Administrators consider enrollment expansion

By Matt Weiser
Asst. managing editor

President Warren Baker and California State University Chancellor's Office met to evaluate the possibility of increasing enrollment by up to 2,000 students, perhaps within the next decade.

Ralph Bigelow, director of analytic studies for the Chancellor's Office, said CSU Chancellor W. Ann Reynolds chaired a meeting with Cal Poly and the Cuesta College board.

By Coleen Bondy
Staff writer

The Cuesta program provides chance to earn nursing bachelor's degree

Cuesta College does not have a nursing program, but Cuesta College was chosen to house the program in this region.

The cost of the bachelor's degree runs from $5,000 to $7,000. Starting pay for a registered nurse with a bachelor's degree is about $31 or $32 an hour, according to Ann Grant, chairman of the nursing program at Cuesta College.

The curriculum for the bachelor's degree enhances a registered nurse's knowledge of community health, physical assessment of patients, and leadership and management skills.

Cal Poly students who are working toward or already have a bachelor's degree can complete the two-year nursing program and go directly into the master's program.

With a master's degree in nursing, there is incredible flexibility in career options, such as setting up a private practice or teaching at the college level, Grant said.

Applications for the two-year nursing program will be accepted until Oct. 15. The only requirements are a year of basic chemistry and a year of basic algebra, even at the high school level.

There is a 36-student limit on this program, and a third of the applicants are accepted, said Grant. There is no limit on enrollment for the bachelor's program.

We're closer to World War III than we know

We are at war with Iran. Nobody has admitted it, and no one has declared anything yet, but then Vietnam was the same way. It's not a send-in-the-troops war and it's not a cruise missile war. It's more like a warm war. The sides have been exchanging unpleasantness for years and now, it makes productive discussion impossible, and it makes productive discussion impossible, and it makes productive discussion impossible.

Past Deadline

Matt Weiser

like two kids in a playground fight: getting hostile and shoving each other back and forth, but never throwing any big punches.

The United States has dealt the latest blow with a helicopter assault on an Iranian ship. On Monday, two U.S. helicopters, on patrol near Iran, discovered an Iranian landing craft dropping mines over the side. After attempting to establish radio contact and firing a warning shot with no response, the helicopters received permission to open fire with guns and rockets. The Iranian ship was set afire and left dead in the water.

Such actions have been concealed by the U.S. government for months. An earlier "demand" for a cease-fire was shrugged off by Tehran, and on the next day of this month, the U.S. State Department accused them of unacceptable sailing. At this time, Iran was again "threatened" with sanctions if they didn't immediately agree to the cease-fire. This is not the way to end wars; this is a recipe for creating them.

The first and most important ingredient for peace is an open mind. You can't deal with people productively unless you respect them, and you can't respect them if you believe them to be sword-handling flesh-eaters.

A perfect example is Reagan and the Russians. The U.S. had used to preach the doctrine of the mad Russian earth conquerers. The time has come to either end the era of the mad Russian earth conquerers, or start World War III right now.

J.J. Peterson, photography, junior:

I think it's a total plus to the mentality of the nation. I think football is for knuckleheads. But if anybody wants to get together on Monday night, instead of watching the game, let's go play some tag football down at the park.

Wendy Lavender, dietetics and food administration, freshman:

As far as I know I think that they're making enough money already. Although in that profession it's kind of risky. You just don't get just injured and you're done.

ON THE STREET

What's your opinion of the NFL strike?

Deb Lynn Frasier, education, senior:

I don't understand why they're doing it. Don't they get paid enough already?

Sean McCartney, city and regional planning, sophomore:

I figure that if they're getting paid to give up fighting for its causes without getting something in return. The current administration is full of people who think it can stop the war with guts while useless, and in the more powerful and prosperous democracy. The Reaganites have clearly shown their reluctance to do this.

When you get right down to it, people are people, whether they live in the desert or on top the world's largest oil reserves, or in the more powerful and prosperous democracy. The Reaganites have clearly shown their reluctance to do this.

When you get right down to it, people are people, whether they live in the desert or on top the world's largest oil reserves, or in the more powerful and prosperous democracy. The Reaganites have clearly shown their reluctance to do this.

Demand prompts plan for new childrens center

By April Karys
Staff Writer
and Elizabeth Barrett
Special to the Daily

Inadequate facilities and extensive demand have prompted plans for a new ASI Children's Center to be located on Highland Drive.

The children's center, provides day-care and preschool services to the children of students, faculty and staff. There are about 300 families on the waiting list.

Lori Regan, director of the center, estimates the new facility will be completed in two years.

"That's a conservative guess," Regan said. "We can't stay here (in the center's current location) much longer than that."

Regan's office, at the back of the wooden bungalow that houses the 14-year-old center, is so small that the four people who share it cannot work there at the same time without severe crowding.

"These buildings were to be demolished in the '70s. They are not earthquake proof and we are right in the middle of a flood zone," said Regan. "It's mostly a problem of building availability, if the administration could work with us to get a new building it would be quite helpful."

Building codes, as well as fire safety standards, are set up so that the code in effect at the time a building is erected is the code that governs, said Roger Conway, ASI executive director.

"There are, however, moral and ethical considerations," Conway said. "We have been running very careful maintenance checks on that building (the children's center). We regularly look for dry rot in the wood and check out the roof."

