By Jan Sprague

San Luis Obispo may be "another story waiting to happen" and has a history of destructive earthquakes, along with a number of legally non-conforming buildings that are potentially hazardous should an earthquake strike.

Allen K. Settle, vice mayor for San Luis Obispo and a political science professor at Cal Poly, said the city of Coalinga and San Luis Obispo share similar conditions and age of downtown buildings. The same type of unreinforced masonry buildings are found in both downtown areas.

Coalinga, located some 80 miles east of San Luis Obispo, suffered $2.5 million in damage when an earthquake, which registered 6.5 on the Richter scale, occurred on Jan. 20, 1981. Many of the damaged buildings were brick and not up to code, said Settle.

History professor Daniel Kriger said the greatest danger to downtown San Luis Obispo should an earthquake occur is the number of unreinforced masonry buildings.

Kriger, who also writes a weekly column about downtown San Luis Obispo for the Telegram-Tribune, co-authored a report titled, "Report of the San Luis Obispo Cultural Heritage Commission," in 1985. The report cites the unreinforced masonry buildings in downtown San Luis Obispo that need to be examined for possible earthquake safety.

Kriger said the Mission and the County Historical Society Museum would be very susceptible to an earthquake. "We just received a letter from the state Office of Historic Preservation to repair the porch of the museum, which has suffered damage from past earthquakes and slippage.

Settle agreed that buildings constructed in San Luis Obispo during the late 1800s and early 1900s will not withstand a strong earthquake.

"According to San Luis Obispo's Fire Chief Mike Dedder, the J.P. Andrews Building is an example of the type of unreinforced masonry, privately owned buildings that are not up to today's code," said Settle. "It's all unreinforced masonry with wooden floors on top of a brick wall. There's no steel reinforcement to hold the ceiling up. If you shake it, it'll come down like dominos."

San Luis Obispo has passed an earthquake safety law saying that buildings constructed in the last 100 years that are built with unreinforced masonry must be examined for earthquake safety.

Kriger said that buildings constructed in San Luis Obispo in the 1800s and early 1900s will not withstand a strong earthquake.

"The buildings are not up to today's code and to live owners, said Settle. "It's all unreinforced masonry with wooden floors on top of a brick wall. There's no steel reinforcement to hold the ceiling up. If you shake it, it'll come down like dominos."

Speaker addresses farm problems

By Debbie Box

The California table grape boycott and immigration issue are big alarms to this state for employment is only two of the controversial issues facing the California Agricultural Labor Relations Board, said the general counsel of the ARLR Wednesday evening.

Stirling also discussed dealings with farm workers, labor unions and the agricultural industry group of about 40 people in Chumash Auditorium.

"There is a great deal of resentment," Stirling said, adding that objectives are to remain fair, balanced and unbiased in its operations. He said the ARLR cannot endorse anyone or cause a group of about 40 people in Chumash Auditorium.

"There is a great deal of resentment," Stirling said, adding that objectives are to remain fair, balanced and unbiased in its operations. He said the ARLR cannot endorse anyone or cause a group of about 40 people in Chumash Auditorium.

"There is a great deal of resentment," Stirling said, adding that objectives are to remain fair, balanced and unbiased in its operations. He said the ARLR cannot endorse anyone or cause a group of about 40 people in Chumash Auditorium.

There would be real problems in California agriculture if this legislation passed," said Stirling. "California wants workers to come across (the border) from Mexico."

An alternative to such legislation is to issue guest worker permits with approved legal status and proper protection by the law, said Stirling.

Problems arise within the state agency regarding dealings among the workers, the growers and the United Farm Workers Union. Stirling said the board tries to talk to the attorney defending the growers. He said viewpoints on labor relations have completely changed. Formerly polarized sides are now resolving their disputes.

"We can't try every case. They need to be settled or reinstated. Litigation and delays are expensive. Appealing everything routinely, even ordinary violations, is a five-year process."

Hawaiian punch

The Lady Mustangs hailed to a victory Thursday and Friday over the University of Hawaii Rainbow Wahines Page 5

Football tumble

The Cal Poly football team loses to Boise State in a chilly game in Idaho. Page 6
The time to prepare for next quake is at hand

The Pacific Ring is alive and shaking. This so-called zone of seismic activity, the most active area in the world, encircles the Pacific Ocean and has been in operation during the past several weeks.

