Children's Center in need of funding, improved facility

By Carmela Herron

The Cal Poly Children's Center can use a major face lift. Either two years, she said.

The center has been at Cal Poly for nine years, and it is currently operating within a 1,500 square-foot, refurbished wooden bungalow that was supposed to be demolished in the 1960s, said Liz Regan, the center's coordinator.

It serves students and faculty at Cal Poly and has an extremely long waiting list, with priority given to lower income families.

According to a 1986 report on existing California State University children's centers, centers at most other CSUs are rated as fair to excellent. The Cal Poly Children's Center, as well as those at Sacramento and Dominguez Hills, are rated as poor.

One look at the surroundings will verify that, as they are small, cramped and "in constant need of maintenance," said Regan.

The increase of students returning to school with children has caused concern among parents and workers at the center who feel that current facilities are "bursting at the seams," and are unable to keep up with the growing number of students and faculty who are in need of child care at Cal Poly.

Students who have had their children on the center's waiting list since March 1985 are only now being admitted to the center, said Regan. "Some parents have had to wait up to two years," she said.

"Our expenses increase 5 to 6 percent each year," Regan said. "But we are not allowed to expand, or increase the number of children that we have."

The reason for this, said Regan, is that there is not enough space on campus — and not enough funds — to help get a new facility under way. Also, state regulation requires a certain amount of children per square foot at the center, and this can also be a determining factor in how much money the state will supply.

The center is funded mostly by the state and by ASI. Forty-nine percent of the aid given to the center comes from the State Department of Education; 25 percent from ASI fees; 18 percent from the parents who pay child care fees and 6 percent from the State Nutrition Department.

Because most students at Cal Poly are young and childless, they may be concerned that there is a disproportionate amount of their money being spent on a center that only a few students use.

"Students who think this have no concept of what it's like to get back to school and need child care," said Catherine Collins, a 30-year-old married student who had to wait a year and a half to get her child in the center.

"Sure, I don't have to be concerned because my kid is already in the center, but I think it's a social need at our school," Collins said. "Students who have had children in the center are concerned about the people in South Africa and apartheid should look right here on our campus," said Collins.

But the concept and second on details.

Because the theme was "imaginary friend," the committee received 44 entries from Cal Poly and Cal Poly Pomona, evaluated more than 80 design entries on Saturday, the committee selected Pomona student James Baugnertner's drawing, titled "CP and Me."

He said he had submitted the same design in last year's contest, but it didn't fit the theme. So he decided to incorporate the idea into the theme of the Jan. 1, 1988 parade, "Thanks to Communication."

Baugnertner has the choice of two tickets to the 1988 Rose Bowl football game or $100 as a prize.

Kurt Hanft, Pomona Rose Float Committee chairman, said the committee was looking for a concept when evaluating the designs.

"We focused on the initial concept of the design — something said in a simple sentence that projects the theme — not a pretty picture," said Hanft.

The Rose Float Committee first narrowed down the 83 entries to those 35 that pertained to the theme. The members then selected the top 12 that best projected the theme.

When entries were reduced to the top three, the committee considered the design, construction, decoration, style, originality, animation and humor possibilities of each entry, focusing first on concept and second on details.

Eric Noell, Cal Poly committee chairman, said Baugnertner's "communication through imagination" idea was chosen because it is unique and it is a form of communication.

"Kids can grasp it. Everybody has had an imaginary friend at one time or another," said Noell.

"And it has potential for large, spectacular animation," added Hanft.

The Rose Float Committee will discuss different ways to improve the float idea, said Michelle See FLOA, page 4
Should juveniles get the death penalty?

Dan Kehew, political science junior:
I don't think anyone should get the death penalty. With the appeals process it costs more than to imprison them for life. And prison for life seems worse than ending it for the person.

Mike DeCarlo, math senior:
I don't think so. They haven't developed their ways. They're at an impressionable age, and by seeing violence all the time on TV they tend to imitate it and think it's acceptable.

Sid Bowen, electrical engineering junior:
No, there's too many things that affect the kids because they're so impressionable at that age. By the time they grow into adulthood they may realize what's right and what's wrong. They deserve that chance.

Claire Chapman, human development junior:
I don't believe in the death penalty period. It's not administered justly. Minority groups are more likely to get it than others, even when they're being tried for the same crime.