Although Conway's department funds the children's center at $40,000 to $50,000 per year, fixed costs such as employee wages increase more quickly than general inflation, he said. In order for the center to continue, Conway added, the strategy would either be to persuade ASI to keep funding the facility at its present size, or to increase the size of the center. Either would spread fixed costs over a larger client base.

A larger client base would be welcomed by the families on the waiting list. The new center would provide 108 to 154 state-licensed spaces, as opposed to the 36 the facility now has. Because the facility is funded for only 36 spaces per hour, some children attend part time.

Regan said parental demand has prompted plans for the addition of a kindergarten service with the new facility.

"The center's popularity could be attributed in part to the emphasis on natural learning processes that the facility maintains," Regan said.

"We strive for a curriculum free of bias regarding age, race, gender or handicap," said Regan, who taught for eight years at Cuesta College's child development department. "There is a strong focus on a sensori-motor curriculum because children learn through their bodies by acting on the environment and from the experiences they go through. It is a very natural way to learn."

Regan said that the center's teaching focuses on self-esteem. The goal, she added, is to enable the children there to see themselves as able learners and to be absolutely delighted with themselves and in the learning process.

"We talk to the children," Regan said. "They learn by consequences natural to the situation. It's a democracy of opposed to an authoritarian or a laissez-faire system. If the child spills milk, it's no big deal, he just has to wipe it up."

Regan, who earned a master's degree in child development from Pacific Oaks College in Pasadena, said that although the new center does have a site on the Cal Poly Master Plan, and permission to build has been given by Cal Poly President Warren Baker, approval for the new facility still has to be gained from the Chancellor's Office and from ASI.

"What ASI is striving to do is to look at the numbers in a 25-year projection and to ask ourselves if this is a good business prospect," said Conway. "We all can agree that it would be a good thing to do, but we also need to agree that it would be a sound investment of student dollars."

Conway said that one funding option now being explored is a $32,000 loan, by which private lenders loan money to nonprofit public benefit programs such as ASI. The benefit to the lender is that the tax rate on interest income from the loan is eliminated, said Conway. The benefit to the borrower is that the facility will be closer to campus and to be absolutely delighted with themselves and in the learning process.

Who Do You Call When You Want To Identify A Soccer Ball From 22,300 Miles In Space?

If your answer is Ghostbusters, we want to wish you all the best and have a nice day. If you answered "TRW", here's the rest of the story.

The U.S. Air Force asked us to build a ground-based electro-optical surveillance system that could identify an object the size of a soccer ball from 22,300 miles in space. We did it, utilizing 3 telescopes and a large computer system. Then they asked us to build four more. Quite an achievement, but it's just one example of TRW's impact on the future.

TRW offers you the freedom to move among a wide variety of opportunities in microelectronics, high energy lasers, large software systems, communications, and scientific spacecraft. If you're mapping in engineering, computer science, math, or physics, and want to be with a company that's driving technology into the next century, it's not too soon to talk. Tomorrow is taking shape at a company called TRW.

If you are unable to see us on campus, please send your resume to: TRW, College Relations, E2/4000, One Space Park, Redondo Beach, CA 90278.

Because Anywhere Else Is Yesterday.

Plan needs changes

1960 education plan outdated

By Kristine J. Ashley
Staff Writer

California's higher education system could use some improvements, and although there are some proposed changes, they may have no effect on Cal Poly.

The Commission for the Review of the Master Plan recently scrutinized the Master Plan, a 1960 document upon which California's higher education is based. The commission released "The Master Plan Renewed," a report that made several recommendations.

The report states that since 1960 California's economic and social conditions have changed dramatically, leaving room for improvement in the plan.

The commission, made up of 16 Californians who are not involved in higher education, spent two years on the study. An executive staff worked full time gathering background information and writing documents.

The commission's recommendations for improving education are directed toward the University of California, the California State University, community colleges and independent institutions.

Robert Lucas, associate vice president for graduate studies at Cal Poly, represented the university's views at some of the commission's meetings. His main goal was to get some financial support for research at Cal Poly campuses and the state.

"I wanted to articulate to the commission that while research work is being done on the graduate and undergraduate level, it would help if there was money to support it," he said.

Lucas said there are several ways for faculty development to take place. He gave examples such as research work, further study for higher degrees, work with professional associations and time for creativity.

He said that when the Master Plan was put together, the UC system was not recognized as a research institution. Therefore, the state gave money to the UC system to pursue research. The CSU system was authorized to do research but has never been given money for it.

The CSU chancellors and state academic Senate had the same priority as Lucas in addressing the commission, to get financial support for the professional development of faculty and to keep instructors current and effective.

They succeeded, as the report clearly addresses the issue, stating that "postsecondary education has responsibilities for improving instruction in the public schools through improvement in the training of teachers."

It also recommends state support for faculty development.

"Our report will have an impact on the campus but it won't happen overnight," Lucas said.

"Hopefully the legislative committee will adopt greater support for CSU faculty development and that that support will be turned into dollars.

Lucas said the commission attempted to come up with alternatives that would not require extra funds. The only way to cut the $10 billion that came from grants last year went to research; no money came from the general fund. If the state does not allocate money specifically for research, Lucas said there will be no change.

