Professor dies over Christmas holiday
By Diane Zundel

Donald R. Mash, a mechanical engineering professor known for his unwavering friendliness and dedication to his students and colleagues, died last month of a heart attack. He was 63.

Mash died on Dec. 17, 1986, in a San Luis Obispo hospital. He had been a faculty member at Cal Poly for the past two years.

"He had a good relationship with everyone. He made it a point to be friendly and he never walked by without smiling or saying hello. There are over 150 faculty members within the engineering department, but he really stuck out," said Theresa Pittaway, a clerical assistant in the department.

Bernice Glinski, the mechanical engineering departmental secretary, said that Mash was a great instructor and students really loved him. At the end of fall quarter, three students whom Mash had for a senior project class baked him a big heart-shaped cake to show their appreciation, said Glinski.

When students heard of his death, she said, many wrote letters to Mash's wife to express their sympathy.

"He was such a nice and thoughtful man. And he was always happy. He wanted all of us to do well. When I would go to his office hour, he would explain things over and over again if I didn't understand. He would never turn you away," said Christopher McNairy, a junior agricultural engineering student who had a class with Mash last quarter.

Mash was born Nov. 21, 1923, in Greensburg, Pa. He received a bachelor of science degree in metallurgical engineering in 1944 at Carnegie Tech in Pittsburgh, Pa. He served in the U.S. Army.

State budget cuts may force tuition up $45 in spring
By Carmela Herron

A proposal for a student fee increase to be effective spring quarter is strongly opposed by California State Student Association members and various ASI representatives for the California State University. They claim that a mid-year registration surcharge is illegal under existing state legislation.

The surcharge, or one-time fee, is part of a plan to cooperate with Gov. George Deukmejian's $27 million reduction of the CSU system budget. The surcharge will be proposed Thursday to the CSU Board of Trustees.

Deukmejian will make a decision on the proposed reduction plans this week. It is not certain whether or not he is in favor of the surcharge.

If approved, the surcharge will be approximately $45, according to Sherry Skelly, CSSA staff member and legislative director for the CSU. The fee will be charged only spring quarter.

An approximate $13.5 million of the $27 million reduction could be generated by the proposed surcharge. The other $13.5 million may come from administration budget cuts, early retirement programs, possible system savings and unallocated funds, said CSSA liaison for the CSU and Board of Trustees Kerri Johnson.

Both the CSU and UC systems are being asked to pick up 63 percent of the $100 million state reduction plan, Johnson said.

Along with the $27 million reduction for the CSU system, UC schools are expected to reduce spending by $37 million.

"We feel it is an unfair share of the reduction, considering we (the CSU and UC systems) only make up 16 percent of the budget," Johnson said.

Although the surcharge is "a quick and easy way" to generate funds, Skelly said this type of fee increase has a history of becoming a permanent fee, and that it is possible the $45 will be added to the scheduled 10 percent registration fee increase for the upcoming fall quarter.

Johnson said, "Our main concern is that the CSU is operating on a 'shoestring' budget. ... We have no money in reserves because the governor doesn't want to deplete state funds."

According to Johnson, the CSSA opposes the surcharge because within Senate Bill 195, it is not legal to impose a mid-year student fee increase without 10 months advanced notice and further declaration by Deukmejian of an existing fiscal crisis. Neither has been announced, said Johnson.

Skelly pointed out that SB 195, made effective last January, was pushed through by students and administrators so that students could plan their finances.

"The reasoning behind State Senate Bill 195," said Skelly, "is to take the power away from the Board of Trustees, and put it back in the hands of the methodology. It allows for planned, predictable fee increases, and is a way of insuring that sporadic increases, like mid-year surcharges, will not surface."

ASI President Kevin Swanson, who attended the CSU meetings during the weekend, also opposes the surcharge.

"When a student pays his or her registration fees, that is considered a contract. We expect nothing to be changed," he said.

"The fee comes without warning; it leaves little time for planning and the students who are on financial aid, and it is outside of the existing legislature," he said.

Swanson said an average of about $45 a quarter will be charged.

Budget cuts may halt purchase

AV waiting for new dish
By Jennifer Manor

Audiovisual Services may be getting a new satellite dish this quarter to supplement the department's existing cable system, but the purchase of the dish depends on getting the site approved and the extent of state budget cuts.

Technical support coordinator Dick Tibbetts said, "If the state decides to cut our Budget, then no satellite. If we receive our original funding for Audiovisual Services and the site location is approved, then we will purchase the satellite dish."

