New Poly Royal Queen crowned

By Donna Taylor

An animal science senior was crowned the 1987 Poly Royal Queen Thursday night.

Debbie Francis, sponsored by the Veterinary Science Club, was selected from among 51 contestants, the most ever to run for the title in the 55 years of Poly Royal.

“I'm shaking right now,” said Francis just after the announcement to 500 people in Chumash Auditorium. “This is such a great honor.”

The Fountain Valley native was a princess in last year's court.

“But I don't think that had anything to do with it,” she said the 21-year-old. “The contest was so different this year, being split into two nights, and with so many girls running.”

Master of Ceremonies Walt Lamberti announced the four runner-up from the 10 finalists, who were each given yellow roses. First runner-up Chrissy Sparling, sponsored by the Redroco Club, will take over the queen's duties in case of illness or other problems. The rest of the court includes second runner-up Mandy Veehan, third runner-up Delaney Peters and fourth runner-up Linda Layon.

Francis was presented a crown, a sash, and a dozen red roses by 1985 Poly Royal Queen Angela Darnell. Last year's queen was unable to attend.

All 51 contestants introduced themselves to begin the evening, and then the 10 finalists were announced. Finalists were chosen Tuesday after all entrants responded to a prepared question.

Two questions regarding Poly Royal were given to each finalist at the pageant, one prepared and one impromptu, according to ASI information director Judy Phibbs. Francis' impromptu question had an unusual theme.

“If you were queen, what would you do if a fire broke out in one of the buildings?” asked Lamberti.

“I would remain calm, and tell everyone to stay calm and move to the boundaries of Dexter Lawn, for example,” said Francis, who wore a red taffeta dress. “I would tell them to try to enjoy the other activities like the Tractor Pull. Oh, and I would call the fire department.”

Judge Bob Thompson, adviser to the Poly Royal board, said the decision was very difficult.

“We looked for speaking ability, poise and appearance,” said Thompson. “The competition was really tough. Debbie had a lot of poise and she seemed very relaxed.”

Thompson said he was aware that Francis was in last year's court, but said that wasn't really a factor in the decision. He See QUEEN, back page

Life comes to Cal Poly

Past photo editor speaks

By Stephanie Flahavan

Two old friends reminisced Friday to an audience of students and faculty about their days with Life magazine.

Richard Pollard, former photo editor at Life, and Mark Kaufman, former Life photographer and now Cal Poly photography teacher, worked together for several years.

Pollard showed exclusive slides of John Kennedy's assassination derived from 33 frames of 8-mm film. The sequence was detailed and graphic, beginning with Kennedy waving from a convertible limousine and ending with the slain president's body slouched in a bullet hole.

“There were five cameras present, but we were the only ones with color film,” Pollard said. “We could hardly wait to show the slides.”

Needless cruelty

Ot Monday, veteran TV emcee Bob Barker announced he would not host last night's Miss USA Pageant. Barker, who is celebrating his 20th year with the pageant, said he would not be the host if officials continued to insist that semi-finalists wear fur coats.

Barker is a vocal animal rights activist. He often tours the country lecturing on the cruelty of the furrier industry, and telling people not to wear fur coats. Barker said of the pageant, "I think it would be hypocritical of me to appear and telling people not to wear fur coats."

The voices of protest also overlook another aspect of the lease plan. Even if all the leases were granted, even if all the oil companies found it profitable to drill out there to any large extent, the resulting wells would not be nearly as numerous or as the hundreds of wells already pumping in our state-controlled waters.

The state -- not the federal government -- controls the water from the beach out to three miles. The vast majority of the ugly wells that environmentalists are shaking their fists at in this category, and the state routinely grants drilling permits on the ugly wells visible off Santa Barbara and Ventura are in state waters. The testers of oil ugliness might direct their anger to Sacramento, not necessarily to Washington.

Much of the protest -- and fighting money -- of the anti-drilling lobby comes not from indignant environmentalists but from coastal landowners and developers. Acting in shrewd self interest, not necessarily a love for California's scenery, these people do not want to see coastal property values decline as a result of increased drilling. The recent battle to stop Occidental Petroleum's drilling in Pacific Palisades was not fought by well-meaning environmentalists as much as it was fought by millionaire landowners in the area.

I am a naive Californian, deeply concerned about this state's survival. Certainly I do not like the idea of more oil wells off the coast, but the enthusiasm of the anti-drill lobby raises an important question. Which is more destructive to California? -- what might happen offshore, or what is already happening on land? Perhaps the anti-drilling protesters would do better to direct their anger and money to stop condominiums on the beach, and view home on the bluffs rather than a few oil wells out to sea.

Gov. Deukmejian has deliberately angered the Coastal Commission in recent years, and coastal development in our state is exploding. What good are unpolluted ocean views if there are no unobstructed beaches or bluffs to view them from?

