Minor consideration

Arts want own major programs

By Monica Fiscalini
Staff Writer

As a polytechnic university, Cal Poly tends to give the liberal arts second billing. Many liberal arts subjects are offered only as minors, and some professors are afraid that this means the university considers their departments comparatively unimportant.

The School of Liberal Arts offers seven majors, as well as seven minors in such subjects as foreign languages, music, philosophy, theatre and dance.

Michael Malkin of the theatre and dance department said that in forming courses of study at Cal Poly, far too many political decisions are being made over educational ones.

Clifton Swanson, head of the music department, said Cal Poly has been trying for 10 years to figure out exactly what his department is. President Warren Baker has had several studies done to clarify the role, personality and future of Cal Poly. Swanson said the reaction from faculty and alumni has always been that Cal Poly is a unique polytechnic university and such subjects as music are contradictory to its position.

Swanson said a music major would allow the department to do more, pointing out that the department has felt stymied for a long time.

The music department asked for a major five years ago, but getting it has been a slow-moving process. The proposal was supported by the School of Liberal Arts and the Academic Senate, but disappeared once it reached the upper levels of the Administration, Swanson said.

The situation is frustrating, he said, adding that a decision needs to be made because the department is looking to the future.

Tipsy Taxi to return with new funding

By Dawn J. Jackson
Staff Writer

All lights are green for the return of the Tipsy Taxi program, and barring any schedule difficulties, it will be available for use in less than two weeks.

The ASI-initiated program, which was piloted fall quarter, offered free taxi rides to students who were too drunk to drive themselves home. About 350 students used the service in the two-and-a-half months it was offered.

The new program will be similar to the one offered in the fall, but the costs will be spread among different sources. ASI funded five-sixths of the cost of the pilot program while the Intra-Fraternity Council picked up the other sixth.

Franklin Burris, chairman of the program, said ASI made the decision to restructure the program because Cal Poly students were not the only ones who could potentially benefit from Tipsy Taxi. "It's a community responsibility, so we felt the program should be more of a community effort," he said.

The program will be available to all San Luis Obispo residents, not just students. The program does not provide for rides out of the city. Burris said this would take away from the time the taxis will be available in the city, where the greatest need is.

Coupon books good for 10 rides home will be sold to local bars, restaurants serving alcohol and fraternities and sororities. Other groups, such as a large campus club hosting a party, will be able to buy the books through ASI and arrange to sell back unused tickets.

The coupon books, which have a face value of $65, will be sold for one-third of the cost — $21.75. The other two-thirds are

Creative minds come together

Advertisers share talents

By Vincent Aviani
Special to the Daily

More than 300 communications students and professionals joined creative forces this weekend at the Third Annual Santa Barbara Creative Seminar.

Sponsored by the Greater Santa Barbara Ad Club, the seminar showcased advertiser and creative director Hal Riney. Leading talents in design, photography, illustration and commercial direction were also present.

Riney, now famous for his ingenious Bartles and Jaymes, Gallo Wines and Dryer’s Ice Cream advertising campaigns and commercials.
Should Poly applicants have to declare a major?

Matt Milburn, mechanical engineering senior:

No. It seems awful rough on high school students to force them to choose a major. It's awfully abrupt to decide right out of high school.

Chris Keneuf, economics junior:

I feel there should be an undeclared major for students who have been here less than a year. They should have to declare a major when they're sophomores.

Al Thomas, construction management graduate student:

I think so. The students should come here knowing what major they want to take.

Tony Brown, engineering technology freshman:

It sucks, but the school's so impacted that they have to. I don't know anyone who hasn't changed their major yet.

Until about five years ago, priority registration was routinely granted at Cal Poly to athletes and other students, such as ASI officers. The privilege was halted apparently because it got out of hand and became difficult to keep track of. Since then, the athletic department has pressured the Administration to restore it, and that was done, starting this quarter. As far as I am able to tell, there was no official announcement.

Under the rules spelled out by registrar Gerald Punches in a Feb. 4 memorandum, approximately 170 athletes, chosen by their coaches, are eligible for priority registration, with fixed allocations for each team per quarter. The allocations for spring were: 56 for track and field, 45 for football, 20 for baseball and softball, 24 for tennis and 12 for volleyball.