"Our institution is efficient in fashion already," he said. "The question comes up of where the additional dollars are going to come from."

Lucas mentioned the Gann Initiative as a possible roadblock for getting any research funds. The Gann Initiative, voted in as part of the state constitution in 1980, limits any increase in state expenditures.

In another recommendation, the commission said the state should take steps to ensure that all institutions are clearly linked so that students can proceed easily from one level to the next. Lucas said the commission was adamant about supporting the improvement of the transfer function.

The top eighth of high school students is guaranteed admission to the UC system, while the top third is assured of admission to the CSU. The single requirement for entrance into a community college is that students prove they will profit from instruction.

Lucas said a weakness in the transfer function is the difficulty in transferring from a community college to a state university.

"If a student has a poor high school record but performs well in community college, that student should have an opportunity to get a bachelors degree," he said.

Julie Faarpbruch, a staff member of the commission, said the ultimate goal is to arrive at a standard set of transfer courses. She said the problem is severe enough that students are losing transfer credits even when they transfer within a system.

The commission recommended that the state list cooperation between community colleges and state universities so that they can agree to a new transfer policy. Part of the problem is that UC's policy is not very conducive to transfers.

As a general guideline, courses offered by state universities should be 40 percent lower division and 60 percent upper division. More upper-division courses must be offered to accommodate community-college transfers who need to take predominantly upper-division classes.

The UC system presently has 46 percent lower division courses and 54 percent upper division. The UC has been advised to adjust to the guideline. The CSU as a whole is up to par on the percentages, although Cal Poly has about 45 percent lower division courses and 55 percent upper division, Lucas said.

Lucas said he felt any changes in the transfer area would not have much of an impact on Cal Poly because of the close relationship the university has with nearby community colleges. But in other areas, Lucas said, some community colleges have been losing credibility as a viable place to spend two years because of the transfer difficulties.

The commission recommended that the improvement of the transfer function should be a central priority and suggested diverting more money to support it... — Robert Lucas

"HOW I MADE $18,000 FOR COLLEGE BY WORKING WEEKENDS."

As soon as I finished Advanced Training, the Guard gave me a cash bonus of $2,000. Then, under the New GI Bill, I'm getting another $5,000 for tuition and books.

Not to mention my monthly Army Guard paychecks. They'll add up to more than $11,000 over the six years I'm in the Guard.

And if I take out a college loan, the Guard will help me pay it back — up to $1,500 a year, plus interest.

It all adds up to $18,000 — or more — for college for just a little of my time. And that's a heck of a better deal than any car wash will give you.

THE GUARD CAN HELP PUT YOU THROUGH COLLEGE, TOO. SEE YOUR LOCAL RECRUITER FOR DETAILS, CALL TOLL-FREE 800-638-7600, OR MAIL THIS COUPON.

**Youth admits to shooting murder at campus concert**

**OAKLAND, Calif. (AP)** — Police say a 15-year-old boy who "just wanted to shoot something" admitted killing a young woman he did not know at a summer rock concert.

The boy, whose name was withheld because of his age, was booked on Tuesday for investigation of murder in the July 25 shooting of Elizabeth Dallas, 18, at a Grateful Dead-Dylan concert at the Oakland Coliseum.

"He gave no reason for it," said police Sgt. Dan Vosnik, who arrested the boy after receiving numerous tips. He quoted the youth as saying,"I just thought I wanted to shoot someone."

Vosnik called the suspect a "braggart" who liked to scare people by shooting the pistol into the air.

The Half Moon Bay woman was shot in the head from the front seat of a speeding car as she hugged her boyfriend in the Coliseum parking lot, police reported at the time. There were no clues to the shooter until this week.

"I knew if someone was found it would be a miracle," she said.

During questioning, the teenager at first denied involvement in the shooting, but eventually "gave a full and complete confession," Vosnik told reporters.

Homicide Lt. Jim Hahn and Vosnik said the reward helped generate information that led to the identity of the boy three weeks ago. After the reward was posted, "the neighborhood started buzzing with information," they said.

Police say a 15-year-old boy who admitted to shooting the woman in the Coliseum parking lot, said he had shot her because he "just wanted to shoot something".

**US claims attack of Iranian ship justified, evidence of mines found**

**WASHINGTON (AP)** — The United States has "irrefutable" evidence that Iran has been laying mines in the Persian Gulf, according to Defense Secretary Caspar W. Weinberger.

He also said the Navy is releasing the crew of an Iranian ship that was attacked by U.S. forces.

Weinberger, in a television interview Tuesday, said the United States will continue to lay mines in the area after discovering it in the act of planting mines and now has all the evidence it needs to show the world that Iran is engaged in "hostile acts" against neutral shipping.

The Iranian ship Iran Ajr, which was attacked on July 25, has been released.

"The transfer would occur later this fall," the Pentagon said.

The proposal, which will be considered by the full board of regents on Nov. 19, does not include salary increases for faculty and staff that will be presented by civilized nations require rules of engagement and the "neutral, non-belligerent" in the Kuwaiti war. Weinberger said, "We had ii"

"We can't take prisoners of war who become a belligerent," the source said. "We are not a belligerent, nor do we intend to become one."

Pentagon spokesman Fred Hoffman said the Iranian ship was towed to an anchorage in international waters.