Perhaps the environmentalists should arrange a trade. They could agree to offshore drilling if the state and federal government would agree to greatly expand park protection to our remaining unpolluted coastline and open spaces.

Such a trade would serve our future well. Development is permanent, the controversies and housing tracts spreading across our state like mold in a petri dish will never be undone. Drilling rigs, however, are not permanent. The oil beneath them will not last forever and the oil companies will no longer maintain them once it is no longer profitable to do so. When the oil is exhausted, the oil companies can be forced to dismantle the rigs, or we could let the mighty Pacific do the job in its own time.

We have the right to protect our coastline, but we should not let our real for preventing offshore oil drilling blind us to the real tape of our state that is occurring onshore.

COMMUNISM PROHIBITS FREEDOM OF THOUGHT

Editor — I am writing in response to the letter "Americans are naïve regarding communism," Feb. 11. In this country we are free to have our own thoughts. One effect is that we can freely exchange ideas in this newspaper. I thank God for this.

As I have experienced war and have lived with communists for six years, I just hate communists. My brother-in-law, a former soldier who retired because of a wound many years before the fall of South Vietnam, was put in a so-called long-term re-education camp (10 times worse than crowded prisons in the U.S.).

My father was also put in the above camp, simply because he was in favor of democracy. Worst of all, he received no fair trial or hearing. He was only released from the camp after recovering from parasites when he was put in a dead house to await his death and was ready to

Panetta addresses issues

By Danielle Lurieye

The Iran scandal — or "Irangate" — is now the predominant issue in Washington, and it is putting off action on other issues, said Representative Leon Panetta (D-Mo.) in a press conference Tuesday.

Panetta was also at the San Luis Obispo office to answer questions the public had about what is happening in Washington.

"The situation just generally in Washington is with the Irangate situation," said Panetta. "I think that that still pretty much predominates the scene. It is probably going to last anywhere from eight to 10 months. The consequence of that is that it does tend to paralyze not just the President but the Congress in dealing with a number of key issues."

According to Panetta, these issues, coming up in the next few weeks, are a possible hold-off on $40 million of the $100 million approved last year in aid to the Contras, a relief bill for the homeless, trade legislation, the budget and offshore drilling.

Panetta said a delegation will prepare a response to Secretary of the Interior Donald Hodel's proposed plan to develop offshore oil drilling. "What we hope to do is to provide a clear and thorough response to the Secretary's five-year plan and hopefully submit an alternative which we will bring before the Congress."

Panetta strongly opposes the proposed five-year offshore oil and gas drilling plan for California's outer continental shelf. Last year Panetta and representatives Ralph Regula (R-Ohio) and Vic Fazio (D-Sacramento) were successful in getting legislation passed that would prohibit the leasing of areas off the California coast until at least February of 1989.

"I guess the most discouraging aspect about it (the five-year plan) is that it showed no willingness to compromise the basic issues that we have provided time and time again," said Panetta. "(Hodel) provided no conditions whatsoever with regard to oil spill concerns, the impact on fisheries, and air quality. None of those conditions was in his five-year plan."

"Lastly, when the secretary tops it all off with a threat that, if you don't buy this then I'll do something worse, then very frankly he sets a very bad basis in which we can hope to negotiate any kind of agreement. I think the secretary has pretty much decided the side he's going to come down, which is essential-ly on the side of the oil companies. I will be very surprised if we see any kind of compromise on the part of the secretary in the next few years."

Panetta is also working on a measure to delay any more money in aid to the Contra rebels in Nicaragua until the Contras have a full accounting of funds already sent. According to Panetta, the measure, to be voted on within the next two weeks, will delay a $40 million installment of the $100 million in aid to the Contras until Congress knows what happened to funds already sent to the Contras: $27 million in humanitarian aid from the United States and other money from third world countries.

"There seems to be support for that position, but I'm afraid that even if the House and the Senate were to pass this legislation the President would veto it, and I don't think there are enough votes for an override."

Panetta was recently appointed to a second two-year term as deputy majority whip-at-large in the House.

It (Irangate) is probably going to last anywhere from eight to 10 months'

— Leon Panetta

Oppotunity

Gates backs overseeing process

WASHINGTON (AP) — Acting CIA Director Robert M. Gates, facing sharp questioning Tuesday about the Iran-Contra affair in Senate confirmation hearings, testified last April that CIA employees believe in the congressional oversight process.

He said nearly two-thirds of the agency's employees had been hired since Congress tightened controls on U.S. intelligence a decade ago and "they know no other way of doing business than within the framework of congressional oversight."

But Gates and other top agency officials failed to tell Congress of the CIA role in the secret arms deal with Iran, or their suspicions that some of the proceeds went to help Nicaragua's Contra rebels.

Gates, a 43-year-old career CIA analyst, was nominated this month to replace William J. Casey as director of the CIA.

