Good, bad news for Poly in proposed state budget

By Dianna Callesen
Staff Writer

Gov. Deukmejian’s proposed 1988-89 budget provides about $1.5 billion in state support for the California State University system. The budget, submitted earlier this month, is about $92 million less than the CSU Board of Trustees requested. The Governor’s Budget allows $41.4 million for compensation increases in proposed state budget outlay for the system.

Cal Poly is budgeted to receive about $18.4 million for capital outlay programs, scheduled to take place during the 1988-89 fiscal year. Specific programs include: constructing the student services facility, expanding the Business Administration and Education Building, and obtaining working drawings for Physical Education and Dairy Science facilities.

“Some really good news about the Governor’s Budget is an allotment of $2.5 million for faculty search scholarships and related activities,” said Rick Ramirez, Cal Poly budget officer. This is the first time this item has been included in the budget.

“Faculty and CSU representatives, including Cal Poly President Warren Baker, have been working for this item for about three years,” Ramirez said. The governor has also endorsed about $500,000 for faculty recruitment. This amount will be divided among the 19 CSU campuses.

Additional state funding has been given to minority programs this year. The governor has endorsed a $750,000 increase for student under-representation programs. CSU faculty salaries will also be increased.

Children’s Center wants different location

By Shannon McFarlin
Staff Writer

The Cal Poly Children’s Center has proposed moving to a new site to accommodate more children. The Children’s Center is located at the bottom end of campus just below the Architecture Building, and has a capacity of 36 children per hour. Because the site is hard to find and the waiting list for enrollment is 1.5 years long, director of the Children’s Center Liz Regan said a new center is needed.

The center is there to serve the day care needs of student families primarily, and staff or faculty families secondarily. The program initially (since 1973) accommodated 24 preschool-aged children on a daily basis. In 1980 an infant-toddler program was started and allowed for 12 more children.

“Throughout the program,” said Regan, “we have been the smallest center of the

Auto accident claims life of Poly graduate

By Dianna Callesen
Staff Writer

A recent Cal Poly graduate died in a car accident in Malibu Canyon last Wednesday.

Gary Conley, who graduated last June with honors in the veterinary science program, was 37 years old. He is survived by his mother Audrey, two brothers, Jerry and Kerry, and a sister, Sherry.

“Gary was a pleasure to know. He was very intelligent and had a really good sense of humor. He really appeared to enjoy life,” said animal science professor Robert Wheeler.

While at Cal Poly, a school his mother said he truly loved, Gary worked at the campus veterinary clinic. He had also been accepted at Ross to continue his studies in veterinary science.

“Gary always had a good attitude. While working at the clinic, he was very capable and responsible. It was a pleasure having him around,” said animal science professor Dale Smith.

Services were held at 7:30 last night at Our Lady of Malibu Catholic Church. Audrey Conley asks those wishing to pay their respects to make donations to Alcoholics Anonymous or Mothers Against Drunk Driving rather than sending flowers.

Mentally ill man arrested for behavior

By Lawrence Anton
Staff Writer

A man described as “mentally ill” was arrested near the Main Gym after being warned repeatedly to stay off the Cal Poly campus Monday.

James Patrick Johnson, 30, of San Luis Obispo was taken into custody after Cal Poly police received a report from an unidentified woman who reported his behavior as “frightening.” Johnson was charged with being a “permissive presence at school.”

Officer Alan Blair said Johnson, whom he described as “truant in appearance,” had a history of mental illness. Johnson had been advised numerous times to stay away from campus.

Johnson walks to himself and to imaginary people, said Blair. Alone in the back seat of the police car on the way to county jail, Johnson kept repeating “He's killing me; he's killing me.”

Police charge 2 students with DUI

Two Cal Poly students were arrested over the weekend by campus police and charged with driving under the influence of alcohol.

Keith C. Chura, 23, was stopped Friday for reckless driving then taken into custody after Officer Alan Blair determined Chura had been drinking.

Justin Richard Nobriga was arrested Sunday by officers Lee Kevany and Pauline Hardy.

Both Chura and Nobriga were taken to county jail where bail was set at $750.

CHP takes bull by horns

The grass was greener on the other side, prompting a 1,500-pound bull to break through a five-wire fence, then step on the vegetation along Highway 1.