The reinstatement of priority registration is not without resentment from many non-athletes. Why shouldn’t students who work to support themselves be granted the same privileges? Why not band, drama or student government participants? The athletic department argues that our athletes should be put on an equal footing with athletes from other schools, who have the luxury of priority registration. Also, Assistant Athletic Director Marilyn McNeil pointed out to me that athletes’ class schedules and report cards are scrutinized by both Cal Poly and the NCAA.

“The academic rules for athletes are more stringent than for any other body on campus,” McNeil said. “Not that all of us don’t have to graduate, but (non-athletes) are not checked every quarter for grade point average, overall grade point average and satisfactory progress.”

What effect will priority registration have on the rest of us? It means that athletes will easily be able to get the general education classes that have always been difficult to get. It means that athletes will be able to choose the preferred sections (usually in the morning) with the most popular professors. As far as major courses are concerned, the various departments will be affected differently, depending on the number of athletes and total student enrollment in that department. Nearly half of all Cal Poly athletes are in the schools of Business and Liberal Arts, and the enrollment are two of the smallest in the university. They will probably be the most affected by the privilege.

Is it fair? There is a case to be made for the athletes. It is also true, however, that priority is much more important at Cal Poly than at most other universities. The argument, “Every other school does it, so should we,” cannot be applied here.

In the past year we have agreed to give nearly $40 per quarter out of our own pockets to support the new recreation center and athletic scholarships. In light of our generosity, this latest move by the athletic department is shamelessly unannounced — seems almost like a slap in the face. Why wasn’t it announced, anyway? Certainly not because it isn’t sufficiently important. Either the administrators have reached a point of complete contempt for student opinion, or else they’re afraid of us.

Jeff Kelly is a mechanical engineering senior.
Reagan to look at acid rain treaty

OTTAWA (AP) — President Reagan said Monday there are "no quick and easy answers" for curbing acid rain, but he agreed to consider a Canadian proposal for a treaty requiring lower pollution levels by an agreed date.

Reagan made his surprise offer in a speech to Parliament after Canadian Prime Minister Brian Mulroney told the same audience, "In this matter, time is not our ally but our enemy. The longer we delay, the greater the cost."

The agreement to consider negotiations allowed the two leaders to wind up a 24-hour visit by Reagan on an upbeat note.

Earlier, both sides predicted there would be no agreements, and U.S. officials said privately that a treaty was not the correct way to combat pollution, particularly since various technologies are being explored to fight it.

Moscow embassy left damaged

MOSCOW (AP) — A congresswoman who made an unannounced nighttime inspection of the U.S. Embassy said Monday that Soviet KBG agents have "fully compromised" it and undoing the damage will cost tens of millions of dollars.

Rep. Dan Mica said he and Rep. Olympia Snowe made the surprise inspection beginning at about midnight at the embassy, which is the focus of a sex-and-spy scandal allegedly involving former U.S. Marine guards.

Mica and U.S. officials said privately that a treaty was not the correct way to combat pollution, particularly since various technologies are being explored to fight it.

Meese denies Contra probe block

WASHINGTON (AP) — Attorney General Edwin Meese III denied on Monday that he blocked an investigation into alleged gun-running to the Nicaraguan Contras last year when Congress was preparing to debate resumption of aid to the rebels.

Meese, speaking at a news conference, also rejected suggestions that then-National Security Adviser John Poindexter had urged him to shelve the investigation.

He acknowledged, however, that he had kept abreast of the probe, discussing it with the U.S. attorney in Miami, Leon Kellner.

Meese's handling of the investigation is one of several matters relating to the Iran-Contra affair in which the Justice Department's activities are coming under increasing scrutiny.

Catholic Bible: tradition in, sex bias out

WASHINGTON (AP) — America's Roman Catholic bishops published a new Bible translation Saturday, edging away from language seen as biased against women but at the same time moving to more traditional phrasing in general.

The result is a Bible that often sounds more like the King James Version than the modernized 1970 translation it is replacing — but without the constant use of "man" or "men" when referring to people of unknown sex.

God and Jesus are still male in all references.

The editors, in a pre-publication interview, acknowledged they wouldn't please everyone.

In one area of controversy, in a passage listing people who won't inherit the kingdom of God, the new version includes "boy prostitutes practicing homosexual acts" rather than the 1970 version's "sodomites."

A Vatican statement last October said bishops should be more aggressive in stamping out pro-homosexual views within the church. But the committee of priests who put together the new translation, approved in March 1986, said the detailed wording was truer to the Greek original.

The overall revision covers the New Testament portion of the U.S. church's New American Bible and should find its way into Catholic services during the next two years.

