Greek Row: a project now awaiting action by students

By Darcy Spangler

The stage is set to establish student housing on university property, better known as Greek Row, the proposed site of the CSU in the hands of Greeks and other interested student organizations.

The 30 acres of university property which the Greek Row project would consume is currently a housing Greek organizations and other interested student organizations. The site is located near the top of campus along the south side of Highway 101.

Jeff Sanders, ASI president in 1983-84, initiated the effort to form a Greek Row during his term in office. His successor in 1984 was Nick Aihanasakos, continuity of the effort. In April of this year, conditions have been met so that the organization could lead to a community being established by university executives and approved by President Jeff Sanders. Assembly Bill 633 will present a proposal to the California State University Board of Trustees.

The first condition requires student organizations to form a single business entity which would make a bid to purchase property and deal with the university in negotiations. The group could be made up of Greek organizations and not exclude interested student organizations on campus.

The second step involves the City of San Luis Obispo. The university could not follow through without the support of the City Council, promising to provide services to the student housing development. The prospective property purchase would not be excess of present university property and would need to be annexed, explained Coughlin.

At this point, the opinion of the city is not known, but some candidates for mayor and council have made the student housing project a political issue in the Nov. 5 municipal election.

"To make it work, we're going to have to have their (City Council) support," said Nick Aihanasakos, Greek relations officer.

"It's going to be a pretty slow process." The final step would be to ask the Chancellor's Office to review the proposal and determine whether or not it agrees with trustee policy. If it does, action may proceed; otherwise, it will have to be presented to the board of trustees who would consider a policy to allow a student entity to purchase and develop university property.

ELM test scores down percent from summer 1984

By Craig Andrews

The results from the Cal Poly Entry Level Mathematics Test for the 1985 summer quarter show a nine percent drop from the number of students who passed the test at the same time last year.

Out of 617 students who took the ELM test this summer, only 244, or 40 percent, passed. Of 497 students who took the test in the summer of 1984, 243, or 48 percent, passed. In the same period of 1983, 54 percent of those taking the test passed.

The ELM test is designed to assess the skill levels of entering CSU students in the areas of arithmetic, elementary algebra, and geometry.

Besides passing the test, students can fulfill the ELM requirement by having a Math SAT score of 530 or above. Students scoring 520 on the College Board Math Achievement Test, or three, four or five on the Advanced Placement Calculus test, are exempt. A grade of "C" or better in an intermediate algebra class transferred from another college also satisfies the requirement.

The 1984-85 ELM testing period at Cal Poly since the ELM became a requirement in 1983. Passing percentages on the 13 tests range from 32 percent to 67 percent. To a big extent, the results for last summer are normal, said H. Arthur DeKleine, a Cal Poly professor who coordinates the ELM tests. "On the other hand, there's a rolling up of students who have not satisfied the requirement," he said.

"Cal Poly is in as good a shape as any of the (CSU) schools. The number of 40 percent just doesn't sound like us," DeKleine said. He added that Math-SAT scores of students entering Cal Poly are already fulfilling the requirement. "About half of the freshmen entering Cal Poly have already fulfilled the ELM requirement," he said.

A completion report of the ELM requirement is a prerequisite for all math classes. Students do not have a notice and test date if they have not taken the test within their first two weeks of classes.

A letter released Thursday by Paul F. Murphy, interim head of the math, statistics, department, states, "Students who entered the university in the fall quarter of 1984 or before will be expected to successfully complete the ELM Requirement before the end of the 1985-86 academic year. Failure to do so may result in the student subject to academic disqualification."

"I think that the university is undoubtedly going to start implementing the (test) regulation," said Donald M. Coats, associate dean of educational services. "This means those who have not met the requirement after two years at Cal Poly will be discharged from the university."

DeKleine said students had six chances to take the test during the past year. The university was 20 percent of those who did not satisfy the requirement. "Many are probably calling it quits," DeKleine said.

A report on ELM issued for this quarter lists the number of students who have not fulfilled the ELM requirement at 2,486. Those who failed the test amount to 1,142, and there is no record of 1,344 students having fulfilled the requirement.

DeKleine said, however, there is no way of knowing how many of those students are freshmen or sophomores, or those who simply decided to drop out of school this fall. He said many of those who have failed have such low GPA's that they probably were not serious about continuing school anymore. He estimates that about 150 did not return to Cal Poly after having taken the test and failed.

There are about 700 students who are enrolled in their first year at Cal Poly who have not taken the test. These are the students who in the past year have not received their study list if they had not been a run with the updated file.

"There was no way we could have figured out who had received it," he said, "so we ran a complete second run with an updated file. This way we were able to get the information out to everyone." The section of the registration forms that had not been updated was where students select the location they want their study list sent, said Zuur. He added that most of the study lists that did not reach the students during the first run were probably sent to their departments.

Dave Yang, director of resource management, said the error resulted in an additional $1,246.53 bill that will be paid by the state. This quarter about 13,000 study lists were supposed to be sent out and only about 6,000 actually reached students, said Zuur. About 3,500 to 4,000 of those that did not receive their study lists were new students, he added, and none of them would have received their study list if there had not been a second run.

Wrong file cause of duplicate study lists

By Sally Kissell

The use of the wrong file during computer assisted registration for fall quarter resulted in duplicate study lists being sent to the majority of students enrolled and additional expenses, said the manager of student data systems office.

Tom Zuur, the computer center did not update the right file, meaning that all of the new students and some of those continuing would have not received a study list if there had not been a run with the updated file.

"This was no way we could have figured out who had received it," he said, "so we ran a complete second run with an updated file. This way we were able to get the information out to everyone."

The section of the registration forms that had not been updated was where students select the location they want their study list sent, said Zuur. He added that most of the study lists that did not reach the students during the first run were probably sent to their departments.

Poly listed as competitive college

By Jennifer Kibler

Cal Poly has been selected for inclusion in a work which profiles colleges and universities that consistently have more applicants with above average credentials than they can accept.

Cal Poly was included "because of the large number of applicants applying to the university and the fact that Cal Poly's academic program has the ability to accommodate them all," says Dave Snyder, admissions officer.

Poly listed as competitive college

Also listed in the book are Carnegie-Mellon University, California Institute of Technology and Princeton University.

Overall, Cal Poly accepts about one applicant in two, but the competition is concentrated in a few programs, mainly architecture, business administration, computer science, and engineering, for which the ratio is about one in five, said Snyder.

There is room in majors for all qualified applicants, or those among the top third of California high school graduates and community college students who score with an average average Snyder said. Virtually all Cal Poly students come from the top half of their high school class and about 35 percent come from the top tenth.