Battle intensifies in west Beirut

BEIRUT, Lebanon (AP) — Shiites fought an alliance of Druse and communists gunman for the third day Tuesday in a battle for control of Moslem west Beirut that has caused scores of casualties and set whole neighborhoods ablaze.

Police said at least 24 people were killed and 125 wounded Tuesday in west Beirut's fiercest factional struggle for three years. They said the toll was at least 30 dead and 150 wounded since the fighting began Sunday.

Dozens of fires raged in residential districts because the intensity of battle kept fire engines from getting through. Several apartment buildings were burned and scores of cars destroyed by gunfire and rocket-propelled grenades.

Grenade explosions and bursts of fire from heavy machine guns shook the city all day. Thousands of families took refuge in basements and bomb shelters.

Salmonella a problem in chicken

WASHINGTON (AP) — The problem of salmonella in the nation's poultry supply has grown so rapidly that today nearly four out of every 10 chickens sold to consumers are contaminated, the Agriculture Department says.

Contaminated food can result in salmonellosis, a food poisoning that produces flu-like symptoms within 12 hours to 36 hours after eating. The illness may last two days to seven days, and in some cases it can be deadly.

"We cannot have a risk-free food supply, but, on the other hand, if we can improve it, we should do so," says Donald L. Houson, head of the department's Food Safety and Inspection Service, the agency that oversees federal men and poultry inspection.

Alum leases ranch to School of Agriculture

By Julie Anne Lauer

The Swanton Pacific Ranch located just north of Santa Cruz has recently been leased to the School of Agriculture by a Cal Poly crop science graduate.

A portion of the ranch, approximately 3,000 acres and shares of stock valued at about $1 million, has recently been leased to the ranch center, like other enterprise projects, with all the profits going back into the ranch fund, according to Griel.

The project will be run as a ranch with student interns and labor wherever possible. It will be used as an addition to the present agriculture program to enhance the teaching program.

“We want to use this as an addition to our overall curriculum, not as a separate curriculum,” Griel said.

The ranch will be used for field trips, internships, some senior projects and possibly some master's theses.

“This is an absolutely fantastic opportunity,” Griel said. “I can’t see us doing anything but gaining by it.”

Griel said that of the money given to Cal Poly by Smith to operate the ranch, only about $200,000 was taken out to use as operating capital. The remainder of the funds was put aside in an endowment.

The ranch land that Cal Poly is leasing from Smith is only a portion of the whole ranch, according to Griel.

Some of the land, including a narrow gauge railroad, areas used as campgrounds by the Boy Scouts and the part of the property that Smith lives on, were not made available to the university.

Currently Cal Poly has a three-year lease for the ranch with the possibility of permanent ownership at a later date, said Jim Griel, project director.

Grid said the ranch was made available to the School of Agriculture by Smith provided that the land remain open space agricultural land and for the benefit of agriculture students.

According to Griel, the ranch consists of about 1,900 acres of good cattle land, 1,000 acres of timber land, and between 130 and 150 acres of cropland.

There are now 115 Cal Poly cattle on the ranch. Griel said there are presently two forestry interns working on preliminary surveys of the timber resources.

Griel said one of the projects they hope to have on the ranch is a workable long-term sustainable harvest of redwood timber.

The ranch will be operated by the Foundation as a profit center, like other enterprise projects, with all the profits going back into the ranch fund, according to Griel.

Working up a sweat

Students who don Reeboks and sweatbands to head for some exercise are beginning to discover that health clubs aren’t just for pumping iron any more

By Carolyn Clancy, Staff Writer

Some students jump to pump iron, others to pound it out on the aerobics floor, and still others to sweat it out in the sauna. Whatever the reason for getting involved, students find that working out in San Luis Obispo’s health clubs can be a personalized experience.

The key to the success of San Luis Obispo’s health clubs has been just that. Each of the four primary clubs has gained its own personal recognition which draws in people with different ideas about exercise.

Gold’s Gym is known as the hard-core weightlifting club, and for this reason it can be intimidating to potential members.

“Gold’s is more of a serious lifting gym,” said Kathy Wright, a former Gold’s aerobics instructor who now teaches at Maloney’s. She chose to leave Gold’s because the emphasis on weightlifting caused the aerobics floor to suffer. The aerobics floor is small at Gold’s and only a few classes are offered daily, while Maloney’s concentrates more heavily on aerobics, offering 10 different classes.

This is because the owner of Gold’s Gym, Kevin Folsom, is interested in training professional and goal-oriented athletes.

“I think we’ve taken it (weightlifting) a little bit further,” said Folsom. Every member has a personal routine, which is set up by Folsom, and many members are working out for competition or rehabilitation. Recently two Gold’s athletes competed in a 100-mile race in Northern California, said Folsom.

The social atmosphere of the various clubs is also a major consideration of new members. Folsom has gotten complaints from some male members that the number of female members is disproportionately small, but he cares more about promoting a serious, individual workout program than membership ratios.