Officials argue over amnesty rules

WASHINGTON (AP) — A debate is raging in the Agriculture Department on how widely to apply new rules that allow amnesty for illegal aliens needed to harvest fruits, vegetables and other perishable commodities, officials said Monday.

New federal immigration regulations are scheduled to begin going into effect on May 5. The rules are being prepared to carry out the new law that opens the door to legal residency for many aliens who have been living and working in the United States illegally.

A general amnesty is provided for those who can prove continuous residency in the United States since Jan. 1, 1982. The law also provides several avenues for working legally in this country, including provisions for alien farm workers who have a history of helping with fruits, vegetables and other perishable commodities.

The USDA's main role is to provide specific interpretations of the law's definition of "seasonal agricultural services" performed by alien labor, primarily from Mexico.

According to the law, seasonal agricultural services include the "performance of field work related to planting, cultivating, growing and harvesting of fruits and vegetables of every kind and other perishable commodities, as defined by the secretary of agriculture."

It is the interpretation of the last part — "other perishable commodities, as defined by the secretary of agriculture" — that is the biggest stumbling block.

The New York Times reported Monday that the Agriculture Department has drafted rules that mean more illegal aliens will qualify for amnesty than expected.

Records indicate the program was intended to cover labor for other produce that isn't picked immediately after ripening.
EXECUTIVE INPUT

Cal Poly's real-world needs are examined by its own cabinet of presidential advisers from the big-shot ranks of business and industry

By Kathy Kent

For Darlene Slack said the president's cabinet meets once a year to discuss issues involving the type of students the university is producing as well as assessing the needs of the campus. The cabinet members give input about the kinds of employees they look for and the type of education they want their employees to have.

Slack said she believes many corporate donations may have been a direct result of the cabinet members' interaction with the university.

"We can't put a dollar value on the gifts that have directly resulted from the cabinet," Slack said. "but when a cabinet member comes to campus and learns what the needs are, he can go back to his company, and later on down the road, may convince his company to make a donation to the campus."

Cabinet members represent a wide variety of well-known individuals and corporations. Former Secretary of the Interior William P. Clark, San Francisco Examiner Publisher William R. Hearst III, as well as high-level executives of corporations such as IBM, Xerox, Foster Farms, Pacific Bell, Loomis Inc., and the California Farm Bureau Federation are members of the cabinet.

In an effort to assess the needs of the various schools of the university, a committee of the cabinet has asked each of the seven schools to compile a list of prioritized needs. This report will be bound and given to all members of the cabinet, so they can take it back to their companies and perhaps find a way to fulfill the need.

Slack said there are also parallel on-campus committees which carry through with the decisions and recommendations the cabinet makes when it is not in session.

Cabinet members also help to provide influence on outside decision making. Slack said that members of the cabinet recently met with the Commission of Master Planning of Higher Education and discussed the probability of doing applied research at Cal Poly. Formerly, only the University of California schools have been permitted to do applied research. Now, Slack said, the commission has issued a report with language appearing to support applied research at CSU schools.

According to Slack, four committees were developed to explore certain areas of concern. The first is the faculty development, recruitment and retention committee which explores ways Cal Poly can attract top instructors and ways they can keep them here. This includes finding funding for conferences and seminars for the instructors that the state doesn't provide.

The depth and breadth committee researches issues related to careers. It also debates over the balance of general education and technical training in the curriculum.

Another committee, quality of campus life, looks at the total experience of a student, including the social, cultural and wellness of students. The wellness program is an offshoot of this committee.

A final committee, resource development, is divided into subgroups: computing resources and corporate donations. The computing resources committee deals with evaluating what resources are available on campus and how to best use the resources that are available. This committee also looks for ways to get resources that are lacking.

The corporate donations committee tracks down money and equipment needs and makes this information public.

"Why do these executives donate their time and energy to the cabinet?" Slack said they come to Cal Poly and they "like what they see."

'Day of the Child' a success in Mission Plaza

Christine C. Temple
Staff Writer

Children with families of all ages gathered to celebrate "Day of the Child" Saturday in Mission Plaza.

The event was to commemorate the nationally-proclaimed "Week of the Child," held annually.

Human development seniors Anita Schuster, Amy Centis, Suezie Nation and Valerie Lante worked since early January to coordinate efforts of private organizations throughout San Luis Obispo to participate in Day of the Child.