The amount needed to buy the new satellite dish, mount, receiver and 350' of cabling is approximately $6,000. Audiovisual Services purchased a dish for $2,500 last year.

"The purchase of the dish depends on getting the site approved and the extent of state budget cuts," Tibbetts said. "If the state decides to cut our Budget, then no satellite. If we receive our original funding for Audiovisual Services and the site location is approved, then we will purchase the satellite dish."

Some Cal Poly students throw people out of bars in their spare time. See page 5.
Education for political literacy

GUEST COLUMNIST

Donald Lazere

While the 1984 Reagan-Mondale election and the 1985 State of the Union address are history, it is important to remember that they were meant to be a counterbalance to the misrepresentation of the average voter—can not develop enough to grasp its ironic, between-the-lines meaning: "Liberal Democrats claim that we conservative Republicans try to impede progress for the poor, but some programs which in theory would help the poor have actually harmed them."

If the brightest of American youth cannot understand this or other key passages in a presidential address aimed at a nation-wide TV audience, we are in big trouble.

The problem is compounded by the regrettable fact that statements by politicians of both parties are filled with rhetoric that is vague and evasive at best, deceptive and false at its worst. Rhetoric flies so fast in contemporary political chaos is connected to a nation-wide TV audience, we are in big trouble.

The problem is compounded by the regrettable fact that statements by politicians of both parties are filled with rhetoric that is vague and evasive at best, deceptive and false at its worst. Rhetoric flies so fast in contemporary

Photos of swimmers should be identified

Editor — In over four years of reading the Daily, I have yet to see the appropriate photo credit given to a student swimmer. As a photographer, I know it can be diffic-?

ficult to collect information on every shot. But as a swimmer, I am tired of seeing photos of swim team members identified as "a Cal Poly freestyle," or more commonly, "a Cal Poly swimmer," while the indi-

dividuals in every other photo are identified by name. Come on.

Blake Wechter, aeronautical engineering senior:

No. This is my fourth year at Poly, and I attended a junior college for four years. I don't think you can graduate in four years and have a normal college life.

Stephanie Logan, computer science fifth-year senior:

No, I think the curriculum is set up so it's pretty much im-

possible to graduate in four years. Especially if you have to work part-time.

Ann Alsobrook, business junior:

No. There's so much general education that it's impossible. You can't get English classes. I'm a business major, and to graduate in four years you have to take 16 or 17 units a quarter. That's a heavy load.

Julie Frink, biochemistry fourth year senior:

No. I've changed my major, and that makes it difficult because you have to follow such a precise schedule. I really am frustrated by the system here, to say the least.

Editor — In over four years of reading the Daily, I have yet to see the appropriate photo credit given to a student swimmer. As a photographer, I know it can be diffic-?
American asks Soviets delay trial

MOSCOW (AP) — An American businessman accused of defaming the Soviet government newspaper Izvestia has asked a Moscow court to delay the trial on the newspaper’s lawsuit.

Izvestia’s editorial board filed the defamation suit against Raphael Gregorian in December, but the newspaper has not released details about its charges.

Gregorian’s Los Angeles attorneys said they needed time to prepare a defense and asked Moscow City Court to delay a trial that the lawyers said was set for Monday. However, an official at Moscow City Court said Monday the trial had not yet been scheduled.

A copy of the lawyers’ request was sent by telex to The Associated Press in Moscow.

Gregorian sold medical supplies in the Soviet Union for 15 years before being forced to leave the country in 1984. Izvestia printed allegations at the time that Gregorian was a spy and he went to court in the United States charging libel.

Neither the newspaper nor the Soviet government responded to the charges, and Gregorian won his U.S. lawsuit by default in August. In November, U.S. marshals seized about $5,000 worth of property from Izvestia’s offices in Washington.

In their message to the Moscow court, Gregorian’s lawyers said their client had not been served with a summons or statement of claim in the Izvestia countersuit, and that the scheduled trial would violate Soviet civil procedures that give a defendant “sufficient time to prepare a defense.”
Weinberger justifies higher defense spending

WASHINGTON (AP) — Higher defense budgets are necessary to meet the continuing Soviet military buildup and because there is "no prudent way to scale back American interests around the world," Defense Secretary Caspar Weinberger told Congress on Monday.

Weinberger's familiar message came during his first appearance on Capitol Hill before the new 100th Congress in support of President Reagan's request for a 7.7 percent increase in military spending at a time when the administration has proposed to cut many domestic programs.

