Campus multi-level parking garage years away

By Shelly Evans

With the opening of San Luis Obispo's first multi-level parking structure last Tuesday, the idea of a structure on campus to solve Cal Poly's parking problems seems even more sensible.

Cal Poly Executive Dean Doug Gerard said a parking structure on campus is not altogether unrealistic.

"We're jealous because we would like to have one," Gerard said. "Right now, the Chancellor's Office doesn't support it."

Because the Southern California campuses have limited space available for parking, the CSU funds are used toward building structures on their campuses.

The parking problem is systemwide," Gerard said. "Cal Poly parking fees go into a system fund. The metropolitan campuses get a majority of the funding because they must go up."

Chancellor's Office officials were unavailable for comment.

Both staff and students argue that, instead of parking on campus becoming more scarce, covering valuable land with ground-level parking instead of using less land for vertical parking would greatly hinder school programs and destroy much of the aesthetic beauty of the area.

"The land is an integral part of the School of Agriculture — to be used for instructional purposes," Gerard said. "It's like taking away a lab from chemistry students."

Though the Chancellor's Office denied a planned systemwide parking structure at Cal Poly, Gerard said a plan could be approved in five years.

Of the two structures on the master plan, one is located across from the library and the other is an underground multi-level structure across from Sierra Madre Hall.

The structure near the library will have approximately 1,200 spaces and the other will have 1,500, compared to the downtown structure at Morro and Palm streets which has 422 spaces.

"The cost of developing parking is a major problem," Gerard said, emphasizing that one structure costs about $7 million to $8 million.

An increase in parking fees is scheduled to go into effect fall 1988. Currently, parking is $22.50 per quarter. With an almost 65 percent increase next fall, the quarterly fee will be $36.

The increase is proportionally higher or lower for all CSU campuses and will be used primarily to cover the expense of parking structures on southern campuses, Gerard said.

The parking fund is not large enough to cover the expenses of a parking structure.

Low funding forces library to cancel magazines

By Christie Kuechler

When people think of donating money to Cal Poly, they hardly ever think of giving it to the library, said Cal Poly's library director.

David Walsh said when alumni are asked to donate money to Cal Poly they usually give it to their former department.

This is one of the causes of the library having to cancel 200 periodicals last year and it seems more will be canceled this year.

"The budget for the library has not been cut, but the yearly increase in the money given to the library has not risen as fast as the cost of books, periodicals and serials," Walsh said. Serials are received yearly like journals or encyclopedias.

"The annual increase in the cost of books, periodicals and serials is $18 percent, serials 30 percent and books 36 percent," said Walsh.

Walsh said the library can not cancel many of its periodicals because they are all needed by different departments. If they don't cancel the periodicals then the number of new books that are bought each year will decrease, according to Walsh.

The money for the books, periodicals and serials comes from the state and some departments also help.

Walsh said libraries throughout the county have been affected by this but it is especially bad in California.

"There are a lot of demands on the money from the state and it has failed to recognize the problem," said Walsh.

Right now 35 percent of the budget is spent on books, 42 percent on periodicals and 23 percent on serials. If the periodicals are not canceled then the money spent on the books will be cut until there is nothing left, and no new books can be purchased.

"Kids can usually relate better to a carnival than management information systems," said Olhausen.

The carnival is only part of Poly Royal's "great heritage," said Olhausen. Poly Royal makes Cal Poly stand out among other university open houses by far, he continued.

In addition, the carnival brings out the country fair aspect of the university's open house. In the past, the theme was "A country fair on a college campus," but it has changed with the times, Olhausen said.

As of March 1, the Poly Royal executive committee has received 319 requests for activities for Poly Royal '88.

By Caroline Boullon

The annual tractor pull and rodeo, cow-milking demonstrations, lectures by Ray Bradbury and others, magic shows, optical displays, rappelling demonstrations, free concerts and a rugby competition are all planned for Poly Royal '88 — demonstrating the university's open house is a lot more than just food and carnival activities.

Well, "It's Our Style."" The main goal of Poly Royal is to show off the university, its students and its staff," said Bob Olhausen, superintendent of this year's Poly Royal.

The Poly Royal Executive Committee staff consists of more than 200 students, each representing a different school or club on campus. They must attend a meeting every week, said Olhausen, a mechanical engineering senior. "This is where we get all the information to them about how to put on Poly Royal."

This year, the carnival will be in the G-4 parking lot, behind the music building. Although the carnival will be for everyone, it is mainly directed toward children — emphasizing Poly Royal is for everybody.