The wandering bovine broke through the fence twice — once Saturday morning then again Monday — in search of greener pastures, said Albers Souza, owner of the bull. Each time, CHP officers corralled the bull on Highway 1.

Dick Tattaglia, associate director of university Police Operations and Cal Poly police Officer Bruce Miller pushed the black bull back through the fence.

Souza said the grass along the highway was too tempting and the fence too weak to keep the bull from wandering. Souza said he’ll soon move the bull to a pasture away from the road.

Selling off nature to get streetlights

The axe has taken another fall in its task of eliminating our scenic coastline. The Pismo Beach City Council intends to develop the cliffs overlooking Pirate's Cove. This plan will allow San Miguelito Associates to build 23 homes overlooking the clothes-optional beach. The developer will install fencing and a security gate that will prevent access to Pirate's Cove from the east across county land. Previously, vehicles were prevented access by barricades. Although the plan also calls for wide expanses of open space and hiking and biking trails, the gates and fences will make them resident-only luxuries.

After years of negotiations, the city finally got its way and allowed development to proceed. The developer will pay the city of Pismo Beach more than $350,000 in fees and improvements in exchange for construction rights. In addition, homeowners in nearby Sunset Palisades will contribute more than $300,000 for repairs, improvements and fees. Apparently, Pismo's natural beauty pales in comparison to its inability to make money.

Previously, vehicles were prevented access by barricades. Apparently, the annexation does not include or affect Pirate's Cove in any way. Well, Dave may be right technically, but the beach will never be the same again. The Cove is the only secluded stretch of beach anywhere between Port San Luis and the southern end of Pismo Beach itself. Everything else is devoted either to recreational or residential uses.

Although Pirate's Cove is known as a nudist beach, this is hardly its only purpose. From naturalists to bonfire partiers, it is what their future residents will want, and they are installing fencing to meet this need.

Residents are fighting the destruction of beautiful, natural coast, and even the Sunset Palisades residents don't mind paying $300,000 to watch it happen. Who needs to see wild seagulls frolicking on an open shore when you can have new streetlights?

Letters to the editor

The majority must compensate

Editor: I am tired of hearing people gripe about minority students receiving more benefits than white students. It is true that there are programs here on campus to aid minority students, but this does not mean that the students involved with these programs are poor and should not be here.

The letter "Favors don't help anymore" (Jan. 11) talks about Cal Poly and its minority students by minimizing that minorities are here because the white majority allows them to be here, not because they are good students who work hard like everyone else.

I have heard the story of the poor immigrants who came from Europe, overcame hardships, and made wonderful lives for themselves and their descendants.

It is a great story and I am proud to say it is a large part of my heritage as well, but many Americans, my ancestors included, had to endure much more because they were not European. Mr. Schenone doesn't seem to know the story of the blacks who were brought here against their will, shackled like pieces of meat in the bottom of a ship. Upon arriving to this great land of fortune, these African immigrants were placed into slavery so European Americans could pursue happiness with less effort.

Let us not forget the Asian Americans who were placed in internment camps during WWII because they didn't look American enough. Let us not forget the many Hispanic Americans who live in their home country illegally, and are exploited in modern-day sweatshops. Native Americans gave up their land and way of life to Americans of European descent who, "through hard work and perseverance," could have a better life.

The minority assistance programs here on campus are not designed to pamper the underprivileged students, but help acclimate them to our campus, and offer the negative effects of years of minority suffering. Unfortunately we cannot go back in time and eliminate the majority's crimes, and minorities will not just forget the pains they have endured in the past and the present. The majority must give some kind of compensation. This is not a favor, but a duty.

-James Rutherford

Repeating history

Editor: While it is undeniable that social and economic barriers created by racism exist, it must be asked if the methods used by government and minority agencies are actually working.

A problem arises with the existence of "minority" clubs. While probably serving the economic interest of its members, socially these clubs only further socially alienate various minority groups.

Economically speaking, the money for education is available to those who truly need it, regardless of skin color. Getting an education is not cheap; a lot of us have to get jobs and take less units to pay for it, in addition to seeking financial assistance. Relying on an artificial handicap (minority-ism) as an excuse for our specific needs is a cop-out.

When we begin to understand that the information that each of us needs to create the life we want to live is out there, then we can take our lives into our own hands and break down any social or economic barriers we might be dealing with and pleading hardship based on something as ridiculous as skin color. Mr. Schenone's letter (Jan. 1) can still be well taken—essentially that we should stand on our own two feet, take life by the horns and quit being bitter about the past.

