Concert gets out of hand at annual Vet's Hall bash

By Alison Skratt

Poor organization plagued SAE's annual Red Party Friday, leaving a row of stranded outside, unable to even try and cope with the crowd inside.

As many as 200 people piled up outside, the Veteran's Hall, trying to see the Unsouchables.

Tami Martin waited in line to get in for two hours, and then decided to leave. "It wasn't worth it," she said. "There was kind of a line at first, then everybody rushed to the door, leaving my friend and I in the back."

Krisy Duncan was on the guest list and waited an hour to get in as well.

"The actual show was really good," she said, but "the crowd outside was a mess."

According to Duncan, a packed crowd inside, along with violin, slam dancing and poor ventilation, were all signs that the event "was not well organized at all."

"The building was too small to hold an Unsouchables crowd," she said.

"It was so hot in there that the walls were dripping water from the condensation," Duncan said.

"I was just getting shoved from one end of the hall to the other."

"The crowd was a little wild," said Jason Gross, last year's Red Party chairman. "But the band went over really well."

SAE was required to hire Five Cities Security Services to watch the party. But they also had about 50 fraternity brothers and 20 local beaters to help with crowd control.

"It was a bad situation," said Alex Little, member of the open band Rhythm Akimbo and a veteran of the event. "K.C. Bowman, Rhythm Akimbo leader, agreed. "It turned all right. But it could have come off so much better. It's kind of unfortunate."

Bowman also faulted the security at the show. Tables were set on their sides in front of the stage as barricades, he said. "Picnic tables and 15 SAE brothers aren't going to hold 1,500 people surging toward the stage. It's silly to expect people to stay 30 feet in front of the stage (with the barricades)."

Members of the Unsouchables were unavailable for comments at press time.

Rhythm Akimbo's performance was stopped twice.

Senators: It won't work

Plus/minus grading under fire

By Alison Skratt

The capability of Cal Poly's new grading system to change the university's grading system to plus/minus has prompted two student senators to write a resolution condemning the modification.

Apparently the idea of changing Cal Poly's grading system is not a new one. The administration first proposed it in 1982. The Academic Senate even recommended a system superior to the present system before it was discovered that the computers of the time could not accommodate the switchover.

After the technological obstacle was destroyed, the matter was put on hold until now that OASIS has the capability, the issue has reappeared.

But after Agriculture Senator Ricardo Echeverria and School of Business Senator Nelson Chen don't think the system should be altered, and they've written a resolution expressing their views.

Resolution 88-12 strongly recommends that the Academic Senate re-evaluate their decision regarding plus/minus grading and that the administration not implement it.

It will be introduced at Wednesday's meeting and will be voted on in three weeks.

An older Student Senate resolution, passed in 1982, that opposed the change was used in the new resolution to give evidence of past disagreement.

However, the resolution's strongest defense is its discussion of the 1.7 GPA.

It cites the Academic Senate's old recommendation of a 1.7 GPA equating a C- or passing grade, and/or possible dismissal from the university.

Also, a student who received a C+ or passing grade, in a course would not be allowed to retake the class "even though a 1.7 is below the satisfactory grade point level of 2.0."

According to Echeverria, the administration is the key, Berkoff to re-evaluate the plus/minus system.

"If accepted by the Student and Academic senators, the plus/minus system could still be implemented by the administration, because the senators' decisions are only recommendations.

"It's a double-edged sword," said Academic Senate Chair Charlie Crab. It depends on if the student accepts the plus/minus system or not.

"Most cases aren't really bothersome," he said, because of students' fluctuations above and below the straight grade.

"I think the GPAs won't really change," he said, because of students' fluctuations above and below a straight grade.

"Most cases aren't really bothersome," he said, because of students' fluctuations above and below the straight grade.

"Most cases aren't really bothersome," he said, because of students' fluctuations above and below the straight grade.

"I think the GPAs won't really change," he said, because of students' fluctuations above and below the straight grade.

"The chances that you'll need the add/plus are very slim.

