Candidate Hubbard details four-point plan

By Susan Harris

"That's subjective planning and it's illegal to do. That's personal taste," she said.

To combat these "injustices," she said she designed her four-point plan.

"First, the rules must be defined. Second, one must play within the rules. All citizens need to be represented and the government must be responsive."

The third rule, Hubbard said, is to play efficiently. "We have limited space and resources."

"I moved here because of the environment," she said. "I'm afraid of urban sprawl. Eventually, we'll all blend together like L.A.

Fourth is to play fair. "Is subjective planning playing fair?" Hubbard asked.

Besides her four-point game plan, she said she has another idea for creating jobs in the community.

"I'd like to see a research-centered, clean industry come and utilize the students of Cal Poly and Cuesta," she said.

She likened the project to the research row she said was in L.A. that uses many UCSD students.

"The schools are here and students supply an energy that is vital. We should tap it," she said.

Hubbard said she decided to run for council to help achieve an order and balance at City Hall.

MISSING STUDENTS SAFE IN COALINGA

By Laura Rosenblum

Two Cuesta College roommates who were reported missing Friday were found safe and in good condition Saturday night at a Burger King in Coal inga, according to San Luis Obispo police.

Heather Eubanks and Shannon Taylor, both 18-year-old freshmen at Cuesta College, were reported missing by the father of one of the women Friday. They failed to call him from San Jose, where the two women were to attend a funeral Saturday.

Before they were located Saturday, Eubanks and Taylor were last seen at 4 p.m. Thursday in the Cal Poly University Union Plaza. They apparently left for the Bay Area that same evening in a green Volkswagen Jetta with personalized license plates.

Flyers with the missing students' pictures and personal descriptions were posted around downtown San Luis Obispo and Cuesta and Cal Poly campuses by their roommate, Barbara Lepine.

Due to "a miscommunication" the two women had made a change of plans and did not tell anyone, said a spokesperson from the San Luis Obispo Police Department. They called their roommates at about 8 p.m. Saturday night to tell them they were in Coal inga.

The roommates informed parents and San Luis Obispo police that the two women were safe.

Eubanks and Taylor live in Steiner Glen on Foothill Blvd. and both are originally from Foster City.

INTEGRATION IS NEXT FOR HOUSING COMPLEX

By Andrea Bernard

"After four years of work on an idea, I think we can make a real, consolidated effort," Hubbard said.

The humpback whale that was lost in the Sacramento River heads back to the ocean. Page 3.

For the first time a solution should have been reached.

Hubbard said he hopes to bring in new ideas and plans into a council that calls itself "like-thinkers."

"If you have five team members and they are all playing the same position -- the team won't do well," Hubbard said.

Hubbard said she decided to run for council to help achieve an order and balance at City Hall.

Editorial:

A matter of perception

In late November the world's two most powerful nations will sit down at the discussion table in Geneva. The two men who will be facing each other across the table will have a tremendous task at hand, but will they truly understand the sensitivity of this task?

President Ronald Reagan and Soviet Premier Mikhail Gorbachev are at the threshold of a new era in East-West relations in which the future of the planet may be decided. Nuclear weapons have become such a major military concern for both nations that there now exists enough explosive power to demolish the world, and possibly much more.

The fundamental question that needs to be addressed is that of perception. What do we really think the Soviet Union and visa versa? Hardliners on both sides talk up a rhetorical storm pushing their views, claiming to be the holders of the truth. But what is the truth when it concerns U.S.-Soviet relations?

The twentieth century has seen continuous shifting in the balance of power throughout the world. Often the action and intentions of countries go misunderstood or misinterpreted and result in reactionary policy based upon these faulty visions.

We each see the other as a threat to the world view that our ideologies profess. What needs to be done is to begin talks about these world views so that we can better understand and work toward peace and nuclear disarmament.

The talks in Geneva will be filled with the usual rhetoric about the need to free the world from the danger of nuclear holocaust. The professional politicians need to begin to look beyond the surface underlining ideological differences that exist. We cannot go into a meeting planning to solve the symptoms of a disease and not the real cause.

We also can't go into the meetings with a closed mind; the world is complex and it has been argued that any American growing up in the Soviet Union would have the same feelings as the Soviet citizenry and visa versa.

The main difference is one of perception. We must both begin to search for that way we can begin to understand and work toward the future of the world. We must all watch closely and become educated about the whole situation to become effective observers of the world process.

Warrant issued for PLO official

ROME (AP) - An Italian news agency said Sunday that a
Sudanese prosecutor investigating the hijacking of the cruise ship
Achille Lauro apparently was issued a warrant for the arrest of
Mohammed Abbas, the leader of a faction of the Palestine
Liberation Organization, who seized the ship Oct. 7 with more
than 500 people aboard.

Reuters reviewed a tape of Abbas talking to the four hijackers
who were arrested last week in Sicily by American warplanes.