Booths sponsored by Special Olympics, the Early Childhood Education Club at Cuesta College, the Cal Poly Children's Center and the Cal Poly Petting Zoo were among 40 set up to provide information, food and activities promoting learning for young children.

Even parents raised their hands to clap and sing along with Don Norton, one of the three scheduled performances held at the event. Other performers were Danseline/Beach Cities Gymnastics and Pat Jackson's American Dance Company.

An ambulance and police car were provided by the San Luis Police and Paramedic Departments for curious children to inspect.

The Cal Poly Audio Visual Department provided a public address system, VCRs and other necessary equipment to attract shoppers and passers-by.

Without the support of local businesses and Commission of Children and Youth member Haila Hafer, the Cal Poly students said the day would not have become a reality.

"It's worked out perfect. My family is having a great time," said Centis. Schuster said there were a few minor problems: the fire department was unable to participate and some political organizations such as the Anti-Abortion activists displayed booths.

"(The event) wasn't meant to have anything controversial," Schuster explained.

But overall, the students said their months of hard work were successful, as was apparent when passing through the crowd of smiling children playing with balloons and crawling through cardboard tunnels of mystery.

Those who arrived late in the day said their attendance was spontaneous. A small boy named Jefffrey was drawn into the mini-fair by the large crowd and musical entertainment.

"We were eating at the Spin-dle, so I just got here, but I'm having a fun time so far," he said.

But, after nine consecutive years, the Day of the Child is in jeopardy of ending because of monetary and insurance problems, but organizers are trying to keep that from happening.

Parents and students were encouraged to make reasonable efforts in promoting the continuation of the event for the children of San Luis Obispo.

notables

Dean Freeman, a graphic communication senior, recently received a $1,000 Technical Association of the Graphic Arts student award for research and scholarship.

Freeman won the award for his paper "Artificial Intelligence: As applied to Text Entry Systems" which he presented at the annual TAGA conference in San Diego. The paper will also be published in the TAGA Proceedings, an annual journal by the printing industry association.

Kenneth Reiner has been named head of the business administration department, succeeding Dan Bertozzi, Jr. who has returned to full-time teaching.

A member of the faculty since 1983, Reiner earned an undergraduate degree in mechanical engineering from the University of Idaho and two advanced degrees from Purdue University. He served on the finance faculties at Texas A & M University and Concordia University in Canada before coming to Cal Poly.

Alison Streich, a former Cal Poly student, won first place in the Nissan Focus Awards for students for her film "Debonair Dancers." The film is about a man in Bakersfield who teaches ballroom dancing to the mentally handicapped.

Michael Malkin, of the theater and dance department, will have a staged reading of his play "Tides" at the 21st Street Theatre in Los Angeles.

Malkin has already won the Mill Mountain New Play Award for 1986 for "Tides." The play, written during a sabbatical leave in the 1985-1986 academic year, examines how a family divided by age, lifestyles and geography deals with the death of one of its members.

Laurie M. Chirica, a computer science professor, recently received a $4,000 Excellence in Teaching award from TRW Inc. The award is the first of what is to be an annual recognition to a member of the School of Engineering faculty.

Chirica, who joined the Cal Poly faculty in 1984, was an assistant professor for seven years at UC Santa Barbara before coming to Cal Poly. Since 1981 he also has been a computer systems consultant for the Mission Research Corporation in Santa Barbara.

Todd Mendenhall, Todd Reinhart and Craig Davis were recently honored as the outstanding seniors in engineering programs at the Engineering Week banquet. Each received $100 savings bonds from Lockheed Missiles and Space Co. and the Santa Barbara Research Center.

Mendenhall received awards for overall academic excellence in engineering. Reinhart was honored for outstanding contributions to the objectives and public image of the university through his involvement in campus activities. Davis won the award for contributions to the objectives and public image of the School of Engineering.

Alyson Strelich, a senior majoring in both food science and biochemistry, has been selected by the California Food Processing Sanitation Association to receive a $1,000 scholarship. The award recognizes Austin's achievement and potential for future contributions to the field of food science.

Unocal Corp. has given $7,000 to aid the study of petroleum engineering in Cal Poly's mechanical engineering program. The money will be used to sponsor the work of assistant professor Amrohilla Mehdizadeh, who heads petroleum engineering studies here.