Reagan focuses on long-term aims

FROM THE RIGHT
Frankie Houck

Let's look ahead three years. Imagine it is 1990. Following the disintegration of the post-Khomeini government, Iran has been taken over by the Tudeh Communists, who have been propped up by Soviet money and arms. The Soviet Union has gained its long sought warm-water port, enabling it to menace the oil-rich Gulf states, and threaten the major source of oil for both Western Europe and Japan.

Meanwhile, the Soviet's Sandinista puppet government in Nicaragua has consolidated its power and is financing and arm­ing the communist revolutions in neighboring Costa Rica and El Salvador. Due to the lack of proper military equipment, the Con­tra resistance movement within Nicaragua has collapsed. In­elligence reports indicate that the Soviets are installing missile sites in Central America. Both liberal and conservative members of Congress worry openly that it may be necessary to send Amer­ican troops into Nicaragua.

Sound frightening? It should. Policies designed to achieve a different scenario need to be sought, now.

The revelation that the United States and Iran have conducted secret arms sales should not have come as such a surprise. Iran is a country that is extremely vital to the U.S. We may not like the current regime, but it would be irresponsible to ignore its geopolitical importance. National security demands that President Reagan explore all reasonable avenues for improving relations. You do not hear this in public discussions of this issue, as critics of the president are too preoccupied turning this into a partisan issue than to examine the strategic implications.

Geographically, Iran acts as a buffer to Soviet expansionism in the Arabian Peninsula and Persian Gulf. Vast petroleum reserves lie beneath Iranian soil. President Reagan recognized the need to improve U.S.-Iran relations. To bring this about, he approved a series of secret con­tacts between representatives of the two countries. The plan sought to appeal to moderate elements among Teheran's ruling elites, groups which might steer the imminent Khomeni succes­sion struggle in the most pro-Western direction possible.

The president's critics do not contest the need for improved relations between America and Iran. Instead they publicly at­tack the means used to achieve this goal — specifically the shipment of military supplies to Iran.

No arms-for-hostage swap occurred. Iran has no critical need for the type of defensive arms the U.S. supplied, and the ter­rorists who took the hostages certainly do not lack weapons. Instead, both the U.S. shipment of military supplies and Iranian efforts to secure the release of hostages were diplomatically signed of good faith. The impression that a swap occurred exists only because the ultimate aim of the U.S.-Iran contact, improved relations, has yet to be realized.

Why won't the critics condemn the president, regardless of the effect on ongoing operations and the lives of the remaining hostages, they place short-term personal aims ahead of Reagan's expense, above our national security.

Frankie Houck is a Cal Poly student and president of the Col­lege Republicans.

Reader lauds column on recreation center

Editor — On Wednesday, Feb. 25, Jeff Kelly disclosed in his "Down to Earth" column, "The referendum that wasn't" — information showing just what a sham last year's rec center referendum was.

It is way past time that students realize how easy it is for the presi­dent to bend us over a barrel for what he wants when it is needed for pro­jects. Using a slick campaign (beautiful posters that are still up), he can fool enough people (5 per­cent majority) into voting his way and thereby silence the opposition — "Hey, the people wanted it." When in actuality, by claiming the rec center (or any other facility) to be an extension of the University Union, he can do whatever he wants and we get to foot the bill.

It's good to see someone willing to expose the whole issue for what it is. Good job, Kelly.

KEVIN P. HANRAHAN

Mothers of the unborn also need consideration

Editor — In response to the letter titled "Animal rights activists care for humans" (Feb. 24), I must ask, are the women who decide to have the abortions not human?

The writer referred to the term "unborn babies" a number of times, but not once did he refer to the mothers of those unborn babies.

It is very ironic that the letter was written by a man, considering that it is the woman who has to put up with the side effects of the birth control pill, which, by the way, is not 100 percent effective. It is the woman who has to carry the child for nine months.

I think it is much more cruel to give birth to an unwanted baby who would grow up unloved than to abort some issue.

Please do not get me wrong. I am not saying women should not have the side effects of the birth control, because they should. I am just stating that a woman should have all the choices available to her if an accidental pregnancy does occur.

Why not care more about the women — the humans — who fit right into the letter?