Sicilian prosecutor investigating the hijacking of the cruise ship
Mohammed Abbas apparently was issued after prosecutors in
the United States and Italy released him, an action that
prompted sharp criticism of the Italian Parliament from the
American government.

Abbas, the leader of a faction of the Palestine Liberation
Organization, was with the hijackers in a lemon that was
briefly reviewed in Sicily by American warplanes.

With the TI-55-II.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions - more functions than a simple slide-rule calculator has. Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately with the TI-55-II, because it's preprogrammed to perform complex calculations - like definite integrals, linear regression and hyperbolic - at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula.

Included in the Calculator Decision-Making Sourcebook.
It makes the process of using the TI-55-II even simpler, and shows you how to use all the power of the calculator.

Poly spikers have tough week on volleyball courts

By Lisa A. Hoak

A brief moment at the top is better than none at all.

For the Cal Poly women's volleyball team, the week was too fast and brought with it a new experience for the Lady Mustangs - called losing.

In the beginning of last week, Cal Poly became the number one ranked women's volleyball team in the nation, with a school-record 16-match winning streak and a perfect 7-0 in league play.

Thursday in Stockton everything changed, as the Mustangs saw their streak end and their perfect record devoured by the hungry Tigers of University of the Pacific.

The eye of the Tiger haunted Poly throughout five sets in a 18-16, 14-16, 16-14, 10-15, 15-9 victory for the striped felines, as a Mustang win over UOP two weeks ago in the semifinals of the NIVT was soon forgotten.

Pacific, ranked fourth in the Tachikara Coaches' poll and second in the National Collegiate Athletic Association poll, now owns a perfect 6-0 record in league and a 21-3 overall mark.

Saturday, the clocks were turned back and the Lady Mustangs gained an hour but lost a volleyball match. The University of Southern California Trojans arrived on their white horses to gallop past the Mustangs 15-8, 15-5, 15-10. This marked the first three-set defeat this season for Cal Poly, as its other two losses against Brigham Young University and UOP went the full five.

In the UOP match, Poly fought to stay alive, but in the fifth game the Mustangs had an 8-7 lead and watched as Pacific's all-American Julie Magisot served eight in a row to pace the Trojans to a 15-8 victory in front of 2,700 home town fans.

"We were out of it, and UOP proved to be the better team," said Mike Wilton, head coach of the Lady Mustangs. "We fought back at certain times, but not hard enough."

Poly spiker Carol Tschauer fired 19 kills in 48 attempts, while immunities Kelly Strand and Ellen Beukaske combined for 32 more. Strand also hit the floor with 18 defensive digs and Dede Bodnar set up 56 assists for a .293 assist percentage.

Hitting percentages for both teams were nothing to grow over, as Poly posted a .165 hitting mark and UOP a .170. The Tigers were also awarded 11 service ace to Poly's four.

Against the Trojans, the Mustangs looked a little flustered, either over the October heat wave or the fact that the UOP loss would not go away. A number nine-ranked Trojan team proved to be the better team, and for the Lady Mustangs, they are nothing to be afraid of.

SPIKERS

From page 4
came into the match with a 14-7 overall record and left San Luis Obispo with a quick win, but most of all a big psychological boost.

In the first set against USC, the 2,168 anxious fans saw their Lady Mustangs fall behind, never to catch up until the ninth point of the third and final game. By the third game, the crowd was hungry and began a "Beat SC" chant, and Poly began its comeback from a 2-9 deficit to a 10-9 lead. This lead would only hold for seconds, as the Trojans mixed up their hitting game to cap the next six points for an 18-10 win.

"We just got our tails kicked tonight, and the balls were falling on our side of the court where they shouldn't have been," said Wilton. "USC was ranked number two in pre-season, and they are a well coached team — we made some basic mistakes and got our clocks cleaned."

The most noticeable difference in the Mustang attack was from the back line in the serving department. Poly would work hard to win a crucial sideout, only to lose the advantage to a service error. The Mustangs ended the night with a cold total of 10 service errors and .192 team hitting percentage compared to the Trojans' .304 mark.

Some bright spots in Poly's effort did not show up on the statistic sheet, but on the court itself. Mustang reserve Claudia Hemmersbach came in to spark the Mustangs to their comeback in the third set, and Vera Pendergast wore out her uniform with 13 digs to add to seven kills for a .429 hitting mark.

Wilton said, "Claudia went in and got it going, but we needed everybody to keep the balls from hitting the floor, and it just didn't happen."

In a previous match-up with USC, Poly won in four 10-12, 15-12, 15-4, 15-10, but the Trojans were without their starting setter Kim Ruddins. Ruddins was a member of the United States Olympic Team in 1984, and returned healthy at every Saturday night after nursing a knee injury. Tracy Clark, who leads the nation with 3.6 kills per game and 229 kills on the season, provided the Trojan force with 13 rockets against the Mustangs.