The U.S. military forces had shadowed the Iranian Ajr for days, waiting for conclusive evidence the vessel was laying mines. The officials, speaking only on the condition of anonymity, said the vessel had been tracked by radar and by air as it steamed through the central gulf toward Bahrain "because it had been seen loading suspect devices before leaving an Iranian port."

"When we caught them in the act, we had the evidence we needed and we moved in," one source said.

Weinberger said, "We had it under surveillance long enough to satisfy ourselves completely that it was performing these hostile acts, that it was dropping mines."

Iranian officials vowed to exact revenge for America for the attack while also insisting the Iranian Ajr was a merchant ship carrying foodstuffs.

Iranian President Ali Khamenei, appearing at the United Nations, described the American account as a "pack of lies" and declared: "The U.S. shall receive a proper response for this abominable act."

The Departments of Defense and State issued special alerts to American mariners in the Persian Gulf wet area on Tuesday, advising caution.

Tensions in the gulf itself also remained high. An Iranian hovercraft closed within a mile of an American frigate that was toasting the crippled Iranian Ajr on Tuesday afternoon, snapping its approach only after warning shots were fired across its bow, the Pentagon said. Weinberger said an Iranian tug boat also had been warned away from the area.

New shopping mall will change SLO look

By Lynne Hasselman

A half block of downtown San Luis Obispo will soon undergo a major facelift with the construc­tion of a three-story, $7 million mall along Higuera and Marsh streets.

Earlier this month, the city's Architectural Review Board gave their unanimous approval of the plans for the stucco and tile design of the mall to be called the French Pavilion.

When the project is completed in an estimated five years, it will provide more than 83,000 square feet for retail businesses, 48,700 square feet for banks and offices and 3,000 square feet reserved for restaurants.

See MALL, page 21

INTRODUCING THE
ATM-CHECKING
ACCOUNT.

Only for ATM users. Only $3.50 a month.

Sound like your kind of banking? It should if you do your day-to-day banking at ATMs.

Now Wells Fargo comes through with a special checking account for people who prefer the convenience of ATM banking.

The new ATM-Checking Account gives you unlimited use of over 1200 Express Stop® automated teller machines, 24 hours a day, 7 days a week.

Plus unlimited checkwriting with no per-check charges. And no minimum balance required.

All for just $3.50 a month.

And you can use your Wells Fargo ATM card for purchases and cash at all participating ARCO and LUCKY locations.

So if you don't use the full services of your bank to make deposits and withdrawals, why pay the full service charge?

Open an ATM-Checking Account today. Only at Wells Fargo Bank.

From page 3

Other sources of funding for the proposed new facility include approximately $10,000 coming to the center as a result of a bill signed in July by Gov. Deukmejian. The bill allocated $490,000 for CSU child care programs. Of the total, $300,000 was earmarked for a study of child care services in the CSU and the remaining $190,000 was awarded to the Children’s Center an operation of ASI.

AS YOU MAKE THE MOVE TO COLLEGE, MANY THINGS ARE GOING THROUGH YOUR MIND; ONE OF THE MOST IMPORTANT OF WHICH IS SOMEWHERE TO CALL HOME. THAT’S WHERE STENNER GLEN COMES IN. WE RUN STENNER GLEN FOR YOU, THE COLLEGE STUDENT, TO US THE PEOPLE ARE IMPORTANT.

FACILITIES:
STENNER GLEN OFFERS YOU A WELL ROUNDED HOME LIFE. START WITH FACILITIES INCLUDING A SWIMMING POOL, BASKETBALL COURT, DRY HEAT SAUNAS, WEIGHT ROOM, COLOR TV LOUNGE, STUDY LOUNGES, DRAFTING ROOM, PHOTOGRAPHY ROOM, COMMUNITY KITCHEN. AND MUCH MORE.

FOOD SERVICE:
WE BELIEVE WE HAVE THE BEST FOOD SERVICE PROGRAM AVAILABLE FEATURING 19.14. OR 7 MEALS PER WEEK WITH 3 ENTREES AT EACH MEAL AND UNLIMITED SECONDS. WE HAVE MONTHLY SPECIAL DINNERS AND YOUR CHOICE OF STEAK, CHICKEN, OR SHRIMP EVERY SATURDAY NIGHT. THERE ARE ALSO MINI-SPECIALS ALONG THE WAY TO CUT DOWN THE BOREDOM OF EATING IN A CAFETERIA DAY IN AND DAY OUT.

ACTIVITIES:
WE HAVE ACTIVITIES PROGRAMS THAT INCLUDE DANCES, BBQ’S, GUEST SPEAKERS, HAPPY HOURS, MONTE CARLO, MOVIES BY THE POOL, TALENT SHOW, TOURNAMENTS. AND MUCH MORE.

ACCOMMODATIONS:
THE SUITE ARRANGEMENT AT STENNER GLEN IS DESIGNED TO GIVE YOU PRIVACY WHILE PROVIDING A WELL FURNISHED LIVINGROOM FOR COMFORTABLE GET-TOGETHERS. ALL ACCOMMODATIONS ARE FULLY FURNISHED, DRAPED, AND CARPETED. YOU CAN DECORATE THE ROOM TO FIT YOUR TASTE...EVEN MOVE IN A WATERBED IF YOU LIKE.