Soviet arms proposal discussed

GENEVA (AP) — American and Soviet arms control negotiators met in special session Monday to discuss Soviet leader Mikhail Gorbachev’s new proposal to eliminate medium-range missiles in Europe.

The two sides agreed to extend the talks indefinitely. U.S. officials in Washington said the American side would respond by presenting a draft treaty to remove intermediate-range missiles now aimed at Soviet and European targets.

Soviet officials said Gorbachev made his offer in an attempt to break the Geneva deadlock. The proposal dropped a Soviet demand that the United States restrict its “Star Wars” program before an arms control package could be agreed on.

European governments generally reacted favorably to the Soviet initiative but cautioned that they would want to examine it closely before agreeing.

Gates nomination withdrawn

WASHINGTON (AP) — President Reagan on Monday withdrew his nomination of acting CIA Director Robert M. Gates to head the agency, saying confirmation hearings at this time “would not be in the interest of the CIA or of the nation.”

In a statement read to reporters by his new chief of staff, Howard H. Baker Jr., Reagan said he withdrew the nomination at Gates’ request.

Baker also read to reporters a letter from Gates to the president, saying, “It is apparent that there is strong sentiment in the Senate to await completion, at minimum, of the work of the Senate Select Committee on Iran before acting on my nomination.”

“I believe a prolonged period of uncertainty would be harmful to the Central Intelligence Agency, the intelligence community and potentially to our national security,” he said.

Early primary to be proposed

SACRAMENTO (AP) — Sen. Quentin Kopp of San Francisco, the only independent in the 120-seat state Legislature, said Monday he will introduce legislation to advance California, the only independent in the 120-seat state Legislature, in presidential primaries. California has been left behind.

“California has been largely irrelevant for almost two decades in presidential primaries,” Kopp said. “Times have changed regarding presidential primaries. California has been left behind.”

Kopp said his standing as an independent puts him in the unique position of sponsoring such legislation, because it inevitably debated whether Democrats or Republicans will benefit more.

Most California Democratic Party leaders support an earlier primary, while Republican leaders are divided among those mildly in favor to strongly opposed.

IRS shortens confusing tax form

WASHINGTON (AP) — The Internal Revenue Service, apologizing for its confusing four-page tax-withholding form, offered a slimmer-down version Monday that will allow half of all taxpayers to complete the chore in 15 minutes.

“The Internal Revenue Service has heard the reactions to the long form — from members of Congress, from the media and from individual taxpayers,” IRS Commissioner Lawrence B. Gibbs told a news conference. “We have not ignored what we have heard.”

What the agency heard was that the four-page W-4 released last November was incomprehensible. The IRS defended the form as meeting Congress’ requirement for a W-4 that allows taxpayers to accurately match their withholding with actual tax liability.

CLASS ENCOUNTERS

There are peaceful ways to serve one’s country

Editor — We would like to respond to the “Past Deadline” column (Feb. 23). “A peacetime sense of duty,” by Insight editor Floyd Jones, who is curious about how to express his gratitude and patriotism to the country he loves. There are many other insightful ways to serve one’s country besides being a soldier in the United States military. True, it is impossible to change the date he was born, but one can help change national priorities while one is alive.

Peace and understanding among nations should be this country’s highest priority. If our world is ever going to achieve peace, we Americans must show an example by changing the way we think and act toward other nations. War is senseless. Many ways exist to serve one’s country, or to resolve feelings of guilt or frustration, rather than killing other human beings.

Opportunities to advance peace and mutual understanding among countries are many, are wide open, and are barely explored by young people today. Why not fulfill one’s sense of duty by promoting peace through organizations such as Students for Social Responsibility, Central American Study and Solidarity Association, or perhaps volunteering to serve in the Peace Corps? There are literally hundreds of governmental and international organizations that do much to promote understanding among cultures and nations. What better way is there to serve the best interests of this country than to help in some small way to promote peace and understanding throughout the world?

The U.S. has much to gain by promoting peace, understanding and fairness in the world. Why don’t we think in terms of peace first? Why is it that when our government speaks of war, many of us are ready and willing to fight without first asking, “Have we given peace a chance?”

THERESA LEES
GREG HALLQUIST

Woman suing ASI is depleting students

Editor — I would personally like to thank the woman who is suing the ASI for injuries suffered at the Berlin concert. Have you ever wondered why we don’t have more big-name concerts at Cal Poly? The insurance against suits like hers is why. And because of this instance we may never have another one.