First there was Mexico City and then the human tragedy at the hands of the killer quake. Now Hiroko, Turkey, and the virtual extinction of an entire community. This time, the culprit was the Nevado del Ruiz volcano and a 25-foot wall of mud. Of a town population of 25,000, it is estimated that between 17,000 to 20,000 lives were lost, turning the city into a vast graveyard. One person thinks the town should now be called "the Land of the Dead."

With all this activity, many experts in California are trying to predict the levels of danger that will result if the state were hit by a large earthquake. Geologists and scientists of all types are scurrying about trying to be the first ones to accurately predict the "Big One."

Many people probably don't remember the Simlar Quake of 1971 centered around Los Angeles and the massive destruction which occurred. Fortunately at that time the number of dead was minimal. Next time, and many experts are sure there will be a next time, we may not be so lucky.

The question that all the experts should be addressing is not when the next earthquake will hit, but rather how we can begin to prepare for it? The National Red Cross recently announced that it had run out of money because of all the problems that have plagued the Eastern seaboard this past summer.

Relief agencies, hospitals, fire departments and a myriad of other organizations will be hard pressed to meet the needs of millions of homeless or countless injured. We all need to begin to prepare, not out of a sense of paranoia, but out of common sense. We have to accept the fact that we Californians enjoy the good life while sitting in the middle of a ring of fire and destruction just waiting to unleash its savage force.

Let the summit begin

President Reagan is in Geneva and will soon be meeting with Soviet leader Mikhail S. Gorbachev. The outcome of these talks has been guessed at for months. We have to accept the fact that we Californians enjoy the good life while sitting in the middle of a ring of fire and destruction just waiting to unleash its savage force.

OPINION

No holds barred

The injustices of the judicial system

I always feel a pang of envy when I see people running mara­thon. I used to run marathons. In fact, I used to run 10 to 15 miles a night just for the fun of it. I trained incessantly, but it wasn't grueling, it was exhilarating.

I'd get out on the beach in twilight, stretch, pop a high energy cassette into my Walkman — then zoom off — sometimes running for two hours. Afterwards I'd strip off my running gear and plunge into the ocean. What a way to end a hard day!

On weekends, I kept running, but it was the 90-minute sprint of the mini-marathon, not the marathon. I swam, not snorkeled. I didn't feel stale, but I enjoyed soccer, team work, and the pleasure of whipping the ball into the net with one swift leg action.

My legs don't work like they used to, and it's not because of old age. My left thigh was slashed virtually to the bone by a knife-like glass splinter sticking out of a coffee table. I'd gone to a friend's house to watch an overtime game and ran into the table in a darkened hallway as I entered. When I fell on the floor, my friend's first words were, "You idiot! You didn't run past your broken table did you?" When he turned on the lights, I was amazed that he'd leave a lethal-looking table in the middle of the floor where I might have stepped on it. My friend's second words were, "You idiot! Why did you run past your broken table?"

It was many weeks and hospital visits later that my leg healed enough for me to walk comfortably. By that time, I'd lost a lot of my conditioning and muscle tone. The accident had largely ended my athletic pursuits. As a big part of my life and my leg was gone.

My friendship with the table's owner was gone also. He never offered any apologies for what happened, never admitted any responsibility. In fact, he actually indicated that it was "personal" and "lame," the last time I spoke to him he gave me the address of his dad's insurance company. "They'll take care of it," he assured me.

But his father's insurance company didn't want to pay a penny, so I was forced to get a lawyer and sue them. They played legal games for a long time. I filled out numerous de­positions, had my leg examined for the record, spent hundreds of dollars in legal fees, and at one point was offered several thousand dollars to settle out of court. My lawyer advised me not to. "They're not offering enough, we can get a lot more," he counselled. I never forgot that he was helping me because he'd get one third of the final settlement.

I dragged it on and on. Almost three years after the accident, I got a letter from my lawyer. My ex-friend's insurance company had escaped liability due to a technicality, and he promised to declare bankruptcy if I won a settlement from him. I ended up with nothing but a bad leg. And this is legally final, there's nothing else I can do.

