 3:30 p.m. to 6 p.m.
Financial Aid offers workshops

Cal Poly Financial Aid Services will offer workshops on student loans and time management this quarter.

Last year almost 4,000 Cal Poly students received Guaranteed Student Loans. Students who wish to find out more about this financial aid program should attend the workshop titled “Everything You Always Wanted To Know About Loans.”

The workshop will be offered twice during fall quarter:
- Tuesday Oct. 1 at Tenaya Hall, 7:30-9 p.m.
- Thursday Oct. 3 in the University Union, Room 219, 11 a.m.

Students who have not yet picked up financial aid, loan or scholarship checks should go to the Student Accounts Office, Administration Building Room 211 between 8 a.m. and 5 p.m.

The Financial Aid Office will also conduct a workshop titled “Managing Your Money” for students who want to organize their resources and budget for the school year. The focus of the workshop will be on budgeting techniques, debt management, shopping skills and checking and saving accounts.

A financial aid counselor will also assist workshop participants in completing an individual budget worksheet. This workshop will be offered twice during the quarter:
- Wednesday Oct. 9 at Santa Lucia Hall, 7:30-9 p.m.
- Thursday Oct. 10 in the U.U., Room 219, 11 a.m. to noon.

Computer taken from Cal Poly

For the second time in three months a computer has been stolen from the Counseling Center.

A $4,949 Apple IIIe computer and printer with disc drive were taken from the Career Library of the Counseling Center between Sept. 13 and 15.

The missing Apple IIIe was used by students to match career skills with related fields, said Joe Diaz, coordinator of Career Planning Services.

After the first break-in, Diaz complained about the security in the building. The windows were reinforced and ties were ordered to lock the computers to table tops. The ties arrived after the second computer was taken. Although Diaz had ordered security devices, he doesn’t believe they eliminate the possibility of theft.
CMC inmate population increase could affect SLO water supply

By Dan Ruthemeyer

An increase in the inmate population at the California Men's Colony may cause housing and water supply problems for students, San Luis Obispo Mayor Melanie C. Billig said in a news conference Wednesday.

The city is working to seek a cap on the number of inmates at the facility, which is already crowded beyond its listed capacity. There are 6,850 men incarcerated at the prison, which is designed to hold 5,144.

Overcrowding in the prison first came about in 1981 when the Department of Corrections added 500 beds to the prison in full use water may be scarce for that project. If expansion continues, a housing shortage may result because one guard is needed for every five new inmates.

San Luis Obispo Mayor Allen K. Settle said the prison is already using two-thirds of its allotment of water and that any increase will probably come from the allotments of the university. He also said that when the university gets its cogeneration system in full use water may be scarce for that project.

With 150 inmates added to the state prison system every week and 7,200 throughout the year, Billig said she believes the state must take action to prevent the overcrowding. With the present rate of incarceration so high, Billig is worried that the state may try to add either Camp San Luis Obispo or Camp Roberts to the existing facilities.

In addition to the CMC, San Luis Obispo County also includes the Paso Robles School for Boys and the Atascadero State Hospital. Billig said larger communities are able to avoid expanding facilities to the point of overcrowding by using their political clout.

To combat the problem of a lack of political clout in the state, Settle will meet with the League of California Cities, which is the lobbying group for small cities throughout the state.

With 150 inmates added to the state prison system every week and 7,200 throughout the year, Billig said she believes the state must take action to prevent the overcrowding. With the present rate of incarceration so high, Billig is worried that the state may try to add either Camp San Luis Obispo or Camp Roberts to the existing facilities.

CMC has fulfilled its obligation for housing inmates.

"We feel we are really bearing our social responsibility for taking care of inmates in the state," said Billig.

The prison adds 900 beds to the CMC to turn the construction bill was passed by the California Legislature earlier this year which will allocate $190,000 to the CMC to turn classrooms and a television room into housing units. This bill is now before the governor.

Melanie C. Billig said in a news conference Wednesday, "We feel we are really bearing our social responsibility for taking care of inmates in the state," said Billig.

