CCC helps young people prepare for future

By Matt Weber
Staff Writer

"Hard work ... low pay ... miserable conditions." This does not describe the kind of job many people would be drawn to, but it's a description that the California Conservation Corps is proud to advertise.

And they don't seem to have any problem rounding up applicants. There is, perhaps, a gung-ho atmosphere attached to a job with the CCC, but for many people there aren't a lot of other options.

The CCC is essentially a work-study program for people with minimal job skills or education levels.

"We don't care what their application looks like when they get here," said Terri Dunivant, CCC education coordinator. "A lot of people here have academics that are very low. Sometimes we're the only option left for people, I think."

Some people apply with no more than an eighth-grade education. Some can't read or write. Only 2 percent have any college background. The CCC tries to make these people more attractive to potential employers.

"We don't teach specific skills so much as we teach the work ethic," said Dunivant. "We try to get them to understand why (education) is important."

Work days at the CCC start at 6 a.m. with physical training. Hard work takes up the rest of the day, which may consist of fighting fires or building parks.

Night classes must be taken four days a week. The classes range from basic reading and writing to specialized training in solar panel fabrication, auto mechanics, purchasing and others.

The San Luis Obispo CCC was the first branch in the state, and they're kept busy by the environmental needs of the city, county and state. Tree planting and trimming, park construction and maintenance, creek clearing, fire fighting, flood control, wildlife rehabilitation and dune stabilization occupy a lot of their time in the area.

"Out in Morro Bay we removed a lot of iceplant," said Dunivant. "By us doing that, the population of endangered kangaroo rats theoretically would increase."

They also build and maintain trails in parks throughout central California, and they have renovated many historic buildings, including the Morro Bay Library and the Avila lighthouses. Currently a renovation of the Morro train depot is underway.

Sometimes the area where they work is tooSee CORPS, back page

Chamber might ax student position

By Suzanne Carson
Staff Writer

The ASI position on the Chamber of Commerce Board of Directors may be eliminated next month because of pressure from other community organizations which want similar representation on the board, said Mike Rice, ASI community relations representative.

For the past 13 years ASI has represented Cal Poly through a designated position on the San Luis Obispo Chamber Board of Directors. In 1973 the chamber added seven designated positions to its 14-member elected board.

The purpose of adding designated positions to the board was to foster improved communication and cooperation between various business and community organizations. And the board felt that designating the ASI position on the chamber board in 1973 would facilitate that goal.

However, with the new growth and development going on in the community, several new organizations are requesting designated positions on the board.

Expansion of the board beyond the current 14 members seems impractical, said David Garth, executive manager of the Chamber of Commerce. Therefore, rather than establishing new designated positions at the cost of eliminating others, creating hard feelings, the board is considering eliminating all designated positions, Garth said.

Also, some board members said conditions that existed in 1973 necessitating designated positions to the board no longer exist. This is another reason given for eliminating the positions.

Garth said chamber directors will consider expanding elected positions on the board. Therefore See CHAMBER, page 5
A penny for your thoughts

If you believe AT&T commercials, everything in this world hinges on good communication. I agree, but just because people don’t say something doesn’t mean they’re not getting their message across. Below are a few conversations with their non-verbal translations:

Boy and Girl in Snack Bar
Boy: “Hi.” ... Hei00000000000
Girl: “Oh, hi.” ... Oh God not you again.
Boy: “So what’s new?” ... Jesus those jeans are tight.
Girl: “Nothing much.” ... You’re gross and I have a boyfriend.
Boy: “So, how’s your quarter going?” ... I have money and a new car.
Girl: “Fine.” ... What kind of car is that?
Boy: “That’s good.” ... A Volkswagen.
Girl: “How about you?”... Helahkan.
Girl: “I get $0.01 for my translate.”
Boy: “Pretty good.” ... If she leans over just a little more I can look down her blouse.
Girl: (Adjusting blouse) “Well I have to get to class.” ... Nice try, slime puppy.
Boy: “Bye.” ... Damn!
Girl: (Goes up and leaves) “Bye.” ... Now where do I go, I don’t have class for two hours?
Boy running into Girl in line at El Corral
Girl: “Hey Bill, how’s it going?” ... I’m easy.
Boy: “Great.” ... YEAH!!!!!

