Local goats steal the show in play audition

By Jane Gumerlock

People auditioning for a play is a common occurrence, but goats auditioning for a play is quite a different story. Such was the case at a goat audition Saturday for the Cal Poly production of "Teahouse of the August Moon."

Two goats, Millie and Tillie, along with their owner, Joan Hanley, showed up to audition for the play. The goats did not appear nervous as they cavorted about before showing off for the director of the play, Roger Kenvin. However, it quickly became a matter of sibling rivalry when the two goats tried to outdo each other for the coveted spot.

In one of the scenes in the play, the goat is supposed to jump onto a jeep. To recreate that scene, the goats were to jump onto a table. Unfortunately, the goats had other ideas. While their owner tried to coax them with some eucalyptus branches, and Kenvin bribed them with readings from Shakespeare, the goats were not impressed. Only after Kenvin put the Shakespeare book away did Tillie show that she could jump on the table. Not to be outdone, Millie followed suit.

"Teahouse of the August Moon" is a play about the occupation by the Marines of Okinawa, Japan. One captain is sent to a village to Americanize it, but instead the village makes a Japanese out of him.

According to technical director Howard Gee, the goat has rather a small part, but it's a part which will have the audience grinning. Lady Astor, the name of the goat in the play, has two small scenes. In the show a boy, played by freshman animal science major Scott Hansford, leads the goat around, so the goat will not be unsupervised. Hansford himself raised goats when he lived at home, so he sees no problem in acting with the goats in the play. "Once they get used to being around people, Millie is all black, and Tillie is a striking black and white.

While watching the goats perform, Hanley explained that goats are personable animals, and hers especially love almonds, Coke, and beer. Goats live to be about 15 or 16 years old, and Hanley said her goats are reared for milk production.

Adapting skills needed in job

Speech degree is helpful

By Anna Cekola

The versatility a speech communication degree offers in adapting to any job situation was a main point stressed at a career information symposium Saturday.

Presented by the Cal Poly speech department and an internship project of Word of Mouth President Christine Fagerlin, the symposium featured former Cal Poly speech communication graduates who have entered various career fields.

"Most U.S. industry is becoming more service and marketing oriented," said Bob Perry, a 1971 graduate and bank manager. "A

Speakers take stand on world politics

By Monica Fiscalini

The speakers at Friday's Educational Peace Forum, a retired admiral and a Stanford professor, proved that one does not have to be a flower child to advocate peace.

Adm. Noel Gayler, former U.S. Navy commander-in-chief, discussed the use of nuclear weapons by the military. Dr. David Holloway of Stanford University discussed Soviet national security.

Gayler, who spent 45 years in military service, has become a spokesman for the banning of nuclear weapons. A former nuclear target planner, Gayler was asked when he realized that nuclear weapons should be banned. He replied, "I think when I became aware that there was no rationale to the targeting — that we had a targeting policy which said essentially, 'We've got so many nuclear weapons, Find a target for them.'"

"If the U.S. should enter into a general nuclear agreement with the Soviet Union, it would be followed by other countries.

There are many illusions people have about nuclear war, Gayler said. He believes these delusions could be eradicated through education and enlightenment.

Gayler listed several delusions, including a delusion about the number of weapons in the world. Balance is not the important thing, he said, because the first 100 nuclear weapons would end the world. Also, Gayler noted, it does not matter where weapons are based — it is where they land.

The men's basketball team suffered two heart-wrenching losses — one in the final seconds of the game — to Riverside and Pomona this weekend. See SPORTS MONDAY.
Senate misses mark

Like it or not, the Student Senate is our Voice to the Administration. In their recent newsletter, ASI Times, they bragged about all the resolutions passed this year already.

While the effectiveness of a senate can’t be measured by the number of resolutions passed, the kind of resolutions they discuss shows what they think is important.

The most notable resolutions discussed in the senate so far have been one opposing Proposition 61, one asking the San Luis Obispo Chamber of Commerce to let us retain our university policy, it can make recommendations and lobby for administration.

Though the senate is powerless to actually change university policy, it can make recommendations and lobby for Administration action. For example, last year the senate got business hours extended at student support services offices and looked into putting more bike lanes on campus.

Issues such as teacher shortages and curriculum changes, and ideas to make graduating in four years possible have yet to be discussed.

It would be nice to see this year’s senate put aside political squabbles and do the job they were elected to do: represent student needs and fight for them to be met.