The requested $312 billion defense budget would amount to an actual 3 percent increase after inflation, the smallest hike sought thus far by Reagan as part of his program to "rearm America."

"Over the years, I have made much the same kind of plea," Weinberger noted to the Senate Armed Services Committee as he reviewed U.S. global defense agreements and the Soviet Union's military capability.

Much of the hearing dealt with U.S. military strategy rather than specific items in the defense budget. Sen. Sam Nunn, D-Ga., the new committee chairman, has called a series of hearings to try to outline overall U.S. defense strategy rather than debate specific weapons.

Still, Weinberger defended several budget requests, chiefly the administration's proposals to buy two more aircraft carriers and sharply increase spending for the "Star Wars" anti-missile research project.

The administration wants $660 million as a down payment for the carriers, which would cost $6.9 billion. It also requested $5.78 billion next year for the Strategic Defense Initiative, as Star Wars is formally known, compared with the current SDI budget of $3.5 billion. A separate request would add $500 million this year to the SDI budget.

Weinberger said the two carriers are necessary to replace two 40-year-old ships and keep the Navy's carrier fleet at 15 ships.

But Sen. Carl Levin, D-Mich., said Weinberger told the panel last year that no carriers would have to be sought until the next decade, a statement Weinberger disputed.

"You need to order them six to seven years in advance," said Weinberger.

But Levin argued that the request was a change because he said last year's Navy shipbuilding budget projected no carrier money for the next five years.

"I do not concede that there has been any change" in Navy plans, Weinberger said.

Several Republican senators said the administration should consider deploying elements of a Star Wars shield as soon as possible even if no complete SDI system is available.

"I'm very fearful the patience of the Congress is very thin," said Sen. Dan Quayle, R-Ind.

Weinberger said he supports deployment "as soon as possible," but only if it is the first stage of a full-scale SDI system.

When Sen. Steven Symms, R-Idaho, pressed Weinberger for a date when a deployment decision could be made, Weinberger would not go beyond saying he hopes it can be within the very few years... the sooner the better."

As a Marine Officer, you could be in charge of a Mach 2 + F/A-18A, a vertical take-off Harrier or one of our other jets or helicopters. And you could do it by the time you're 23. But it takes a special commitment on your part. We demand leaders at all levels. We teach you to be one. If you're a freshman, sophomore, or junior, ask about our Platoon Leaders Class program. If you're a senior, check out our Officer Candidate Class programs. Starting salaries are from $18,000 to $24,000. And you can count on going farther... faster. We're looking for a few good men.

Go farther... faster.

For further information contact the Officer Selection Officer in Los Angeles collect at (213) 298-6236.

NEW YORK CITY
Shows, shopping and celebrities await in the Big Apple

By Catherine Hernandez
Staff Writer

After a hard winter quarter the Cal Poly student may feel the need for a change of atmosphere. A Cal Poly economics student has arranged an eight-day trip to New York that offers students the opportunity to experience things they could not in nearby Los Angeles and San Francisco. Only New York can offer the opportunity to see a Broadway show or go on a shopping spree on Fifth Avenue.

This will be the second year Jon Scofield has organized a spring break trip to New York for Cal Poly students. He lived in New York for three years before moving to California to attend Cal Poly, so he feels he is more qualified to introduce people to the Big Apple.

The first trip was arranged in spring 1985. Scofield admits he did it because it was a way to afford a trip back to visit his friends in New York. But he decided to plan this year's trip primarily because the first trip was so much fun.

"Sure it was great to see my friends, but I had a wild time with all the people who came along," Scofield said. "It was a real reward for me to be there with people who had never seen New York before."

Scofield says the trip can be whatever students want it to be. Those who decide to take the trip are not forced to follow a planned agenda. "You have the freedom to do what you like," he said.

Scofield said one of the ways of making this type of unstructured trip work involves making the people feel familiar with the city. He will schedule a few meetings to help students decide on areas they would like to see and teach them to use the subway system to get around on their own. He says the meetings also allow people a chance to get to know each other.

"New York is just a different life. It's a different place and I enjoy showing it to people," Scofield said.

He said that in New York there is no guessing what will happen next. "Famous people are walking on the same side of the street as you and going to the same delis. Last time some of the people saw stars such as Woody Allen and Rod Stewart just walking the streets," Scofield said.