Lots of advantages in riding the bus

With the cost of campus parking permits going from $15 to $22.50, not to mention the daily jockeying for position for those of you in scarce parking spaces, the new free bus service now available to students makes a lot of sense. It can save bus loads of gas also.

We can all relate to the terror of trying to find a parking space in time to get to class before the teacher shuts and locks the door. It can be very embarrassing walking in late, out of breath, sweating about having to walk miles.

Through the hard work of many campus and city personnel, students, faculty and staff can ride all SLO Transit buses for free. The $48,780 price tag for the program was derived from fines and parking ticket bail forfeitures resulting from on-campus parking violations.

In addition to the free bus rides for local students and employees, the price of monthly passes for out-of-town buses has been reduced. The monthly passes from Atascadero and Santa Margarita have been reduced from $45 to $27. The monthly passes for Los Osos and Morro Bay residents have been reduced from $30 to $18.

To meet the needs of students who live in large apartment complexes, the city has started a 6:45 a.m. bus that will pick up students at Valencia, Tropicana Village, Stenning Glenn and Mustang Village.

Not only does the program save individuals money, but by delaying the costly expenditure of building a parking structure, it saves the university money also. The savings on wear and tear of vehicles, plus the gas savings add up.

The continuation of the service depends on usage. If we don’t take advantage of the program, it will end in June. If the need is there, the service can be continued and expanded.

Ride the bus. Save money, time and a great deal of hassle. Next time you see the tired, swearing driver coming up, remind him about the service.

- Joe Ann Smolar

Letters to the Editor

Father shares letter of appreciation

Editor — A friend of mine sent me this “writing” recently, and I wanted to share it with you. If you would like to use it in your paper you have our permission.

I was particularly struck by the excellent composition of this piece as well as the powerful and profound meaning it captured the moment exactly.

My son, Steve, always appreciated good writing, and really enjoyed the time he spent on your staff. He would have liked this article.

By Marilyn Beuchenschl

It’s a little crooked,” he said as he took his mouth out of the grave marker. “It hasn’t settled yet.”

The voice was weary. I looked into my friend Karl’s face and saw the pain and exhaustion. Too many years had left him dry and empty. He tended the grave with careful hands.

Karl was a careful person. His hands were more accustomed to carefully dispensing medicine in his pharmacy, to touch other people in pain and give strength and encouragement. Now those hands plucked slowly but purposefully at the offending weed around his son’s grave marker, slightly askew “because it hasn’t settled yet…” His eyes caught a point far beyond the bus sheltered granite. How could he reconcile his own horror of how life laid waste to that young, warm soul, his flesh and blood, to be laid to rest in his seed, his hope? Steve Braun, age 21, and Viola "Loa" Ada were killed May 27, 1984. They were both soon to graduate from CalPoly.

The grave of his son was all Karl had been left to… to visit, to stand by, to remember. That was ALL he had been left with. There is no more echo of that boy in the lodestone. It’s too bad there’s only one memory left of that voice from beyond. But I said in the factual way I had come to the conclusion that’s really it. Two blocks from the house if I figure some way to get over the fence, but I am too old. I like to come in at night.” “He needs to go at night,” his wife Mary had said to me. “Sometimes he’s gone for a long time, I don’t know if he can get home.” He twists in grief and I see too clearly how they both keep vigil and suffer alone.

The grave: the departure point for one we cannot follow. We come and stand at the shore, look out, try to catch a glimpse through the fog, whisper or scream a message, out of our hope to speak. But we cannot find our voice then. We cannot find our voice then. We hear no voice from beyond. That is how we come up with that kind of sense says “how can you lose part of you? Can he be dead if he’s still live inside your soul?” But we are not so cerebral or spiritual that we do not long for warmth and touch to connect, and that connection is forever and Karl and Mary and Steve was forever.

I see, I feel, so helpless. My hands are warm, my touch is real, I can touch my friend, my son, so harmless. I am no substitute, but I am now, I am a comforter, I can comfort him.

KARL BRAUN

Mother’s Day

Mother’s Day is the weekend. It’s that day when we have a chance to buy a thank-you gift for the woman who gave us life — or, in some cases, just a chance to observe how we would have been if we had been raised by a different mother. It’s a day when we have a chance to show our appreciation. It’s a day when we have a chance to show our love. It’s a day when we have a chance to show our respect. It’s a day when we have a chance to show our gratitude. It’s a day when we have a chance to show our admiration. It’s a day when we have a chance to show our respect. It’s a day when we have a chance to show our gratitude. It’s a day when we have a chance to show our admiration.

Violence continues in S. Africa

JOHANNESBURG, South Africa (AP) — A 17-year-old girl of mixed race whose face was bruised and swollen died Thursday that five officers, behaving like "real animals," beat her for six reasons in a Cape Town police station.

The charges came the day after a judge barred policemen from assaulting prisoners in two other Cape Province cities. Port Elizabeth and Uitenhage, where other allegations of brutality have been made during more than a year of protest against white-minority rule.

Cape Town police said they fired on a crowd from which a gasoline bomb was thrown at a police station, killing a 15-year-old black youth. A policeman in the Ciskel tribal homeland shot and killed a black man who was, in a threatening mob, authorities there said.

Police headquarters reported a dozen riot incidents during the day, mainly rock-throwing and arson, and said 45 black men were arrested for "political violence" in Queenscown in eastern Cape.

Two health care workers contract AIDS

ATLANTA (AP) — For the first time since AIDS was discovered four years ago, federal health officials reported Thursday that health care workers — a nurse and a laboratory employee — have contracted the AIDS virus from working with patients and their blood.

Neither of the two health care workers has gone on to develop AIDS but we maintain a whole class of people think? We should keep and be proud of this town as is. If we chase them away where will they go? Paso Robles. San Luis Obispo want to dump their burden of our neighbors? I hope not. What would City Council sponsor a city wide noaea. We wouldn't want to deny people alcohol minded students, but it hurts the City of San Luis Obispo. We wouldn't want to deny people at whom to look down our price beer once a month In each

Congress, asking them to approve legislation which it believes is needed to cut down on transients loitering and spreading crime in the area. The legislation would provide penalties or as substantial fines or even prison terms for public officials who tamper with or threaten to retaliate against public employees for their public or political activities such as collection of the institutions for whom they work.

Public administrators may try to express public concern by their employees in order to protect their own jobs. This can benefit their own financial situations while causing financial harm, in the form of job actions, to the employee. An employee who also benefits financially while causing financial harm to his victims and I think that, morally, the two situations are similar and the penalties should be similar.

I urge the readers of this letter to write their public representatives at the state and national levels and to support the call for this type of legislation.