MANAGEMENT:
MOST IMPORTANTLY WE HAVE CONCERNED MANAGEMENT WHO THINK YOU ARE IMPORTANT AND TREAT YOU AS AN ADULT. WE RUN STENNER GLEN FOR YOU AND SOLICIT YOUR INPUTS INTO THE RUNNING OF THE COMPLEX. WE HAVE FAITH IN OUR RESIDENTS AND THEY HAVE FAITH IN US. STENNER GLEN IS THE KIND OF PLACE THAT WILL MAKE YOU FEEL RIGHT AT HOME.

he unique Cal Poly experience called WOW (Week of Welcome) once more brought together complete strangers. And at the end of a very memorable week "WOWies" felt like they could do or say anything in front of each other. And if their counselors were any good, they probably already had.

The WOW tradition has been carried on in much the same spirit for 18 years. The only changes that have been made are certain activities that are no longer allowed, such as the sewer tour of San Luis Obispo, or the "haunted house" expedition. In an amazingly short amount of time, a group of as many as 15 new Cal Poly students can get to know each other intimately, beginning the year with a feeling of being at home, among friends.

Indeed, for the week prior to fall quarter, WOWies own the town. They are talked about on the radio, local merchants woo their business by offering coupons and discounts, and local residents hide away until the madness is over.

So who runs this wacky show? Hundreds of counselors, dedicated individuals who are not paid a cent to plan a week crammed with fun, but at times exhausting, activities. The only activity not indulged in much is sleeping, and at times eating, because there are just too many other things to do.

Counselor Ron Leutbecher recalls walking into his dorm room three years ago as a freshman, and thinking that it looked like a "jail cell." He felt lonely and homesick. But WOW soon dispelled those dismal feelings, and turned his Cal Poly experience into a positive one. He has been a WOW counselor for two years in a row, because he wants to help new students as he once was.

WOW is a time for meeting new people. Gone are the days of high school when people grouped in cliques of stereotyped personas — well, sort of. Anyway, these groups are the minority now. College is supposed to be a time of expansion and exploration — a time to open one's mind and meet new people — and, it is hoped, a time to appreciate the uniqueness of each human being.

As WOWie Barbie Quinn put it, WOW brought together people who would probably never have sought each other out. To her surprise, she found that she really liked this strange, diverse group that in the beginning just didn't seem to fit together.

Group number 107 is an example of a typical WOW group. Counselors Leutbecher and Joyce Byrne planned for months to make the week everything the new Cal Poly students never expected it to be. It's not just an orientation. It's where students begin to find themselves.

The first day began with the usual icebreakers. Nervous, em-

Early one morning along one side of the science building the bushes quiver, through a break in the greenery and after a moment, the rest of a thin, white, short-haired cat emerges.

When a groundskeeper walks by with a wheelbarrow, the four felines dash madly back to cover and it’s as if they were never there. Even the bushes are still.

The cats (or rather, their disappearing tails) can be seen all over campus. They live in small groups behind, around or under such buildings as the Yosemite residence hall, the Housing Office, the Health Center, Food Services and the science building.

"Cats? We have tons of them," said Matt Wiener, Foundation Building superintendent. Wiener said there are at least six feral cats living around the University Union. He speculated that many of them are abandoned by dorm students when they move at the end of the year.

"Department policy is that when we find animals in the halls we tell the owners to get rid of them," said Steve Grande, Housing Office student assistant and political science senior. "As for students leaving cats on campus, we don’t know. But we can’t say that it doesn’t happen."

Woods Humane Society manager Virginia Gagliani said that at the end of the school year, Cal Poly students tend to either bring back the animals they adopted or abandon them.

"We try not to adopt animals out to Poly students," said Gagliani. "But there are other sources from which they can get them. Students who don’t check to be sure that the animals will be well cared for. And of course students don’t take the time or money to get the cats spayed or neutered, so that just adds to the problem."

Stray cats on campus

Officially, Cal Poly students report seeing about six feral cats living around the University Union. They live in small groups behind, around or under such buildings as the Yosemite residence hall, the Housing Office, the Health Center, Food Services and the science building.

"Cats? We have tons of them," said Matt Wiener, Foundation Building superintendent. Wiener said there are at least six feral cats living around the University Union. He speculated that many of them are abandoned by dorm students when they move at the end of the year.

"Department policy is that when we find animals in the halls we tell the owners to get rid of them," said Steve Grande, Housing Office student assistant and political science senior. "As for students leaving cats on campus, we don’t know. But we can’t say that it doesn’t happen."

Woods Humane Society manager Virginia Gagliani said that at the end of the school year, Cal Poly students tend to either bring back the animals they adopted or abandon them.

"We try not to adopt animals out to Poly students," said Gagliani. "But there are other sources from which they can get them. Students who don’t check to be sure that the animals will be well cared for. And of course students don’t take the time or money to get the cats spayed or neutered, so that just adds to the problem."

The Food Services loading dock is a popular gathering place for hungry felines, which gather by the dumpsters in the early morning and late afternoon. Dale Lackore, procurement manager for Food Services, said his department started humanely trapping the strays when a few of them somehow found their way into the central dining complex.

"We don’t trap them until they start becoming a nuisance," Lackore said. "We have tried relocating them to the agriculture area of campus."

FORMAL WEAR

For Every Festive Occasion...