With 150 inmates added to the state prison system every week and 7,200 throughout the year, Billig said she believes the state must take action to prevent the overcrowding. With the present rate of incarceration so high, Billig is worried that the state may try to add either Camp San Luis Obispo or Camp Roberts to the existing facilities.

Appointed to board of directors

PolS major represents students, makes Foundation decisions

By Andrea Bernard

The Cal Poly Foundation Board of Directors has an "enthusiastic, self-motivated and open" student representative in Linda Eberl.

This is how the senior political science major described herself in an interview Wednesday in regard to her personal contributions to the Foundation. At her appointment at the end of spring quarter, Eberl was given the title of student director to the Foundation Board of Directors—something she calls a unique duty.

Eberl has been a part of student government during much of her time at Cal Poly. For the past two years she has served on the ASI Executive Staff as administrative coordinator and last year as community affairs representative. As student director, Eberl will serve on the Foundation Board until next May.

"Linda has been one of the most effective student directors to date," said Al Amaral, executive director of the Foundation. "She's the type of person that does her homework and doesn't hesitate to express her judgment.

"I have my opinions, but I'm always willing to listen," Eberl said. "I'm very open to new ideas. I love this university, so the opportunity to serve on the board was an honor. I want to do what I can for the university."

Eberl may continue to serve Cal Poly even after graduation. Her concentration in public administration has enabled her to narrow her sights to university administration, and one of the universities she has in mind is Cal Poly.

In the meantime, Eberl is involved in making Foundation decisions. One of the most important has been the question of divestment of Foundation money in companies that deal in South Africa. Last June the Student Senate passed a resolution encouraging the Foundation to do so.

"The Foundation Board of Directors listened and did all they could," according to Eberl. As a result the Foundation Investment Committee recommended the Foundation maintain its involvement with companies that honor the Sullivan Principles, a system that promotes the monitoring and rating of corporations in South Africa. The Foundation divested from a company that did not align itself with the Sullivan Principles.

Last Friday, the Foundation board voted on an issue of much less international importance, yet political science major Linda Eberl, student director to the Foundation Board, said "we are doing what we can in promoting a certain social atmosphere in South Africa."

Eberl represents Cal Poly students by offering their particular perspective to the Foundation, yet she is not responsible to the Cal Poly student body. When Eberl is part of decision-making that affects the university in the long run, decisions that "may not make present students happy now," she said.
Thursday, September 26, 1985

MUSTANG DAILY

Executive Director

The student director would like to develop a public relations program through the use of articles in the Mustang Daily and the development of booklets detailing the many functions of the Foundation.

Executive Director Amaral sees Eberl's idea as another contribution to one of the most important factors her student perspective on the board can provide, "assuring a two-way channel between the Foundation and the student constituency. There is not only information from students through Eberl but also information about the Foundation going back to the students," said Amaral.

This is all in a day's work for Eberl. "It's a fantastic experience to be involved in the Foundation Board. I have a voice and a vote."
Getting the answers right is a matter of how many functions your calculator has. And nobody gives you more functions, and features for your dollar than Casio.

Our solar fx-45S, for instance, costs only $34.95 yet it has 98 scientific functions—including trig, stat, and hex—dual calculations and conversions. What's more, it lets you calculate with the speed of light—and twelve other commonly used physical constants, including Planck's constant and atomic mass. Plus it offers you 16 metric conversion functions, as well as a 10 digit + 2 digit exponent display for greater accuracy. And its flip-open keyboard gives your fingers plenty of elbow room for calculating quickly.

For only $19.95, our fx-115 is solar powered and has a 10 digit + 2 digit exponent display. And it gives you 57 functions—including statistics and computer math conversions, which are so valuable in today's high tech environment.

Whichever Casio scientific calculator you choose, it'll help you get your answers right on the money. At a price that's right.

Available at your local college bookstore.