At one point, the gym was getting rather social in the evenings, which is the time most people go to work out. Folsom wanted to divide members’ cards into time periods so people wouldn’t socialize as much, but decided against the idea because he realized it would be impossible to prevent people from getting to know each other.

“People don’t want to go to bars,” said Marcy Maloney, owner of Maloney’s. She said people go to gyms because they like to exercise and it is inevitable that this will be used as a common interest to spark conversation.

“Some of the guys are really into it,” said Jan Lerner, a member of Gold’s. “People are there to do their own thing and then they leave.” Lerner said that though Gold’s is no social as other gyms, people are friendly and it is inevitable that people will meet at any gym.

Maloney said she wants her gym to be “a place for people to get into shape,” not just a social outlet. For this reason she tries to balance the services she offers to members: aerobics and weightlifting are equally important in order to get a total workout, said Maloney.

Even Calendar Girl has a social atmosphere. “Some of the ladies use the place as a gossip outlet,” said Paula Spano, a Calendar Girl aerobics instructor. “The women love to gossip about new instructors,” said Spano, and new instructors can gain reputations quickly by being late or using “wild” music for their classes.

The reason health clubs have become so social can probably be attributed to their popularity. Gyms get very crowded, especially in the late afternoons, and people end up working out alone.

The success of SLO gyms might be because they cater to individual tastes.

According to Lerner, this trend is the norm for most male members.

Calendar Girl caters to women who just want to work out with the girls. “If a girl doesn’t have a perfect figure, she may not want aella to see her,” said June DeViney, new manager of the for-women-only club. The majority of Calendar Girl’s members are college women, but the club has members of all ages.

“I liked it because it was all girls,” said Tina Beck, a Cal Poly sophomore, who feels more comfortable working out at Calendar Girl than at a coed gym. “You’re all here for the same reason,” said Beck, “and you don’t have to worry about getting picked up.”

The only gym in San Luis Obispo that doesn’t focus on the student population is Kennedy Nautilus Center. “We cater to businesses in the community,” said manager David Flores. The unimimidating, back-to-nature atmosphere is what draws the wide range of people who belong to Kennedy. Only about 25 to 30 percent of Kennedy’s members are students, said Flores, probably because few discounts are offered as compared to other gyms.

Calendar Girl offers programs to draw in women of all ages. DeViney created a weight loss program called the Diet Stop that currently has women of all ages shaping up. “We have girls from 16 to 50 on the weight loss program,” DeViney said. “I just think women want to look good and feel good.”

Some people have taken exercise so far that they want to work out before the sun comes up. At Gold’s they are called the “breakfast club,” and they are the people who are pumping iron at 4 a.m., when the gym opens.

Many of the earlybirds are California Men’s Colony employees, said Folsom.

Folsom has had requests to keep the gym open 24 hours a day, but he said that this would make it difficult to keep the gym clean and impossible to get anyone to work the graveyard shift.

Crowds are a common complaint of most health club members. Sometimes evening aerobics classes get so crowded at Calendar Girl that they have to be closed, said Spano. “Sometimes you have to wait a long time to get on some of the equipment,” said Lerner about Gold’s.

Although Maloney said she feels that “gyms aren’t for everybody,” in San Luis Obispo, there is one for almost every type of athlete.
How to buy a TV.

FOUNDATION

From page 1 gray carpet will replace the "out-of-date orange," and the expensive lighting over the general merchandise area will be replaced by more cost-efficient fixtures, and windows looking onto the University Union Plaza will be altered.

"We've had a lot of hassle with the huge windows in that area," said Routh. "When the sun heats them, there is a tremendous heat build-up. People have actually fainted from the heat. Through smaller windows and insulation, a majority of that heat build-up — plus the fading of some merchandise — will be eliminated."

Foundation Executive Director Al Amaral said the remodeling of the bookstore is the first step in a long-term facility renovation plan.

"The University Dining Room, Snack Bar and the Burger Bar all need renovation and/or expansion. We are trying to address the students' wants, and make them compatible with the services the Foundation already provides," Amaral said.

"Long-term plans for remodeling the Snack Bar include a redesign of the scramble area, where students get their food, as well as recarpeting and new dining tables," he said. "We want to create a new dining atmosphere there and in the dining room. Our goal is to get away from the institutional look."

Other renovation projects include a proposal to use Mustang Lounge for bookstore computer sales or additional seating for the Burger Bar, according to Routh. "The Foundation has made these proposals to the University Union more than once," he said. Routh. "It would be great if El Corral could move its computer sales area there. The U .U. desperately needs a new home — if not Mustang Lounge, then it has to be somewhere else." Routh said preliminary plans for using Mustang Lounge specify that half of the space would be used for computers, and the other half for sporting goods.

"The computer section would include a training room, and we would also be able to have computer repair on the spot, instead of bringing the merchandise to the bookstore.