Students attend Poly for different reasons

Editor — In reference to Jane Gumerlock’s column, “Learning for the sake of learning” (Jan. 22), I must agree with her assertion that many students lose sight of the significance of their educations in their struggles to get good grades. I, too, know many students who just want to get school out of the way so they can pursue their careers. Four years ago when I was a freshman, I also felt angry at the “casual” students and their lack of interest in the learning process and performing well in it.

However, I no longer feel angry with those who are bored with classes and resent teachers. I simply shrug and accept them and realize that not all of my wishes that students will “learn for the sake of learning” will alter these people.

At 22 years of age, I’m sure of very little, but I’m reasonably certain that some people enjoy learning and others simply don’t — it’s just part of one’s nature. Polytechnic schools and impatience to begin careers don’t breed casual students. Hell, I still know them today in college. I don’t think I’ll ever change.

Two, why is He in Ohio? Three, why is He writing to Mustang Daily and send me this letter only to the large publishers for them to publish. I cannot predict the day nor hour, but only the period I believe with all my heart the quake will come in. The basis of my prediction is in the stars, as interpreted with Astrology in conjunction with my work.

There you have it. My only advice to you is to take shelter in open doorways. Don’t run around screaming like Shelley Winters.

As for me, I think I’ll just donate $1,000 to Oral Roberts and pray for an afterlife with lots of acorns and a warm tree in which to sleep.

Susan Edmondson is editor of Mustang Daily and she just after mailmen in Bermuda shorts.

So, instead of lamenting a lack of truly enthusiastic students as Jane Gumerlock does, I place “learning for learning’s sake” in the category of “seldom-acquired traits” and wish those who don’t enjoy what I’ve found to be the pleasures and enrichments of learning and intellectual growth. As for my path through education, “I took the one less traveled by, and that has made all the difference.”

Mustang Daily encourages readers’ opinions, criticisms and comments. Letters should be submitted to Room 226 of the Graphic Arts Building. Letters should be shorter than 230 words, must be typewritten and must include the writer’s signature.
W. German chancellor re-elected

BONN, West Germany (AP) — Chancellor Helmut Kohl's conservative coalition government headed for a re-election victory in nationwide voting Sunday, according to early computerized projections.

Projections by the ARD television network gave Kohl's Christian Democrats and their Bavarian sister party, the Christian Social Union, 44.3 percent of the vote. The business-oriented Free Democrats, junior party in the coalition government, were projected to win 8.4 percent of the vote. The opposition Social Democrats were projected to receive 37.6 percent of the vote. It was reckoned that the anti-NATO Greens party would pick up 8.2 percent of the vote

ARD first projections are based on the returns from 17 representative districts across the country, officials said.

Chinese student accused of leaks

PEKING (AP) — Authorities arrested a student accused of giving intelligence to an American reporter, the official news media said Sunday, in what appeared to be the first move against the press in China's anti-Westernization campaign.

The official Xinhua News Agency said in a two-paragraph report that Lin Jie, a student of Tianjin University, was arrested for "his secret collusion with and providing intelligence to" Lawrence MacDonald, reporter for the French news agency Agence France-Presse.

The report said conclusive evidence was obtained by the Tianjin office of the State Security Bureau, a secretive organization responsible for China's external security.

GOATS

From page 1

During the audition, the curious animals unabashedly sniffed into other people's faces, and Tillie tried a taste of pen and paper. Apparently she did not enjoy it, for she quickly abandoned it for tastier things such as eucalyptus branches.

Hanley explained that getting the goats to do something can be rather difficult in a different surrounding, but they quickly adapted to the newfound attention of the people at the audition. The only thing that did not seem to impress Millie and Tillie was Kenvin's request that they read from Shakespeare. Instead of showing a penchant for the Elizabethan playwright, the goats tried to take a nibble out of the book.

"I'd say the goat needs to show passion, a rage of emotion, have pretty eyes, and a great smile," Kenvin joked as he watched the two goats perform. The goat is probably the luckiest performer, as it gets its own dressing room (the lawn outside the theatre) and its own entrance (through the garage behind the stage.)

Live animals are not something new to the Cal Poly stage. According to Gee, a live pony was used in a production of "Cinderella" a few years ago. Kenvin is also not a newcomer to having animals in his productions. In the musical "Showboat" he had a Great Dane who refused to perform one night. "Actually, I think that animals and children are easier to work with than adults," Kenvin said.