A job action against an employee can, over a few years, cause tens of thousands of dollars of loss, the loss can even exceed one hundred thousand dollars. Few thieves cause this much harm to their victims.

Freedom of speech is essential to a democratic government. If it is not safe in our public institutions, where can it be safe? When public institutions don't respect our civil rights and our democratic form of government, we are in serious danger of losing both. In addition, it is our public employees who know best what is occurring in these institutions and are able to inform the general public if their institutions are run in an incompetent or corrupt manner. Administrators who deprive employees of their civil rights betray the public trust and corrupt the integrity of the institutions which they are supposed to serve.

Blocking freedom of speech is a crime

Editor — I have recently written to our public representatives in the State Legislature and in the U.S.

LETTERS TO THE EDITOR

Alcohol ban: it just moves the problem

Editor — I am very much against the ban on alcohol use in San Luis Obispo's public parks. This ban only hurts the City of San Luis Obispo and its neighboring towns. Not only does it upset Cal Poly's numerous alcoholic minded students, but it restricts an important social phenomenon.

The alcohol ban is designed to cut down on transients littering and drinking in the parks. We need our transients. I see a huge shortage in this town as it is. If we chase them away where will they go? Paso Robles? Pismo Beach? So the people of San Luis Obispo want to dump their share of social debris on their neighbors. I hope not. What would people think?

We should keep and be proud of our transients! If we do, we not only lessen the burden of our neighbors but we maintain a whole class of people at whom to look down our noses. We wouldn't want to deny our children that. Let's let them see what life can be like.

Forget the ban. Let's have half price beer once a month in each park. The money we save in not arresting the transients can pay for the drinking. In addition, I would suggest the City Council sponsor a city wide "Take a man to lunch day." Remember, banning alcohol does not make transients vaporize, it makes them criminals.

Cogeneration plant to be included in new campus five-year plan

By Chuck Buckley

A cogeneration plant and new buildings on campus are planned for what Cal Poly Executive Dean E. Douglas Gerard termed "a five-year plan."

The cogeneration plant will be located on state land about halfway between the Cal Poly campus and the California Mission Colony. The 10,000-square-foot plant will replace the aging and less efficient steam plant in the Engineering South Building. According to Gerard, the $30 million price tag will be paid for by Calogen, a San Francisco-based firm in charge of constructing the plant.

The cogeneration plant burns natural gas in a turbine that turns a generator to produce electricity. The electricity will be sold to PG&E, and the profit will be split by Calogen and the state.

"The exhaust from the burned gas gets up to 1,100 degrees Fahrenheit and will be used to create steam power," Gerard noted. "Steam will be piped to the campus directly for use."

Gerard said the plant should save from $200,000 to $300,000 a year. Construction is scheduled to begin in August of next year.

The cogeneration plant will be decommissioned to make room for the welding and machine shops.

The California State University Board of Trustees approved some changes in the Cal Poly Master Campus Plan on Sept. 18. Among the changes is to grant the current welding and machine shop buildings temporary status. The buildings will eventually be removed because of structural problems.

Also, faculty office additions on the Science and Engineering East buildings are planned. And a new building will become a permanent facility, with additional parking space to be made near the facility.

Gerard added that temporary trailers will arrive within the next couple of weeks to facilitate the Foundation Administration until offices are built.

In September of 1984 the California State University Board of Trustees approved other changes of the campus master plan — one of which was to build foundation administration offices. Plans for multi-level parking structures, an auditorium, child care center, student activities facility, P.E. and Intramurals Recreation Building and an activities center have been approved. Other projects in the works are additions to the Mathematics and Home Economics and Business Administration buildings, and for administration and student services.

Recommendations for campus changes are initially proposed by the Campus Planning Committee, chaired by President Warren J. Baker. Any resolutions adopted are sent to the California State University Board of Trustees for approval.

"The five-year plan indicates this should all be done," said Gerard. "But realistically we're looking at ten years." The main thing holding up developments is the appropriation of funds, Gerard said.

Poly to challenge bite of Division I Bulldogs

Coach hopes to rally troops

By Tim Robison
Special to the Daily

Imagine a stadium filled to the brim with 30,000 mostly hostile fans. Then, imagine playing an undefeated Division I school, which has a 5-1 record against the last six PAC-10 teams they have faced.

Tomorrow, this image will be reality as the Mustangs venture into the unfriendly confines of Bulldog Stadium to face Fresno State in a 7 p.m. contest. The game will be as important as the stadium will be full, and for the Mustangs its more than just another game.

"The thing that separates this game from all the others is that Fresno State is a legitimate Division I team, and it will take a special effort on our part to beat them," said Jim Sanderson, Cal Poly head football coach. He admitted they probably will not be able to keep FSU's offense off the field as they did against North Dakota State.

Fresno State's junior quarterback, Jim Sweeney, has thrown over three and half thousand yards in his two years at Fresno State, but has had a sub-par year thus far. He did, however, show signs of brilliance against Oregon State, throwing touchdown passes of 73 and 93 yards.

The Mustangs will probably try to neutralize the Bulldog's powerful offense as they did in the North Dakota State game. During the North Dakota game, Cal Poly's offense was so dominant that they kept the nation's No. 1 leading rushing offense on the sidelines for nearly three quarters, giving up only one score in the first three periods.

"Fresno State will be a better team than North Dakota State. They'll have more offensive weapons than North Dakota State. And rightfully they should, they're a Division I school, and we'll have to play inspired football to stay in the game," said Sanderson. He admitted they probably will not be able to keep FSU's offense off the field as they did against North Dakota State.

The fact of the matter is the job of beating FSU is awesome, but not impossible. The Mustangs have put up some pretty impressive numbers themselves, averaging 26 points a game and over 340 yards in total offense per game.

The Mustang's also have bragging rights to the conference's number one rusher, Jim Gled. A senior running back from Laguna Niguel, Gled is averaging more than five yards a carry. Also, junior quarterback Jeff Byers has completed over fifty percent of his passes, averaging nearly 200 yards a game in passing yardage.

Defensively speaking, the Mustangs have lost the core of their defense to time (a.k.a. graduation). The stronghold of the defense that is now missing included Steve Gibson and Gary Swanson. The Mustangs are now lining up younger, less-experienced players at some critical spots and it may take them time to learn the defensive system.

Meanwhile, there have been some outstanding performances on the defensive unit, one of which was not have entirely unexpected. Rich Bosselman, a junior linebacker and a preseason All-American pick, is leading the team in tackles after finishing second in team tackles last year with 62 solo's.