Where miracles never cease.
Fire disrupts life in San Luis Obispo

By Renee Shupe

This was not a typical summer for the usually sleepy town of San Luis Obispo. There are a few of the more exciting events summer residents experienced:

Monday, July 8: The situation in the city of San Luis Obispo could best be described as grim because of the roaring Las Pillas Fire. Hundreds of residents had been evacuated from the area above Cuesta Park over to San Luis Drive as flames shot high in the air. Highway 101 was eerily silent due to its closure to all emergency vehicles. City residents were told via the Emergency Broadcast System not to use water, electricity or telephones except in emergencies, and above all, not to stay off city streets to provide access for emergency vehicles.

At Cal Poly, the campus was deserted after classes were officially canceled. Students from the carpentry shop helped bulldoze the hill behind Yosemite Hall for a firebreak as the billowing clouds of smoke threatened ominously over the mountain. There was a definite possibility that the fire could reach the school.

Throughout the day residents lined the streets in the city and neighbors converged in groups watching firefighters battle the flames. The atmosphere was tense as the news seemed to continually worsen. Later in the day, Gov. George Deukmejian declared San Luis Obispo County a state disaster area.

More than 2,000 firefighters, 10 percent of whom were female, lined the streets, which spread quickly to the southeast portion of the city. Orcutt Road and Broad Street had become the latest fire "hot spots." Approximately 4,000 people were evacuated throughout the county, with majorities coming from the Monterey Heights vicinity.

By late afternoon the worst of the crisis had passed, as 100 percent containment of the fire within city limits was announced. It was a relief for San Luis Obispo residents, but there was still work ahead for the exhausted and weary firefighters--in particular the massive 10,000-acre backfire soon to be set.

Deserted reports, only one house within city limits was extensively damaged. Several other structures were lost, including two barns, one garage and four chicken coops. Seven houses were lost in the Lopez Canyon area, along with numerous other structures.

The 75,000-acre blaze as well as the round-the-clock work of the firefighters will not be forgotten by San Luis Obispo summer residents.

Thursday, August 1: Kevin Weir, the secretary of the Cal Poly Wheelman bicycle club, was charged with two counts of felony burglary and one count of possession of stolen property in relation to two break-ins at the Velo bike shop in San Luis Obispo. Although Weir had not been charged in relation to a computer theft committed at Cal Poly in June, he was also connected with that burglary at this time.

Weir was spotted riding one of at least three of the stolen bicycles downtown at Farmer's Market Thursday, July 18 by San Luis Obispo police. After questioning Weir, police officers released him, but searched his apartment two days later, finding other stolen items missing from the Velo store. At this time an Apple computer system valued at more than $7,000 was also spotted by a San Luis Obispo resident, but no explanation as to what he had done, but said that he should not be made to "feel like a Kenneth Curry." The next morning Weir was caught removing the newspapers from their stands and throwing them in garbage dumpsters.

Although the Mustang Daily was able to recover approximately 3,000 papers, potential advertising losses and production costs for the remaining missing papers was estimated at $500. Summer Mustang personnel also discovered Weir had taken papers the previous week when an earlier story had appeared, bringing total losses to $1,600.

Weir has been expelled from Cal Poly and will not be allowed to attend any university in the California State University system. He will not be forgotten by San Luis Obispo residents, along with numerous other structures.

This was a few of the more exciting happenings of Poly Summer 1986.
Students... THE GOOD LIFE! GO FOR IT!

At Mustang Village you pick your own lifestyle... make your own choices... live in a conveniently located student community.

- Rents from $187.50 a month.
- Save on transportation... just a short walk to campus.
- Close to shopping... banks... markets... churches.
- Beautiful BRAND NEW units with kitchens, study areas, laundry facilities, swimming pool, recreation room!

Accusations made that Stanford students cheat on psych test

PALO ALTO, Calif. (AP) - Twenty-three Stanford University students have been accused of cheating on computer-scored tests in a psychology course and could face a number of penalties, including expulsion from the school or even be expelled, officials said.

The final dispositions will be decided by Stanford President Donald Kennedy following hearings for the students. The accou­ nted students can choose between the Student Judicial Council or a dean of student affairs' staff member for their hearings. The recommendations from the hearings go to Kennedy.