Chen also added that with the new system most people wouldn't get A's. The A grade would be moved up to the 95

Senate seeks effective evaluations

Resolution option that standardizes faculty critiques not recommended

By Alison Skratt

The Academic Senate's instruction committee has drawn up six resolutions in response to a report on how to measure effectiveness of instruction, one of which supports the optional use of the Student Senate's recommended faculty evaluation system. The resolution strongly recommends that the Student International Report (SIR) be used optionally "in a complementary fashion with the current evaluation system in order to provide faculty with confidential constructive feedback of classroom performance."

Having the instructors be the only ones to see the evaluations is a key part of getting the faculty to accept the idea, said Academic Senate Chair Charlie Crab. Crab.

The SIR is a system of evaluation put out by the Educational Testing Service, the same organization that runs the SAT and LSAT.

The evaluation consists of 50 questions that rate the instructor on a one-to-five scale and how satisfied students were with one's own comments. The estimated cost per usage is $29,500.

The SIR would only be used during a quarter when the instructor was not using the department evaluations that are now being used.

If refuted by the Student and Academic senators, the plus/minus system could still be implemented by the administration, because the senators' decisions are only recommendations.

"It's a double-edged sword," said Academic Senate Chair Charlie Crab. It depends on if the student accepts the plus/minus system or not.

"Most cases aren't really bothersome," he said, because of students' fluctuations above and below the straight grade.

"I think the GPAs won't really change," he said, because of students' fluctuations above and below a straight grade.

"The chances that you'll need the add/plus are very slim.

Chen also added that with the new system most people wouldn't get A's. The A grade would be moved up to the 95

Library needs less mess, more concern

With the recent prominent posting of anti-consumption signs in our Kennedy Library, it is clear that the majority of students cannot be trusted to care for valuable books.

I'm not saying all this is the library's fault. I sit and wonder what they are teaching when students cannot be trusted to care for valuable books.

Involvement appreciated

The English club and the Cal Poly Sigma Upsilon chapter of Sigma Tau Delta, together with the national English honor society, have presented an evening and weekend rehearsal, a room on campus where we could meet. Furthermore, professor Kenin edited, typed, copied and rebound the original script and distributed them to the cast, saying it was an understandable expense and trouble.

We need to save our books, the bastion of historic permanence itself. But we also need to consume at odd moments, why not compromise?

Apathy robs the future

Editor

Any questions?

The instructor waits a few seconds for a student to show at least some sort of interest and ask a question, or at least offer an opinion. But no one does and the instructor goes on.

This is the scene in one of my classes, but I see it in most. It's apathy, I sit and wonder what kind of generation I belong to.

I'm not saying all this is the students' fault, this apathy. Every generation seems to pass on this attitude that the future generation will do something. We are the future. Teachers too have a part.

I'm not saying all this is the students' fault, this apathy. Teachers too have a part. Many that I've seen are in a hurry, and then they turn off. All with the enthusiasm of a man who builds fences, as students to get interested in what they are teaching when students cannot be trusted to care for valuable books.

Involvement appreciated

Fergie, Andrew hit California to promote British trade, art

LOS ANGELES (AP) — Britain's Prince Andrew and his wife Sarah were warmly welcomed by dignitaries, entertained by children and ignored by crowds Saturday as they began the official duties of a 10-day California visit to promote British trade and art.

The ducthess got the City Hall ceremony off to a light-hearted start by topping off her black-and-white outfit with a hat sporting the inch-high white letters LA sticking out on wires from the back.

Prince Andrew, in a gray suit and tie and a panel green shirt, gave a short speech in the City Council chambers Sunday that stressed the three-month U.K.-LA '88 Festival of cultural and business exchanges between the two nations, along with the joint U.S.-British efforts to maintain peace in the world.

Noting that he and his wife will visit the aircraft carrier USS Nimitz at sea, the prince said: “For us, our visit to one of your ships will remind us of those many parts of the world in Central Europe, in the Persian Gulf and elsewhere in which your armed forces and our own stand side by side in common defense or our shared democratic values.”

Though still displaying a jovial nature, the prince was more restrained than he was during his visit to Los Angeles four years ago. While visiting a housing project he playfully sprayed paint on accompanying reporters.

Noriega denounces president; Delvalle flees house on foot

WASHINGTON (AP) — Congress faces a confusing choice this week between two rival versions of a plan to help the Nicaraguan rebels.

A vote is scheduled for Thursday to decide whether the U.S.-backed Contras will get an aid package drafted by House Democrats, a similar one drawn up by House Republicans, or nothing at all.