"Some of these fixtures have been here since the bookstore opened."

— Nick Routh

INSURANCE

From page 1 caused the injury or damage."

Macias said the problem with filing a tort claim is that the parking lot incident was a result of direct vandalism, so the state does not assume responsibility.

"But if I were a student," he said, "I would go ahead and file against the state. It's hard to know what the Board of Control's decision will be." No students had filed claims as of Friday.

Sierra Madre resident Eric Kayser plans to pay for the estimated $92 worth of damage to his car's right window with his own money. He could have filed with his insurance company, but he's afraid his rates will increase.

"I didn't even think about Cal Poly paying for it. But maybe they should since I pay $60 for a parking permit," he said.

He added that the university should have a better security system; "then it wouldn't have happened," he said. Landreh said students and non-students have given Public Safety leads as to who the vandals were. Investigators are at work on the case.

Fairness Board hears disagreements concerning grades

By Donna Taylor

For students who feel they've undeservedly failed that required, dreaded class, an appeal to the Fairness Board may be the answer.

The board, consisting of a faculty member from each school, one person from Student Affairs, and two students, hears grade appeals when students believe an instructor has been unfair, according to Chairman George Beardsley.

"If you think that there has been a grading error, you should first try to resolve it with your instructor and then his department head," he said. "If that doesn't work, then you come to me."

The correct procedure, according to Beardsley, is for students to prepare a letter to the board indicating their problems, which should identify the teacher, course and include "evidence." Such as the syllabus, exams and papers.

"The board and I tell the student if we think the case has merit," said Beardsley. "If it does, I forward the letter to the instructor, who has a week to respond. We schedule a hearing, and testimony begins."

In his seven years on the board, including three as chairman, Beardsley said that the win/loss ratio between students and teachers is fairly even in cases that go to a full hearing.

"I would estimate that 60 percent of the cases we hear go in favor of the instructor, and 40 percent for the student," said Beardsley, who also serves as head of the economics department.

"In the past year, however, it has been more like 50-50."

An average of six cases per year go to a full hearing and recommendation. Currently, the board is hearing a case regarding a grade from fall quarter.

"The case involves a student's complaint that an instructor's syllabus assigned a certain number of points for a certain grade, and that she was treated unfairly with regard to that," said Beardsley. "We're in the process of completing the decision of that particular case right now."

The board operates under the assumption that the grade assigned was correct, said Beardsley, who also serves as head of the economics department.

"If you think that there has been a grading error, you should first try to resolve it with your instructor and then his department head," he said. "If that doesn't work, then you come to me."

The correct procedure, according to Beardsley, is for students to prepare a letter to the board indicating their problems, which should identify the teacher, course and include "evidence." Such as the syllabus, exams and papers.

"The board and I tell the student if we think the case has merit," said Beardsley. "If it does, I forward the letter to the instructor, who has a week to respond. We schedule a hearing, and testimony begins."

In his seven years on the board, including three as chairman, Beardsley said that the win/loss ratio between students and teachers is fairly even in cases that go to a full hearing.

"I would estimate that 60 percent of the cases we hear go in favor of the instructor, and 40 percent for the student," said Beardsley, who also serves as head of the economics department.

"In the past year, however, it has been more like 50-50."

An average of six cases per year go to a full hearing and recommendation. Currently, the board is hearing a case regarding a grade from fall quarter.

"The case involves a student's complaint that an instructor's syllabus assigned a certain number of points for a certain grade, and that she was treated unfairly with regard to that," said Beardsley. "We're in the process of completing the decision of that particular case right now."

The board operates under the assumption that the grade assigned was correct, said Beardsley.

"Claiming that you got a bad grade because a teacher didn't like you probably wouldn't hold up."

Beardsley said that some allegations against instructors include not following the syllabus, alleged cheating, treating the student differently from others, and miscalculating the grade.

"Considering that there are 16,000 students at Cal Poly, who each get grades in, say, four classes a quarter, that's nearly a quarter of a million grades year-round," he said. "With only six or so grades appealed per year, that represents a very tiny percentage. So there is really no common complaint."

Beardsley added, "The board makes no grade changes nor does it take punitive actions against any instructors. We merely liberate the cases and make recommendations."
Nuclear protests no longer have OK

LAS VEGAS, Nev. (AP) — Anti-nuclear protesters will no longer be given permission to demonstrate on a section of the Nevada Test Site because of growing civil disobedience, the Energy Department announced Tuesday.

"The decision is based on increased violations of laws and the rising cost of controlling protesters, road blockades and civil disobedience," said Energy Department spokesman Jim Boyer.

He said the department paid $302,000 last year for security guards and law officers to handle crowds at the growing number of demonstrations.

Two demonstrations this year have cost more than $20,000 for law enforcement, Boyer said.

The decision is not expected to have a major impact on the demonstrations at the site 65 miles northwest of Las Vegas, where nuclear testing is conducted for the United States and Great Britain.

