CSEA to request 7 percent wage hike

By Danielle Letenyei

The California State Employees' Association Unit 7 met Thursday for the first time this year to discuss their proposals for 1987.

Of the proposals the clerical and administrative support services union plans to bring to the meeting were an increase of 7 percent in general wages and the elimination of sex-based wage inequality.

The governor's budget for 1987-1988 includes an up to 3 percent raise in general compensation for state and CSU employees. However, the raise is not to go into effect until Jan. 1, 1988.

According to Shirley Lewis, president of the Cal Poly chapter of CSEA Unit 7, such a freeze on the increase means that the employees are actually getting only a 1.5 percent raise.

"We are going to see if we can negotiate from the Chancellor's Office," said Lewis. "That's what gives us our raise."

Lewis said that often the controversy of a pay increase pits employees against each other.

"The governor gives the CSU system a chunk of money and it is up to the employees to bite and scratch to get their share of it," said Lewis. "It's not a very good system. It's not a benevolent system because it pits you against each other and it's hard to get unity in a situation like that."

According to statistics, in the past four years management salaries have increased 42 percent. See LIGHT, page 3

Rodeo arena to be moved for parking

Relocation part of long-range plan

By Anna Cekola

A two-year-old proposal to move the rodeo grounds, making way for another parking facility, was approved by the campus planning commission and the School of Agriculture last week.

Agricultural Dean Lark Carter said the new rodeo facility will be located at the north end of the racing track and relocation will begin after Poly Royal rodeo events in the spring. The Chancellor's Office has agreed to give approximately $200,000 from student parking fees to help finance the move.

"Moving the rodeo grounds is a matter that the campus parking situation demands," Carter said. "Part of the long-range university master plan includes the site of the existing rodeo facilities for parking. The administration is just following through and initiating this plan."

Rodeo coach Clay Robinson also acknowledged the need for additional campus parking, but said the new location will have a few disadvantages.

"One-third of the budget for the rodeo club comes from proceeds made from Poly Royal rodeo events and the worry is that the farther we get away from campus with limited parking, the less crowd we'll draw," Robinson said.

Other disadvantages include possible disease problems if horses are put near the swine unit and also additional wind forces at the new site which could cause difficulty in roping.

"If it was my choice, parking would be a matter that the campus parking situation demands," Carter said. "Part of the long-range university master plan includes the site of the existing rodeo facilities for..."

Bomb threat closes all science buildings

By Jerry McKay

A bomb threat Friday closed the three science buildings on campus while police conducted a search for explosives. None were found.

Public Affairs Officer Don McCaleb said a woman called at 8:56 a.m. saying a bomb was in a backpack in one of the science buildings. McCaleb said all three science buildings were closed until the search was completed at 10 a.m.

Students who were just beginning exams probably thought it was their lucky day. However, they soon found out that it takes more than a bomb threat to get biology professor Peter Jankay to cancel one of his exams.

"I was just passing out the exams when the police came and said we had to leave," Jankay said. "I just told the students to take the tests outside."

Denise Benson, an agricultural management student, sat on the curb of Perimeter Road as she took her exam. She said she didn't mind the inconvenience.

"I'm glad we had the bomb threat. It's such a nice day. The sun is shining and I need a tan," she said.

Not a modern problem

Eating disorders discussed

By Mary J. Westfall

Why women suffer from eating disorders and what women gain from them were the topics of a panel discussion Thursday chaired by health professionals.

"Women and Eating Disorders: Sickness or Choice," was the title of the discussion, part of the Women's Week program.

Dr. Lynda Koenig, a San Luis Obispo family counselor, pointed out that eating disorders are not a modern problem; eating disorders have been documented back in the 1800s.

Koenig said eating disorders are classified into two categories: See EATING, page 7
**The new racism**

A
ericans like to think racism is on the wane in this
country. But recent events, particularly those on col­
lege campuses, have shown otherwise.

A
black female operator at the University of Penn­
sylvania, an Ivy League School, was called derogatory
names and struck by a bottle of urine thrown from a dorm
window. The minority cultural center at proper Smith Col­
lege in Massachusetts was defaced with the phrases:
"Niggers, chinks and spics stop your complaining" and
"Niggers go home." Two black students at the State Uni­
versity of New York at Albany found a note on their dorm
door reading: "We don't want niggers on our floor. Leave
tomorrow or die."