Current authority to aid the Contras expires at midnight Monday, and the rebels are said to be rapidly running out of items like food, clothing and medicine that the new aid plans would provide.

Both versions of the new aid package would keep non-lethal supplies flowing to the rebels at their positions inside Nicaraguan territory. Neither would provide new weapons. And both would set up a $14 million program to help war-injured children on all sides of the conflict.

But while similar in what they would do for the rebels in the short term, the two versions set starkly different ground rules for an impending rematch between the Reagan administration and the Democratic Congress over military aid for the rebels.

The Democratic version, which House leaders say they are confident will pass, holds out the possibility that a new military aid package could be considered sometime after June 1.

The one that was rejected dealt in all classes.

The one that was rejected dealt with standardizing testing instruments for students.

It is called for “all student evaluation instruments to include: a quantifiable element, a significant percentage that is common across the school or university, some means of evaluating the internal consistency and responsibility of the respondents and some means of correlating it with peer evaluations.”

In an added comment on the resolution, the committee said, “It is not terribly important that the present evaluation forms are not standard. Each department/school should seek to improve the form it uses, but not necessarily along standardized lines.

The committee agrees with having some means of internal consistency and responsibility of the respondents, but believes that correlating it with peer evaluations is impossible to achieve.”

Free Order of Garlic Bread and 2 Soft Drinks with any Woodstock's Pizza and were one at the door by Delvalle's wife, Mariela. While the soldiers were telling her they wanted to take Delvalle, the president escaped out a back door, according to U.S. officials in Washington.

State Department sources, speaking on condition of anonymity, confirmed Delvalle's departure and said he had been in telephone contact with U.S. Ambassador Arthur Davis in Panama City and that his children and grandchildren were at that American embassy.

Noriega is expected to file criminal charges against the deposed president, who is still recognized by the United States.
Women's Week concludes

Soviet, American women share element of powerlessness

By Joan M. Halpin

People are basically the same all over the world, said a Cal Poly Soviet, American women share element of powerlessness the North Atlantic Ocean are

remarkable, said Bianca Rosenthal of the foreign language department, during a Women's Week speech titled "Women in the U.S.S.R."

Along with the lecture, the award-winning foreign film, "Moscow Does Not Believe in Tears," was shown. Rosenthal said except for the subtitles, Americans would find it difficult to tell the difference between many of the Soviet's day-to-day experiences and their own.

Although alcohol, teen-age pregnancy, female oppression, and food, clothing, and the Soviet's major problems in the film, many Americans are used to handling the same concerns, said Rosenthal.

Rosenthal pointed out some of the stereotypes in the movie were exaggerated, but did find a common thread in the lifestyles of women in both countries.

Rosenthal's presentation included a discussion of the Soviet Union and the United States share the same thread of powerlessness, she said. Even though Soviet women have what American women strive for — equal rights under the Constitution — it is not upheld in practice, Rosenthal said.

In the U.S.S.R., the majority of women work outside the home, said Rosenthal, but also handle the domestic responsibilities. According to "Women and Russia," a book on feminist writing, the U.S.S.R. has the highest female labor force in any modern industrial society. Women dominate the medical, law and engineering fields but also work in agriculture, construction and other heavy labor positions.

Although women dominate the medical fields, doctors in the U.S.S.R. do not carry status and are considered as ghetto workers who are sponsored by the government, said Rosenthal.

Space exploration, defense and higher education are some of the Soviet priorities. A clip from the film showed a women factory worker getting her engineering degree and being promised to the director of the same factory. Rosenthal said this promotion was unlikely because top executive positions are usually held for male members of the Communist Party, the Soviet Union's only political party. The U.S.S.R. is considered an atheist state and only 6 percent of the population — the elite — are affiliated with the Party.

Opposition of women in a patriarchal society is seen in a Soviet phrase that still circulates today: "If the wife works and makes more money it will ruin the family."

Domestic chores, like grocery shopping, are considered the Soviet woman's responsibility. But unlike the United States, supermarkets are rare and customers have to stand in many lines to purchase, pay and receive their goods. Meat is rare and shopping includes separate trips to the bakery, dairy, fruit and vegetable stores. Men stand in line for alcoholic beverages.