The accused students were among 744 taking the Psychology 1 course from professor Philip Zimbardo, who said the size of the class made it necessary to give the multiple-choice tests rather than essays or other types of tests.

Zimbardo said the allegations of cheating have led him to decide to never take on such large classes again unless the school provides him with a graduate teaching assistant for every 200 students.

During the spring semester, the course, which has no grad­ uate teaching assistant, but she was the one who discovered the identical tests, officials said.

The assistant, Mary Parpel, said she had been receiving anonymous complaints about cheating during the semester. Parpel said that new students were making better grades through cleaning.

Parpel said she discovered the matching tests June 1, during a testing session for students who had missed tests during the semester. She said she checked out the students who submitted the tests on a hunch and found they had the same address.

Names in the news

Springsteen visits with sick girl

DENVER (AP) — A 17-year-old Detroit girl who missed Bruce Springsteen's concert in her hometown because she was in the hospital with cancer got to meet the rock singer in Denver.

Dianna Sobel met Springsteen backstage at Mile High Stadium on Monday night before he opened the first of two concerts there.

Springsteen kissed her cheek and autographed a large photograph of himself, said her father, Chuck Zobel. Dianna gave him a dozen roses to celebrate his 36th birthday, which was Monday.

"It was exciting to see Dianna with such an emotional high when she had been in so much pain the week before," Zobel said. "We (Springsteen) has been such an inspiration for her."

Dianna was back at C.S. Mott Children's Hospital in Ann Arbor, Mich., Tuesday night.

Oilman to write story of his life

AMARILLO, Texas (AP) — Oilman to write story of his life.

Boone Pickens has made another deal, but Wall Street can breathe easy. Houghton Mifflin Co. will pay the oilman a $1.5 million advance for writing the story of his life, the publisher said.

Pickens, president and founder of Mesa Petroleum Co., signed a contract Monday night, said Carolyn Amussen, president for Houghton Mifflin.

He will write the book with Joseph Noona, a senior editor of Vanity Fair Magazine, she said.

Mesa has made profits of about $718 million and investments through attempts to take over Superior Cities Energy, General American Oil, Superior Oil Company, Gulf Oil and Phillips.

Cavett kicks off school birthday

WAYNE, Neb. (AP) — Talk show host Dick Cavett returned to his hometown to kick off Wayne State College's 70th anniversary celebration and relate fond memories of growing up in Nebraska.

"It's wonderful out here," Cavett, 45, told a sold-out audience of more than 700 people at Wayne State on Tuesday night. "It's funny: I had to go away to appreciate it. I often wish I were here.

"I get all sentimental when I come back."

— Radio humorist Garrison Keillor doesn't think he's funny, but residents of suburban Detroit may disagree.

"He's bigger than Bob Hope," exclaimed Lynn Staib, assistant manager of a Beverly Hills bookstore where Keillor on Tuesday autographed copies of his new book, "Lake Wobegon Days."

The lines for Keillor were longer than those for Hope when he appeared, Staib said.

Keillor is host of "A Prairie Home Companion" on American Public Radio and writes humorous essays for magazines.

Men’s team wins in Sacramento, Fresno

By Karen Kraemer

A combination of speed and depth this season have vaulted the Cal Poly men’s cross country team to the top of Division II racing.

Only two weeks into the 1985 season, the distance runners have posted successive wins at the Horset Invitational in Sacramento and last week’s Fresno State Invitational. On the merits of early performances, the Mustangs already demand serious consideration for a Division II national title.

At Fresno, the men outdistanced not only Division II foes, but five Division I teams. Pac 10 members University of Washington, and UC Berkeley finished second and third to a close group of Cal Poly runners.

“This is an outstanding group of men,” said Tom Henderson, in his fourth season as coach of the men’s team. “They are just beginning to show how good they are.”