San Luis Obispo

541-1975
If only typewriters let you proofread your work before they printed it on the page.

What a mess! You've just proofread your term paper and it's got typos, spelling errors and misplaced paragraphs. Now you can't hand in a paper like this. So no matter how tired you are, you've got to retype the entire thing. That is, unless you typed it on a Videowriter.*

The Videowriter solves all your typing problems. Take the most obvious one: typos.

On an ordinary typewriter it would mean a bottle of white-out and a frustrating interruption. On a Videowriter it just means pressing the key marked "delete." That's all. Because you type your work on a screen before you print it on a page.

It edits.

And how about those bigger problems like wanting to rearrange paragraphs? On an ordinary typewriter you have to "cut and paste" them. On a Videowriter you only have to press the key marked "move" and then indicate the area you want it moved to. It's that simple.

It spells.

What happens when you're typing and you come to a word you can't spell? On an ordinary typewriter you have to stop typing, find a dictionary and look it up. Not so on a Videowriter. Spelling problems can be corrected simply by pressing the key marked "spell." It counts words.

If you've ever had a teacher tell you to write a thousand word essay, you know what a pain it is trying to count your words. On an ordinary typewriter you have to do it with your finger. But on a Videowriter you can press a mere two buttons and it does the counting for you. It makes multiple copies.

From time to time you want a copy of what you've typed, right? Well, if you use a Videowriter you won't have to go to the school library to look for a copier machine. All you'll have to look for is the "mark" and "print." Press it and the Videowriter will make another original.

And because your work is automatically stored on a standard 3 1/2 "floppy disk, you can make those copies whenever you want. It obviously does a lot more than type.

That's because the word processing features just go on and on. What's more, we sell the Videowriter* Word Processor for around the price of a good electronic typewriter. And that's quite a bargain when you consider the amount of time it'll save you. Time you can spend doing the work for your other classes.

You would do that, wouldn't you?

Many irked-homeless to be housed in dog kennels

IRVINE, Calif. (AP) — Plans to convert a state-of-the-art dog kennel into homeless people housing drew howls of protest Wednesday from factions upset about the indignity it all and others who feel it will attract transients.

On a 3-2 vote capping a public hearing that lasted until 1 a.m., the City Council ordered city staff to continue working on plans to convert the 50-stall kennel at the city animal shelter, which never has been used for animals.

The same measure also orders consideration of alternatives, including moving portable housing to the site and seeking private donations of space.

The vote came despite vocal opposition — from both citizens who feel a kennel is inappropriate for people and those who fear any housing for the homeless will attract more transients to this Orange County community.

"I'm concerned with the human dignity of people being placed in animal shelters," said resident Catherine Peters told the council.

"How we treat the poor, the oppressed, and the homeless is of utmost importance in God," said Michael Winstead, pastor of University United Methodist Church, one of a dozen clergymen urging approval of some form of shelter.

But homeowners who live near the site, which includes another kennel normally occupied by 40 dogs and cats, opposed any shelter for fear the city would become a magnet for the down-and-out.

"I'm afraid this great city will no longer be a paradise when the vagrants arrive," said Louis Roberts, secretary of the Orange County Chamber of Commerce. "Don't make giving us this grant money and you'll get homeless in your city.

Irvine Mayor Larry Agran said sentiment appeared evenly divided on whether the city should provide more housing for the homeless in this upper middle class community 40 miles southeast of Los Angeles.

The shelter plan originated because the city's only group helping the homeless, the nonprofit Irvine Temporary Housing, turns away 20 to 30 families a month. Single homeless people depend on county programs.

City staff proposed converting the kennels, which feature heated floors for cold nights and air conditioning. The council previously gave preliminary approval to the plan on the same 3-2 vote. The plan comes up for final approval Nov. 24.

Estimates of the cost of converting the $500,000 kennel for human habitation range from $200,000 to $325,000.

The lot has room for portable, modular units, a solution the mayor favors.

91.3 FM

"It's a fact:"

Major Tony Nelson's address on the TV show "Dream of Jeannie" was 1137 Oak Grove St., Cocoa Beach, Florida.
barrassed, already forming op­
inions of one another, the group
embarks on its journey. First
impressions are recorded anon­
ymously, to be laughed and
wondered at later.

A frisbee-barbecue is held at
Cuesta. There's something
everyone can do — eat! As for
the frisbee...

... "..

RON LEUTBECHER/Special to the Daily

Port San Luis is visited, as it
surely will be many times
throughout the year for the bon­
fires and sense of comradeship
that sharing s'mores can evoke.
The group returns home ex­
tausted but content, feeling that
this was the longest day they
had had in a long time.

The second day brings more
activities and a first taste of
dorm food. Almost everything is
perfect. The downtown area is
explored and the WOWies realize
that San Luis Obispo is a warm,
friendly place, eager to accom­
modate them. At night the group
dances together in the gym and
then takes a hike to paint the in­
famous "P."

At this point, the group is
sharing experiences common to
all WOWies, and is beginning to
feel a part of Cal Poly and their
own WOW group. A bond is
forming that will be hard to
break. Perhaps this is why the
students who go through WOW
seem so well adapted to Cal Poly —
they share this common
ground with WOWies old and
new before the year even com­
mens.