Other social concerns, like birth control methods, were ignored, especially after World War II when 20 percent of the Russian population were killed. Today Soviet contraception is abortion and the average Soviet woman has had eight abortions. "They just don't make women a priority," said Rosenthal.

"A clip from the film idealize men, especial­ly in the scene where the man cooks dinner for his girlfriend and her daughter. Although this may happen in the past, it was a novelty."

Although the Soviet Union and the United States have similar concerns on many issues, economics is not one of them.

Poly falls to Riverside; finishes in second place

By Floyd Jones
Daily Correspondent

RIVERSIDE — So it wasn't the most important game of the season. So both teams weren't fighting for a ticket into the California Collegiate Athletic Association Tournament. But you never had known before watching this game.

Whether it was an illusion caused by U.C. Riverside's claustrophobic breadbox gym, the loudspeaker's late-game announcement, or the fact that it was the last game of the regular season — something made head coach Steve Reason and his Mustangs smell blood.

Saturday night. Riverside shared the CCAA title with Cal State Bakersfield, ending the Mustangs' two-year reign at the top. The Mustangs finished second in the CCAA tournament.

Bakersfield, which gets the No. 1 seed in the tournament and will host the event, will face Cal State Northridge in the first round Friday. No. 3 seed Cal Poly and No. 2 Riverside will have a rematch in the other half of the draw. The winners play in the CCAA Tournament

MEN'S HOOPS

MEANING the winner of the Cal Poly-Riverside game would advance to first place.

In the first few minutes, scoring went up and down, but halfway through the period the Mustangs pulled away to lead, 23-17. The Mustangs answered with two inside shots to come within one, but then it was Mark Ota time. No, not a three-pointer. An inside move. A BIG inside move, on a 30-foot defender in front of the crowd in the crowd.

Even though Ota scored a very quiet team-high 15 points, it was awfully hard to miss a ball in the paint — especially when he's only 6-2. Ota's newfound find inside the key was indicative of how hard the Mustangs were going to play.

Every Mustang to hit the floor played ferociously, not the least of whom was senior guard Jeff Gray, who ripped down nine rebounds and dished off six assists.

With four minutes left in the game, Riverside had cut the deficit to within one, 48-47. But the MustangsCAP a three-point play.

With 12:58 left, the Mustangs moved further ahead, 42-33. The Highlanders had cut the deficit to within four, but Hasselfield nailed a jumper from out of the paint.

With 10:29 remaining, Cal Poly's 23 turnovers. The Highlanders turned over 18.

Poly's 23 turnovers. The Highlanders turned over 18.

The Mustangs ended the game with a 14-5 run.

The Lady Mustangs ended the season with a 9-15 record in the California Collegiate Athletic Association play. The Mustangs had an 18-9 all-around record, placing third with 37.05 points, the highest score the team has ever achieved. Northern Michigan, ranked sixth in the nation, placed second with 176.7, while Seattle Pacific placed third with 176.5.

Plence's first place in the all-around with 37.05 points was good for a school record, as was her first in the floor exercise at 9.45.

Kim Wells, with a score of 9.65, placed third in the all-around. She also won the balance beam, usually Cal Poly's weak area, with a score of 9.3.

Wells got the balance beam. She was trying to find a routine when she competed against Sea Pacific's in the regionals, said Wells.

The Mustangs are striving to stay in the 180s for team scoring, he said. But the Western Region champion boxes, to be held at Seattle Pacific in March, may be a different story.

The team's overall score of 46.4 in the floor exercise was their highest score of the season. Cal Poly head coach Tim R_iso said the Lady Mustangs' performance means they have a good shot at winning nationals. They are aiming to stay in the 180s for team scoring, he said. But the Western Region championship boxes, to be held at Seattle Pacific in March, may be a different story.

The “team needs to keep working hard so they know going in the 180s was not just a fluke,” he said. “We are a 180s team.”

Wells said the team worked hard to prepare for Saturday's meet because Seattle Pacific is a tough team. It was easier to compete at home, she said. But the Western Region championship boxes, to be held at Seattle Pacific in March, may be a different story.

The “team needs to keep working hard so they know going in the 180s was not just a fluke,” he said. “We are a 180s team.”