-Mark Grant

Help can backfire

Editor: I feel that it is necessary and good for the university to provide minority students with help in obtaining an education at Cal Poly, because in many cases minority students still do not have the same opportunities as non-minorities. However, in some cases this "help" has grown to absurd levels and has become reverse discrimination.

As a senior in high school, my best friend and I applied to Cal Poly. We both were very disappointed when my friend, who had a 4.2 GPA and a 1220 SAT score, was not accepted to one of Poly's highly impacted majors. Imagine my surprise when I arrived at school to find another student who had been admitted to an almost equally impacted major with a 1.6 GPA and a 600 SAT score. The only difference was that the latter was of Hispanic origin. This student has spent three of his last four quarters on academic probation.

Instead of occupying a space at this university, this student had attended a junior college, which would have been less expensive and at a level he could understand. I am only left to ask, for whom is this equality of opportunity?

Raisin industry officials mad about ‘rat dropping’ remark

FRESNO (AP) — Raisin industry officials are livid that a Fresno County Health Department employee compared Fresno’s trademark crop to rat droppings.

Keith Stewart was discussing Fresno’s rat infestation problem during a local television interview last week and described rodent droppings as looking like “unwrinkled raisins.”

John Pakchoian, chairman of the Raisin Administrative Committee, said Stewart should be fired for making the comment. Other raisin executives have launched a letter writing campaign to protest the remark.

Stewart said he doesn’t understand what the stink is all about.

“I also said mice pellets look like darkened rice. Now, is the rice industry going to come down on me?” Stewart asked.

“I really can’t understand where a noon newscast is done,’” he said.

In recent years the raisin industry has spent millions of dollars on advertising trying to create a positive image for their product. The expensive but popular “Dancing Raisins” promotion has been at the forefront of the advertising blitz.

The Raisin Administrative Committee sent out letters to growers and packers last week protesting Stewart’s remark and urging them to call the health department.

Naples, Fla. (AP) — Leigh Briant thought she had a bargain when she bought a 37 videocassette of “Sleeping Beauty,” but found out just before rewinding that it ended with a steamy, three-minute sex scene.

“I’m talking hard core. I was very angry when I saw it,” said Briant, who bought the bargain tape for her 3-year-old daughter. “I think that’s what lured us to buy it, the low price. At this point, I’d rather have books.”

The California firm that produced the Classic Fairy Tales videos, Marantz Co., stopped shipment of 2,000 copies after Briant reported the real-life, triple-X scene at the end of her fairy tale.

President James Twedtahd said Monday he planned a private screening of Briant’s video. “I’m not sure I want to see it, but I suppose I’ll have to.”

The fault may lie with the firm that records Marantz videos from master tapes, he said. Briant’s tape and a similar one reported by a woman in Washington apparently were made on cassettes that once were porn films, he said.

Twedtahd said workers at the video duplication company either didn’t know that or forgot to erase the tapes before using them for fairy tales.

“I guess someone slipped up,” he said. “They do the porn films on the night shift.”

He said the rest of the Classic Fairy Tales in stock at the store were pulled from the shelves.

“They’re as concerned about it as we are,” said Twedtahd, who offered Briant a new video. Briant, whose daughter missed the flick’s ending, refused his offer.

American couple is granted political asylum in Moscow

MOSCOW (AP) — An American couple who came to Moscow as tourists have been granted political asylum after choosing life in the Soviet Union as an “alternative to capitalism,” an official said Tuesday.

Foreign Ministry spokesman Gennady I. Gerasimov identified the Americans as Theodore Branch, 43, and Cheryl Branch, 40, and said they were “experts in the field of mass communications” from Pennsylvania.

Branch’s father, Clarence Branch of Erie, Pa., said his son was “stupid” for deciding to live in the Soviet Union because “there are so many millions wanting to get out of there. Why would he want to go over there?”

Branch, 77, said his son had worked for a radio station in Mount Dora, Fla., and that he left for Moscow against his advice and the advice of others.

“He talked about it, but a lot of people tried to talk him out of it,” the elder Branch said. He said his son had met a Soviet woman in the United States who wanted to go back to her homeland.

“She just pointed him a row picture,” he said. “She probably got homesick.”