More than 130 students participated in the first annual Residence Community Service "Nurturk" Dance-a-thon recently. A check for $1,000 will be presented to Muscular Dystrophy. Door prizes were donated by local merchants. Armando Gama, Kelly Hendrickson, Kristina Vitols and Gen Nilluka danced the longest. Vitols solicited the most pledges — more than $200.

Cal Poly was chosen by International Business Machines to have two classroom laboratories using IBM hardware and software established on campus. Bernard Troy, education professor, will oversee the program.

Notables must be received in writing by noon Friday in Graphic Arts Building Room 226.

future with an unclear definition of what it can do and what is expected. "It's very unhealthy to continue in that mode any longer," Swanson said.

The theatre and dance department has offered a minor for one year, but Malkin does not see this as a stepping stone to major status. He said the university has a real problem deciding what to do with the arts. He said he feels bitter about the way his field is perceived at Cal Poly, adding that the frustration liberal arts professors are feeling is not healthy.

Malkin said he has a lot of respect for the Cal Poly students and graduates involved in theatre and that they are entitled to more than minor status. The theatre and dance program is not legitimate as a minor, he said, and the department's pride would increase with a major. Malkin said he does not like the "If you don't like it, leave it" attitude because he wants to stay to better the situation.

Swanson agreed. "The previous president said there would be a music major over his dead body and if we didn't like it we could go somewhere else," he said. Swanson said he wants to stay because he does not want Cal Poly to be the same in 20 years as it was 20 years ago.

And the theatre and dance department isn't alone. The philosophy department offers a minor but no major. Tal Scriven, head of the philosophy department, said it is demoralizing to have to tell students who are interested in majoring in philosophy to go somewhere else to get a degree.

The philosophy department of 12 faculty has submitted a proposal to get a major program in fall 1988. Scriven said the Administration has legitimate concerns about resources and money, so the philosophy department has designed a program with limited cost. He said he is confident the proposal will be accepted.

Scriven found out from a survey of philosophy minors that at least 40 students would rather major in philosophy than in their current majors. Cal Poly has the largest philosophy minor program in the CSU system, with a current enrollment of about 80.

Scriven realizes philosophy classes are jammed now, but said the major would affect the problem. He pointed out that even the Massachusetts Institute of Technology has a philosophy major.

The foreign language minors began in 1983. Department head William Little sees majors in the future, but is realistic in his expectations. He said that while it would be fulfilling to have majors, right now the minor is crucial for department morale.

The resources aren't currently available to accommodate majors, Little said, which keeps the department from increasing services and adding such languages as Japanese, Chinese, Russian, Arabic and Portuguese. Little said the department feels frustrated in terms of how it serves the university; only one in 10 students who want to can minor in foreign languages because of limited resources.

"When moving towards majors we think in terms of interdisciplinary majors," Little said. He said he is working to keep the department creative, innovative and quality-oriented in anticipating the future. He sees foreign languages as tools of communication, and pointed out that some other schools don't recognize this.
SEMINAR

From page 1

cials, gave some tips to students entering the advertising business. "My advice to anybody just getting into the creative areas of advertising is to just work really hard, and to keep working hard," Riney said. "It is just really important to really work yourself and constantly question yourself and keep trying to get better."

The show also presented advertising photographer Bruce Wolf, illustrator Javier Romero, designer Linda Hinricks and television commercial director Steve Seigman. "We really worked hard to bring some impressive people to this year's conference," said Richard Barre, seminar chairman. Each speaker had something to say or show which seemed to stimulate and enlighten the 350 members of the professional and student audience.

Cal Poly business student Gwen Montgomery explained that she was surprised to learn how much business and communications are connected. "It was really interesting to learn how much business and the creative end do intertwine and how each is dependent on the other," Montgomery said. "I definitely think that the seminar was a motivational kind of thing that built up enthusiasm for advertising and illustration. I think that any business major who has an interest or flair for this field should consider it for another avenue to take."

Kathy Thompson, a 24-year-old communications major at UC Santa Barbara, also saw value in the seminar. "To see people like Hal Riney talk is really an inspiration and learning experience for anyone considering communications as a career," she said.

Cal Poly journalism professor Steve Seigman, television commercial director Linda Hinricks and television commercial designer Linda Hinricks all gave their advice to students. "To see people like Hal Riney talk is really an inspiration and learning experience for anyone considering communications as a career," she said.

Robert Goggin also seemed to think that it was a knowledge-builder because of the quality of people that were presented here. "I think the show was really successful," said Barre, co-producer of the event. "Just the number of students and professionals who showed up signals that this was a success."