Mustangs rally to take conference quad meet

Unknowning mile relay team puts the icing on win

By Rob Lopez

The Cal Poly men’s track and field team came from behind to win a close four-way conference meet under rainy skies Saturday afternoon.

The Mustangs defeated Cal State Bakersfield, Chapman College and Cal Poly Pomona. They scored 103 points, with their toughest competition coming from Bakersfield, which finished second with 72 points. Pomona scored 22 and Chapman only six.

"Our coach told us it would be a do-or-die situation when, in fact, they had the results but decided not to pass them on until after the relay," said Henderson. "Given the weather conditions the team performed well."

The Mustangs swept the top four places in the 3,000 and the top three in the 800. They also placed in the top three in the pole vault despite the strong wind, which Henderson said was blowing directly in the vaulters’ faces.

Mens Track — The Mustangs took third and fourth in the 100. Huber ran an 11.26 and freshman Ronan Delboire an 11.59. In the high hurdles, Kowarsch took second with a time of 15.35. The Mustangs also placed third, fourth and fifth in that race. Huber finished third in the 200 with a time of 22 seconds flat. Senior Joe Strieff took third place in the 400 with a time of 49.47. Mark Conley of Bakersfield won the distance in a time of 49.25. In the intermediate hurdles, King finished first in 53.7 seconds. Hans Kardel finished fourth with a time of 55.4.

Middle Distance — Junior Chris Craig led the sweep of the 800 with a time of 1:56.3. Junior Mark Soen was second (1:57.2) and Doug Hancock third (1:57.3). Senior all-American Mike Livington took first in the 1,500 with a time of 3:55.01. Junior Tim Campbell placed third and junior Gary Charbonneau placed fifth in the 1,500.

The Mustangs first place in the triple jump with a leap of 44-6. Sophomore Kevin Ranklo led the sweep of the pole vault, clearing 15-6.

Relays — The 400-relay team performed well by passing the baton before the last race. It sent a chill up and down my spine, it really pumped me up," said Henderson. "Everybody stuck together. People started clapping before the last race. It sent a chill up and down my spine, it really pumped me up."

Kowarsch used a powerful kick in the last 100 meters to pass the Bakersfield runner en route to victory. The team of Kowarsch, Mike King, Rich Baurier and Rudy Huber posted a time of 3:18.10.

Henderson said Kowarsch did a great job filling in for Brian Streiff, the No. 1 400-relay runner and anchorman of the "A" mile relay team. Streiff had to sit out the mile relay because of stiffness in his leg.

"We had some real solid performances today, but nothing spectacular," said Henderson.

"Everybody stuck together. People started clapping... It sent a chill up and down my spine."

— Kowarsch

Long Distance — Pomona was the only school entered in the 3,000 steeple chase. The Mustangs Erich Ackermann won the 5,000 with a time of 14:59.8. Senior Michael Miner, junior Paul Ghidossi and freshman Mike Peterson took second through fourth, respectively.

Jumps — In the high jump Cal Poly’s Mark Conley placed third, clearing 6-0. Bakersfield won the event. Huber finished second in the long jump, traveling 22-1. Delboire finished third with a jump of 19-5. Conley gave the Mustangs first place in the triple jump with a leap of 44-6. Sophomore Kevin Ranklo led the sweep of the pole vault, clearing 15-6.

Poly routs Chapman for seventh straight

By John Alexiou
Staff Writer

The Cal Poly women's tennis team dominated Chapman College, 9-0, to win its fourth conference and seventh straight match Friday afternoon.

The Lady Mustangs, ranked second in Division II, raised their record to 7-2 overall and 4-0 in the California Collegiate Athletic Association. Cal Poly head coach Miguel Phelps was pleased with the results and wasn't surprised by his team winning in straight sets. "I knew we would kill them," said Phelps, who let his less experienced players compete higher on the ladder. "It was a blowout with my lower squad. It just showed we have a lot of good players and a lot of depth."

The Lady Mustangs team is unique because they have a large number of players, including a reserve team. "Most of the other teams in this league are fighting to have seven players," said Phelps. "I'm sitting here with 15 players and can put most of them in a match and feel confident that we'll hold our own."

"I'm sitting here with 15 players and can put most of them in a match and feel confident that we'll hold our own."