The couple, which the elder Branch said has no children, had been living in Erie with him and his wife, Lava, 73, before they left to visit the Soviet Union.

They arrived in Moscow last month, “declared their unwillingness to return to the United States and asked for permission to live here as immigrants,” Gerasimov told reporters at a government news briefing.

Gerasimov and the official Tass news agency said the Branches were granted political asylum by the Presidium of the Supreme Soviet.

Cal Poly Creative Writing Contest

Prizes for Short Story Division (and Poetry Division, a separate category) are: 1st, $100; 2nd, $75; 3rd, $50.
1. A contestant must be officially enrolled as a student.
2. All fiction manuscripts must be typed and double spaced, and all poetry manuscripts must be typed.
3. A contestant must use a pseudonym on his/her manuscript. He/she should include a sealed envelope with his/her pseudonym on the outside and his/her actual name, address and phone number on the inside.
4. Poetry contests are limited to no more than 200 lines of poetry; short story contestants to no more than 35 pages.
5. All entries must be turned in by 5 p.m. Monday, February 8, 1988.
6. Selected winning manuscripts will be printed in the English department's Literary Supplement to the Trojan Weekly.
7. Prizes for Short Story Division (and Poetry Division, a separate category) are: 1st, $100; 2nd, $75; 3rd, $50.

BUDGET

From page 1

However, the increase, originally scheduled to take effect in July 1988, will be delayed until January 1989. The Governor's Budget also brought some bad news. Because of limited state funds, some major programs have been cut by nearly $16.8 million. This reduction, which Ramirez said is due to a combination of factors including the Gant initiative passed two years ago, is not expected to affect student employees. However, a large majority of support personnel, such as secretaries, custodians and food service personnel, may not receive scheduled wage increases.

This is the fourth year this budget item has been reduced. It will be interesting to see how the Board of Trustees will deal with this, said Ramirez. In the past, the reduction has been covered by drawing from other funds, but Ramirez said because of the state of the cut he doesn't think funds can be drawn from other areas to support this program.

There will be no expansion or upgrade of computing work stations either. Ramirez said this will force the university to maintain a status quo. "Because work stations will not be expanded, students will have to continue to deal with limited access," he said.

Budget cuts in this area will also affect work-station maintenance and limit hiring of student assistants for computer labs.

Also cut from the budget is support for additional funds requested to expand educational opportunities to students off-campus centers.

Although disappointed that the Governor's Budget is about $92 million less than the CSU Board of Trustees requested, we are encouraged that many of the requested programs received positive support and endorsement from the Department of Finance, and would have included in the Governor's Budget had there been sufficient state revenues," said CSU Chancellor William Reynolds in a statement distributed to the campuses.

Since the budget is only a proposal, it is still subject to revision. A final version will be decided on at a later date.

CENTER

From page 1

At Chevron, People Do.

We do more than just explore and develop energy resources. At Chevron, innovative, concerned scientists and engineers are committed to doing more and reaching higher than expected. With technological and creative support, people at Chevron use their professional degrees as a foundation on which to build and and advance their careers while making the world a little better.

We will be on campus the following dates, and would like to talk to individuals with the following degrees:

BS, MS or PhD in Chemical, Mechanical, Electrical or Civil Engineering
February 23rd, 24th & 25th

BA/BS or MS in Accounting
January 29th

BA/BS or MS in Computer Science
February 23rd, 24th & 25th

Master of Industrial and Labor Relations
January 29th

Please contact the Placement Office to schedule and interview.

You have worked hard for your degree...wouldn't you like to have more than just a job?

People Do.

An equal opportunity employer.

Lasham, a miniature horse-sized Doberman Pinscher, certainly has his work cut out for him as Beth Currier’s canine companion, pulling the paraplegic’s wheelchair throughout cities in California.

Currier is raising money for her Rancho de los Animales for the Disabled in Arroyo Grande.

RAD’s main objective is to provide a free ranch experience to physically and emotionally disabled and able-bodied volunteers who help maintain the ranch.

Currier, who contracted polio at age 12, founded RAD in 1983 and believes the disabled can “improve their self-esteem and physical well-being through a wholesome ranch experience.”

Jenny Lee has been going to the ranch for one-and-one-half years. Upon meeting her, you’d think she was a typical pig-tailed, physically and emotionally disabled and able-bodied volunteer who helps maintain the ranch.