FOOD FOR THOUGHT
Kenneth Dintzer

Boy: “Hey, what are you up to?” ... Do I know you?
Girl: “Just spending my life bugging.” ... Don’t remember.
Steve’s party last month?
Boy: (Forced laugh) “I’m just getting a Scanscan.” ... That was you? Damn, I must have been drunk.
Girl: “What class?” ... I’m not busy tonight.
Boy: “Math.” ... Not for all the drugs in Colombia.
Girl: “Well, I’ll see you around.” ... You weren’t that good anyway.
Boy: “Sure.” ... Unless I see you first and I can turn away and pretend I didn’t notice you.
Boy running into Girl he’s been wanting to ask out for a long time
Boy: “Hey Wendy, long time no see.” ... Oh no how do I look?
Girl: “Hi Steve, how are you?” ... (Accompanied by a mental scoff).
Boy: “Pretty good.” ... If she leans over just a little more I can look down her blouse.
Girl: (Adjusting blouse) “Well I have to get to class.” ... Nice try, slime puppy.
Boy: “Bye.” ... Damn!
Girl: “I get $0.01 for my translate.”
Boy: “Real good!” ... I would give my right arm for the chance to comb my hair.
Girl: “You look great, have you lost weight?” ... Was that too forward?
Boy: “Thank you.” ... Thank you, thank you, thank you.
Girl: “Sure.” ... Here’s your chance.
Boy: “So, uh ...” ... Do I really want to do that? I know I’m going to look like a fool.
Girl: “Yes?” ... I’ll say yes if you ask me.
Boy: “Are you having a good quarter?” ... But what about when we go on the date?
Girl: “Great, things are really coming together.” ... What do you mean?
Boy: “Did you get good teacher?” ... If I take you to a nice restaurant will you order the most expensive thing on the menu?
Girl: “They’re really good. and I’m done with math.” ... Not if you don’t take me to a party where you know everybody and I feel like an outsider.
Boy: “That must be a relief.” ... Enough. What about the good night kiss? Are you going to stand two feet away from me so I have to lunge at you?
Girl: “You know it, now I can have some fun.” ... I’ll let you kiss me as long as you don’t make an issue about me inviting you in.
Boy: “Do you “Hi Steve, how are you?” ...
Boy: “Only 13, so I have a lot of units.” ... Deal.
Boy: “Oh, do you want to go out Friday night?” ...
Boy: “I’d love to.”
Boy: “I’ll call you.” ...
Boy: “Great.” ...

letters to the editor

Cal Poly litter bugs: keep the campus clean

Editor — This a letter of appreciation to the University Union custodial staff for the outstanding work they all do at keeping our campus clean. Thanks for doing your job so well.

This letter is also a challenge to the students on campus who force the state to spend so much money to hire the custodial staff.

Next time you finish reading Mustang Daily, throw it away. Don’t leave it lying around for someone else to read, because the end result is newspaper trash everywhere. When the weather is nice and you eat outside, have some respect for the others who use the common areas and bus your own dishes back to the dining facilities.

The next time you want to draw attention to yourself, choose another method than defacing the Poly “P” as a way of getting your name in lights. If you must use the “P” at least have a little consideration and clean it up the next day.

This is a challenge to all of us, as no one is completely innocent, to take some pride in our campus and to pick up and throw away at least one piece of trash per day and not to leave any new mess behind. Just think how much it could look if we all work together to keep it clean.

Reagan: summit is prep session

WASHINGTON (AP) — President Reagan sought Monday to dispel what he termed "inaccurate speculation and false hopes" that his summit with Soviet leader Mikhail Gorbachev will lead to new superpower agreements.

Reagan also said he would confront Gorbachev in Iceland this weekend on the Soviet Union's continued military operations in Afghanistan and "unceasing" human rights violations.

Reagan, speaking to a business group meeting at the White House, said in the strongest terms since the Iceland summit that he viewed it as merely a preparatory session for the full-scale meeting he and Gorbachev envisioned after they first met in Geneva last November.

Officials in both Moscow and Washington have said both sides appear to be narrowing differences on ways to reduce numbers of medium and long range missiles, but Reagan said the purpose of the session in Reykjavik is "planning and preparations, not treaty signing and publicity."

Soviet nuclear submarine sinks

WASHINGTON (AP) - A nuclear-powered, nuclear-armed Soviet submarine, apparently doomed from the moment it experienced a fire and explosion last Friday morning, sank and was abandoned by its crew early Monday in the western Atlantic Ocean.

The Soviet news agency Tass said no lives were lost when the so-called Yankee-class submarine went down around 1 a.m. The Pentagon said it had no reason to doubt that statement.

The vessel sank in waters 18,000 feet deep about 1,060 nautical miles to the east of Cape Hatteras, N.C., or roughly 600 miles east of the island of Bermuda. A Soviet merchant ship, which earlier had been trying to tow the vessel, collected survivors and remained in the area on Monday, the Pentagon said.

Two ranking U.S. military officers said the sinking posed no threat to the environment, even though the submarine was powered by two nuclear reactors and carried up to 16 nuclear-tipped, SS-N-6 ballistic missiles.