Cal Poly's No. 6 Amy Lansford defeated Chapman's No. 1 player, No. 6 Amy Lansford defeated Chapman's No. 1 player.

In doubles competition, Wendy Elliot and Lansford rolled to an easy win over Dubbeck and Bonnett, 6-1,6-0.

Cal Poly's No. 1 player, Vicki Kanner, and No. 5 Susan Norman beat Siebel and Perez, 6-0,6-2.

Cal Poly's Chris Calandra and Barbe easily won their match, 6-0,6-0.

Cal Poly's Chris Calandra and Barbe easily won their match, 6-0,6-0.

Timely hits missing as Long Beach nips Poly

By Sherry Wittmann

After a confident win Friday against Cal State Long Beach, the Cal Poly baseball team fell short Saturday in the second of a three-game series, 3-2.

"We had a very good and courageous game by our pitcher, Chad Holmes," said 49ers coach John Genovese.

Holmes' performance was a vast improvement for Long Beach, which had allowed 92 walks in the previous 102 innings.

The 49ers controlled the first three innings, scoring all three of their runs. Cal Poly saw only 10 of its batters come to the plate during that time.

However, the Mustangs rallied in the fourth. Second baseman Joe Rumsey belted a line drive to center field. Leftfielder Todd Rice followed with a double that allowed Rumsey to score. Another line drive to center by rightfielder Rich Shepperd brought in Rice to make the score 3-2.

The inning ended when third baseman Justin McCray grounded to 49ers shortstop Chris Gill, resulting in a double play.

The Mustangs had a chance to score again in the seventh inning when shortstop Chris Vodanovich came to the plate with two outs and the bases loaded. But he grounded out to 49ers second baseman Mike LaTuan to end the inning.

"We didn't get the big hit when we needed it," said Cal Poly head coach Steve McFarland.

Poly wins every event but one to post 88 points

By Rob Lopez
Staff writer

The Cal Poly women's track and field team was storming just like the weather Saturday afternoon.

Cal Poly won a four-way conference meet against Cal State Bakersfield, Chapman College and Cal Poly Pomona under rainy skies. It was the Lady Mustangs' California Collegiate Athletic Association opener.

WOMEN'S TRACK

They scored 88 points. Their closest competition came from Pomona, which scored 59. Bakersfield scored 26 and Chapman had only two. The Lady Mustangs dominated the meet from start to finish.

In every event but one, Lady Mustangs swept the top two places. The one exception was the 100 hurdles, which was won by Geri Courtwright of Bakersfield with a time of 14.37 seconds.

"It's amazing," said head coach Lance Harter. "Cal Poly Pomona usually finishes in the top four or five in the United States."

Harter said the younger Lady Mustangs continue to rise to the competition. The team was not even close to full strength Saturday, he pointed out that changes were made in the lineup to allow "B" team competitors to step up a notch.

The team has been under a heavy work load this season.

"We have been having hard workouts on Monday and Wednesday and the girls are sluggish by the time they get to the track on Saturday," Harter said.

By late March he will begin to taper the work loads in preparation for the nationals in May.

Sephna Thatcher said the key to the win was the rigorous training.

"Lance's program has been really consistent," she said. "It's real good. The team is like one big family, we're all real good friends. We always support each other. Today I could hear everyone doing the field events rooting when I was running and we did the same when they were doing their competitions."

Now to gloat about Cal Poly's victories:

Sprints — Erin Erber won the 200 with a time of 23.9 seconds. Tenna Colebrook, a Division II record holder in the 400 and 1,500, took third. In the 100 hurdle, Erber took second. Freshman Gina Albanese finished first in the 400 hurdles in 62.6 seconds, almost four seconds faster than the second-place finisher. In the 400 Colebrook won in 57.87 seconds and Karrie Rexford took second with a time of 61.52.

Middle Distance — Thatcher placed second in the 1,500 with a time of 4:34.89, a personal best.

Relays — The Lady Mustangs placed second in the 400 relay with a time of 49.34 seconds. In the mile relay the Cal Poly "A" team finished first with a time of 4:02.2. The "B" team finished third and the "C" team fourth.

Cal Poly high jumper Anne Campbell clears the bar in Saturday's meet.