On the third day the group
competes in the ROTC obstacle
course. Performing feats of dar­
ing and skill, with the threat of a
good dousing always imminent,
the members show their true
colors.

Determined, fearless little
Melvin tosses back her long dark
hair and volunteers to be the
first across a shaky ladder held
none-too-securely over a few feet
of murky, cold water. Successful­
ly she skims across it. Another
member of the group staunchly
refuses to be a part of the ven­
ture at all. Some of the group
grows closer while others choose
to stay on the outskirts. A pat­
tern emerges that will probably
continue throughout the four to
six years or more people will at­
tend Poly.

Later that same day Melvin
stands on the shoulders of her
counselor and another member of
the group. She is perilously per­
ched this way in an alley, and
falling against the wall may be
more treacherous than landing
on the ground.

She's in bubble gum alley —
one of the grossest places in all
of San Luis Obispo. Tradition
dictates that the group leave its
mark, and since Melvin is the
smallest of the group she is ask­
ed to make a large sacrifice. She
must take the wet, sticky gum
out of the mouths of 15 of her
companions and emblazon the
wall with "107" and a small "87."
With a grimace and then a
disbelieving grin, she carries out
her task. That is the spirit of
WOW.

*Texas Instruments*
Robert Griffin, a San Luis Obispo City Council member and associate to the executive director of Cal Poly's Foundation, said an increase in the student body could cause problems for the city. He said the city has a provision in its general plan that "urges the university to keep enrollment at the current level."

More students could create problems with traffic, housing and the city’s water supply. Said Griffin: "We would have a lot of talking with the university to try to understand why they feel they have to have the increase."

Griffin sees a possible enrollment increase as more of an opportunity for the city and university to work together, rather than a source of conflict. But he added that "the city doesn’t have any control over what the university does.”

ENROLLMENT

From page 1

Obispo community.

Those involved stress that everything is currently in the discussion stage, and Glenn Irvin, Cal Poly’s associate vice president for Academic Affairs, agrees. He estimated that a future increase might be from 1,000 to 2,000 students.

"The basic idea is that they (the Chancellor’s Office) would like us to be larger," said Irvin. "We have to make sure that the whole area can support that increase."

Cal Poly is back, but this sale is for everyone!

CIA...

where your OPTIONS

are as diverse as your interests

If you're looking for a professional environment that will expand your options, not limit them, you should consider a career with the Central Intelligence Agency.

We seek enthusiastic liberal arts, engineering, and graduate business majors who are interested in international affairs as well as the interplay of politics, history and economics, in the affairs of mankind and nations. Individuals who make the most of their talents in a wide variety of challenging CIA positions.

An entire spectrum of opportunities is yours to explore...opportunities as diverse as your own interests, as exciting as your curiosity. And all our career options come with the intellectual stimulation and excellent growth potential you need for a rewarding professional life. To qualify for a CIA career, you must have a Bachelor's or Master's degree or a Ph.D., be a U.S. citizen (both self and spouse), and successfully meet our strict medical and security requirements.

The CIA offers highly competitive compensation, liberal benefits, and the consistent challenges in heretofore a diverse environment. In addition, our location just outside the Washington, D.C. area provides you with an abundance of leisure-time options such as cultural events, athletic bouts, and historic attractions.

Literature is available for review at you Career Placement Office.

To explore your options with the CIA send your resume to:
Personnel Representative C18
P.O. Box 3127
South El Monte, CA 91733
Resumes must be received by 2 October 1987 for Fall interviews.

NOTE: We do not accept resumes outside this timeframe.

**House OKs $3.5 million for Contra rebels**

WASHINGTON (AP) — The House on Wednesday approved $3.5 million for the next round of military aid to the Nicaraguan Contras, and House Speaker Jim Wright said he expects it to be the last U.S. aid ever sent to the rebels.

The money was part of a $2.5 billion stopgap spending bill to keep the government running after the current fiscal year ends Sept. 30. The measure, approved 270-138 along party lines, was sent to the Senate, where it is not expected to receive much opposition.

The House aid money was part of a bipartisan agreement between Wright, D. Texas, and House Republican leader Robert Michel of Illinois.

The $3.5 million represents the proportion of this year's $100 million in Contra military aid currently being used to finance the Contras' war against the leftist Sandinista government in Managua.

The vote came a day after President Oscar Arias of Costa Rica traveled to Capitol Hill to appeal to lawmakers to "take a risk for peace" and give the Contras military aid for the Contras over 18 months if the peace plan fails.

Wright cited as signs of progress in the Contra military aid debate the reopening of the opposition newspaper La Prensa, the resumption of broadcasts by a Roman Catholic-operated radio station and the appointment of a reconciliation commission led by Cardinal Miguel Obando y Bravo, a leading government technologist at O'Connor Pei Hospital on Higuera Street.

"It takes a different kind of mentality for someone to abandon something like that," said Budano. "A person who loves animals wouldn't be able to sit back and see the cats out there scrapping and trying to survive day to day. It's really inhumane and cruel to abandon them.

"They may have a 50-50 chance of surviving, because they can hunt for rodents, birds and insects. But they can get many diseases."

Budano said cats are probably the second most prevalent cause of death for strays. He guessed that the cats at Cal Poly are probably not all abandoned, but are the wild offspring of cats that have lived on campus for quite some time.