Senior cornerback Keenan Stanley, who is also a All-American candidate, had four tackles, four pass deflections and an interception against Cal State Hayward. Yet, it will take a solid team effort in the hope to knock off FSU. This is especially true if the Bulldogs hold true-to-form of their long-standing reputation of being a bona fide powerhouse in Bulldog Stadium.

Women's volleyball serves up victories

By Lisa A. Honk

Taking each day game by game and practice to practice makes looking ahead hard for the Cal Poly women's volleyball team, but with a 6-1 overall record, this philosophy is working.

"We have to take one game, one practice and one point at a time, because each match is an opportunity and we don't look past any of them," said Mike Wilton, head coach of the Cal Poly women's volleyball team.

The Lady Mustangs ranked No. 6 in the United States Coach Top 20 Poll Tuesday, were overpowering in their first two matches of the season sweeping Utah State University 15-3, 15-3 and University of Lous. 15-3, 15-3, 15-4. One other Utah school proved to be an easy victory for Poly in Brigham Young University upset the Mustangs in five games.

"After the BYU match, we had to go back and take a look at the video of the games to create a new plan of attack for our first conference match of the season," Coach Wilton said.

At Wilton shefted his lineup, University of California, Irvine awaited the changes for the Pacific Coast Athletic Association opening match. The Anteaters waited too long to figure out the new Mustang attack, as the Poly spikers triumphed with a 15-8, 15-13, 15-2 victory.

Poly's new moves consisted of shifting Ellen Bugalski into the middle blocking position, enabling Kelly Strand to return to the outside setting position (where she was an all-PCAA choice in 1984). Bugalski inherited her new role with 16 kills in 24 attempts, while Strand responded with 12 kills in 27 attempts.

"Ellen is doing a superb job in the middle, considering the switch is like telling a second baseman to play catcher," said Wilton. "I think Kelly feels more comfortable at the outside spot and Ellen knows her new position is the best move for the team."

Wilton said one of the strengths of this 1985 squad in their ability to regain composure and come from behind at critical points during a game. This comeback ability proved more helpful to the Mustangs than their home court advantage during the non-conference Pepperdine match.

A crowd of 2,108 attended the home opener and watched the Lady Mustangs rally from a 10-14 deficit up to a 16-14 win in the first set. The Waves were calmed in the second set 15-7, but caught a second wind in the third set to jump ahead 13-5. Poly rallied deep and beat the back once again to a 16-14 victory.

Bugsalski, Strand, and Lynn Kestler, the senior outside hitter, all took over during the Pepperdine match. Bugalski finished with 17 kills in 21 attempts for an impressive .431 hitting mark, while Strand put down 21 sets in 46 attempts (.379) and Kestler made good on 11 of 23 (.480).

Wilton said, "We are becoming more aware of what we should be doing during certain games, but I don't want to fully rely on our comeback ability, even though it's exciting for our fans."

Last weekend Wilton's spikers traveled to Cal State Fullerton for a second (PCAA match, in which the Mustangs their (PCAA record in 25 by sweeping the Titans 15-4, 15-4, 16-4. Poly had an impressive .399 hitting percentage as a team, paced by Polic блокер Карл Тхомасар с 9 kills and 2 errors in 15 attempts (.600), and hitter Christine Larson with 7 kills and one error in 10 attempts (.600).

While still in the Los Angeles area, the Mustang team upset the No. 2 University of Southern California in a slow starting 10-15, 15-12, 15-4, 15-10. Poly got warmed up; the Mustangs ended with a hot hitting percentage of .373 as a team.

"Kelly Strand had one of her best performances against the Trojans, and Dede Rodarse has been setting better since ever," said Wilton. "The setter is the most important and most un-noticed position in volleyball, and Dede is like glue out there -- she keeps things together while the hitters take the glory."

The PCAA conference matches have arrived early this season due to the addition of new teams to the conference and theince of tournament play, said Wilton.

"We just have to be ready, and be ready to play on any day of the week," Wilton said. "We never know what team we face."

The Lady Mustangs are on a four-game road trip to take on two more PCAA conference teams, Long Beach State and the University of Nevada-Las Vegas. Last Beach State has a 4-4 record overall and a 0-2 PCAA record, but Wilton said that the Forty-Niners is a deeper team, who could easily sneak up on any unsuspecting team.

As for the University of Nevada-Las Vegas, Wilton said, "We have to play Long Beach State...
Cross country women sweep in Fresno meet

By Karen Kramer

Cal Poly women's cross country — it is a name becoming redundant only to those "other" collegiate teams who are continuously being blown by them. The men's team has won two national titles in the last three years, and regardless of which runner graduates, another one steps in to take her place.

At the Fresno State Invitational last Saturday, Poly placed five runners in the top 12 positions to easily beat teams from Berkeley, Hayward and Davis.

Katy Manning, a junior All-American, cleaned up the 5,000-meter race in 17:57.

"Katy comes into the season physically and mentally stronger than ever," said Lance Harter, women's coach. "She took command with a quarter mile to go and pulled away relatively effortlessly."

Manning attributes her strong opener to the mileage she put in this summer. Despite her individual win, Manning also realizes the talent of her closest competitors, the other Poly runners.

"In a few weeks the team will be running at fast and did," said Manning. "Everyone will be up around my shoulders."

Three returning All-Americans and a freshman were supported, Manning, filling the remaining five scoring positions. Junior Lori Lopez finished with a time of 17:57 to place third behind Berkeley finisher Sally Wood. Besides her cross country accomplishments, last year Lopez posted an impressive second place finish in the 3,000 meters at the Division II Track and Field Championships in Los Angeles.

Senior Jennifer Dunn finished sixth overall, third for Poly. According to Harter, "when in fine tune, Dunn can run with anyone, anywhere."

Sherry Minkler, a freshman from Santa Rosa, finished her first collegiate race with in tenth place (18:16). Jill Ellington, although an 800-meter track standout, lacks no experience on the cross country course. Ellington, a cross country All-American in 1984, finished 12th at Fresno.

Sports office gets going

By Laurie Magin

The place to go to exercise your body as well as your mind is located at the University, Union staff's office with a wide range of activities for students to participate. Faculty and staff various recreational programs and coordinates the use of the athletic facilities to allow people to develop their own self-paced fitness schedules.

- The intramural sports program provides a competitive and social atmosphere in which students can participate. Teams are formed by students with common interests, such as club and distance.

- Managers' meetings will be held.

"Just because you don't know anybody doesn't mean you can't play tennis. Just come to the meetings," said Kevin Turley, Intramural Team Sports Coordinator.

The leisure class program provides high-quality instruction at reasonable prices for all students, faculty and staff who want to workout physically and mentally. The classes range from aerobics, yoga and karate to the language. Anybody interested should contact the Rec Sports Office for the class listings.