But a widow in Florida received $1.25 million dollars from a funeral home after her husband was "psychologically damaged" by losing the ashes of his loved one. A man in Texas got lots of money from a funeral home because he didn't die, a woman in New York got $10.25 million because Hudson allegedly didn't tell him he had AIDS. He wants the money to cover the possibility that he might get sick and then die, thus compen­sating for his fear of the disease.

America's civil system is full of all kinds of cases like this, fueled by hungry attorneys creating cases out of thin air, asking outrageously large sums of money to compensate for trumped up non-injuries.

They've become so opportunistic and heartless, it's ridiculous. How about those two fine Americans using the Italian cruise ship line over the Achilles Lauro hijacking? They know a golden opportunity when they see one. So does attorney Melvin Belli. He went to India im­mediately after the Union Car­bide disaster, rounded up people who weren't even affected, and filed a lawsuit on their behalf.

Bar associations routinely say something has to be done about the civil justice problem. They say they want to clean up the ambulance-chasing image the public has of lawyers. That's fine, but I think they basically do nothing about it, the courts are still jammed with "vain" cases like this. I can also at least sympathize with the anticipation of big payoffs. Those are offices jammed with "vain" cases like this. I can also at least sympathize with the anticipation of big payoffs. Those offices are jammed with "vain" cases like this...

In the meantime, I still feel the need to write letters like mine about the ugly red scare. I look at the letter from my an­cient buddy. It's like the police he fell with when he was a boy.

In the meantime, I still feel the need to write letters like mine about the ugly red scare. I look at the letter from my ancient buddy. It's like the police he fell with when he was a boy.

Colombian town to be rebuilt

ARMEÑO, Columbia (AP) — The local government vowed Sunday to rebuild the Andean farming town of Armero, destroyed when a volcanic eruption set off a gigantic mudslide that buried Armero and killed more than 21,000 people.

“We don't know is where we will erect the new Armero,” said Eduardo Alzate, governor of the Tolima province.

In an interview with RCN radio in Lerida, a nearby town where survivors were receiving aid, Alzate said new locations would have to be discussed with Armero's survivors and the area's farmers, because Armero was an important marketing center.

Envoy has meeting with captors

BEIRUT, Lebanon (AP) — Terry Waite, the archbishop of Canterbury's envoy seeking to free American hostages in Lebanon, said Sunday he met with their captors at a secret meeting in Beirut and "positive steps have been taken."

Before flying to London and Washington, he stressed at a news conference that the situation "remains very difficult and very dangerous."

Many disputes are social-cause oriented, such as unfair labor practices. Stirling said. Unfair labor practices mean an employee cannot be discharged for certain union activities such as wearing buttons and supporting union. Stirling is a former state assemblyman with six years in the Senate. He practiced law for 10 years before holding office.

The Cal Poly Agricultural Union, Farm Management Club, and the National Agri-Marketing Association sponsored the lecture

UUAB makes committee changes

By Andrea Bernard

The University Union Advisory Board voted Thursday to make specific revisions in its committee infrastructure.

The UUAB moved to do away with Public Relations, merge Space Allocation and Expansion with Building Expansion and Improvement, and form two new committees dealing with accreditation and selection of future board members.

Chairperson Shelby West said that the Public Relations Committee is in charge of only one UUAB event, Reunion Day, and spends its remaining time placing ads in the Mustang Daily. "Putting these ads in is a staff responsibility. We shouldn't be wasting our time with busy work," West said.

Board Governor Steve Dunton questioned the possibility of extra cost to the UUAB if its committee did not directly handle the event, and member Mike Sues worried that the focus of Reunion Day may be jeopardized if the UUAB didn't supervise the event. West concluded that those issues could be addressed if or when they develop. "There is no reason to have a committee for one event," she said.

"There is no reason to have a committee for one event."

— Shelby West

UUAB in these areas. "It would serve as checks and balances and keep our focus on policy. It will give direction to our long range plans," said West. The UUAB voted to direct the Policy Committee to study the issue of accreditation before establishing the new body.