You may have been deprived a few bucks for the cost of your ambulance, but now thousands of future Cal Poly students will be deprived of good music and fun. Berlin did not entice the crowd to rush the stage and the security did all that could be expected.

And don’t you know that it’s “sue happy” people who are ruining our economy? So much of the government’s and small businesses’ money goes to lawyers and insurance that everyone pays. We can do something. Stop suing others and take a little responsibility for your own risks in life.

JAMES HARNETT
and the parking lot near the train tracks and Poly Grove is on the master plan for future construction at Cal Poly, but this construction could take as long as three years or more to complete, if approved.

Although the center meets with existing state health standards, students and faculty praise the quality of child care the center provides, there is definite concern and want of improvement.

Other departments and organizations on campus are fighting for needed space and funding, and the wants and needs of the center are no exception. Floors need to be resurfaced, plumbing needs to be fixed, and student interns who work at the center to places far from campus. An on-campus site would cost approximately $400,000 to $500,000, she said.

However, Regan said neither expansion nor an increase in financial aid to the center are possibilities that are expected to materialize in the near future.

Conway said a tentative site between the clock tower lawn and compliance with state regulations. Approximately eight spaces open per year, said Regan. An attempt to raise funds for a new building, and pleas to California legislators to influence the governor’s decision to provide state funds for child care, have already been put into the planning stage.

Mike Carroll, a student who waited on the list for eight months to get his child into the center, has helped to initiate a letter-writing campaign at Cal Poly. The effort is in collaboration with other CSUs and the California State Student Association.

“If it wasn’t for the center,” said Carroll, “I wouldn’t be going to school.”

ASU President Kevin Swanson said the CSSA has been trying for 10 years to get state support for child care. The more money that comes from the state, the less money that will have to come from students at Cal Poly, said Swanson.

Swanson said letters from all CSU campuses will be sent to legislators in Sacramento, and that the governor could make a decision in June leading to more child care support for the CSUs.

Regan said students have a legitimate concern concerning the fact that a lot of the money for child care comes from students.

“What everybody needs to understand is that we could be self-supporting if we could only expand,” she said. An ideal number of children at the center would be about 100, she said.

“All the resources are right here but we’re not utilizing them because there is not enough space,” Regan said.

Conway said that this is particularly an “access to education issue.” Women, he said, are traditionally the ones who are disadvantaged when it comes to acquiring finances and education, and that good child care system could help alleviate this.

Regan has great hopes for the future of the child care program, and believes it is time to see a kindergarten program and a preschool started as soon as the time and funds become available.

“It’s a marvelous program... but they have to make due with what they have,” said Collins.

Center
**Change in softball may affect the game**

**By Ken Miller**

A change has been made in women's softball that will affect the outcome of every game: the pitcher's mound has been moved back three feet.

Cal Poly coach Becky Heidesc said that the changes were made by the National Collegiate Athletic Association and were put into effect at the beginning of the new season.

"Softball used to be a pitcher's game, but this change is going to bring it into a more offensive game. There will be more hits, more stolen bases, the defense will get more balls, and more runs will be scored," Heidesc said.

There have also been more walks, as the pitchers haven't made the physical adjustment yet, Heidesc said.

Michelle Gardiner, a freshman pitcher for the team, said that the new rule hasn't been that much of an adjustment for her.

"The other pitchers feel the same way. I think it's made it more of a hitting game. Sure, there are changes, but nothing that is really extremely different," Gardiner said.

Heidesc welcomes the changes. "If you had a good pit­cher, you could win games even if..." Gardiner said.

**Lady runners glide to another win**

**By Dan Ruthemeyer**

Despite leaving seven All-Americans in San Luis Obispo, the women's track team picked up an easy 73-point win in its first conference meet Saturday in Bakersfield.

The Mustangs scored 108 points to take first place in the four-team meet, with Cal Poly Pomona finishing in second with 35 points. Pomona is expected to eclipse the Mustangs to finish in the top 10 Division II.

The other two conference teams competing were Cal State Bakersfield, which finished third, and Chapman College, which finished fourth.