From page 1
SAX, along with the rest of the crowd down. The ones who did perform also were used, but only made the crowd more horrible, said Matt Lepow, audience member. "That's when the tables started breaking."

The overwhelming solution to the crowd problem suggested by those in attendance was advanced ticket sales. If they had sold tickets in advance, reasoned concert-goer Allen Do, who also waited for two hours to get in to the show, they could have sold everyone a home where it was sold out. Rhythm Akimbo member Little said tickets weren't sold in advance because of the remote possibility of the party being shut down for noise or alcohol violations. If they were sold in advance, he said, and then it was shut down, the refund process would be too excessive and hard to regulate.

Gren said that the police praised SAE for doing a good job with crowd control outside the concert. Police on duty that night were available for comment.

Friday's police log listed the following disturbances: a broken stop sign, an underaged drinker, a DSL, a citation for disturbing the peace and "numerous subjects drinking in public" within a one block radius of the Vet's Hall.

BAKER

From page 1
Agriculture said poorly planned growth might jeopardize fertile fields near the core that agriculture students now use for class projects.

Baker was quick to affirm the educational value of conveniently located, arable lands: "We have consistently stated that these fields are laboratories just like an electronics laboratory or a chemistry laboratory... You can't move good, high-quality land to somewhere else and we don't intend to do that.

In fact, Baker said, according to the master plans, those buildings are scheduled to be moved.

Another concern shared by many of the deans is that growth, if not properly planned, could hamper student-faculty interaction, which is a cornerstone of a Cal Poly education.

"Cal Poly has the impression of being a small university," said Dean Phillip S. Bailey Jr. of the School of Science and Mathematics, because there is a close relationship between students and faculty.

Baker said size at Cal Poly is influenced as much by perception as with actual student enrollment.

"We have 16,000 students here, and our students think it's a small school," he said. "I think the reasons that they think it's a small school is the way in which we're structured."

"Maybe we won't eradicate that view and that close relationship" if enrollment is increased 10 or 12 percent, he said. "Though enrollment growth decisions are still down the road, the administration must face funding decisions today. And because of the Gann initiative, which sets limits on state spending, funding has become a major concern for Cal Poly as well as many other universities."

As a polytechnic university, Cal Poly has a large investment in equipment that is required to reach technical majors. And acquiring the latest equipment can cost millions of dollars. Add the need for additional computers, office supplies and funds for faculty salaries, he said, and the appearance is that of a financial crisis.

"It's nearly impossible to keep equipment current at state-of-the-art by the current state budget formulas," said Baker.

The Development Office was established as a means of acquiring new equipment by raising private funds and seeking corporate donations, Baker said.

The Benchmark Campaign, set up to acquire equipment for the School of Engineering, and arrangements made with computer companies are examples of outside support achieved through the Development Office, Baker said.

"The total sum of all donations is more than we get from the state (for equipment)," he said.

Also, Baker said the lottery has provided some money for computer equipment.

Though new facilities construction will be funded by general obligation bonds passed by state voters, which are outside the Gann spending limit, funding for everyday operation is affected.

"If the Gann limit is not changed, it's going to be a mounting problem," he said, "because the CSU system "will be in the very serious situation of trading off improvements of quality against growth."

Baker, addressing the complexity of the many decisions now facing the administration, said one underlying principle will remain firmly in place. "Good teaching is what we're here for, and helping students learn. And that's all we should be doing at a university. I am personally committed to that, and I have communicated this administration committed to that.

GRADES

From page 1
In the spring, the number of students receiving a grade of "F" has doubled. At least part of the reason is a rising concern with student performance.

Dual careers are increasing child care needs

By Caroline Boulton  
San Luis Obispo

Dual career families are causing an increased need for child care, and San Luis Obispo residents need to be more aware of the problem, according to two psychologist at Cal Poly research on women and development.

Robin Pledger and Tracy Maruyama are organizing a corporate child care symposium for Cal Poly students and city residents to increase community awareness on the growing problem. The symposium will also fulfill their senior project requirements.

In 1984, about one-half of American working women were in need of child care, up from 32 percent in 1970. Statistics show working women, single and double-parent working households to be on the rise. Companies are responding to the needs of these families because "women in this generation are the first ones to feel that their career is as important as their husband's," said Maruyama.