The latest demonstration at the site was Feb. 5.

By Ken Miller

Many of the trees on campus which have become familiar to students and faculty are being chopped down.

Among the trees coming down are the Modesto ashes on Campus Avenue and the eucalyptus trees between the Dosixt Building and the Kennedy Library.

The trees are coming down because they have outlived their useful life, said Doug Gerard, Cal Poly executive dean.

"The trees have been around for 40 years, and eucalyptus trees get very brittle and start cracking. It presents a hazard to pedestrians and motorists on campus," said Gerard. "The trees get very brittle and start splitting vertically; for awhile they were wired together."

The removal of old trees is done as a regular part of campus operations. "We've been at it for three years now, but the reason so many trees are coming down so suddenly is because we just had some time where we could address the problem," Gerard said.

Starring summer, the allee pine trees around the science buildings will be taken out. The wood from the trees will be sold at auction, and the proceeds will go into student scholarship funds, Gerard said.

"We haven't gotten any complaints about the trees being a hazard, but we are getting complaints that they're being removed," said Gerard. "Even though I agree that they're beautiful, they present potential hazards to this campus, so there's little choice."

Mike Bowen, department head of architectural engineering, expressed his disappointment regarding the removal of the trees. "If I'm not mistaken there is some kind of beautification committee on campus. I wonder if they were consulted. I saw no hazard in the trees being there. There was some difficulty seeing around intersections, but the whole line of trees didn't present a problem. Things like this should not be done by the Administration," he said.

There is no Academic Senate beautification committee on campus. Associate Executive Vice President Howard West said that what Cal Poly has is a campus planning committee which is headed by Gerard. It is responsible for the overall facility design of the campus.

Jeff Cohen's multi-media presentation of the assassination of Rev. Martin Luther King, will begin at 7:30 p.m. Thursday in Chumash Auditorium. Advance tickets are $4.50 general and $3.50 for students. Tickets are 50 cents more at the door.

Twenty-five nonprofit groups from San Luis Obispo County will recruit volunteers from 10 a.m. to 2 p.m. Thursday in the University Union Plaza.

A closing reception for the "Transparent Colour" photo exhibit in the Library Photo Option Gallery will run from 7 to 9 p.m. Thursday in the Photo Option Gallery. Refreshments will be served.

All items for Calendar must be received by noon two days prior to the event.

65 mph speed limit supporters cite polls

WASHINGTON (AP) — Western and rural lawmakers leading the move to increase the federal speed limit to 65 mph are bolstering their case with public opinion polls, states' rights arguments and even lessons about teaching children to respect the law.

"A child now sits in the back seat and watches his old man drive and put it at 62 mph, because that is where you can get by," Sen. Alan Simpson, R-Wyo., said during debate on the measure last week. "It happens to be that the speed limit is 55. That is a pretty poor law."

But they are being countered by legislators and their allies, largely from urban and Eastern states, whose major argument is safety.

"Every recognizable piece of evidence indicates that speed on highways kills and that trucks and other vehicles operate most safely at lower speeds," says Robert Mann, spokesman for the American Trucking Association.

The Senate passed a highway bill Feb. 4 that would allow states to increase the speed limit to 65 mph on segments of interstate outside urban areas. The highway bill approved by the House on Jan. 21 would raise the 55 mph limit. Conflicts from the two chambers are expected to begin meeting this week.

Part of the dispute is tactical. According to the office of Sen. Sen. Strom Thurmond, R-Ind., chief Senate supporter of the higher speed limit, the bill would allow higher speeds on 13,910 miles of the 43,291 miles of interstate.
Mustangs Talley 4 overtimes in marathon win

By Elmer Ramos

POMONA — There was regulation and four, count ‘em, four overtimes. That’s a total of 60 minutes, or one-and-a-half games. Given the pace of the game, it took nearly three hours.

That’s how long it took the Cal Poly men’s basketball team to pull out a 94-93 California Collegiate Athletic Association victory over Cal Poly Pomona in an exhausting marathon Saturday night.

"People can’t imagine how tired we got," said Poly head coach Steve Beason. "We were like robots. You have to push yourself, and tonight we did.

The battle will go into the record books as the second longest in Poly and CCAA history. It took the Mustangs five overtimes to defeat Cal State Northridge in February 1972.

The victory, coupled with Poly’s 74-72 upset of league-leading UC Riverside on Friday, boosted the Mustangs to 8-4 and into a second-place tie with Cal State Dominguez Hills. Poly’s road record improved to 6-1, a remarkable achievement in the rugged CCAA.

Saturday’s grueling triumph tested not only the Mustangs’ endurance, but also their ability to dodge bullets. The biggest bullet was dodged when Pomona’s Adam Sacks, an 86-percent free thrower, missed a pair from the free-throw line with four seconds left in the second overtime, failing to break a 76-76 tie.