Currier’s son, Paul, 7, is a shy and overprotected boy who’s been deaf since birth. Lee knows he could never do alone,” Currier said.

Currier said they do a great job of maintaining the rancho or building new equipment.

Currier encouraged people in horse-related majors to work out senior projects in the ranch.

Islam, Christianity subject of debate

Two religious scholars discuss Jesus as common link to differing beliefs

By Jill Gregory

Two religious scholars had an open discussion but failed to agree on issues of principle in a dialogue last Thursday night in San Luis Obispo.

The issue of Jesus as a common link between Islam and Christianity was discussed by Jamal Badawi and the Rev. Jim Nisbet in a debate sponsored by the Cal Poly chapter of the Islamic Society of North America.

Badawi is director of the Islamic Information Foundation and on the executive committee of the ISNA while Nisbet is pastor of the Old Mission Church of San Luis Obispo.

The purpose of the dialogue was to educate the public about the similarities and differences between these two religions, said Fawaz A. Kokaiah, advisor to the student group presenting the event. However, the two men presented differing views of religious events.

Badawi's main point was that Jesus was only a prophet and not a divine being. He also said that mistaken interpretations and recordings of history have misled Christians for more than 2,000 years.

"I was touched by the authenticity of my presentation," he said. "I wish I could have had twenty more minutes to present the evidence I have regarding the authenticity of Jesus' message." Badawi's main point was that Jesus was only a prophet and not a divine being. He also said that mistaken interpretations and recordings of history have misled Christians for more than 2,000 years.

Jesus was God in the flesh," said Badawi. "There is much evidence both in the Koran and the Bible that denies the divinity of Jesus," said Badawi. "There is plenty of evidence in the Koran that Jesus is not a deity. He also expressed the idea that placing Jesus with God is a parallelity and violates the idea of monotheism."

"Confusion about the nature of Jesus must be removed, and only then can monotheism be restored." -- Jamal Badawi

Plurality and feels the need to express his feelings. Many people are so used to pushing their unpleasant feelings onto others that they have trouble knowing who owns what.

Lewis hopes this class will help avoid storing the deck and help people become aware of how they can choose their feelings. The class has a relaxed atmosphere, where people have the opportunity to share and compare disturbing situations they face in life.

Lewis said she feels the ideal situation for these people would be to attend Al-Anon meetings in conjunction with "New Directions" meetings once a week in Al-Anon meetings in conjunction with "New Directions" meetings once a week.

The class is specifically designed to provide an outlet for these people to express their feelings, while at the same time, educating them about the symptoms of the disease," said Sally Lewis, the outpatient counselor in charge here at At-Alon meetings in conjunction with "New Directions" meetings once a week.

Among many families, couples and individuals good of a great deal of confusion exists over who owns whose emotions. Many people are so used to pushing their unpleasant feelings onto others that they have trouble knowing who owns what.

Lewis said she feels the ideal situation for these people would be to attend Al-Anon meetings in conjunction with "New Directions" meetings once a week.
OUI, Paris
CSU offers Paris study session

By Joan M. Halpin
Student Writer

Cal Poly students can find adventure overseas this fall by attending the California State University study program in Paris. A trip to Paris is scheduled in October and through the efforts of Jon Ericson, dean of the School of Liberal Arts, students will have the opportunity to learn and experience the French culture.

The Paris study program was developed and sponsored by the School of Liberal Arts in conjunction with the Foreign Language Department. "Paris is an engine that developed the modern world," said department head of foreign language William Little. "It is the key that unlocks European language.

Little said Paris is an "immense city" where people drive faster and walk more. The transition of students living in another culture will be simplified by knowing the French language. Therefore, the 80 students accepted into the program will be required to have a year of college French or the equivalent, and maintain at least a 2.5 minimum grade point average.

Credit for college courses includes classes in language, literature, culture, and humanities.

While staying in Paris, students will live with French families and have the freedom to enjoy outside activities. Students are usually given a house key and are primarily responsible for themselves.

Students will be enrolled in classes for one quarter, from early October to the middle of December, at the Foyer des Lyceennes, a French prep school.

Before school officially begins, students will have the chance to go on a weeklong sightseeing tour of France. The city of Paris is acclaimed for its beautiful avenues, parks and gardens, and monuments.