Toward the end of the audition, Kenvin was toying with the idea of putting both goats in the play instead of just one, or using one of the goats as an understudy. He seemed a little discouraged that more goats did not show up. "It's a reflection of American theater when goats' ambitions don't rise above their stomachs," he said.
Poly drops pair of CCAA games

By Elmer Ramos

The California Collegiate Athletic Association, emerging that this past weekend, the Cal Poly basketball team finds itself in a position where the postseason tournament and playoffs may be a no-no.

The losses — 75-56 to UC Riverside on Friday and 60-57 to Cal Poly Pomona on Saturday — of the situation is that Poly has fallen into the bottom half of the standings. Only the top four teams are invited to the CCAA’s postseason tournament.

“It hurts,” said Poly coach Steve Beason. “In this conference, you have to win at home. We’ve really got to look for those wins next week.”

“I think I’ve made a realistic goal of making the top four but it’s going to be tough because there isn’t a weak team in this conference.”

Poly found out Friday that when the Dynamic Duo is shut down, a not-so-dynamic ending is the result. For the first time this season, Sean Chambers and Melvin Parker both were held to single-figure scoring. Chambers was two of 12 from the floor and finished with seven points.

Parker was five for 14 and scored 10.

The cold shooting was contagious. Poly connected on only 39 percent of its shots. Despite the inability to find the hoop, the Mustangs managed to take the lead once in the first half and close to within two twice in the second half.

“I think the problem was for the first time this season, we faced two dominant big people,” said Mark Shelby, who led the Mustangs with 11 points.

Riverside’s twin towers of Robert Jimerson, who finished with a game-high 24 points, and Paul Kapurtkiewicz kept the Mustangs out of the key most of the contest. Kapurtkiewicz, a 6-9 center, blocked a pair of shots early and that kept Poly aware of his presence the rest of the way.

Riverside led, 32-24, at halftime. Parker and Jeff Gray led the way after intermission, as Poly cut the deficit to two. The Mustangs could not maintain the attack, however, as Riverside had its cushion back to eight points in little time. But instead of going off to the races, it was off to the free throw line.

Riverside shot 14 free throws in the final five minutes, converting on each one. When the dust settled, Riverside had extended its lead to 90-62.

Wrestlers knock off Gators, 34-6

By Jim Hawkins

The Cal Poly wrestling team won its sixth straight home dual meet Thursday night when it destroyed the San Francisco State Gators, 34-6.

The Mustangs dropped only two of the 11 matches, and recorded several big wins. Junior Eric Osborne, currently ranked No. 5 in the nation at 167 pounds, improved his record to 21-2 after easily outpointing his opponent, 13-3.

Cal Poly’s other ranked wrestler, Malcolm Boykin, who is No. 18 at 158 pounds, squared by his opponent 5-4 to move his record to 16-4-1.

Freshman Rick Ravalin of Cal Poly built up a 7-4 lead on his 190-pound Gator opponent before pinning him with 15 seconds left in the match. The win brings his record to 0-3-6.

Heavyweight Ben Lizama was another big winner for the Mustangs. He won his match handily, 16-2, using a combination of two-point takedowns and near-falls on his opponent, who failed to score until the third round. The victory gives him a 13-7-1 record on the season.

Freshman Owen Carlin won his second match in a row for his second victory of the season, scoring a 5-2 win over the Gators’ Lemarl Cooper in the 142-pound division. Carlin is now 2-12 on the season.

John Galkowski, 118 pounds, decisioned his opponent 5-3. Galkowski went ahead 5-1 on a near-fall in the second round, and held on to defeat the Gators’ Rick Goodwin. The win brings his record to 7-3-1.

Darren Rodriguez of the Mustangs won the most exciting match of the night, 10-9, in the 126-pound weight class.
Broncos look strong in defeating Mustangs

By Karin Tindall
Staff Writer

The two-time defending national champion Lady Broncos of Cal Poly Pomona expressed interest in a third straight crown on Saturday, rolling over the Lady Mustangs 90-62 in the Main Gym.

After leading by 11 points at the half, the Lady Broncos came back to outscore the Lady Mustangs by 17 points in the second half, bringing them one step closer to their third straight NCAA title.

Pomona, which leads the league in scoring with an average of 71 points, played way above average, while San Luis Obispo, second in the league in points averaged, played only a little better than normal.