"The main thing about New York is that it's a real paradox with the extremes of everything. I was down to 18 dollars and starving at one time while I lived there so I know you don't have to spend a lot of money to have a good time," he said, but added that there are also ways to spend $400 in one night.

"The shopping there is intense," Scofield said. "There are expensive stores and then there are little shops with little trinkets. You can spend a million or you can spend a dollar."

Scofield said the 1985 trip did include some unplanned excitement when a large drug deal took place in the subway car that some Cal Poly students were riding. "Things like that can only happen in New York," he said. "The trip is fun because you do whatever you want to do. I had one girl who saw eight Broadway shows and others who did not see any."

"New York is the highest, the lowest, the fastest, the slowest, the smartest and the dumbest," Scofield said. "New York is a great place to visit because it offers something for everyone."

The $435 trip will include round trip air fare from San Francisco to New York and seven nights of hotel accommodations. Scofield will hold a meeting and slide show to talk about the details of the trip at 7 p.m. Wednesday in University Union Room 219.
Jeffrey Crovitz, a graduate student specializing in civil engineering, received a one-year $1,500 fellowship award from the Central Coast Chapter of the American Public Works Association.

Crovitz will teach a laboratory course in the strength of materials under the fellowship.

Master of Engineering degree recipients while working toward a civil engineering, received a one-year $1,500 fellowship award from the American Public Works Association.

Central Coast Chapter of the Society of Photo-Optical Instrumentation Engineers (SPIE) has been given a total of $21,000 by several organizations for its concentration in management information systems. Two students within the computer science department received $1,000 scholarships. Additionally, five seniors in the management information systems program each received a $600 Chevron scholarship.

Charles W. Jennings has been named chairman of the art and design department. He succeeds Robert G. Reynolds, who has returned to full-time teaching.

Jennings had served as interim department head since March, and teaches courses within the department such as design fundamentals, fundamentals of drawing, illustration, water color and professional practices.

The Cal Poly chapter of the Society of Photo-Optical Instrumentation Engineers (SPIE) won a $2,000 grant from its national parent organization to develop its programs. The funds will be used to expand the chapter’s electro-optical lecture series and develop technical videotapes for outside distribution.

Cal Poly students were the first in the nation to form an SPIE student chapter. Additionally, the Cal Poly grant was the only one issued to a student group.

Computer science professor Emile E. Attala was named recipient of an award from an international society for his outstanding service to the organization. He received the Joan Laser Hayes Award from the Association for the Development of Computer-Based Instructional Systems.

Attala served as head of the computer science department from 1978 to 1983 and as interim associate provost for information systems in 1983-84.

Cal Poly’s computer science department is among the first undergraduate computer science programs to receive national accreditation.

The Bachelor of Science degree program offered by the department was one of 22 programs nationwide to be accredited by the Computing Sciences Accreditation Board.

Three metallurgical engineering students recently received scholarships totaling $2,500.

Senior Carol Ann Bauer won two national societies’ awards — the $500 Mary Norton Scholarship given by the American Society for Testing and Materials and a $500 American Society for Metals Undergraduate Scholarship.

Senior Robert Haun was awarded an AIC Foundation Scholarship for $1,250.

Junior Johnathon S. Fish received the Greg Stines Memorial Scholarship for $250.

Contributions for Notables must be received by noon Friday.
Parking revenues, campus citations examined

Portion of Cal Poly revenue goes to CSU parking fund

By Anna Cekola

Staff Writer

Although some students may find parking permit rates high, revenues made not only serve Cal Poly, but the entire California State University system.

Assistant Budget Officer Debbie Marple estimates that Cal Poly will generate $638,465 from parking permits this year. Of this figure, approximately 60 percent will be allocated to Cal Poly, with the remaining percentage going to a parking fund that benefits the CSU system.

Within the 60 percent figure left to Cal Poly, specific guidelines set by the State University Administrative Manual mandate three major areas to receive parking revenues. These areas are financial operations, logistical services and Plant Operations.

"This is a completely self-supported system based on an estimated number of permits to be sold," Marple said. "Anything to do with parking is paid by the parking fund."

Receiving the largest budget allocation logistical services. This primarily covers salaries and benefits received by Public Safety and clerical employees involved in parking matters. This allocation is also responsible for such details as parking permit printing costs.

Plant Operations receives the next largest allocation, which includes groundswork and receiving the largest budget allocation logistical services. This primarily covers salaries and benefits received by Public Safety and clerical employees involved in parking matters. This allocation is also responsible for such details as parking permit printing costs.