*Although the Mustangs finished Saturday's meet in fine fashion, coach Lance Harter said the score was of secondary importance.*

For the fourth straight week, Harter said that the meet was important to give the team's veterans a chance to tune up for the season and the newcomers a chance to adapt to track at the collegiate level.

Despite the lack of emphasis on winning, Harter got eight personal bests from his athletes and one national qualifying time.

Senior Pauline Stehly qualified for nationals in the 3,000-meter race with a first-place time of 9:46.9. Underestimated in three meets this season, Stehly's finish was a personal best.

Also coming up with personal bests were Becky Niero and Sydney Thatcher in the 1,500-meter race, Charley Polik in the 400-meter and Sharon Hanson in the 100-meter.

Hanson, a senior, participated in six events on the day in preparation for her first hep­tathlon in two years. She finished first in the 100-meter race with a personal best.

*See WOMEN, page 6*

---

**Men's track picks up second place**

**By Dan Ruthemeyer**

Coach Tom Henderson's men's track team finished second to Cal State Bakersfield on Saturday, placing 27 points back.

But despite the loss, Henderson termed the meet the Mustangs' best performance of the season.

"We were beaten by Bakersfield, but that doesn't concern me at all at this time of year," he said. "We will not run a full team at full strength until March 21 at home against Cal State Los Angeles."

The Mustangs left a significant number of competitors at home, including their top four distance runners, their top two throwers and their top three pole vaulters.

Despite the smaller contingent of runners and field athletes, the Mustangs got strong per­formances in both the distance events and the pole vault.

Cal Poly finished the top two runners in the 5,000-meter event and three out of the top four in the 1,500-meter.

*Placing one-two in the 5,000-meter race were Doug Twilleager and Jeff Ahlquist, who finished with respective times of 15:08.8 and 15:12.0. Both times were personal bests.*

Twilleager, Ross Newby and Tim Campbell finished second, third and fourth for the Mustangs in the 1,500-meter run.

**DOMINGUEZ HILLS TO FACE ANCHORAGE IN REGIONALS**

Cal State Dominguez Hills, winner of the California Col­legiate Athletic Association Basketball Tournament title, will face the University of Alaska-Anchorage in the NCAA Western Regionals.

The regions, which will be held at Eastern Montana State Uni­versity in Billings, will feature Eastern Montana versus Hayward State in the other game. The winners from the two games will each advance to the NCAA Division II playoffs this past Saturday when they beat Cal Poly 70-58 in the finals of the CCAA tourna­ment. The Mustangs failed to receive an at-large berth.

***Three Cal Poly softball players named to All-American teams***

Three Cal Poly softball players were named to the All-American teams, as relays score twice as many points as individuals in the national championships. The women have had 11 swimmers qualify for the NCAA Division II championships this year, while the men have qualified six.

**MUSTANG DAILY**

**Mustangs win three from Hayward State**

By Jim Hawkins

The men's baseball team exten­ded its winning streak to five games this weekend as it swept Cal State Hayward in three straight, bringing the Mustangs' season record to 7-9.

The Mustangs' final game of the series, the second game of Sunday's doubleheader, was probably their strongest perfor­mance of the weekend. Jeff Sut­ter pitched the seven innings for the Mustangs, holding the Pioneers to four hits while recording six strikeouts in Cal Poly's 7-1 win.

The Mustangs got on top ear­ly, and had opened up a 6-0 lead after the third inning.

They scored their final run in the bottom of the sixth off of a booming John Orton home run, his third of the day. He had an impressive weekend against the Pioneers, hitting two singles and a double to go along with the three home runs.

The Mustangs rang up seven hits in the game while commis­sioning only two errors.

The earlier game was a little bit closer. Orton led Poly to a 6-2 lead going into the eighth inning after slamming home runs in the third and fifth innings. But the Mustangs came back from the four-point deficit by scoring six runs in the top of the eighth to take a two-run lead.

The Mustangs' bat however, batt­led back, and tied the score in the bottom of the ninth, sending the game into extra innings. Both teams went scoreless until the bottom of the 11th.

Eric Baysinger led off the 11th inning by grounding out to Hay­ward's shortstop, but was followed by Pat Kirby, who drill­ed a single to left field and made it to second when the outfielder had trouble handling the ball.