It is ironic from this situation is that racism is a
product of ignorance, and college students are regarded as
one of the more enlightened segments of the population.
What is overlooked is that the current crop of college stu­
dents is the first that was not widely exposed to the civil
rights movement. As a spokesman for the University of
Alabama said of today's college students recently:
"This
generation did not live through that time. And I think we
have passed down the knowledge of what gains we've made
in civil rights and human rights of all sorts. The '60s and
'70s are really ancient history for them.''

'70s are really ancient history for them.''

So Women's Week is over. What a shame (sorry, shame)...
What are all these women doing giving speeches when they
should be home making their husbands dinner? Just kidding,
but it's a little annoying when some sub-section of the popula­
tion annes a part of the year to celebrate itself. It opens the door for:

Irish week
Jewish week
White week: All sheets and
towels are half-off at Mervyn's.
Greek week: Socrates, Plato
and the like... not a bunch
of drunk frat boys.
Geek week: Computer scien­
tists, engineers and other suc­
cessful professionals give
speeches that no one attends.
Bashful week: Short speeches
by the very shy.
Grumpy week: Kind of that
time of the year, when we all re­
tain water and have cramps.
Dopey week: For military con­
tractors and Reagan's White
House staff.
Sneaky week: Hay fever season
(Not to be confused with sneaky
week which is "roll-in-the-hay
season").

Every decision has moral implications

Editor — I would like to add my comments to those in your article concerning professional ethics and
Having chosen the life of a pro­
essional soldier, I never considered
the possibility of foisting the re­
sponsibility for my actions off on
others. Instead, I have opted for the
logic that by accepting the in­
volatility of war, I can try to ensure
that the damage done to my
homeland in a war is minimal.
(“Better them than us.”)

Having justified my choice, I have
no respect for those who refuse to
recognize the moral implications
of their actions. Almost every decision
you make has a moral side, whether
it is trying to chat up the blonde sit­
ting next to you in class, giving a lift
to that fellow walking along the
road, or helping design a stealth
bomber for the Air Force. Each one
requires a moral choice of some
degree.

People who provide weapons to
someone without concerning
themselves about the use of those
weapons are as morally culpable as
a person who hands a gun to a
murderer and then professes a lack
of guilt.

Also, building weapons is at least
as much a question of immorality as
pornographic movies. There is a
measurable link between the view­
ing of violence (war movies, gore
spectaculars, etc.) and violent
behavior, but nobody has ever
shown a measurable correlation be­tween non-violent pornography and
any harm to society.

There have been indications that
pornography leads to a procrustition for
practicing procreation, but that only
offends some sensibilities, it doesn't
leave shattered bodies and minds.

This could mean that "G.I. Joe: The
Last American Hero" is more
obscene than "Debbie Does
Dallas," if obscenity is a measure of
harm caused.

Think about your choices, people.
Your decisions are votes for the
future of your choice. Elect some­
ting you want to live with.

Julie Haney

letters to the editor

**FOOD FOR THOUGHT**

Kenneth Dintzer

Doe week: We all get X-rayed,
then watch Bugs Bunny carto­
onics.

Sleepy week: (to coincide with math week).

(No! No Happy week — this is
why we have a happy hour).

Next week is a week of
speeches on dyslexia.

Wh-wh-wh Week: Seven days
for those who stutter.

Next week is when we
plan to do everything we put off.

One more week: Consistently
passing us by.

Another week: This week will
be declared by teachers for stu­
dents who have been asking for it
for many years.

Very week: This week features
an Emilio Esever Film festival.

Weekness: For me it's
redheads and great smiles... but
that's a different subject entirely.

Sex week: Just to get it out of
our system.

German week
French week: precedes sex
week.

Dutch week: Take someone
from the Netherlands to lunch
and pay half.

A week of mourning: (follows
report card week).

The week shall inherit the
Earth: it's got to happen sometime.

Pledge Week: When everybody
dusts their tables... leaving a
lemon fresh shine.

What not what you think it is, this
week all radio stations play nothing
but the greatest hits of Rush... we
dread that.

Ken week: Once a week: Clean all throw
rugs.

Weekness: It's my list — so I
got my own week.

One off week: When I wrote this
column.

(Please note: I have not listed a
"Men's Week," and for a very
good reason. Whenever a whole
group of men get together all we
do is talk about men. Kind of
seems to defeat the purpose.)

Soviet offer welcomed in Europe

LONDON (AP) — Western Europeans on Sunday called the surprise Soviet offer of a separate deal to eliminate medium-range missiles in Europe the long-awaited breakthrough to an agreement.