In Saturday’s Fresno meet, Cal Poly placed five scorers in the top 11 places. Jay Marden of Berkeley won the 10,000 meter race in 31:06. Joe Rubio, a senior who red-shirted last season, led the Cal Poly team over the course and finished sixth overall.

“This was the finest team effort I have ever seen a Cal Poly cross country team run,” said Henderson. “The men ran as a team throughout the race, feeding off of the strength of their teammates. There was no way any of them could quit.”

Rubio’s time for the 10,000 meter course was 31:45, only seconds ahead of teammates Bruce Storms (31:49) and Jerry Hernandez (31:50). Claiming the fourth and fifth scoring positions were seniors Jim McCarthy (31:54) and Brent Griffiths (32:00). Poly won the invitational with 35 points, 25 ahead of the University of Washington.

Coach Henderson was impressed with the seven-member team’s depth, adding that Cal Poly has enough depth this season to race three full teams at most of the meets.

“Now we’re talking depth,” said Henderson. “To make it clear just how ‘deep’ we are at Fresno — competing Washington — our 18th man would have been in the top seven of every other team in the race.”

Also finishing the race in about 35 minutes were freshman Jim Chaney (32:24), sophomores Doug Twijzer (32:31) and Michael Miner (32:42), and junior Mike Livingston (33:06).

Henderson said he believes Cal Poly’s early performances will not go unnoticed.

“The pre-season NCAA Division II poll ranked us 7th,” said Henderson. “This is rather interesting considering we usually finish in the top seven of every other team in the race.”

Players to keep the winning spirit

Poly men's soccer team kicks off the 1985 season

A tough preseason and a stiffer 1985 schedule have led the Cal Poly men's soccer team to push harder and gain the confidence to enter league play.

Wolfgang Gartner, head coach of the men's soccer team, is back for his sixth season at Poly and hopes his team's 1-3-1 preseason record will prove to be a learning experience and spark some good play from his players during league action.

Poly's season opener at Chico State University shocked the Mustangs, as an aggressive 12th ranked Division II Chico team came out in full force from the kickoff and scored two goals in the first 10 minutes. Poly ended up losing the match 3-0.

The University of California at Davis team capitalized quickly on two Cal Poly defensive mistakes and scored two goals in the first half. Dan Campbell, a newcomer, was the only Mustang to score a goal, denying the Aggies a shutout.

Campbell's goal, which came with 10 minutes left to play, could not save Cal Poly from a 2-1 defeat. Poly finally came alive the next match, and gave Coach Gartner a reason to smile, as they trounced Division I University of the Pacific, 3-0.

Poly will host the Stanford Cardinals on Saturday, Sept. 28 at 7:30 p.m. to challenge yet another Division I opponent from the 1985 schedule.
An emotional beginning

By Tim Robinson

On September 14, more than a week before any students would even crack a book, the Cal Poly Mustangs, playing before over 6,000 fans at Mustang Stadium, began their 1983 campaign. They were facing an aged and trying rival, met with North Dakota State, but the rivalry of a David and a Goliath. The Mustangs, in the role of giant-killers, upset No. 1 ranked North Dakota State, 15-29. The win came before one of the largest crowds to see a Cal Poly football game since the 1980 chromium-styled Mustang. It might have stirred some memories and hopes of Mustang faithfuls, that Cal Poly might return to the elites of Division II football.

The Mustang’s newly-earned prestige was short-lived however. Apparently suffering from an emotional drain of the North Dakota State win, they were victimized by an aggressive Cal State Hayward in its third quarter, trailing 1-7. The Mustangs had not lost to Hayward since 1971 and had beaten them, 36-6, last year. It was a two-week long rollercoaster ride, beginning with the top rated North Dakota State, then ending at the bottom with the loss to Cal State Hayward.

North Dakota State, which received one of its No. 1 rankings from Sports Illustrated, came into the game as the No. 1 rushing offense in Division II football. It was, however, the Mustang’s offense that was the determining factor. Cal Poly rolled up over 400 yards in total offense against the North Dakota defense which had allowed Northern Michigan only 10 points the week before. The game also had a close score, as the Bison’s made a mad, second-half comeback after trailing 17-6 lead in the third quarter. If not for a few key injuries in the contest. One of the most crucial injuries was to running back Jim Ghed. Ghed, who had rushed for over 170 yards a week prior, was lost after the first set of downs to a hamstring injury.