Palm Springs

to get a break this spring

PALM SPRINGS (AP) — Remembering spring break '86, when students ran wild in the streets, officials of this desert resort believe they're the ones getting a break this year.

Spring breaks are spread out over a longer period this year, so the student visitors will be coming in over a few weeks," Mayor Frank Bogert said. "Last year, they all came in one fell swoop."

The city was caught off guard last year when beer-guzzling youths took control of the main street briefly, throwing rocks and症状ing clothes off young women and damaging cars. An estimated 10,000 young people packed Palm Springs that Easter Week.

Police Capt. Gary Boswell said police believe it is going to be quieter this year, "but if it's not, we're ready." Easter Week, Aprill 10-19, is still the biggest time of the year.

"Last year, when Easter came earlier, it seemed that all the schools were out at one time," Boswell. "But schools on the quarter system already have had spring break."

"We got a good dress rehearsal (on March 23-29) for Easter Week because we had a lot of drunks in town, a lot of young people with a snout full," he said. He said police made 78 arrests and handed out 30 plus citations.

This past weekend, there were 58 arrests related to the spring break crowd, 30 them for public drunkenness, said police Detective Fred Donnell.

The city is spending $200,000 more than last year, much of it to augment its 85-man police force with 40 officers from the Riverside County Sheriff's Department and the California Highway Patrol.

The officers have undergone crowd-control training, including drills where Army National Guard troops mimicked rowdy youths.

A command center has been set up in the center of town to coordinate law enforcement.
In the women's race, Catherine Rice of UCSB took the top honors, followed by Eileen LaPorte of the University of Santa Clara and Mustang Danielle Michelelli. This sent the Mustangs off on a good start, leading with 166 points from Creston. UCSB paled in second place with 133 points, and Stanford brought up the rear with 74 points.

Sunday morning started with the time trials, raced on a 1.2 mile course set up by Highland Drive and Steiner Creek Road. UCSB's women's team soaked up the first two berths, with Kim Davis posting a 3:18.9 and Rice a 3:22.9. Chris Smith of Cuesta College placed third with 3:24.7, followed by Michelelli in fourth and Chris Pappas in fifth, both of Poly.

Meanwhile, the men's C showed a Santa Clara rider posting a 2:52, followed by a Berkeley competitor at 2:53.5. Mustang Eric Shadrick finished third at 3:07.7.

In B's, Thornburg placed first for the Mustangs with 2:58.7, followed by Pomona and Santa Barbara City College at 3:01.6 and 3:04.3 respectively. A's were led by John Nist of Pomona at 2:55.2, followed by John Moffett of Stanford at 2:56.9.

Later that day, the criterium was held on the central campus, with sunworshippers out in force to cheer on the racers. Chaz Fetro of Sonoma State easily won the 35 laps of the men's C division with more than 20-second win, followed by Mitch Mani of Pomona and David Warren of UCSB. The Mustangs' Alex Estrada, Rich Keenan and Steiner placed respectable showings of fifth, sixth and eighth.

Following the C's, the women took to the field with Poly's Michelelli capturing first, trailed by Ann Talbot and Rice of UCSB. Seventh and eighth places went to Poly's Pappas and Mandy Trank.

Moving into the B's, Brock LaPorte of Stanford finished first and Wheelmen Jeff Johnson, Thornburg, and Lindholm placed third, sixth and eleventh-place finishes. Because the second-place finisher was not

Cal Poly's weekend games against Arizona State and the University of Arizona were marked by fine overall play from the Mustangs, who encountered their only problem in making the most of their scoring opportun­ities.

"We should have beaten Arizona State by six," said club president Sean Tuite. "The shots were there but we couldn't get them in."

Despite failing to convert on several scoring opportunities, the Mustangs came up with a 6-5 win over Arizona State on Saturday before losing to the University of Arizona on Sunday 8-4.

Leading the way offensively against the Sun Devils was Kyle Marshall who single goals in each the first and fourth quarters. After scoring his first

Splits a pair of weekend games in Arizona, the Cal Poly lacrosse team has put itself in a
do or die situation.

With the Mustangs still at the bottom of their league stand­nings, they will need a win over UC Berkeley on April 14 to pre­vent themselves from dropping into a lower division for next season.

Volleyball team loses three to end season

By Paul J. Roberts

The Cal Poly men's volleyball team fell 3-1 Saturday night to second-place Santa Clara University in a close and tedious match.