"Cats can have a litter of kittens twice a year if they are really prolific on the side," Budano said.

**Lunch Next Tuesday!**

Gosh I'll Be Glad We Don't Have to Make it Monday.
The French Pavilion will be built in three stages, with construction expected to start this January. Phase 1 will include the demolition of a building on Marsh Street and the two-story structure on Higuera Street which formerly housed Korb’s Trading Post and Cheap Thrills. Buildings occupied by Et Cetera, San Luis Athletic Supply, Surf N’ Wear and Audio Video Concepts also will be destroyed.

Phase 2 includes extending the mall to the south to include a parking lot that borders Marsh Street, and phases 3 and 4 include tearing down buildings on Marsh Street occupied by Image One and Dave’s Hacienda.

“The mall won’t be a threat to the existing buildings in San Luis Obispo,’” said Pierre Rademaker, a member of the Architectural Review Board. “The pavilion will add more energy to the area and keep the downtown on its toes. The prospect of having a new mall has already wooed several stores onto Higuera Street.”

Not everyone believes the French Pavilion will prove to be beneficial.

“The main problem we will see with the addition of a mall to the downtown is an increase in traffic and parking problems,” said Dodie Williams of the downtown Business Improvement Association.

We have over 200 retail shops and restaurants already in the 20-block area of downtown, and a mall would attract the traffic of the north county people who usually go into Santa Maria.

Before you choose a long distance service, take a close look.

You may be thinking about choosing one of the newer carriers over AT&T in order to save money. Think again. Since January 1987, AT&T's rates have dropped more than 15% for direct-dialed out-of-state calls. So they're lower than you probably realize. For information on specific rates, you can call us at 1 800 222-0300.

And AT&T offers clear long distance connections, operator assistance, 24-hour customer service, and immediate credit for wrong numbers. Plus, you can use AT&T to call from anywhere to anywhere, all over the United States and to over 250 countries.

You might be surprised at how good a value AT&T really is. So before you choose a long distance company, pick up the phone.

AT&T
The right choice.
State prices are on the rise

Higher housing and apparel costs pushed consumer prices up 0.8 percent in the Los Angeles region in August, while higher costs for other consumer services boosted prices by 0.3 percent for the month, the U.S. Labor Department reported Wednesday.

In the five-county Los Angeles region, the sharp increase was in marked contrast to relative price stability for the past two months, said Sam Hirabayashi, regional commissioner for the U.S. Labor Department's Bureau of Labor Statistics.

The 0.8 percent rate, if continued for a full year, would yield inflation of 10 percent.

For the 12 months ending in August, prices in the Los Angeles region were up by 3.3 percent.

Housing costs rose by 0.9 percent. Apparel costs and transportation costs rose by 1.1 percent. Food costs were up by 0.4 percent.

WASHINGTON (AP) — The Senate is set to decide whether to restore the muscle of mandatory spending cuts to the Gramm-Rudman deficit reduction law, and even a staunch opponent of the cut offers it concedes likely it will succeed in the House.

Senators planning to consider revising Gramm-Rudman today after the House voted Tuesday night to approve amending the legislation that lawmakers hope will guide the federal government to cut budget deficits.

The new Gramm-Rudman-proposal sidesteps Supreme Court objections to the mandatory spending cut mechanism in the 1985 version of the law by changing the way the reductions are achieved.

The bill also cas es the annual deficit targets set by the original legislation, and Congress has had difficulty meeting it. It does not require a balanced budget until the 1993 fiscal year, two years after the House voted Tuesday to approve strengthening the legislation that lawmakers hope will guide the federal government to cut budget deficits.

BORK

From page 1

Styron asked, "How can we be sure that, upon further reflection, he will not return to his earlier views, held so long?"

"There must be persons with less controversial and destructive qualifications to assume this highest office," he said, adding that the nominee's views could "rob a society of expression."

But Sen. Alan K. Simpson, R-Wyo., a Bork supporter, suggested the writer and artist were hypocritical. He said they were attempting to chill the right of Bork, a former law professor, and other legal scholars to author controversial pieces because their old quotes would someday be used against them if nominated as a judge.

Hills told the committee she disagreed with women's groups that contend Bork's views on equal protection are too narrow. "There's not a scintilla of evidence that he is anti-feminist," she said.

Metallic balloons can cause power outages

By Kristie Kouchier

Metallic balloons have caused at least 120 power outages in central and northern California this year, according to Pacific Gas and Electric Company.

Although San Luis Obispo has only had one incident so far this year, balloon-caused problems can mean an increase in electric rates to pay for the labor to repair damaged lines.

"We want the public to be aware of the dangers and the problems these balloons can cause," said Cheryl Johnson, a local PG&E employee.

Balloons are becoming increasingly responsible for causing thousands of customers to lose their electric power as their metallic coatings conduct electricity. About one-third of these episodes result in downed power lines. Power lines meeting balloons can also cause fires.

Metallic balloon-caused power outages have been on the rise in densely populated areas. In San Francisco, there have been 33 outages affecting 32,500 customers this year.

Virgil G. Rose, PG&E vice president of electric operations in San Francisco, is urging everyone to follow these tips:

• Keep balloons and kites away from power lines.
• Fly them in parks and other areas free of overhead power lines.
• If a balloon does get caught in some power lines, call PG&E.