Rich Shepperd then came up to bat and won the game for the Mustangs when he hit a long double into the left-center field gap, his third hit of the game.

Jeff Gray, coming in for Eric Baysinger, got the final out after reliever Lee Hancock, was impressive, holding off Hayward State in the final innings. Hancock also pit­ched a good game, holding the Mustangs to just two hits in just over seven innings.

Cal Poly had 10 of 12 hits in the game while recording just one error.

The Mustangs had another close one with Hayward State in their first meeting of the weekend, winning 5-4 Saturday afternoon.

The Mustangs trailed by as many as three in the game while commit­ting only two errors.

The earlier game was a little bit closer. Orton led Poly to a 6-2 lead going into the eighth inning after slamming home runs in the third and fifth innings. But the Mustangs came back from the four-point deficit by scoring six runs in the top of the eighth to take a two-run lead.

The Mustangs' bat however, batt­led back, and tied the score in the bottom of the ninth, sending the game into extra innings. Both teams went scoreless until the bottom of the 11th.

**SPORTS BRIEFS**

**Cal State Dominguez Hills, winner of the California Col­legiate Athletic Association Basketball Tournament title, will face the University of Alaska-Anchorage in the NCAA Western Regional title game at the CCAA Swimming Championships in Bakersfield. The past weekend's events at na­tional qualifying times were the last chance for the relay teams to compete for nationals, which will be held March 11-14 in Long Beach. Cal Poly coach Bob Madrigal said the relay teams, as relays score twice as many points as individuals in the national championships. The women have had 11 swimmers qualify for nationals while the men have qualified six.**
MEN

From page 5

event, and all recorded personal bests in that event.

In all, the Mustangs recorded 14 personal bests and 10 season bests on the day.

Hurdler Dave Johnson, who had competed only in the sprints in the first couple of meets, ran his first high hurdle race of the season on Saturday. Johnson’s time of 14.5 was the second best of his career.

Placing strong in the sprints was Eric Josephson, who finished first in the 200-meter event with a time of 21.7 and second in the 100-meter race with a time of 10.7.

A surprise for the Mustangs was sprinter Mike Voss’ performance in the 800-meter race. Voss finished with a personal best time of 1:58.4, which was only one second slower than Cal Poly’s fastest time.

The Mustangs will face some stiff competition this week when they travel to UC Berkeley for a meet against Berkeley, the University of Nevada-Reno and Sacramento State.

WOMEN

From page 5

time of 12.2 and helped the Cal Poly team to a first-place finish in the 400-meter relay.

The remaining three Mustangs who locked personal bests were Noreen DelBettencourt in the 800-meter event and Stacy Kuehnis and Jessica Johnson in the 400-meter hurdles. DelBettencourt finished at 2:13.4, which is two seconds faster than last week’s performance against UC Santa Barbara.

Picking up multiple wins for the Mustangs were Hansen, Danielle Shriver who won the long jump and triple jump, Ceci Chandler who took firsts in the 400-meter hurdles and the 1600-meter relay and Laurie Hagan who won the 800-meter event and helped the 1600-meter relay team to its win.

Kris Katherhagan, who won the 1,500-meter race last week, picked up a win in the 5,000-meter race this week in a time of 17:29.

Calling Saturday’s meet the final dress rehearsal, Harter plans to have the Mustangs come out in full force this week when they travel to the Aztec Invitational in San Diego. The meet will feature USC, UCLA and UC Irvine, San Diego State and various track clubs.

RULES

From page 5

your defense was weak. This way there will be less strikeouts. The pitchers will really be trying harder," she said.

The changes don’t seem to have done Cal Poly much good. Even though the pitching was strong in the 200-meter event, the Mustangs gave up 10 runs in the 3-1 loss to the Spartans.

The softball team is 4-8 so far this season.

“Don’t think the changes have anything to do with our being behind. We’ve just been playing some real good teams,” Gardiner said.

Cal Poly’s Mike Voss turns the corner in Saturday’s 800-meter race.

Hall of Fame will add two players

TAMPA, Fla. (AP) — Phil Rizutto and Joe Gordon, the slick double-play partners for the New York Yankees in the 1940s, are among the leading candidates for election to baseball’s Hall of Fame this week by the Veterans Committee.