The board then decided to form a Human Resources Committee to be composed of past UUAB governors and staff for the purposes of recruitment and training of new members. "This committee will provide on-going orientation for new-comers to the board as well as conduct exit interviews of those leaving the board," said U.U. Executive Director Roger Conway, adding that the group will meet on a regular basis as a standing committee, rather than once a year as the present selection committee does.

The UUAB also heard from senior construction major Bill Dean, who is serving as owner's representative for the proposed new bowling alley. Dean introduced an alternative flooring system to the wet sand and concrete plan already under consideration by the board. "For the long-term, a steel beam and hardwood floor would be stronger," Dean said, adding that this floor design would cost $16,000 more than the present estimate.

Dean said the floor area presently in the U.U. bowling alley area is composed of three levels. "The steel floor with its underfloor access would raise the existing floor level, maximizing flexibility particularly in moving walks," he said.

"I think it's important to explore this alternative," said Conway. The UUAB moved to further discuss the proposed flooring design.

The board also decided to place a public notice in Mustang Daily asking for additional proposals to replace the bowling alley. Beginning Nov. 18 proposals will be discussed by the UUAB and a vote will be taken on Dec. 5.
Poly spikers dig Hawaiian punch

By Lisa A. Houk
Sports Editor

The Cal Poly volleyball players discovered the true meaning of "island paradise" Thursday and Friday, as their hair turned a richer blond and their winning record became bolder in a visit to the University of Hawaii.

Even King Kamehameha would've been proud of the way the Lady Mustangs battled the Rainbow-Wahines' own surf and turf. No voodoo or island rituals could stop the Mustangs Thursday, as they hulaed past Hawaii 13-12, 6-15, 15-11, 13-15 and 15-8. This five-set victory recorded Poly's first-ever triumph over the Rainbow-Wahines.

Almost like a repeat of "Hawaii 5-0," the Mustangs again took the eighth-ranked Rainbow-Wahines to a fifth game Friday night to level off another win for the mainliners 7-15, 15-10, 15-5, 7-15, 15-7. The fifth-ranked Lady Mustangs deserved high fives all the way around, as their league record jumped to 12-2 and their overall mark rose to 25-5.

Poly's defense would've caught the eye of Tom Selleck Thursday, as the Mustangs put their noses in the sand for an impressive 112 team digs. For about three hours...

See HAWAII, page 6
Racers can win birds

The Cal Poly recreational sports special events program is sponsoring a fun run for Thanksgiving called the Turkey Trot on Thursday.

The 2.3 mile run will begin at 4:15 p.m. Thursday, and every "turkey trotter" will be required to sign-up and either donate a can of food or pay $1 for the entry fee. All participants will be eligible for a drawing after the race.

The turkey trot course begins and ends in front of the main gym, and three divisions will place participants in the men's, women's or a faculty/staff category. Turkeys will be awarded to the first place winners, along with a "champ" T-shirt, while the second and third place winners will receive cornish-game hens.

Interested trotters can sign-up at the Cal Poly recreational sports office located in the University Union Plaza, or at a sign-up table in the U.U. Plaza between 11 a.m. and 1 p.m. this week. Late sign-ups will be in front of the main gym from 3 p.m. to 4 p.m. on Thursday.

The deadline for entries is 4 p.m. Thursday, and for more information, people can call the rec sports office at 546-1366.

Poly fumbles away game 42-14

By Lisa A. Honk

The Cal Poly football team suffered a 42-14 loss to Boise State University Saturday in the cold and snowy state of Idaho.

The Mustangs had trouble holding on to the ball in the adverse conditions, as Poly compiled five turnovers to Boise's one. Three of the Mustang turnovers were fumbles, and two of these resulted in Bronco touchdowns.

With runningback Jim Gled Osborne with a first-half injury, Carlos Adams stepped in and carried the ball 10 times for a total of 87 yards. Boise State collected most of its yards on the ground, gaining 285 yards rushing to Poly's 158.

In the passing department, Poly racked up 149 total yards to Boise's 196, and Rushing was a major force on the scoreboard, as the Broncos thrilled through the Mustang defensive line for five total yards.

The Mustangs will carry their 5-5 overall record into the Cal Lutheran Saturday for the final contest of the year.