Times for triathlon training have been changed to Tuesday and Thursday from 1 to 2 p.m. at Crandall Pool. Coached swim workouts has been changed to from 12 p.m. to 1:30 p.m., Tuesday and Thursday at Crandall Pool.

Faculty and staff are encouraged to participate in Rec Sports, as a new faculty/staff league has been formed for team sports.

For more information call the Rec Sports Office.

Men's soccer scores big win

The Cal Poly men's soccer team responded with two second half goals to pull off a 2-0 victory over the University of California at Irvine Wednesday night.

On their home turf, the Mustangs kicked dominated in the first half but couldn't capitalize on key chances given up by the Gauchos. The score was 0-0 at halftime, but Poly gained some added inspiration during the break as they came out strong in second half.

"Keknis Jeff Resendes and Dan Campbell each scored a goal Wednesday night, as team member Paul Hansen played a sound game as halftime to celebrate his birthday, Poly's defense fired up and held on to shut out the Anteaters."

The Mustangs will play the Cardinals of Stanford University at Mustang Stadium Saturday at 7:30 p.m.

A Poly soccer team member sets up for a kick during Wednesday night's match at Mustang Stadium.
Deliberations continue in baseball cocaine trial

PITTSBURGH (AP) — Jury deliberations moved into a second day in the federal court trial of a Pennsylvania accountant charged with selling cocaine to two major league baseball players.

The U.S. District Court panel of 10 women and two men failed to decide the fate of Robert "Rav" McCue after 16 hours of deliberation Wednesday and reconvened today.

McCue, 38, of suburban Upper St. Clair, a former controller for the Easter Seal Society of Allegheny County and a part-time tavern disc jockey, is charged with 13 counts of selling cocaine to former Pittsburgh Pirate infielder Dale Berra and outfielder John Milner.

U.S. District Judge Maurice Cohill ordered the jury to begin its caucus Wednesday morning. The jury returned to Cohill's courtroom once to question the judge and twice sent him written questions.

At one point, the panel asked Cohill to repeat his instructions regarding the credibility of witnesses granted federal immunity from prosecution. The key witnesses against McCue during the seven-day trial were Berra, now of the New York Yankees and the son of Hall of Famer Yogi Berra, and Milner, who retired after 12 major league seasons.

Both players testified under federal grants of immunity that they used cocaine while with the Pirates. Berra said he purchased cocaine from McCue on four occasions in 1984 and Milner said he bought the drug nine times from June 1983 to January 1985.

Cohill told the jury that such witnesses could be considered "competent," but their testimonies must be examined with greater care. He said the jury must decide if the witnesses' testimony is "colored to further the witnesses' own interests."

Last Friday, another federal jury convicted Curtis Strong, 39, of Philadelphia, former clubhouse caterer for the Philadelphia Phillies, on 11 of 14 counts of distributing cocaine to baseball players. Strong faces 15 years in prison and a $25,000 fine on each count when he is sentenced Oct. 21.

Composite attracts responses in killer identification

LOS ANGELES (AP) — Police received more than 100 calls after releasing a composite drawing of a killer who has tortured and strangled 10 prostitutes in the past 21 months, an official said Wednesday.

"We reviewed them, and about 45 are pieces of information — names of individuals or a license plate number," police Lt. Ed Henderson said. "This is the long part, checking the information."

A few of the calls were from prostitutes, Henderson said.

The slayings have occurred in south-central Los Angeles and suburban Inglewood and Gardena. The body of the first victim, Patricia Coleman, was found Jan. 1, 1984. The 10th victim was found Aug. 15.

Gardena police Detective Jerry Hudgson said Tuesday that similar slash wounds on the victim's bodies led police to believe the killings were committed by one man.

A sharp instrument was used to slash the victims before they were strangled, he said.

"It was like torture," Hudgson said of wounds suffered by Gayle Marie Rosell, found Nov. 6 in Gardena. "It was just cutting. It could have been done with a screwdriver or a beer opener... It doesn't look like a knife."

The bodies of seven women were found in south-central Los Angeles. Two were found in Inglewood and one in Gardena. All but two were black and all had arrest records for prostitution, police said.

Three other victims survived after they were kidnapped and assaulted, said Det. John St. John.

A 26-year-old prostitute who was attacked several months ago remains in a coma, St. John said.

One woman who escaped after being picked up Aug. 4 identified a car, a dark 1984 or 1983 Buick Regal with a baby seat, and helped with the drawing.

The sketch shows a black man with a thin mustache and wearing a baseball-style cap. The witness told police the cap had a patch on it bearing the name "FILA," a clothing manufacturer, Henderson said.
Aerial units distribute grass seed

Forestry department helps reduce erosion from Las Pilitas fire

By Chuck Buckley

Re seeding of portions San Luis Obispo County burned during the Las Pilitas fire began Saturday.

About 40,000 acres of the sprawling 75,000-acre burn are being seeded from the air at a cost of $120,000-150,000.

More than 250,000 pounds of rye and blando brome grass seed are being used for the project, which is sponsored by the California Department of Forestry, Larry Flagg, fire captain at the CDF station on Highway 1 near Cal Poly, said the grasses were supposed to stabilize the soil and reduce erosion in the heavily burned areas.

Flagg said the success of the project hinges on the rainfall this year. "If we get the gentle rains early this year, the grass will root and hold the soil," he said. "But if we get hard rains early, it's (the soil) just gonna come down."

Santa Margarita Lake, Lopez Canyon and the San Luis Obispo front country watershed areas are the primary targets for the seeding project.

Flagg said seeding around these areas will cut down on the silt into the lakes if the grasses root and hold.

The project is financed by CDF, the U.S. Forest Service, Soil Conservation Service, Upper Salinas and San Luis Coastal Resource Conservation District, U.S. Bureau of Land Management and San Luis Obispo County.

The Hemet Valley Flying Service is doing the aerial broadcasting of the seed over a two-week span. The flying service estimates it will take 90 flying hours to complete the project.

SUMAT to promote involvement

By Katie Britton

An organization designed to promote school spirit, involvement in Cal Poly athletics and intercollegiate relations will begin this year, a senior business student and founder of the group said.

SUMAT, Student Union for Men's Athletics Teams, is a student organization intended to get more students involved in activities such as sports events, Poly Royal and Homecoming, said Mike Hogan, president of the organization. Hogan started the organization with the help of Jim Stroup, vice president for University Relations, and Jim Simpson, assistant professor of physical education.

"SUMAT will consist of a series of events aimed at building the community spirit of the Cal Poly community as well as the spirit of the school," said Hogan. "It will involve all departments, fraternity, sorority and clubs on campus, he added.