The Paris study program is modeled after the London program, but centers around students' participation in the French language and culture. Ercisi, initiator of the Paris program, said it was designed keeping in mind students who have a limited time schedule and financial resources.

Travel expenses will start as low as $2,745 and students will have the option to choose from two travel packages which differ in price and flight arrangements. Recipients of financial aid may also be eligible for the program.

Two Cal Poly faculty members and a professor from France were chosen to teach in Paris, a city where intellectual achievements flourished for thousands of years. Faculty residence director of the Paris study program Odile Clause will function as department head while in France, and Donald Lazere, an English professor, will lecture and discuss the writings of Camus and other authors.

Another French native, Marcelle Martin, said Parisians enjoy sidewalk cafes as meeting places. Martin also said walking is popular because of the aesthetic things to see.

Paris has many forms of art illustrated by famous architect

By Shannon McFarlin
Staff Writer

There was standing room only as people piled into Chumash Auditorium for internationally renowned architect Charles W. Moore's slide show-lecture called "Recent Works, Here & Abroad" last week.

Moore, considered one of the fathers of post-modern architecture, discussed his recent works in conjunction with a U.U. Galerie exhibit from the Urban Innovations Group, the practicing arm of UCLA's Graduate School of Architecture and Urban Planning.

Moore is a consultant for UIG, directing important projects for the non-profit independent corporation. Projects range from garage additions to city master plans. The group serves as a job for students as well.

According to Moore, the presumption of the architect is someone independent of the rest of the world, creating things for themselves alone, without the help of anyone else. He said this is because architecture schools often teach students to work on and solve problems alone rather than in groups. See MOORE, page 8
From page 7 then working with other people to get more input.

"What architects do can't be done alone," said Moore. "A good building needs input from others too." He said a piece of work that gets energy only from an architect and not from those who may be using it will be a non-energetic building, one that won't give anything back to people because it reflects only one view instead of many.

The slide show featured some of Moore's recent works such as the new civic centers for Beverly Hills and Oceanside, additions to the UCLA campus master plan and the Piazza d'Italia in New Orleans. He also showed and talked about the largest projects of his career, the 2,300-foot Wonder Wall for the 1984 New Orleans World's Fair, the Tegler Hafen housing complex in Berlin, the Hood Museum of Art at Dartmouth College and the award-winning Sea Ranch condominium in California.

As well as being a practitioner who works out of four offices in three states, Moore is also a well-known educator and author. He has been on the faculty and introduced innovations at UC Berkeley, UCLA and Yale. He is presently the O'Neil Ford Professor at the University of Texas, in Austin.

"Dimensions," "The Place of Houses" and "Body, Memory and Architecture" are three of Moore's published books. Three more are now either at the press or in preparation.

Moore earned his bachelor's degree in architecture at the University of Michigan in 1947, and received his Master of Fine Arts (1956) and doctorate (1957) at Princeton.

Dedicated to serving the health and wellness needs of the community.

Johnston Chiropractic Clinic, Inc. is sponsoring a spinal check-up and Scoliosis Screening program as a public service. This service will include consultation, physical examination and a report of findings.

**WARNING SIGNS OF SPINAL MISALIGNMENTS**

- Recurring Headaches
- Dizziness, Blurred Vision
- Neck, Shoulder & Arm Pain
- Low Back & Leg Pain
- Pain Between Shoulders
- Numbness in Hands & Arms
- Loss of Sleep
- Difficult Breathing
- Numbness in Legs & Feet

If you suffer from any of these warning signs call immediately to prevent possible advancing complications. This free spinal public service is for a limited time only, by appointment, please.

California getting tough on foreign produce pesticides

By Marina Chang

Increased public health concerns about pesticide residues on foreign produce has prompted California politicians to improve the federal pesticide residue program.

In response to a 1986 General Accounting Office report, representatives Leon Panetta (D-Monterey) and John Dingell (D-MI) introduced legislation last month before the House Subcommittee on Health and the Environment to toughen federal limits on pesticides on imported fruits and vegetables.

The GAO report indicated that the Food and Drug Administration's current enforcement efforts are too little to keep out imported produce with illegal pesticides or with pesticide residues that exceed legal limits.

Richard Greek, agricultural commissioner for SLO County, said the FDA has many responsibilities and a finite budget which has to be balanced with all their funding needs.