In a major policy shift, Soviet leader Mikhail S. Gorbachev announced Saturday that the Soviets were dropping their insistence that an agreement on medium-range missiles be linked to a deal limiting United States testing of Star Wars.

NATO Secretary-General Lord Carrington called the offer "a substantial step forward."

The governments of Britain, France, the Netherlands and Italy did not make a quick assessment, saying they wanted time to study the Soviet offer.

Ford evaluates Bush’s prospects

LINCOLN, Neb. (AP) — Former President Gerald Ford says he’s confident the Reagan administration will survive the Iran-Contra scandal, but it’s reduced the presidential prospects of Vice President George Bush.

"It’s not the major crisis in this century," Ford told reporters Saturday. However, he said, "there’s no doubt that (Bush’s candidacy) has suffered to some extent so far."

Ford commended President Reagan for appointing Howard Baker to succeed Donald Regan as chief of staff, calling the appointment an important move toward restoring good relations between the White House and Congress.

Blacks boycott in Mississippi

CANTON, Miss. (AP) — Blacks in several Mississippi towns have revive a tactic of the 1960s by boycotting schools and white-owned businesses in what they call a last resort to achieve political goals.

"I think this is something we felt we had to do," said the Rev. Michael Cathey, a leader of a black parents group that wants a black assistant superintendent of schools in Senatobia.

In Canton, where Martin Luther King Jr. once organized against white supremacy, blacks postponed an economic boycott set for Friday when the town’s mayor promised to put a black-owned business on the city’s economic development list.

Chairlift fall kills French skiers

TARBES, France (AP) — A damaged chairlift pitched dozens of skiers onto rocks and snow far below Sunday, killing five of them and badly injuring 25 at the Pyrenees resort of Luz-Ardeche, officials said.

Sixty other skiers on the lift suffered lesser injuries. Some victims reportedly fell from heights of up to 130 feet.

The accident occurred about 4:30 p.m., but the cause was not clear. Local news media gave conflicting reports, saying the lift cable snapped, that it jumped off a pulley, or that a support cable snapped.

Chairlifts are a common feature of ski resorts, but they are not always free of accidents.

RODEO

We made the walkway directly behind the Architecture Building into a movie house," said Fernandez. "We had some technical difficulties, but finally presented the video a little after 8 p.m."

Fernandez and Brunk used graphics and music to enhance the production, called "Luminaria," and said they spent a great deal of time editing the final product.

"Mrs. Lakeman wanted one group to videotape the construction of neon, so Kevin and I volunteered," said Fernandez. "It deviates from the standard light sculpture."

Lakeman spent the evening strolling around in the bitter cold evaluating the different sculptures.

"Early in the quarter, each group made their proposals and submitted models of them," she said. "I helped a little in the designs and development, but the students invested the time and money in producing some excellent projects."

We encouraged them to use rented or borrowed materials, and several local hotels donated sheets to the students.

Other projects included a large cobweb-like display, the conversion of the arbor into a sort of Roman stadium by use of a slide projector, and dyed sheets draped over several windows with a tree shadow cast over them.

"The students who did the spider web sculpture got the idea from an enormous, actual cobweb in the Architecture Building," said Lakeman. "It all shows that when their hearts are set on something, they get it done. I think this is a learning experience that really ties in with the Cal Poly philosophy of learning by doing."

Knot’s Berry Farm is looking for people who have a way with dinosaurs. This spring we’ll be opening “Kingdom of the Dinosaurs,” a brand new ride featuring 23 prehistoric animals.

We’ve also got over 160 other rides and attractions, restaurants and stores, where we need help.

If you’re looking for part time and summer employment, join us on our HIRING DAY, March 14, 9 AM to 3PM at the Independence Hall complex or apply in person at the Employment Office, Monday through Friday, 1:30–4:30 PM.

For further information, call: (714) 220-5174.

**NEWSPRIEFS**

Monday, March 2, 1987

We just hope that enough funds will be provided to do everything without breaking the club and our boosters financially."

Most of the money from the university will be used to provide an underground drainage system and fencing at the new site. Most of the existing Collett Arena will be moved, while any additional improvements, such as a hay barn or restroom facilities, will come from private funding.

The new rodeo facility is expected to be finished in time for the 1987 fall rodeo, and the parking facility is planned for completion by fall 1988.
Toros hold off Poly to win tourney

Desperate rally backed by boisterous crowd cannot erase 16-point deficit

By Elmer Ramos

The Cal Poly men's basketball team had lived on the edge and gotten away with it the past two weeks, winning five games by a total of seven points. But defeat, which the Mustangs had eluded so deftly, finally caught up with them Saturday night.