Cal Poly now posts a 18-3 overall mark and a 7-1 record in the Pacific Coast Athletic Association, and leads the nation in kills per game with 17.3.

Soccer team still has a shot in league

By John Baker

The men's soccer team is back in the race for the CCAA championship after defeating Cal State Dominguez Hills 1-0 Saturday night in Mustang Stadium.

In a previous match-up with USC, Poly won in four 10-12, 15-12, 15-4, 15-10, but the Trojans were without their starting setter Kim Ruddins. Ruddins was a member of the United States Olympic Team in 1984, and returned. healthy at every Saturday night after nursing a knee injury. Tracy Clark, who leads the nation with 3.6 kills per game and 229 kills on the season, provided the Trojan force with 13 rockets against the Mustangs.

MAKE A SOLID CAREER CHOICE
At Morton-Thiokol, Wasatch-Operations

We are the aerospace leaders in solid propellant rocket technology. Aim for excellence in 2 worlds. Develop and produce solid propellant rocket motors for NASA-Space Shuttle and U.S. Defense Programs. Live and play in Utah's mountainous wonderlands. Want to know more? Attend an engineering information meeting. Thursday, October 31st at 6:30, at the Staff Dining Room B. We will also be interviewing December graduates on Friday, November 1st. To schedule an appointment, contact the University Placement Service.

Fun run will offer prizes for costumes
By Lisa A. Houk

Running t-shirts are usually judged by who can finish first, but the recreational sports Halloween Fun Run will also give awards to the best costumes. “We want everyone to sign up early so people can plan their costumes and we can organize things ahead of time,” said Stephanie Sliger, coordinator of rec sports special events.

The course starts on Via Carta, turns left on Pinnacles Road and winds around the Swim Unit, and reverses back to South Perimeter Road towards the finish line in the U.U.

The fun run includes four divisions, with awards and prizes for the top finishers in each. The top five runners in both the men's and women's divisions will receive awards, and prizes for the wheelchair division will also be given.

A special division called the “centipede” will feature at least four members running connected together. One other added attraction in the centipede is that all four runners have to represent a theme.

“Last year the centipede winners had a ‘pool’ theme—they wore caps, goggles, life preservers and were connected with buoys and a pool line,” said Sliger.

Sign ups are today and Tuesday at the rec sports office and in the U.U. Plaza. The entry fee is $3 for Cal Poly students, faculty and staff, and $5 for all others. These fees include a “fun run” T-shirt, or entries can subtract $2 and receive no shirt.

“Anyone who registers on Tuesday will have to pay an extra dollar,” said Sliger. “So get your running shoes and costumes out and sign up now.”

Housing

From page 1

Students, plans to establish an international house.

Alvarez said the house will provide foreign students a place to stay when they first arrive at Cal Poly. "This will introduce them to student life and community life here in San Luis Obispo," he said, adding that the house will serve as special lodging for guest speakers who come to Cal Poly from around the country and world. "This will save a lot of clubs a lot of money," said Alvarez, explaining that usually visitors to the campus stay in motels in town with their lodgings paid by the clubs or organizations that sponsor them.

The idea for a corporation came from the realization that "one entity speaking with one voice" would better the chances of the housing proposal being heard, said Walter Lambert, coordinator of Greek affairs. "It was decided last spring quarter that in order to get President Baker's and the chancellor's approval for the housing we needed one group to make a proposal. This would give us one last shot to get some land," said Lambert.

The corporation would first consider buying a piece of land located north of Highland Drive off Highway I, said Anthanasakos. "It is the largest piece of land and the closest to campus. It would allow room to expand more than the number involved in the project now," Anthanasakos said. Other land options are being considered if the first choice isn't approved by the board of trustees.

The corporation would be relatively simple to form, according to Anthanasakos. Once all interested parties are together, lawyers will be contracted to draw up bylaws, a board of directors will be formed and filing fees paid.

Monroe death may be examined

LOS ANGELES (AP) — The foreman of the Los Angeles County grand jury says he will ask for a special investigator to reopen an inquiry into the death of actress Marilyn Monroe.

"There is enough evidence to substantiate a special prosecutor to work with the grand jury on an investigation," former San Carlos said Saturday. "A full investigation has never been done by the grand jury," he said. "People have not testified under oath. This should have been done a long time ago. It should have been done in 1962."

That year, then-District Attorney John Van de Kamp concluded a probe and conferred with a police report that Miss Monroe died in her Brentwood home of a self-inflicted overdose of barbiturates on Aug. 5, 1962.

Van de Kamp is now state attorney general.

The latest round of inquiries into the 1962 sex symbol's death came on Oct. 8, when the county Board of Supervisors unanimously requested that the grand jury review Miss Monroe's death. The request was introduced by Supervisor Michael Antonovich, who received a letter from author Robert Slatzer claiming to have tape interviews suggesting a cover-up in her death.