Agricultural engineering professor Lloyd Lamouria will be honored in a ceremony on the Davis campus for his part in the research and development of the roll-over protection system (ROPS) for tractors. It is only the 21st such award bestowed by the American Society of Agricultural Engineers (ASAE) since its inception in 1908.

The ROPS, similar in principle to roll bars on dune buggies or stock cars, protects seat-belted operators from being thrown from the seat and crushed by an overturning tractor. Without ROPS, the driver must feel the tractor begin to upset and be nimble enough to jump free of the machine.

"We don't dare let a student get on a tractor without a ROPS," Lamouria said.

All of Cal Poly's tractors are equipped with ROPS, and Lamouria has taught thousands of students the basics of tractor safety in his 21 years at Cal Poly.

Lamouria, who acts as a consultant to tractor manufacturers on ROPS, began his involvement in tractor safety when he joined the Air Force fresh from high school in 1941. As a crew chief maintaining P-51 aircraft in England, Lamouria said he "became accustomed to the seat belt as an essential piece of safety equipment."

In 1956, while with the agricultural engineering extension service at Davis, Lamouria and two colleagues researched methods to build safety features into tractors the way the military had built them into lighter airplanes. "We wanted to demonstrate that tractors could be made inherently safe," he said.

They designed a U-shaped structure out of double iron pipes and attached it to the axle of a John Deere tractor. The strength of the device was tested with strain gauges and field tested by rolling the tractor end-over-end with a dummy at the wheel.

Despite results that demonstrated an operator secured to the seat could survive such a tractor accident, many farmers and tractor manufacturers were reluctant to use the device. Farmers felt confident in their ability to safely handle the tools of their trade and no manufacturer wanted to create the impression that their products were unsafe and in need of additional features, Lamouria said.

It took nearly 10 years before the ASAE established standards for ROPS and the first commercial frames were available on John Deere tractors in 1966. After Deere set the trend, other manufacturers followed the industry leader and in 1975 ROPS was required equipment on all tractors sold in the United States.

Although the early ROPS were retro-fitted to existing tractors, Lamouria said that safety concerning tractors and all machinery is often approached by the builder from the wrong angle. "You must design safety into the equipment, not onto the equipment," he said.

An avid private pilot for 34 years, Lamouria holds six U.S. patents on other agricultural machinery including an auto-guidance system for planting and cultivation, a mechanical grape harvester and fruit processing equipment. He is also the owner of a vintage 1967 Rolls Royce Silver Shadow, complete with right-hand drive, that he often takes to collector auto shows throughout the country.

Lamouria, who met and married his wife Edna in England 42 years ago, enjoys teaching as much as flying. "There is nothing nicer in the world than to be with the students," he said.

"That's the nice thing about teaching," Lamouria added. "The people you work with never grow old."

In addition to his teaching duties, Lamouria is also chairman of the Academic Senate at Cal Poly.
LaRouche offices searched; federal jury charges fraud

LEESBURG, Va. (AP) — Federal, state and local law enforcement authorities raided the headquarters of political extremist Lyndon LaRouche on Monday as several LaRouche associates were indicted in an alleged nationwide credit card fraud scheme. While hundreds of officers searched for evidence, a federal grand jury in Boston handed up a 117-count indictment alleging credit card fraud, unauthorized use of credit cards, obstruction of justice and contempt of court. LaRouche is a frequent fringe candidate for president who has announced he is running in 1988 as a Democrat. The federal grand jury in Boston had been investigating for nearly two years allegations of a massive pattern of credit card fraud involving LaRouche-related organizations, and complaints of amounts charged to credit cards in excess of those authorized to be given to the LaRouche groups.

LaRouche's followers have run for hundreds of offices around the country, and gained widespread attention in April by winning Democratic nominations for lieutenant governor and secretary of state in Illinois.

science, industrial technology and statistics. • A reunion for students who participated in the London Study program last spring will be held from 8 p.m. to 1:30 a.m. Tuesday at Rose and Crown pub.

• Soviet emigrant activist Vladimir Magarik will speak at 7 p.m. Wednesday in San Luis Lounge. Magarik's son was sent to a Siberian labor camp for expressing his desire to come to the United States with his family. Submissions contributed for consideration for publication in Calendar must be received by noon two days prior to the event.

CHAMBER

From page 1 if the designated positions are eliminated, those displaced members could become elected members of the chamber. Rice and other ASI representatives said they're concerned about what the chamber will decide Nov. 1.

"It is imperative that we have some kind of representation on the Chamber of Commerce — if nothing else to show student concern and involvement," Rice said.

ASI President Kevin Swanson said, "We make up 40 percent of the community." The board is one of the best forms of communication between Cal Poly and the community, he said.

"If eliminated, it would mean one less contact with the community," he added.