Poly fell into a hole so deep that not even the Great Savior Mark Orta or a deafening crowd of 3,339 could bail them out. Dominguez Hills thwarted the Mustangs' desperate late-game rally to preserve a 70-58 victory and win the California Collegiate Athletic Association tournament.

After tying Poly for the regular-season title, Dominguez Hills eliminated any question of who the CCAA's real champion is. The Toros' victory also capped a turnaround from last season, when they won only three conference games and finished seventh.

"I'm just so happy for the kids," said Dominguez Hills coach Dave Yanai. "They stumbled at times, but they just got better every week."

The Toros (22-7) earned a berth in the NCAA playoffs, while the Mustangs (19-10) maintained a slim chance of gaining an at-large berth. The announcement was made Sunday afternoon, but was not available at press time.

"Not being an experienced hand, my guess is that it will be very difficult to get a bid," said Steve Beason, Poly's first-year coach. "But stranger things have happened."

Sean Chambers downplayed the possibility of gaining a berth. However, he found consolation in the surprisingly successful season.

"We have nothing to be ashamed of," he said. "We were picked to finish sixth in this league. We have to be thankful for winning the CCAA."

Dominguez Hills led from the opening basket and raced to a 36-23 halftime lead. But the partisan crowd revived the Mustangs, who seemed somewhat flat following their 83-81 victory over UC Riverside Friday night.

As the Mustangs cut into the deficit, Chambers, Parker named all-CCAA

For the second straight year, Poly's Sean Chambers was named co-CCAA player of the year. After sharing last season's award with UC Riverside's Robert Jimerson, he splits this year's honor with William Alexander of Cal State Dominguez Hills.

Chambers, an All-America forward, was the CCAA's fourth-leading scorer (18.2 ppg) and led the Mustangs to a share of the regular-season title. Alexander, a senior forward, is the CCAA's career scoring leader. He also was the conference's

See HONORS, page 6

Lady Mustangs fall to Cal Poly Pomona

By Jeff Blizzard

Cal Poly Pomona jumped out to a quick lead against the Lady Mustangs Friday and cruised to a 72-49 victory in the first round of the CCAA women's basketball tournament.

The Broncos, defending NCAA Division II champions and winners of three of the past five titles, relied on balanced scoring, aggressive rebounding and a stingy defense in holding the Mustangs to 27 percent shooting on the night.

Pomona, which lead by as many as 24 points late in the game, had five players score in double figures. Senior forward Debra Larsen led the way with 21 points and a team-high 15 rebounds.

Marcine Edmonds scored 14 points and snagged 14 rebounds. Niki Bracken added 13 points and Michelle McCoy and Cathy Gooden had 10 points each.

The Lady Mustangs were led by Kim Lackore with 10 points. Janet Jorgensen, Sherinne Barlow and Sherrie Atteberry each scored nine points.

Pomona jumped out to a quick 10-4 lead in the first half, and with 30 seconds left in the half had a 24-point lead. Pomona's fastbreak offense and outside shooting was too much for the Lady Mustangs to overcome. A number of shots for the Mustangs simply would not fall as the ball rimmed in and out of the basket.

Pomona jumped out to a quick 10-4 lead in the first half, and with 30 seconds left in the half
Two records broken as Poly falls to UCSB

By Kimberly Patraw

Two school records fell Saturday night as both Cal Poly and UC Santa Barbara gymnasts broke their respective team-score records in a high-performance meet at Cramdall Gym.

Although only 35 points separated the two team's top scores last week, the Gauchos broke their school record by almost four points with a score of 175.65 to win the meet. Cal Poly's new school record is 173.2, nearly three points over the record-breaking score the Lady Mustangs picked up last week in Colorado.

Poly team member Mary Kay Humble had an outstanding night, breaking her personal best in every event except the vault. "Since Santa Barbara is a Division I team, the competition was really stiff," she said.

That did not stop the freshman from Lompoc from taking second in the balance beam with a score of 9.0 — her first nine-score ever. She also took second in the all-around with 35.2 points and shared third on the floor with teammate Julie Bolen and Gaucio Amy Werbler. Each finished with a score of 8.7.

Despite not working out all week due to a pulled leg muscle, Mustang Mimi Phene took fourth in the all-around, second in the vault with a score of 9.05 and second on the floor, also scoring a 9.05.