Melvin Parker and Darren Masingale both fouled out, but sophomore Errol Talley and freshman Kurt Colvin manned the frontline impressively. And although the Mustangs shot a miserable 35 percent from the free-throw line, they compensated with strong defense and rebounding.

In the end, it was Sean Chambers’ free throws that iced the game. After being fouled going for a dunk, he sank two to put Poly ahead 92-90 with 39 seconds left. Moments later, he converted on two more to make it 94-90. Pomona’s Bill Dobbs buried a three-pointer with one second left to make the final margin one point.

It was an emotional win that Chambers clinched the win with free throws. Despite scoring a game-high 33 points, the All-America forward was only 11 of 24 from the floor.

However, Errol Talley picked up the slack. The 6-5 forward poured in 14 points, 11 in the overtime periods, and grabbed a game-high 12 rebounds. Only a TD Talley has arrived from the line, he made five clutch free throws in overtime.

Talley’s biggest contribution came with one second left in the third overtime. After Mark Orrock made the promise to slow the pace and avoid running with the much faster Broncos, Talley inserted into the game and hit a three to give Pomona the overtime lead.

"It was ironic that Chambers hit the game-winner," said Talley. "This was the promise we made to slow the pace and avoid running with the much faster Broncos.

"The coaches have been telling me all week that I can play with the best and tonight I proved it," said Talley. "This is my chance to prove to my family, friends, the players and Cal Poly that I can play.

Assistant coach Mark Felix, the major source of frustration often appears to be Talley, was impressed but not convinced that Talley has arrived.

"If he wants to be great, he can," said Felix. "He has a lot of promise, but he has to make a commitment to this team. I don't like to dog him, but I have to.

The Mustangs will play their final regular season games this weekend when Cal State Los Angeles and Cal State Northridge visit the Main Gym.

For the Mustangs to have any part of the CCAA title, they must win both contests. Depending on how Riverside and Dominguez Hills fare, Poly can win the title outright or share it in a two- or three-way tie.

Pomona pounds Lady Mustangs

By Elmer Ramos

Staff Writer

POMONA — If Cal Poly women’s basketball coach Jill Orrock keeps her promise, the Lady Mustangs will take more shooting practice this week than they will care to remember.

Orrock made the promise Saturday night after Poly posted a pitiful 27-percent shooting percentage en route to being blown out by defending national champions Cal Poly Pomona, 67-44. Pomona’s victory ensured champions Cal Poly Pomona, straight California Collegiate Athletic Association title.

The loss dropped Poly to 4-6 and fifth place. Despite being swamped in their weekend series — last-place UC Riverside upset the Lady Mustangs, 63-60, on Thursday — Poly remains in the hunt for a playoff spot. The top four teams receive berths in the CCAA’s postseason tournament.

Orrock acknowledged that Poly probably picked a bad time to take on Pomona, which is 9-1 and ranked No. 2 in Division II, because the Broncos’ string of 31 consecutive CCAA victories was snapped two weeks ago by Cal State Los Angeles.

"I knew that it (Pomona’s loss) would be very good for us or very bad," she said. "They were fired up. I think their coach said, ‘Hey, no more of this.’"

The story is best told by statistics:

At halftime, Pomona led 44-18. Poly had made only eight of 31 shots while Pomona was sinking shots at a 59 percent clip. Meanwhile, the Broncos were out-rebounding the Lady Mustangs 28-11.

By game’s end, Pomona’s shooting percentage had fallen to 41 percent, but Poly’s could only improve to 27 percent. Pomona’s final rebound advantage was 64-39 and four Broncos scored in double figures. Niki Bracken poured in 19 to lead all scorers.

After reviewing the statistics, Orrock said: "We will go into practice and shoot and shoot and shoot and shoot and shoot.

"Polly, she said, failed to stay faithful to the original game plan. The Lady Mustangs were to slow the pace and avoid running with the much faster Broncos."

For complete statistics, see SCOREBOARD, page 12.

— misfired from three-point range. Talley grabbed the loose ball and buried a turnaround jumper, sending the game into the final overtime.

"We are the best and tonight I proved it," said Talley. "This is my chance to prove to my family, friends, the players and Cal Poly that I can play.

Assistant coach Mark Felix, the major source of frustration often appears to be Talley, was impressed but not convinced that Talley has arrived.

"If he wants to be great, he can," said Felix. "He has a lot of promise, but he has to make a commitment to this team. I don’t like to dog him, but I have to.

The Mustangs will play their final regular season games this weekend when Cal State Los Angeles and Cal State Northridge visit the Main Gym.

For the Mustangs to have any part of the CCAA title, they must win both contests. Depending on how Riverside and Dominguez Hills fare, Poly can win the title outright or share it in a two- or three-way tie.