Poly also lost two previous matches this weekend, one to Santa Clara earlier Saturday (3-2), and Friday night to Mendocino College (3-0), eliminating any playoff possibilities.

All four games Saturday night were close battles to the end, with Santa Clara holding a slight edge throughout. In the first game, Santa Clara was up 7-2 before Poly came back to tie, and then the lead was traded back and forth until Santa Clara finally took the game 16-14.

Although Santa Clara is potentially a first-place team (depending on UC Santa Cruz's weekend results), it didn't show in consistency, and that's where Poly lost the match. Santa Clara again dominated the beginning of the second game, but Poly came back to tie it and ended up winning its only game thanks to some strong defensive blocking that held Santa Clara down 15-13.

The third game was almost a replay of the first, with the teams tied until the end when Santa Clara took over 15-12, due mainly to Poly's inconsistent hitting and serving that left the Mustangs looking confused and unorganized on the court.

Poly's fatigue from three straight matches began to show in the fourth game when Santa Clara dominated all the way through in a quick and final defeat 15-5.

Santa Clara's win can partly be attributed to its everyday practice and Poly's two-week break from practicing due to finals and spring break.

"The two weeks killed us," said Poly player Daren Stewart. "Mentally, everybody was not prepared," said Cal Poly captain Jim Barnhart. "We need to be prepared," said Cal Poly captain Jim Barnhart. "We need to be prepared."

Baby M case divides feminists

NEWARK, N.J. (AP) — The practice of surrogate parenting, upheld last week in the Baby M case, is dividing feminists, with some arguing that it exploits women and others saying women must have the right to control their wombs.

The National Organization for Women, which has led the fight for equal rights for two decades, has not taken an official stand on the matter.

Surrogate mother Mary Beth Whitehead's fight for custody of her daughter has led many feminists to argue that surrogate motherhood has special risks, such as a mother's bond with her child, that should lead lawmakers to either ban the practice or regulate it so women have the right to change their minds after giving birth.

But others say a woman's right to bear children extends to the practice of surrogate motherhood and other alternate forms of procreation, including in-vitro fertilization and artificial insemination.

The case has also raised the issue of whether courts should give preferential treatment to women in custody disputes because of the biological bonds they have with their children.

"The feminists have painted themselves into a corner," said Joan Wile, a playwright and surrogacy critic. "We didn't foresee this. We think women are equal to men in every regard, but when it comes to the mothering of an infant, we have to turn around a little bit."

"Surrogacy raises all kinds of new problems," said Betty Friedan, a founder of NOW and visiting professor at the University of Southern California. "If you're in first-stage feminism where equality means sameness, where to have equality is to deny the differences between men and women, then you're really stuck."

State NOW leaders were reluctant to discuss surrogacy or the issues that surround it.

TAXI

From page 1

guaranteed by Cal Poly, Cuesta College and the California Beer and Wine Wholesalers Association (specifically, All-American Beverage Company in Santa Maria).

Cal Poly and Cuesta College will split their third of the cost proportionately, according to student population. All-American Beverage Company will pick up the other third. Yellow Cab Company will provide the taxi rides at a flat-rate of $6.50 per ride.

"It's more of a three-way operation now. ASI no longer has the whole burden," Burris said.

Three weeks ago, the San Luis Obispo City Council unanimously passed a resolution stating the city supports the Tipsy Taxi program as it will help prevent people from driving while intoxicated. Steve Henderson, assistant to the city administrative officer, said, "This is just another effort toward strengthening the bond between the City of San Luis Obispo and Cal Poly. The city recognizes the relationship between the private sector and Cal Poly." A similar resolution will be brought before the San Luis Obispo Chamber of Commerce later this month.

ASI has $1,000 budgeted for the program this quarter, most of which is going toward printing expenses of the coupon books and program guidelines. Once this initial expense is taken care of, Tipsy Taxi will be a better program for a smaller price. "Now, what it cost us to run the pilot program for one quarter will fund the program for the whole year," Burris said.

He also said that the program will be better for students if it was less dependent on ASI for funding. "The program will be more stable with these different areas of support. It's like insurance that the program will last."

ASI also has the responsibility of selling the coupon books to the bars, restaurants and fraternities and sororities. Burris said ASI is going to ask the local chapter of Mothers Against Drunk Driving to help them sell to local establishments. "We're going to concentrate on the fraternities and sororities, as they're more accessible to us," said Burris.