SUMAT will be run by a board consisting of representatives from each of the organizations involved, said Hogan. Through an introduction during Week of Welcome, SUMAT has already attracted approximately 200 members, he said, and more students are joining every day. Eventually Hogan expects the organization to have about 3,000 members by the end of this school year, and between 5,000 and 10,000 within the next five years.

Different kinds of membership packages are offered through SUMAT, said Hogan, ranging from $13 to $23 dollars a year. This includes many benefits such as shirts, hats and reserved seats at athletic events.

One of the main objectives of SUMAT this year will be to get more students involved in Homecoming, said Hogan. Events such as a bonfire, a parade and skits have been planned to promote student activity. Everyone is encouraged to participate in these activities, he said.

SUMAT has already participated in functions such as the sponsoring of Sorority Greek Week Trackathon and the 12th man competition, in which members of a fraternity or club on campus, were to participate on the kick-off team at every Cal Poly home game, said Hogan.

Meetings for the new organization will be held monthly. More information can be obtained at the University Alumni House.
Buried quake victims found alive

MEXICO CITY (AP) — Three babies were found alive in the rubble of a hospital, renewed hopes more survivors of Mexico's killer earthquake could be found, but officials said time was quickly running out.

Late Wednesday, Mayor Ramon Aguirre's office said officials had confirmed more than 4,000 people died in a great earthquake last Thursday that measured 6.1 on the Richter scale, and a second quake the following day that registered 7.8.

Officials originally said the quakes measured 7.8 and 7.3, but changed the figures based on readings from several different sources.

Aguirre's office has said 417 buildings damaged in the back-to-back quakes will have to be razed. On Wednesday, President Miguel de la Madrid met with city officials to begin a review of construction codes, land use and building density.

Aguirre estimated 1,300 people were still entombed under toppled hotels, office buildings and residences, and hopes some may still be living when three infant girls were found alive in the ruins of the 12-story Juarez Hospital.

The three babies, whom doctors said had been born on the eve of the Thursday quake, were found by rescue teams within a space of about 214 hours late Wednesday and were reported in good condition early today.

Once removed from the debris, the newborns were wrapped in blankets, placed in incubators and taken by ambulance to another hospital.

Rescue work continued across the ravaged city, but officials expressed concern that many people entombed under crumbling buildings had been buried too long to have survived.

Communications and transportation slowly were returning to normal but at least 2 million people remained without water for the seventh day.

Melodrama shines with Gilbert and Sullivan spoof

By Susan Edmondson

There's an odd combination of shows currently playing at the Great American Melodrama. Rather than the usual damsel in distress, these shows feature a servant who is also a hypnotist, a cannibal and a talking monkey (among other unusual characters).

The Melodrama opens with "Caught with His Trance Down," an amusing farce written by Frenchman George Feydeau. Timothy Greer is excellent as Justin, the conniving servant who hypnotizes his master, Monsieur Boriquet, and makes him do all the housework while under the trance.

"He gets his blisters and I smoke his cigars — that's a fair trade," Justin explains to his friend.

The arrangement works quite well for a while. Actor Dink O'Neal creates an amusing Boriquet, a pompous doll who somehow manages to win the sympathy of the audience.

O'Neal is gifted with a fantastic rubber face that conveys each time Boriquet is put under Justin's trance. He leaps about the stage as Justin convinces him he is a dog, and later, a monkey. Boriquet performs like a marionette as he sweeps the floor and brings in the firewood for his servant. This convenient arrangement (convenient, that is, for Justin) is disrupted when Justin learns that Boriquet is engaged. A woman in the household? How will Justin be able to continue hypnotizing his master? Will he be forced to perform his servant duties?

Justin begins to weave his magic spell on nearly everyone who enters the household.

Although her part is rather small, Anna Christine is
MELODRAMA

From page 1

As the audience for the Melodrama grew, so did the need for more people to make the shows come alive on stage. Twenty-one people were hired for the first season of the theater, and that number has expanded to 70 people over the years. Now 70 people are involved in the production of the shows.

In July 1983 a second Great American Melodrama was opened in Bakersfield and Schlenker expressed a desire to keep both theaters fully professional. "We pick up some of the finest young performers in the country."

Chances are, though, no matter what the show is, "the truth will prevail," as the words painted over the stage proclaim.

Fare at the Melodrama ranges from the purest of Victorian sob stories, to thrillers, westerns and an annual Christmas production. "The host for the evening converses casually with the crowd and instructs them in the makings of a hearty "boo" or lusty sigh. Some amusing announcements such as, "Gentlemen, for you, a new toilet seat." are some amusing announcements such as." - John Schlenker

"There were some real growing pains. We found out what it was like to build a business." — John Schlenker

A trip to the Melodrama is a trip back in time. The show usually begins as the piano player clanks out tunes from the Gay Nineties and constructs them in the makings of a hearty "boo" or lusty sigh. Some amusing announcements such as, "Gentlemen, for you, a new toilet seat." are some amusing announcements such as, "Gentlemen, for you, a new toilet seat." are some amusing announcements such as, "Gentlemen, for you, a new toilet seat."

All of this chatter and singing put the audience in the mood for the show.

Sure at the Melodrama ranges from the purest of Victorian sob stories, to thrillers, westerns and an annual Christmas production.

The host for the evening converses casually with the crowd and instructs them in the makings of a hearty "boo" or lusty sigh. Sometimes a musical number of "Happy Birthday" is sung and there usually are some amusing announcements such as, "Gentlemen, for you, a new toilet seat." All of this chatter and singing puts the audience in the mood for the show.

Susan Soddy portrays Jane in the Melodrama's "The Monkey's Uncle."

\[ \text{REVIEW} \]

From page 1

\text{charming as Antoinette, Boriquet's fiance. Antoinette is a sort of Gracie Allen — naive, tender-hearted and sweet. Hypnosis is always intriguing and somewhat mystifying. Although many of the performers put their all into the production of "Trance," some great opportunities for physical humor are sometimes missed. The premise of the play is amusing and it seemed the playwright could have taken more advantage of the awkward situations hypnotism can create.}

It is in the second show at the Melodrama where the actors take a backseat to the playwright's genius. "The Monkey's Uncle" is a hilarious star. Festival Cinemas.

K. Kristian Truelsen (from the Melodrama) wrote this play that gently pokes fun at some of Gilbert and Sullivan's distinctive characteristics.

The setting is a jungle, home to Doctor Dolivingstone (Robert Johnson). Dolivingstone has a small problem — he's a cannibal.