Sophomore forward Errol Talley takes aim for two of his 14 points in Saturday night’s marathon.
From page 11

Regardless of the title, the Mustangs virtually are assured of one of the playoff spots awarded to the CCAA’s top four teams. The only way Poly can fall out of the CCAA tournament picture is if it loses its final two games and Chapman College (6-6) wins both its contests.

Poly holds off Riverside

Poly led by as many as 13 points en route to the 74-72 upset of Riverside. The Highlanders rallied and had a chance to win in the final seconds, but Mission Labasan’s three-point shot circled the rim and popped back out.

Chambers led Poly with 19 points and seven rebounds. Robert Jimerson, last year’s Co-CCAA Player of the Year with Chambers, collected 29 points and 11 rebounds.

The victory avenged Riverside’s 75-56 blowout of the Mustangs last month.

Helping the Mustangs come within one run of beating San Diego State on Saturday were Eric Basyinginer, who knocked his three-chance run in the eighth inning. It was Reaves’ third home run of the season.

After having Sunday’s game against UC Irvine cancelled because of a wet field, the Mustangs went into Fullerton on Monday to face the nationally-ranked Titans.

Fullerton, which is ranked in the top 15 in the nation, found itself as a disadvantage in the early innings, but came on to take the win, 7-4.

— Dan Ruthemeyer

WOMEN

From page 11

“If Pomona has to slow down, they’re beatable,” she said. “We did slow down and get back a little better in the second half.”

As a result, the only Lady Mustang in double figures, scoring 18. Sherrie Atteberry, who is averaging almost 21 points per game, was held to six. Julie Jordan added seven.

One that the Mustangs remain confident of Poly’s chances of earning a playoff spot. To have a chance, the Lady Mustangs must win their last two games. Poly will face Cal State Los Angeles on Thursday and Cal State Northridge on Saturday, both at home.

“It’s a position I have to be in,” she said, “but I would rate our overall season as pretty good. We’re going to have to maintain our pride and poise.”

Shaky pitching hurts Poly on weekend trip

If there’s one aspect of the Mustangs’ baseball season that concerns coach Steve McFarland, it’s pitching.

After winning the first game of its five-game, five-day road trip 9-5 on Thursday, the Mustangs gave up a minimum of seven runs over the next four days on route to losing three straight. Cal Poly is 2-7.

Describing the pitching as shaky, McFarland said, “If I was concerned about one part of our game, that would be it.”

The Mustang pitching staff had a tough time with the San Diego State hitters on Friday and Saturday, giving up eight and nine runs each day.

While the Mustangs dropped Friday’s game 9-4, they received a significant amount of offense on Saturday to lose by only a one-point margin, 8-7.

Gymnasts fare well in road meets

The Cal Poly men’s tennis squad took to the road last week for the San Diego Intercollegiate tournament at the University of San Diego.

Cal Poly and Chapman College were the only Division II teams at the predominantly Division I tournament at the University of San Diego.

The team then traveled to the Gymnastics Jamboree at Chico State and posted its second highest score of the year. The team took fourth place, one-tenth of a point behind Davis. Defending national champion Seattle Pacific took first and Long Beach took second.

Poly tied Davis for second place while Long Beach State took first. Eastern Washington finished well behind.

Mimi Phene won a number of points for the team, placing first in vault, third in the floor exercise and third in the all-around competition. She also tied teammate Suzi Greene for fifth in the uneven bars and Julie Williams for third on the balance beam.

Williams took sixth in the all-around and tied Tracey Gamble for fourth in the vault. Julie Green took fourth on the bars and fifth on both the beam and the floor.

The theme for the event was “cartoons.” The team, featuring cartoon characters Underdog and Popeye, performed to a background of “Looney Tunes.”

Humble wore a leopardskin bathing suit and swung on the bars pretending to be “George of the Jungle.”

“"It was so funny,” said Humble. "It was the best part of the trip. The whole crowd got into it.”

Eight teams from across the nation compete in the national championships, and eight girls not on those teams are also chosen to compete.

Cal Poly will have two meets in Colorado this weekend.

Form makes scholarships taxable

By Danielle Letenyei
Staff Writer

This year's tax forms contain several items that could be of particular interest to students who are either receiving scholarships or renting off campus.

According to the 1987 federal tax forms, scholarships are now taxable if they exceed tuition and other fees directly related to students' educations. The form states that only amounts received as a "qualified" scholarship by a candidate for a degree may be excluded from gross income.

“Are You Still Using Just A Pencil & Paper?”

Hi,

I am Rob Ginsberg, a Cal Poly Student like yourself. I believe a computer system will improve your grades, and help you obtain your career goals. I offer the lowest prices in SLO County, simply because I understand, all too well, what it is like to live on a budget. For your added convenience, I have installed a toll free number for your parents or friends that are interested in a computer and have questions, (800) 722-0233. Please call me to set up an appointment for a free unpressured demonstration.

Once you use a computer you will wonder why you didn’t buy one sooner.

Sincerely,

Rob Ginsberg