"The FDA uses a statistically balanced based approach to sampling," he said. "It is conceivable that a 1 percent sample base is statistically valid."

Greek feels that the real issue at hand is to ensure that the health and safety of the American consumer is protected.

"The intent of the legislation is to make sure that our foreign produce residue program is working and is in the best interest of all parties."

Currently, there are peppers coming in from Mexico that show chemicals used on them that are not registered with the Environmental Protection Agency. Greek said that foreign producers often have many pesticides available that have either been eliminated or never been registered with the EPA for use in the U.S.

"A lot of testing is taking place and if they're coming up positive in that testing, then they're not allowed to come into the U.S."

Recently, Raley's markets, a chain of supermarkets in Northern California, used a private lab firm and found that a shipment of sweet corn they had received was overtolerant when in fact, it was perfectly safe.

"The lab assumed people are the husk and core of the corn and sampled those parts, rather than sampling the kernels, which are the edible parts," Greek said.

"There is a very specific test process for a lot of chemicals, so legislation is trying to require a long-range research plan and development in testing to take place."

Agriculture commissioners have been pushing for a lab certification program for the past two years and this program is part of the proposed bill. Greek said California is looking toward developing a more sophisticated one.

"The intent of the lab certification program is to ensure that the right procedures are being used when the FDA uses a private lab or requires that a foreign producer use a private lab to screen produce and certify that its safe before it shipped in."

The bill also proposed that a spray list be developed by the FDA and to require that import documents be submitted by foreign growers specifying the pesticides that would be used on produce items.

"Even before they start to spray, the chemicals can be screened before the crops already have been harvested and are on their way to the U.S.," Greek said.

The FDA will know what to look for when sampling and growers can check with the EPA to make sure they've gone through the appropriate health standards. Greek also has been approved as acceptable for the U.S.

DIRECTIONS

From page 6.

"Although Al-Anon is a heck of a good support group, it simply doesn't provide the education that is so crucial to its members the way 'New Directions' does." Lewis said. "New Directions' aims at educating its members while at the same time helping them sort out their emotions, and accept responsibility for their own lives."

The class, which touches on a different topic each week, is held at Summit Place, the alcohol and drug treatment program at French Hospital, every Sunday evening from 7 to 8:30. Anyone is welcome, and there is no charge to attend the class.
**Pesticide**

From page 9

more effort had to be put into the sampling program. In most of the regional FDA offices, Green said, there was no clear direction as to what to do with the paper containing residue analysis and proper enforcement action.

"Most of the reports were going into the standard filing cabinet and were not retrievable," he said. "Since they were inaccessible, the Freedom of Information Act becomes another issue."

Green said the goal of the bill is to sample every foreign produce product that's coming into the U.S. about twice a month. If problems develop, a lot more sampling would go on at entry stations and ports to the U.S.

"We will give our highest priority to any produce or country that has a problem historically and generally screen everything else."

Foreign produce that comes into California is not only inspected by the federal department of the FDA but there is also a sizeable number of sampling taken by the state department as well to ensure California's that foreign produce is not tainted.

California has the most stringent regulatory pesticide program in the world and has long been an agriculture leader.

**PARIS**

GREENFIELD, Mass. (AP) — Fifth-graders angry about the plastic forks and spoons that appeared in their cafeteria have hung posters protesting "School Is No Picnic" and "Real People Deserve Real Silverware."

Christopher Peters, 11, described the plastic utensils as "bumpy, thick, hard to hold... and eating with them makes you feel weird all over."

Peters, a leader of the protest, said the Four Corners Elementary School pupils became incensed when they discovered their stainless steel tableware had been transferred to the high school for use by what Peters described as "uhh, teen-agers."

Using non-violent tactics they studied last week for the Martin Luther King Jr. holiday, Chris and his classmates launched a poster-making campaign and drew up a petition requesting that the stainless steel utensils be returned.

By Friday, the youngsters had gathered 166 signatures from the school's 316 pupils, ages 5 to 12.

The food service director who ordered the utensils, however, said he is unlikely to send them back. Sandra Herzig said stainless steel forks and spoons too often ended up in the trash.