Dolivingstone discusses his eating habits with his companion, a talking monkey (Anna Christine provides the monkey's voice). Energetic Captain Spaulding, who is actually Groucho Marx. Timothy Greer is great as the wise-cracking, cigar-smoking comedian. With Spaulding is Jane, his ward, played by Susie Sodddy.

And where there is a Jane there must be a Tarzan. Dink O'Neal plays the jungle man who looks like a Ken doll in leopard skin.

The plot is not the important thing in "Monkey's Uncle," the words are. Truelsen has created a delightful collection of puns and alliteration to spoof some classic Gilbert and Sullivan lines. Example: as Dolivingstone delivers a rapid-fire song, somewhere he pauses for the triumphant line, "A pair of ducks, a pair of ducks, a most amusing pair of ducks."

Truelsen also parodies Gilbert and Sullivan's fondness for multi-syllabic words. The show has more tra-la-las and fa-la-las than a day with Payanna.

Following the shows is the vaudeville, a salute to American music. This vaudeville seems to lack the energy and enthusiasm of past shows. The jokes are as corny as ever but there isn't a standout number to keep patrons humming as they walk out the door.

"Caught With His Trance Down" and "The Monkey's Uncle" continues through Oct. 13.

Actor Jan-Michael Vincent is released on $13,500 bail

MALIBU (AP) — Actor Jan-Michael Vincent, who stars in CBS-TV's "Airwolf," was released on $13,500 bail after being booked for investigation of battering a woman.

The 41-year-old actor was released on bail after surrendering to authorities Wednesday, one day after a felony warrant was issued for his arrest, said Los Angeles County sheriff's Lt. Jack Innes.

Everything you always wanted in a beer. And less.
LOS ANGELES (AP) — A writer who refused to surrender a taped interview with a woman charged with murdering John Belushi was held in contempt, sentenced to 10 days in jail and fined $1,000 Thursday.

Municipal Court Judge James Nelson said free-lance writer Christopher Van Ness is not exempted from testifying under the California newsmen's shield law because he wasn't working for any news organization when he obtained an alleged confession from defendant Cathy Evelyn Smith.

"I should announce my strong feeling that Mr. Van Ness is in no way a newsmen," Nelson said, "and no number of attempts to make him such is satisfactory."

He asked Van Ness again if he would voluntarily turn over the tape, on which Smith reportedly discusses Belushi's cocaine-heroin overdose death, and Van Ness refused. Nelson also asked the writer if he would respond to a series of questions during a preliminary hearing about his interview with Smith in 1982.

"With all respect to the court, I do refuse," Van Ness said.

The judge then held him in contempt twice — for refusing the tape and refusing to answer — and imposed sentences to run consecutively of five days and $500 on each count.

Smith, a backup singer and companion to such recording artists as Gordon Lightfoot and Hoyt Axton, is accused of murdering Belushi with an overdose of "speedballs" — injections of cocaine and heroin.
If Fletcher Christian and Captain Bligh had known what being stuck in the same boat would mean, chances are neither would have set foot aboard.

And if you're stuck in the same boat with a long distance company that doesn't give you all the services you need, it's easy to harbor mutinous thoughts.

But when you pick AT&T as your long distance company, you know you're in for smooth sailing. You'll get trouble-free, reliable service. Immediate connections—even during the busiest hours. Guaranteed 60% and 40% discounts off our Day Rate on state-to-state calls. And operators to assist you with immediate credit for wrong numbers and collect calling.

So when you're asked to choose a long distance company, sign aboard with AT&T. With AT&T Long Distance Service, you'll never be left stranded. Reach out and touch someone.

AT&T
The right choice.
A student organization on campus has been formed to assist new students in learning about the university and how it functions.

Incoming students will now receive student counseling through Poly Reps, the Cal Poly Student Alumni Council.

"Students are the best recruiters," says Cindy Benneth-Thompson, co-advisor and a member of the relations with schools staff. "Their enthusiasm establishes a level of credibility and reality that we as staff members cannot."

Sponsored by Relations with Schools, University Relations and Alumni Services, and Student Affairs, the goal of the new group is to promote the university to prospective students, students and their parents to tell them what Cal Poly has to offer.

The student members will benefit from the experience and feasibility that comes from serving as a Poly Rep. "The PR initiatives of 'Poly Reps' are not coincidental," says Dr. Roger Swanson, Cal Poly's director of college recruiting and Enrollment Support Services.

The members will receive unparalleled experience in public relations. The skills and confidence developed from representing the university will give them a decided edge in job interviews and career advancement, no matter what their majors," he continues.

Swanson, who has made national presentations on the value of students in recruitment, says student members will have the opportunity to work side-by-side with professionals at Cal Poly as well as broader contacts among students.

"We believe Poly Reps will be the 'rapport' experience for participants in the many leaders of student organizations," says Bennett-Thompson.

Membership in the organization will reflect a cross-section of student majors, ethnicity, male-female mix and a geographical distribution from California. "We will try to judge the level of feasibility of a student housing project, for instance," he adds.

"Prospective students are not incidental," says Bennett-Thompson. "They often want to know what the students are like and how they might fit in. Poly Reps will provide face-to-face answers to those questions."

A group of 25 men and women are to be selected this quarter based on their ability to make a positive first impression, effective speaking and knowledge of the university. They will give tours of the campus, make presentations on high school and college campuses and assist in other on-campus recruitment and alumni activities.

The only way it will work is if there's a working board made up of professionals, who will listen to serve as advisors," said Walt Lambert, coordination of Greek affairs. "But it's open to any group at Cal Poly."

The Greeks have worked hard on this for a number of years to have the door slammed in their face," said Lambert. He explained that it would be be other organizations interested in the student community, he believes it will probably be the Greeks who will push for it and others may jump in when the time is right.

"The only way it will work is if it's open to any group at Cal Poly," said Athanasakos.

Mendez and Athanasakos have met with an anxiety to establish legalities that need to be addressed. The land to be appraised and financial capabilities need to be researched, said Athanasakos.

"The plan is to form an executive board of directors, a group of professionals, who will sit down to serve as advisors," said Lambert. "We will try to judge the level of commitment of prospective Poly Reps," says Bennett-Thompson.

Chancellor W. Anne Reynolds said she could not see herself supporting organizations which discriminate based upon creed and gender. Therefore, one of the conditions is that an entity purporting the student, housing community be open to any interested students.

"We will have to develop a very strong case for the Greek system to unite in an effort to form a community of houses," said Lambert. He explained that it would be other organizations interested in the student community, he believes it will probably be the Greeks who will push for it and others may jump in when the time is right.