Mustang center Sherrie Atteberry, who leads the league in scoring with an average of 71 points per game, led the Lady Mustangs in scoring Saturday with 22 points. Atteberry also led her team in free throws by making eight of 14, but said that a lot of missed shots cost them the game.

"We missed a bunch of free throws and that pulled us out of the game," she said. "Against Pomona, you've got to take everything they give you," she added.

But the Lady Broncos were not giving anything the Lady Mustangs could use.

The Mustangs had several players get into foul trouble trying to defend the potent Bronco attack, and by game's end Jordan, Sherinne Barlow, Janet Jorgensen and Catherine Barlow had all fouled out.

The loss of Barlow and Jorgensen was disastrous for the Mustangs, who are playing without academically ineligible freshmen Trina Tualemoua. The forward was tied for first place in the league in shooting percentage, hitting at .500 clip.

Mustang coach Jill Orrock called the loss a bit disappointing, but was still confident of a win against Pomona later on in the season.

"The key," said Orrock, "is that our five starters have to stay in the game and shoot well."

Jordan commented, "We made a lot of mental errors that I think lost us the game."

"I think if we had kept up with them and hadn't made these mistakes, we would have been OK."

Mustang coach Jill Orrock called the loss a bit disappointing, but was still confident of a win against Pomona later on in the season.

"The key," said Orrock, "is that our five starters have to stay in the game and shoot well."

Orrock said that when playing the Lady Broncos her team has to take advantage of everything.

"Against Pomona, you've got to take everything they give you," she said.

But the Lady Broncos were not giving anything the Lady Mustangs could use.

From page 4

"You look at the score and it looked like it was a breeze, but it wasn't," said Riverside coach John Masi. "It was a very hard-fought win. It's our first league win here in three years."

A weekend split did not seem out of the question, however. Pomona entered the contest at 1-3. But Saturday's battle turned out to be almost as tough as Friday's.

Despite leading by as much as six points, the Mustangs could not put Pomona away. Pomona used three-point baskets to pull ahead, 55-54, with 1:36 remaining. The next minute's events probably hurt the Mustangs as much as what happened right before the buzzer.

With 1:20 remaining, Parker was fouled and sent to the line for a pair of shots. He missed both. A second later, he picked up his fourth foul. Parker did not last much longer, fouling out with 35 seconds left. Tony Theisen buried both free throws to give Pomona a three-point advantage. Parker's designated three-point shooter, Mark Otta, then entered the game. Otta's baseline jumper from behind the three-point arc fell in to tie the game with 15 seconds remaining.

However, Pomona wasted little time bringing the ball back up the court. With two seconds left and the crowd of 1,758 thundering, a wide-open Adam Sacks waited to pull the trigger. Poly's Mike Wintringer tried in vain to call timeout, but the buzzer went off before the referees noticed him.

"We probably should have called a timeout (after Otta's basket) to set up a defense," said Beason. "That was my fault."

Parker broke out of his slump Saturday, making 11 of 14 shots for 23 points. Mike Wintringer's deadly outside shooting produced 12 points, while Chambers managed only eight. The Mustangs, however, shot only 29 percent from the free throw line.

Bill Dobbs hit two three-pointers to lead Pomona with 11 points. Terry Stevens scored 10 and Darron Suttle had nine.

Swimmers lose to Matadors

By Dan Ruthemeyer

Sports Editor

The Cal Poly swim teams ran into some stiff competition Saturday, as they lost to Cal State Northridge in their second conference meet of the season.

The loss drops both the men's and women's conference records to 1-1 after they each started the season with wins over Cal State Los Angeles on Jan. 17.

Freshman backstroke swimmer Amy Holland turned in the Mustangs' most impressive performance Saturday by beating defending national champion Stacy Mettam in the 200-yard backstroke. Holland won the event in 2:10.71, which is just over a second faster than the national qualifying time.

Also, recording first place finishes for the women were Nancy Stern, who won the 200-yard breaststroke; Linda Tucker, who took first in the 200-yard butterfly; and Liz Linton, who captured the 1,000-yard freestyle.

Despite their several strong, individual performances, the Mustang women were done in by the depth of the Northridge freestylers.

"We won all the stroke events and the distances, but they took all the freestyles," said coach Bob Madrigal. "You just can't give that up and expect to win."

The Northridge women placed strongly in the 50, 100 and 200-yard freestyle events to help them to the win.