Bob Herman, Tony Lazzeri, Bill Veeck and Leo Durocher are among others eligible. Results of the voting are to be announced at noon Tuesday.

The 18-member Veterans Committee, which includes Hall of Famers Ted Williams, Stan Musial, Roy Campanella and Monte Irvin, can elect up to two persons and has selected at least one in every year since 1951. Bobby Doerr and Ernie Lombardi got the required 75 percent of the vote last March.

In January, the Baseball Writers Association of America elected Billy Williams and Jim "Catfish" Hunter to the Hall of Fame.

Rizutto, a contact hitter and excellent baserunner, played shortstop for the Yankees from 1941 to 1956, missing three seasons because of service in World War II. He batted .273 with 38 home runs and 562 runs batted in, along with 149 stolen bases. Rizzuto was the American League Most Valuable Player in 1950 when he batted .324, and hit .246 in nine World Series.

BASEBALL

From page 5

Cal Poly tallied 11 hits in the win, while committing one error.

“We’ve been in every game because our bullpen has been so effective,” said head coach Steve McFarland, whose Mustangs have suffered four one-run losses.

“An all the breaks and we would be a few games over .500.”

The Mustangs will travel to Thousand Oaks on Thursday to face Cal Lutheran before returning home to play a three-game series with San Jose State. Cal Poly faces the Spartans in a single game on Friday and in a doubleheader on Saturday.

DUNIN

From page 1 source of student input to the City Council.

In February, the council gave its official endorsement to the committee. The committee is now before the present Senator awaiting final approval.

Dunin said he is particularly excited about the student liaison committee because even though students have been involved in city government in the past, when those particular students graduate, the process has to be started all over. 

"The student liaison committee could be not only the beginning, but the culmination of continued cooperation and communication between students and the city," said Dunin. "We have a lot of enthusiastic and capable students, but no continuity."

The new student liaison committee will be the culmination of a promise Dunin made two years ago when he ran for mayor. During that campaign, Dunin said we would form a kitchen cabinet in which student representation would be a top priority. Although the student liaison committee isn't exactly what he had in mind at the time, Dunin said he thinks it is a worthy substitute.

"The kitchen cabinet has proved to be one of the most difficult things for me to put together during the last 10 years. I've always been on the City Council," he said. "I wanted it to be a non-political advisory body, but it is very difficult for me to have an advisory body independent of the council. This body will allow any (student) organization to address the council with its ideas and grievances and we will be able to plan the future together. I think a lot of them have resolved just by making contact."

Dunin said he also plans to have in the near future neighborhood meetings for residents to talk to him and to each other about their concerns. These meetings will be held in city parks and will begin as soon as the weather improves, said Dunin.

"These informal exchanges could result in some neighborhood restructuring on both sides. Since students are part of those neighborhoods, they should come forward with their ideas as well," he said.

"The whole community should be viewed as one big family, Dunin continued. Just as students involved with their parents and got along with each other before moving away to college, so should students and long-time residents try to get along in the community."

"You (students) cannot say, "The universe is there and you have to suffer,"" said Dunin. "It would be much better if we would just say, "the universe is there and we have to live together.""
Brown said. "If you're having problems, it will talk to you and tell you what to do. What's really convenient about this unit is that ordering the shoes by mail costs just as much as if you'd bought them in the store. There is no freight or insurance charge," he said.

The unit is connected directly to the Florsheim Company in Chicago. "It's a little scary," said Brown. "If the unit becomes low on paper, it tells Chicago, and Chicago calls us and tells us to change the paper. It's almost like Big Brother is watching you," he said.

Because the unit is so expensive ($15,000), Brown's leases it for $320 a month.

"We're really taking a chance on this venture," Brown said. "The unit has to sell 12 pairs of shoes a month just to pay for itself."

Brown says that no jobs are in danger from this new employee because it's a sales tool, just like a catalog. "We have to offer more service to our customers, and this is a tool of the future as far as retailing is concerned," he said.

"So far it's been fantastic," said salesman John Kelly. "In about a week, we've sold six pairs of shoes off of it."

One drawback to the sales unit is it only sells men's shoes. "Men usually know what they want, and they don't want to shop. Women are more particular about their size, and they want to try shoes on," Brown said.

Right now there are 60 units in California, and Florsheim is trying to set up 500 nationwide by the end of the year.