Rice said ASI representation in the chamber is vital to Cal Poly in three ways: To give Cal Poly voting representation in the chamber. To facilitate business and community contacts to help in a new ASI marketing campaign. To preserve the ability to gauge community concern and interest in the university which fosters better relations with the community.

"If ASI representation with the chamber is cut off, then these and other areas will suffer," Rice said.

"Right now the chamber is seeking an accurate representation in the decision-making process, and we would like to see the number of elected members' seats on the board expanded for greater community-wide representation," said Rice. Rice said it's too early to tell what the official decision of the chamber will be, but he hopes an Oct. 16 meeting with the board of directors leads to a decision in November which will keep ASI on the board.

*tone through Friday 7:30 p.m.-10:00 p.m.
October 1 through October 24.
Winner to be announced November 10th in the Mustang Daily.
Young Mustangs
Youthful volleyball team surprises critics

By Lisa A. Houk
Special to the Daily

When Cal Poly head coach Mike Wilton heard the critics labeling this season a transition phase, he handed them a 1986 lineup and never looked back. The Cal Poly women's volleyball roster was tossed away early without the top veteran headliners of Ellen Bugalski, Lynn Kessler, Kelly Strand and Dede Bodnar, but now those same critics are hounding their circular files for this year's crop of new stars.

The 1986 team may have been overlooked in pre-season polling and acclaim, but now 12 matches later, the heat of the spotlight is getting warmer and warmer. The Lady Mustangs went from being virtually unranked to honorable mention to number nine in a Sept. 23 NCAA Division I Poll and number 11 in the Sept. 30 Tachikara Top 20 Coaches Poll in four short weeks.

With a 10-4 overall mark and 5-3 record in the Pacific Coast Athletic Association, Poly has continued to elbow its way into the top competition. A blend of four familiar faces and some hot new talent has produced a host of surprising results on the court. The loss of four starting veterans from the 1985 squad left some big gaps, but coach Wilton is pleased with the fillers.

"Every team is different with all the various personalities and talent, but this team just loves to work," said Wilton. "We are scrappy, but if we lose a game it's not because we didn't fight."

A six-foot and menacing part of the Cal Poly attack is number nine — Carol Tschasar. Cal Poly fans are used to seeing a flash of a blonde ponytail as Tschasar consistently lowers the boom from the front row. Far from having a figure like "The Fridge," Tschasar's blocking ability has frozen a string of opponents at the net.

A graduate of California High School in Whittier, Tschasar was first in total blocks for Poly last year and holds the school's career record with 417. After 42 games this year, Tschasar is fourth on the PCAA list in blocks with 67 for an average of 1.59 per game. In her fourth and final season, Tschasar is an All-American candidate in 1986 and has taken giant steps towards this prestigious status in the past month.
VOLLEYBALL

Dunnivant said: "Women are
expected to do the same things
exactly as men." Employees earn
$580 a month, from which is
deducted $145 a month for meals
and housing at CCC residential
centers. Take-home pay nets
about $360 per month.

People normally sign up for
one year, but are free to leave at
any time for any reason. If they
complete a year, they receive a
$500 bonus.

The CCC creates a strong im-
pression of teamwork. They are
hard-working and dedicated to
improving the environment.

Indeed, the teamwork pays off.
"For every dollar we get, we
return $1.61," Dunnivant said.

On top of this, California gets a
good environment, and CCC
employees get educational
benefits that never stop paying
back.

ODOR

From page 1
Day. Paulsen. One student
likened the odor to burning rub-

There wasn’t a lot of breeze
last night," assistant fire chief
John Paulsen said Monday. A
stronger wind would have
dissipated the odor sooner.

Paulsen said fire fighters from
the Cal Poly station first
detected the strange smell at 10
p.m. Sunday and set out to in-
vistigate. A Kennedy Library
secretary called Public Safety at
10:07 p.m., whereupon Cal Poly
and San Luis Obispo fire
departments responded.

Cal Poly fire official Richard
Smiley, who searched for the
odor’s cause, said Sunday: "We
searched for the smell but
couldn’t find it, so we evacuated
the building. Apparently the
odor is coming from off campus.

The windows on the north side of
the library on all floors were open
and let in the chemical smell."

The evacuation of the library
went smoothly and without inci-
dent, Paulsen reported. "Most
people thought it was a test of
the system rather than the real
thing," he said.

Approximately 70 students
were evacuated 45 minutes be-
fore the library closed for the
night. Student David Lewis was
in the building when the evacua-
tion started. "I was studying and
I thought someone just went out
the wrong door or something, but
then I saw people leaving and I
figured I’d better go too."

John White from the Republic
Elevator Company spent an hour
Monday repairing the broken
grommet and the overheated
system to heat up and smoke.