Poly teacher tells of life in Beirut

By Lynette Wong

It isn't every day that an industry expert has an opportunity to teach in a war zone. Cal Poly Ornamental Horticulture professor Robert Rice has taught in Beirut, Lebanon for the past two years.

Rice, along with his wife, Lee Diaz, Cal Poly supervising cashier, who's office handles parking payments for the campus, and their three children, moved to Beirut in 1984.

The Near East Foundation is a non-profit organization headquartered in New York that supplies expertise to developing countries.

"At the time, it was the American University of Beirut's initiative to try and strengthen the American education style," he said. "We were trying to get Americans to come over and teach. Three actually came, me, my wife and the Dean of Agriculture who was later president of the university, and we were promised to go because he wanted a better understanding of what was occurring in Lebanon."

Rice said he first became interested in teaching overseas six years ago.

"I've always been interested in working with developing countries. His travels include New Guinea, Malawi and Jordan. Rice said he was warmly received by the people. "People welcomed us and were hospitable and grateful for you to come. Your arrival was a sight of hope because this meant more options in classes, and with the university staying open, there was hope that things were getting better." Rice stated that there is an even ratio of men to women but that the university is largely comprised of wealthy Lebanese.

"Ninety-five percent of the students here are Lebanese but there were foreign students from Bangladesh and Jordan who are studying there because of scholarships. They are "evenly represented from different religious and political groups."

Because English was the primary language spoken, Rice said students were required to pass an English exam before being admitted.

Rice said although students studied under difficult conditions, everyone tried to do the best they could. He said there were times when a bomb would go off but class would still continue if the fighting was not too harsh. "If you (the teacher) became upset by a shell, the students became more upset."

However, he said, "Sometimes we would get a phone call from the president or dean informing us that school was closed that day. But there were also times when we knew when not to teach because much of the night was spent in the bomb shelter."

One time, school was closed for a month starting Feb. 6, 1983 because the campus was shelled. The American Navy evacuated the American citizens in Beirut by helicopter to ships offshore. Rice said the militia would declare a strike in which case school was closed once again.

"I was angry that these people could tell me to stop teaching. They didn't understand that we were trying to help the Lebanese." Rice said the American citizens in Beirut were "evenly represented from the fighting atmosphere, she was unable to do her thesis, but did her research instead."

"I felt frustrated and lost a little bit of motivation. There aren't many becaurs of land for research. It is also hard to get the equipment and travel from area to area. You can't go whenever you want." She said.

"Even if you are able to get the equipment, you can't go to the area because of the fighting."

Despite the hardships he endured, Rice said he was able to re-introduce and strengthen the Cal Poly philosophy of learning by doing. "They were able to raise crops and build greenhouses. The agriculture students had to grow under a soccer field because the college farm is in Bekka Valley and is occupied by Syria. The students had never grown and sold their crops. Most of them liked it."

Rice said Lebanese teachers prefer to focus on theory and lab research rather than hands-on work.

Another difference Rice noted between Cal Poly and Lebanese students is that Lebanese students are accustomed to the French educational philosophy of note memorization. "They're used to memorizing so it's difficult to get them to solve problems in terms of application."

Unfortunately, Rice's teaching was cut short when he was forced to leave Beirut in June of 1985 because of a warring faction of students that the teachers were to be kidnapped.

"We left at a moment's notice. It was very emotional. We were forced out by people who were not really aware of what we were doing. "We were only there to help Lebanon."

"When we left, it was a blow to a lot of people. They saw it as sort of an end because of the curtailment in classes being taught. It was a sign to the students that things were getting bad."

However, Rice said this was a very rewarding experience and that he would do it again if given the opportunity.

Free bus access program already a hit with students

By Debbie Boxx

A new program that allows university students and employees to ride the SLO Transit buses for free is already a success in the mind of the city transit manager.

Nancy Knofler said ridership will determine the overall success of the program which started Sept. 15 and continues through June 14, 1986. "We are keeping a careful count of Cal Poly ridership and comparing it to last year's figures," she said.

Already the 7:30-8 a.m. buses are overloaded. Knofler encourages travel at other times. "The city's goal was to make the service convenient for as many as possible," said Knofler. "All drivers have one job and that is to get people home and on the bus."

Knofler added that the city's $48,700 for university students and employees to ride the city buses with unlimited use on all four routes running Monday through Friday 7 a.m. to 7 p.m. and 9 a.m. to 6 p.m. on weekends.

A special 6:43 a.m. service runs Friday 7 a.m. to 7 p.m. and 9 a.m. to 6 p.m. on weekends. A special service runs from the campus to Tropicana Village, Stenner Glen, Valencia and Mustang Village.

The university will continue a partial subsidy program for riders of the North Coastal Transit buses from Atascadero, Los Osos and Morro Bay. Cal Poly will pay 40 percent of the costs of unlimited use monthly passes.

Mostly passes for the Atascadero-Santa Margarita bus to Cal Poly, normally priced at $45, will be $27 for students and university employees. Monthly passes on the Los Osos-Morro Bay campus route buses, normal $30, will be $18.

All bus programs were paid for by fines and parking ticket payments collected on-campus parking violations. Since the campus parking permits have increased from $15 per quarter in 1984-85 to $22 this year, the bus program is more attractive to students, said Knofler. Cal Poly supervising cashier, who's office handles campus parking payments, said there are 3,440 student parking permits sold for the general student parking spaces.

Rice said Lebanese teachers prefer to focus on theory and lab research rather than hands-on work.

Another difference Rice noted between Cal Poly and Lebanese students is that Lebanese students are accustomed to the French educational philosophy of note memorization. "They're used to memorizing so it's difficult to get them to solve problems in terms of application."

Unfortunately, Rice's teaching was cut short when he was forced to leave Beirut in June of 1985 because of a warring faction of students that the teachers were to be kidnapped.

"We left at a moment's notice. It was very emotional. We were forced out by people who were not really aware of what we were doing. "We were only there to help Lebanon."

"When we left, it was a blow to a lot of people. They saw it as sort of an end because of the curtailment in classes being taught. It was a sign to the students that things were getting bad."

However, Rice said this was a very rewarding experience and that he would do it again if given the opportunity.
At a crowded bill-signing ceremony in his office, Deukmejian described the legislation as a "historical plan to free thousands of California welfare recipients from the vicious cycle of welfare dependency."

Workfare, also known as the "GAIN" plan ("Greater Avenues for Independence"), requires AFDC recipients to agree to look for jobs in return for benefits. It includes job counseling, placement services, vocationaltraining and educational programs.

**For information concerning the ELM requirement or exemptions from the test, students should see DeMeine or Murphy in the Mathematics and Home Economics Building.**