Cal Poly's Wendy Meyer had her top collegiate score in the all-around, placing sixth with 34.8 points.

Cal Poly senior Julie Williams took third in the vault with a score of 9.85. Mustang Julie Bolen was injuried in the floor competition when she broke her leg doing a switch leap in her routine, but is expected to be ready for next week's competition.

Coach Tim Rivera said Bolen has had the injury all year, but it has not slowed her down.

The balance beam was the Mustangs' strongest event last week, but Gaucio Amy Werbler beat her personal best, scoring a 9.2 in the balance beam to beat out Humble's top score.

Santa Barbara's Melissa Hennessy dominated most of the events for her team. She scored a 9.3 in the vault, taking first, a 9.0 on the floor, taking third, and took first in the all-around with a score of 35.8.

After the Mustangs' top performance this weekend, the team's average score is 170.7, which may be enough to gain entry into next year's national championships. Rivera said that the lowest team average to go last year was 171.

Jackson coach Ed Foster said he had not expected his team to do so well, but that he believes the Gauchos' performance on the beam lets them win. The Gauchos had their top score, at Cal Poly last year also, as Foster had mentioned two days before the meet.

The Lady Mustangs will be at UC Davis Friday and Cal State Sacramento on Saturday. The next home meet will be a seven-team event on March 14.
Melvin Parker's breakaway dunk with 13:30 remaining cut the Toros' margin to 45-33, but it had a more significant result. For the next several minutes, the fans were on their feet, bolstering Poly's backcourt press with ear-popping enthusiasm.

"I know I've never been in a game this loud," said Season. "It really got the adrenaline going."

With 4:09 remaining, Chambers sank a lean-in jumpshot to make the score 58-56. Then forced a 10-second possession. Moments later, Mark Otta buried a pair from the line to make the Toros' margin four points.

Chambers' lean-in jumpshot with ear-popping enthusiasm. "You coach them (players) all these weeks so that when they get on the floor, they can play the game without the coaches," he said. "You hope that you can just sit back and let them do it." 

Dominguez Hills clogged the inside, holding Chambers to two first-half points. He did not score his first field goal until four minutes into the second half, making it difficult for the Mustangs to regain possession. Moments later, Mark Otta buried a pair from the line to make the Toros' margin four points.

MEETING

From page 1

The governor says the state employee should be happy with a 1.5 percent increase.

"The Chancellor's Office is very fond of building buildings which stand around, last a long time and look good," said Lewis.

"However, in order for a building to work you have to have people in it and you have to have good employees if you want a good system."

Also during the meeting, Lewis and Ken Grossinger, CSEA organizer for the coastal area, encouraged union members to gather evidence to help pursue a sex/race-based wage discrimination case.

"State statistics say that a 42 percent wage increase would be needed in the CSEA to bring women's pay up to men's pay for the same job," said Grossinger.

Grossinger talked of the Bernheim Report issued by Stanford University, as reported by the San Francisco Chronicle. The Bernheim Report says that if women were to receive wages equal to men, it would hurt the economy.

"We need to be skeptical of a report like this," said Grossinger. "I wonder if the results of the report would be the same if the situation were reversed."

Last year, CSEA Unit 7 was successful in getting a vision plan, dental benefits and a 5 percent raise for those working in clerical and administrative positions.

calendar

monday 2

• The deadline for mailing Student Aid Application for California (S.A.A.C.) forms is today. The Financial Aid Office recommends getting a proof of mailing receipt when forms are mailed.

• Monday is also the deadline for filing Scholarship Applications with the Financial Aid Office.

• The movie "Costa Rican Connection" will begin at 7 p.m. Monday at Linnaea's cafe, 1110 Garden, as part of the "What Is Happening in Central America" film series.

• James E. Amrhein, author of the "Reinforced Masonry Engineering Handbook" and executive director of the Masonry Institute of America, will speak at 1:30 p.m. Monday in the Gallery of the Architecture and Environmental Design Building.

• Architectural designer Victor Papanek will discuss the "Edifice Complex: The Designed Environment in an Age of Greed" at 10:30 a.m. Tuesday in the Cal Poly Theatre.

tuesday 3

• The Society of Flight Test Engineers will hold a seminar on wing and laminar flow aircraft development at 8 p.m. Tuesday in Fisher Science Hall Room 286.

• Contributions for Calendar must be received by noon two days prior to the event.