Another key injury was to offensive lineman Eric Tautolo. Tautolo, who has the honor of being the largest member of the team, strained his left knee and is listed as possible for this week’s game against Fresno State.

The loss to Hayward is, perhaps, more disappointing when considering the Mustangs had a 17-4 lead in the third quarter. If not for a few critical mistakes, the Mustangs might be 2-0. There is also the consideration that had they not upset the Bison they would be 0-2.

The silver linings in the story, however, are many. Despite the letdown loss to Cal State Hayward, the Mustangs have proven that they can play with any Division II team. They have also proved, thus, that when healthy, their offensive line will return on the road to national prominence and a place among the elites in Division II football.

Flores refuses to throw in towel

MANHATTAN BEACH, Calif. (AP) — While things haven’t exactly gone as planned so far this year for Coach Tom Flores and the Los Angeles Raiders, he made it clear Wednesday that he’s not about to call it a season.

“We have 13 league games to go, we’re not out of anything yet,” Flores said at his weekly news conference. “But we have to bounce back.

“We’re without our No. 1 quarterback (Jim Plunkett). We’re going to wait a few days to decide whether there will be surgery. It’s a major procedure for him to go on and we will go on with quarterbacks (Marc Wilson and Randy Hippele).”

The right-handed Plunkett suffered a dislocated left shoulder early in the fourth quarter of last Sunday’s 35-7 loss to the defending Super Bowl champion San Francisco 49ers.

The setback was the second in a row of a continuing nature suffered by the Raiders, leaving them 1-2 entering this Sunday’s national TV spectacular, the 1-1 New England against the Patriots, who are 2-1.

“This is an important week for us, obviously,” Flores said. “We’re going to check on the winning track.”

Plunkett, 37, underwent arthroscopic surgery Tuesday. Flore’s mention of surgery was a reference to the possibility that a major operation might be required on Plunkett’s shoulder.

Whether surgery is required or not, Flores said that he didn’t expect Plunkett to be available in about six weeks, as bad, preferred after Sunday’s game and repeated Monday and early Tuesday.

Dr. Robert Rosenfeld, who performed Tuesday’s arthroscopic surgery as a diagnostic measure, was quoted in Wednesday’s Los Angeles Herald Examiner as saying it would probably be 10 weeks before Plunkett is ready to play.

Wilson, 28, and in his sixth professional season, has had an up-and-down career since the Raiders made him a first-round draft choice in 1980. Hilger was the Raiders’ sixth-round draft choice this year.

LOS ANGELES (AP) — The Mexican quakes are the largest in a series of natural disasters in the past 30 years, and with each earthquake, the public is becoming more aware of the need for insurance. The United States has been hit by several major earthquakes in recent years, including the 1989 Loma Prieta earthquake in California and the 2001 earthquake in Denver, Colorado. In response to these events, insurance companies have increased their rates to cover the risk of future quakes. However, this has led to complaints from policyholders who feel that they are being overcharged. In some cases, insurance premiums have doubled or even tripled in the past year. The insurance industry has been criticized for not doing enough to prepare for future quakes, and for not providing enough information to policyholders about the risks they face.

In an effort to address these concerns, some insurance companies are now offering alternative policies that provide coverage for earthquakes and other natural disasters. These policies are often more expensive than traditional insurance, but they can provide a level of protection that is not available through standard policies. In addition, some companies are offering to cover the cost of emergency repairs and other expenses that may arise after a disaster.

Despite these efforts, many policyholders are still concerned about the high cost of insurance, and about whether their policies will provide adequate coverage in the event of a major quake. As a result, some are considering alternatives to traditional insurance, such as self-insurance or alternative risk management strategies. In the end, it will be up to each policyholder to decide how they want to protect themselves from the risks of natural disasters.