Financial Operations receives the last largest allocation, which includes financial matters.

Mustang ruggers kill Pomona Broncos, 40-0

By Jim Hawkins
Staff Writer

The Cal Poly Rugby team opened its winter schedule Saturday by crushing rival Cal Poly Pomona 40-0 in a non-conference match. The Mustangs got off to a slow start, with Pomona controlling the ball most of the first five minutes. But a little after five minutes into the match, the Mustangs' Rob Lopez scored a four-point try, followed by Jeff Magwood's successful two-point afterkick, and Cal Poly SLO never looked back.

"We played great as a team. We really worked well together out there," said team spokesman Rob Frazier. "In rugby there can't be any O.J. Simpsons, no superstars, we have to play well as a team or we won't play well at all."

The Mustangs' win gives them a 13-9 edge in the series against Pomona, which has traditionally been one of the Mustangs' most emotional matches. San Luis Obispo also won the match last year by a large score, winning 30-3. "They (the Broncos) just came back from a trip to Iowa where they beat both the University of Iowa and Iowa State," said Frazier. "I think their biggest weakness is their inexperience."

Mustang coach Roy Berelowitz was also impressed with the way

Eight members of the Cal Poly football team were named last month to the All-Western Football Conference teams.

Punter Kevin Emigh, defensive back Terrill Brown, linemen Tom Gallo and tackle Eric Tautolo received first team honors. Named to the second team were wide receiver Lance Carey, center Don O'Henley and linebacker Rich Bosselmann. Martin, defensive end Tom Emigh, a junior, led the WFC in punting with a 43.1-yard average and was ranked among the top three punters in Division II. His 80-yard punt against Santa Clara was a WFC and Cal Poly record.

Brown's six interceptions was the team high. Gallo recorded 79 tackles despite missing two games because of injuries. Tautolo, a 6-5, 310-pound junior, anchored the Mustangs' offensive line.

Martin had 41 receptions, five for touchdowns, and also saw action as a kick returner. Carey and Bosselmann recorded 79 and 61 tackles, respectively. O'Henley, a 6-2, 260-pound senior, is the only graduating starter on the offensive line.

Cal State Northridge running back Mike Kane and Sacramento State defensive back Lorenzo Lynch were honored as WFC players of the year. Sacramento coach Bob Mattos, who guided the Hornets to their first conference title, was named coach of the year.

University of the Pacific defeated Nebraska in three straight sets last month to capture its second straight NCAA volleyball championship. The Tigers, the Pacific Coast Athletic Association champions, stunned the Cougars 15-12, 15-4, 15-4.

To reach the finals, Pacific survived a grueling Northwest Regional that included six teams from the PCAA, which is considered by many to be the strongest league in the nation.

Kelly Hayes continued her impressive freshman season this weekend by taking a second and fourth place finishes at the UC Berkeley Invitational.

Including qualifying heats, each event consisted of about 80 swimmers from both Division I and Division II schools. Among the Division I schools were UC Berkeley and Stanford.

Hayes was clocked at 25:06 in the 50-yard freestyle to capture second place, and grabbed fourth place finishes in both the 200-yard individual medley and the 100-yard backstroke.

The freshman swimmer also had the top qualifying time in the 100-yard freestyle, although she didn't compete in the final heat. Hayes, the top seed from Berkeley and the qualifier from Stanford each chose to scratch from the Sunday afternoon race in order to prepare for their Monday classes.

Also swimming strong races for the women were Claudia Lynch and Barbara Carson, who reached the final heat of the 100-yard backstroke.

In the men's division, it was Rich Swoboda and Steve Schiel who swam well for the Mustangs.

Swoboda reached the finals of the 400-yard individual medley, while Steve Schiel didn't reach any final heats but was able to better his times.

WAITE is optimistic about freeing hostages in Beirut

BEIRUT, Lebanon (AP) — Anglican Church eminatory Terry Waite said Friday that his efforts to return to Moslem Beirut next week were being optimistic he could win the release of three Americans and other foreign hostages held in Lebanon.

"There has been given to me that now is a reasonable time to come back, and one is able to purchase the contacts and hopefully to be able to try and work a resolution to the problems we face," Waite told reporters.

"I think if we get some resolution to this hostage crisis that will be a step toward Lebanon experiencing the peace that the people here deserve," Waite said. personal envoy of Archbishop of Canterbury

Robert Rennie, criticized secret U.S. arms sales to Iran, which

the Reagan administration says were made at least partly to help
liberate Americans here. Waite said trading arms for lives
cheapens human life.