In the men's competition, junior Neil Leary won the 200-yard butterfly for the only first place finish for the men.
Crop loss and heating costs in cold snap may cool profits

By Julie Anne Lauer

The recent cold weather has meant more to the crop science department and project classes which the planning began heating the area at about 11 p.m. when the temperature dropped below freezing. The area was heated with diesel burning potable heaters. These heaters were a variety of severe heaters, the air all around the trees, and a wind machine which kept frost from forming.

Johnson said that although the heaters were fired up, workers could not ate the temperature high enough to prevent some freezing, especially on the crops. The tree damage was done to avocados which were out of range of the orchard heaters, but mostly of the trees suffered some minor damage.

Johnson said that in the citrus groves, there was the use of one wind machine and the orchard workers, but workers were able to hold the temperature above 28 degrees. As a result the citrus trees suffered only minor damage. Though Jan. 16 and 17 were the coldest, the workers still needed to heat the areas again the following two days.

On other cold nights during the past few weeks, the temperature did fall below 32 degrees until daybreak; as a result the air did not stay cold long enough to need heating.

The cold weather also caused some minor damage to other crops on campus. Some crop projects suffered crop damage and fresh, and some vegetable crops may have been set back a little in their growth.

As far as long term project damage from the cold snap, Johnson said there will be very little if any profit from the citrus and avocado crops because of the high cost of electricity and fuel for the heaters.

In addition, some of the avocado groves may have been damaged to the point that they may not produce new buds and fruit next year.

Johnson said that in the 26 years that he has been at Cal Poly, this is the most cold weather damage in January.

According to Ronald Regan, head of the ornamental horticulture department, some pots containing the OH Unit suffered minor frost damage.

Regan said most of the plants at the unit are given heavy house and therefore were protected from the cold.
SYMPOSIUM

From page 1

speech communication degree helps prepare graduates to adapt to the conditions of this need for marketing.”

Valerie Gilbert, a 1985 graduate and sales manager of a Bay Area hotel, stressed the importance of persuasive skills gained with a speech major.

“Communication is the most essential skill needed because it allows a general awareness of how people and organizations work,” Gilbert said.

For Fagerlin, the symposium culminated months of organizing and provided the opportunity for speech communication colleagues to come together.

“Networking and utilizing resources by making and keeping contacts was a valuable part of the symposium,” Fagerlin said.

She added that the symposium was a good opportunity to show speech communication majors career prospects. “Many people have knowledge, but can’t tell others about it,” she said. “This major allows the ability to communicate and express knowledge in all walks of life.”

PEACE

Adm. Noel Gayler

From page 1 that counts.

He called Star Wars a “magic shield” and a “cruel hoax,” and stated the biggest delusion is that strength is found in nuclear weapons.

The Soviets can be contained, said Gayler, but they cannot be coerced. To contain them, he suggested resolving. “There is no sensible military use for nuclear weapons.”

Gayler said he has devised a process to help bring peace. This process includes: reducing threatening language, giving up military and nuclear war fighting doctrines, encouraging exchange, putting a moratorium on further testing and deployment and, most importantly, deep and continuous cuts in nuclear weapons.

Gayler listed things the public can do to end the threat of nuclear war, rather than leaving the job up to experts. He suggested that people learn to spread the word about the danger of nuclear war. He asked that the mass media not “bury the problem under yesterday’s ball game.” He advised doctors to say to their patients, “You’re more likely to die from a nuclear war than any other single cause.”

David Holloway, an authority on Soviet policy and arms control, explained Soviet leader Mikhail Gorbachev’s new political thinking. He said detente ‘needs to be understood to grasp the new thinking. Detente centers around parity, which is equality in numbers and mutual deterrence. Holloway said the process of detente totally collapsed with the Soviet invasion of Afghanistan.

Holloway went on to explain Gorbachev’s new thinking, which is based on the premise that victory is impossible with nuclear war. Holloway said that if given the choice, the Soviets would pick peace over socialism. Gorbachev has realized that security has to be mutual. Human race interests will come before pro-lematic issues, and the world needs cooperation as it becomes interdependent and pluralistic, he said.

However, Holloway said he has seen an element of propaganda in Gorbachev’s new thinking.

The Educational Peace Forum was co-sponsored by Cal Poly’s Students for Social Responsibility and Physicians for Social Responsibility.