In her book, "Employer-Supported Child Care: Investing in Human Resources," Sandra Burd states 60 percent of all American families have dual career families, single-parent families have doubled and 23 percent of the American population have a "traditional family," where the father is the breadwinner or solo provider. In addition, women are working for economic reasons. Two-thirds of women are single or married to men who earn less than $10,000 per year. "Economically, women can't afford to stay home," Maruyama said.

The San Luis Obispo area needs to be made aware of corporate child care, said Pledger. "Corporate child care is where employers provide meeting employees' child care needs" by providing a child care facility on or near the site of employment. "To me, that's a win-win way of the future," said Maruyama.

Pledger said, "It's a new career opportunity for business and human resource majors. Who should be concerned with corporate child care? Anyone who is hiring women in the family should be concerned."" Companies other than four businesses getting together to have a parent supported child care facility" are also on the rise, said Maruyama. A new city ordinance in San Francisco says new businesses, hotels or large corporations must provide square footage for child care or put money into a child care fund for employers. Businesses pool resources to form a consortium. "It's a real change," reported Maruyama. An example of a corporate child care fund is Hacienda Business in Pleasanton.

Benefits of CCC to employers are retention of quality employees and increased production because "if you keep your employees happy they'll be more productive," said Pledger. Also, turnover is cut back, employee turnover is lower, it's an asset for recruitment and companies are hiring because "the idea is you scratch my back and I'll scratch yours" and commitment and motivation are higher," Pledger said.

Benefits to employees include less stress and worry because their child's in safe hands, a safe place for children because it helps eliminate the lunchtime quandary.

The symposium will be held March 5 from 9:30 to 4:30 in U.U. 220.
WOMEN

From page 5
Throughout the second half, the Lady Mustangs were limited to cross-court passes and perimeter shots. Meanwhile, the Highlanders took advantage of an overplaying defense and continued to get the ball in low. The next seven minutes were bucket answering bucket, turnover for turnover.

With 2:33 left and Riverside leading 63-60, Smith turned on the heat with a 10-footer, a steal and a routine pass into empty space, back in the game. With 48 seconds left, Riverside's ex-spokesman for the Bakersfield-Pomona game, Maurice Pullam dropped the intensity level a little bit. We allowed them to get back in the game," said Hasselfield.

Said Smith: "We didn't take advantage of our steals. We just started letting them back." Hasselfield said playing with only seven players all season has been difficult — that it has been physically draining. The Lady Mustangs had fallen into momentum swings all season. "It's physically impossible to run at 100 percent for 40 minutes," Hasselfield said.

Editor's note: Riverside's exceptional fine senior guard, Chris Lambroese, closed her collegiate career with eight points. With six seconds left, Poly's Morris fouled Held, sending her to the line. Held sank the first free throw. The second bounced off the rim and waiting hands and bodies until the buzzer sounded.

"I think what killed us were turnovers in the middle of the game," said Hasselfield. "We dropped the intensity level a little bit. We allowed them to get back in the game." When they called out the Bakerfield-Pomona game 71, Bakersfield 70."

Both sets of fans burst into a roaring cheer. This game suddenly took new meaning. But the Highlanders must have gotten more adrenalin than the Mustangs. The Mustangs began scraching for whatever points they could get, missing three-point shots and failing to score twice underneath off offensive rebounds. Riverside went into the 45-second stall with 1:58 on the clock and the score 64-58. Chris Jackson drained a three-pointer to extend the Highlanders' lead. Ostra missed a final three-pointer, and with 48 seconds left the Highlanders Maurice Pullam broke for a final layup.

"When they called out the Bakerfield-Pomona game, it got both teams pumped," said Cal Poly freshman forward Coby Nest, who had 10 points. "We wanted to win really bad after the Bakersfield score, but their shots went in and ours didn't." Said Riverside head coach John Musi: "I'll be honest. I was waiting for that score. Our work ethic lagged in the first half. We were reeling from Thursday's loss to Bakersfield, maybe feeling a little sorry for ourselves."

From page 7
The loss drops Cal Poly's record to 9-6, but that doesn't worry McFarland.

"I'm not looking as much for the win-loss as I am for consistent play," he said.

The Mustangs begin California conference Tuesday at Cal Poly Pomona. Game time is 2:30 p.m.