MEN'S HOOPS: The Mustangs, who shot a miserable 31 percent, fell to Cal State Bakersfield, 5-20, Thursday in the conference opener for both teams. Cal Poly trailed 26-12 at halftime and never got closer than 12 points. The Roadrunners shot 54 percent so augured the Mustangs' problems, and also held a 38-29 advantage in rebounds. Mark Shelby led the Mustangs with nine points. D.C. Cashman added eight and Errol Talley had seven. Troy Price led Bakersfield with 14 and Fred Jones had 13. Cal Poly's overall record fell to 7-5.

WOMEN'S HOOPS: An Australian team's visit to Cal Poly Thursday was not a pleasanter foreign exchange for the Lady Mustangs. The Knox Raiders of Melbourne, Australia, came away with a 56-50 victory in the exhibition game. The Lady Mustangs jumped to a 16-7 lead, but the Raiders responded with 13 unanswered points to take a lead they never relinquished. Cal Poly was led by Russia Mitchell, who had 14 points, and Stacy Rooney, who had 12. The game was the Lady Mustangs' final tuneup before conference play begins Thursday, when they host Cal State Dominguez Hills.

WRESTLING: The Mustangs extended their winning streak to four meets after defeating Cal State Bakersfield Friday, 19-18. Cal Poly improved its record to 5-3-1 overall and 4-0-1 in the Pac-10. The tie came against Bakersfield last November.

SWIMMING: Cal Poly's trip to Washington, D.C., and Maryland resulted in a pair of third-place finishes.

On Friday, the Lady Mustangs finished behind Cornell and Madison, who had 14 points, and ahead of Radford. Kim Wells and Mimi Plane were Cal Poly's top performers.

On Saturday, the Lady Mustangs lost to Towson State and Cornell, but beat James Madison.

In a meet in which they were canceled and then rescheduled, the women's and men's teams swept Cal State Los Angeles Saturday.

Liz Linton and Suzi Giordano led the women's 107-21 victory. Linton won the 1,000 and 500 freestyle, while Giordano took the 50 and 100 freestyle. Other winners were Janice Lnyyna (100 back), Marissa Umnuss (200 individual medley), Karen Harding (200 freestyle), Dana Giacote (100 backstroke) and Kristy White (100butterfly).

The men's 98-50 triumph was paced by Neil Leary, who won the 200 freestyle and 100 butterfly. Other winners were Mike Thomas (100 backstroke), Erik Rinde (400 individual medley), Troy Trobaugh (100 breaststroke), Dave Pope (1,000 freestyle) and Dave Padgett (100 freestyle.)

MEN'S TENNIS: The Mustangs opened the season with an R-1 loss to U.C.L.A. Cal Poly's only winner was the No. 3 doubles team of Alex Harvienko and Tim Frenesius.

Raquetball tourney scheduled for weekend

Registration deadline for Rec Sports' racquetball tournament is 4 p.m. Thursday. The event, scheduled for Saturday and Sunday, will feature beginner, intermediate and advanced divisions for singles and doubles. Each division will have brackets for men, women and coed teams.

The registration fee, $3 for singles and $6 for doubles teams, will be accepted at the Rec Sports office.

ON CAMPUS INTERVIEWS
WILL BE HELD ON FEBRUARY 3, 1988

Parker Hannifin Corporation today is a worldwide leader in motion control, creating components and systems which control motion in a broad spectrum of uses. Parker Hannifin Corporation specializes in manufacturing, designing and marketing advanced high technology products for the aerospace, defense, engineered products and industrial markets.

Parker has developed a progressive program that is designed to expand your understanding and abilities through broad exposure to all facets of our organization. It's called our Employee Intern Program. During your first 10 months with Parker, you'll have the opportunity to explore virtually all major operating areas of the company. This internal movement will provide you with knowledge, understanding and career direction, as well as opportunities to achieve success with Parker. In addition, you'll enjoy all the benefits of our beautiful campus-like environment in Irvine. And we'll provide you with a highly competitive salary and benefit program, plus plenty of room to advance within our established organizations.

If you're completing your studies in any of the following areas, we'd like to talk to you:

• Manufacturing Engineering
• Aerospace Engineering
• Engineering Technology
• Quality Assurance
• Production Control
• R&D

See your Placement Office for interview dates, or send your resume to: Barbara Haner, Parker Hannifin Corporation, Parker Hannifin Aerospace, Attn: College Relations, 16321 Jamaica Blvd., Irvine, CA 92716, Equal Opportunity Employer M/F/V/H/V.