"Waite has been credited with helping to win freedom for three Americans who had been held by Islamic Jihad, a pro-Iranian Shi'ite Moslem group.

Sixteen foreigners remain
missing in Lebanon — six Ameri-
cans, five Frenchmen, two Britons, one Italian, an Irishman and a South Korean.

Waite flew in from London on an unscheduled Middle East Airlines flight.

Waite had cited fighting between
Shiite Moslem militias and Palestinian guerrillas for control of the two camps as one factor that delayed his trip, originally planned for Christmas.

calendar

wednesday 14

• Workshops dealing with In-
cest: A Support Group for
Women, will be held from 2 to 4 p.m. at Wednesdays at the Counsel-
ing Center.

• Fall quarter grades will be
given out from 9 a.m. to 3 p.m. Wednesday in the University Union Plaza, or in the Mustang Lounge and in South Korea.

Signups for classes in bike repair, woodworking, silk screen-
ing, ceramics and other crafts will be at 7 p.m. Wednesday in the University Union Craft Center.

MASH

From page 1

He later became the university's dean of engineering. In 1976, he taught at Portland Community College until coming to Cal Poly two years ago.

Mash had been a member of the Sigma Xi Scientific Research Society, the American Society for Metals, the American Society for Engineering Education and the National Society of Professional Engineers. He also had more than 25 technical books, contract research reports and journal articles published.

Mash's colleagues agree that he was a loyal teacher and friend. "I enjoyed working with him," said Jack Wilson, a mechanical engineering professor. "Don had a lot of depth to him and students sensed that he cared about them." He added that Mash was also a dedicated family person and the three things that were important to him were his family, the church and his work.

He is survived by his wife, Katherine E. Mash of San Luis Obispo; two daughters, Jane Ann Mash of San Luis Obispo and Susan Elizabeth Mash of New York; one brother, Eugene Mash of Merced and one sister, Vivian Siegfried of Sacramento.

SATELLITE

From page 1

and associated cabling and controls is $4,000, Tibbets said. This is a little less than 25 percent of the Audiovisual Services new equipment budget for 1987.

AV Services plans to install the satellite dish on the ground, at the northwest corner of the Business Administration and Education Building. "These types of satellite dishes function better on the ground," he said.

"Audiovisual Services must present the site location plan for approval, due to the aesthetics of having a satellite dish on campus," he said.

AV Services decided to purchase a satellite dish at the request of instructors who use the existing cable system and are aware of the additional programming available through satellite, Tibbets said. The new system would be an additional source of programming available through satellite, Tibbets said. The new system would be an additional programming source that would improve the quality of the Audiovisual Services programming used by instructors.

The satellite television receiver would improve the quality of master video tape programs that AV Services tapes off the air for classroom use. A system for receiving off-campus programs by satellite will also be available. These programs are interactive and require a television in the viewing room. AV Services will tie this system into the existing campus cable network.

The new satellite dish will also provide viewing of educational programs as they are being aired. The system will be a receiving-only site.

There hasn't been a definite decision made on what type of satellite dish will be purchased, but Chaparral is one brand name AV Services has been investigating.

and associated cabling and controls is $4,000, Tibbets said. This is a little less than 25 percent of the Audiovisual Services new equipment budget for 1987.

AV Services plans to install the satellite dish on the ground, at the northwest corner of the Business Administration and Education Building. "These types of satellite dishes function better on the ground," he said.

Audiovisual Services must present the site location plan for approval, due to the aesthetics of having a satellite dish on campus," he said.

AV Services decided to purchase a satellite dish at the request of instructors who use the existing cable system and are aware of the additional programming available through satellite, Tibbets said. The new system would be an additional source of programming available through satellite, Tibbets said. The new system would be an additional programming source that would improve the quality of

Audiovisual Services programming used by instructors.

The satellite television receiver would improve the quality of master video tape programs that AV Services tapes off the air for classroom use. A system for receiving off-campus programs by satellite will also be available. These programs are interactive and require a television in the viewing room. AV Services will tie this system into the existing campus cable network.

The new satellite dish will also provide viewing of educational programs as they are being aired. The system will be a receiving-only site.

There hasn't been a definite decision made on what type of satellite dish will be purchased, but Chaparral is one brand name AV Services has been investigating.