"Kids can usually relate better to a carnival than management information systems," said Olhausen.

Library to sell books

"Books a la Carte," Kennedy Library's monthly book sale, will be held Wednesday in the library's lobby. All sorts of good things will be up for grabs, from magazines (10 cents) to paperbacks (25 cents) to hardcovers (50 cents). The sale is sponsored by The Library Associates, and proceeds will be used to purchase special materials for the library. Sale hours are 10 a.m. to 3 p.m.
How to operate on a dime store budget

Well, the ASI is back with its pockets turned out and its mouth dripping ravenously. Yes, they want more money. What else!

"I can predict the future. As I write this, I predict my next project and that's about six books from home. I swear I can't see him from my window."

"Just look at the sound from our stereo. He says he's in the d-d-dwrrrrrrr-eway."

"You think I want all night long?"

Why does anyone need 45-watt speakers in his car? At full volume, my neighbor's son could make his hard top into a convertible just like that. I realize he wants to be able to hear the music, but just wish he wasn't so unselfish about sharing it. I don't mind my windows rattling a little, but the falling plaster is starting to bug me.

Some day I'd like to reach into my neighbor's car and turn up the volume all the way. Then he starts the car and scatters the hell out of him. I can see the headlines in the newspaper now:

"Man mysteriously thrown through windshield of parked car."

"Police officer Ben Down said the mystery will remain unsolved because no one can get close enough to the car to investigate. A SWAT team armed with a sniffer was called to the scene to turn down the stereo but were held at bay by the pounding bass emanating from the car. Police then evacuated the neighborhood and said they would delay their investigation until the car's battery went dead. Three officers complained of dizziness and nosebleeds. They were treated at Sierra Vista Hospital."

"It was the damndest thing you ever felt," said Mike How's Lot Onas. "I swear I felt like someone was beating a drum...like a DeFe Lppoand song.

"Hey, dude, have a nice day."

"Yeah, I guess they appreciate citizens who drive the sound limits."

So I go back to my drum solo and we keep cruising along. After about five minutes, I notice the police car is next to us. "Hey, why's that cop pointing at us?"

"Maybe you've got your headlights on!"

"He's trying to say something to us.""

"Neither can I. Let's pull over and find out.

So we stop the car and turn off the stereo. The cop says as we drive away: "I didn't think I was speaking.""

"So why'd you want us to pull over?"

"Just wondering if you're going the way up the coast for the past 20 minutes and since you're down on the highway..."

"The cop says as he pulls out a pad of paper."

"So you're going to give me a ticket?"

"No, that is I'm going to find out where you got your stereo. It's louder than our sirens."

Polly College of Arts and Sciences proposed

By Joan M. Halpin

Two of the seven Cal Poly Schools may have a chance to bring order into the chaos of education, said the vice president of Academic Affairs.

Malcolm Wilson initiated a proposal to merge the School of Liberal Arts with the School of Science and Mathematics. He said the union may bring new opportunities and provide "a unified voice, instead of fragmented schools."

Wilson said one benefit of a unified voice would be the unity of faculty.

Faculty having a shared thought process may indirectly help alleviate some student problems — including backlogged classes, said Wilson.

Committees from both schools have been formed to examine the effects of combining the schools.

Wilson said if the schools merge there may have a new title — "College of Arts and Sciences." Whether this may suggest an ascendency, or a "cross fertilization" would probably not be implemented until late 1989 or 1990.

The opportunity for change was presented after the recent announcement that two Liberal Arts administrators, Ericson and Associate Dean Besie Swanson, are leaving their positions.

"It's just a good window for considering this... an excellent time," said Phil Bailey, dean of the School of Science and Mathematics. Bailey said if the initial concept was supported by the two deans and faculty department heads, it would put a halt to a national search, recommended in a permanent replacement for the dean of Liberal Arts. But he added they would probably recruit more associate deans.

Wilson said the possible change would not be an economic move and mentioned resources would be necessary to restructure the schools. But he added there may be "positions savings," referring to new faculty office space that could be rearranged.

College of Arts and Sciences may give a clearer focus to the core of a bachelor's degree," he noted it would be the only college in the Cal Poly system.

Wilson said, "If there is nothing to gain, then we won't go through the exercise."

Wilson said by late spring, committee members will evaluate the situation. What he termed the "cross fertilization" would probably not be implemented until late 1989 or 1990.

Bakersfield romps Mustangs to win tournament

By Elmer Ramos

BAKERSFIELD — Sandwiched between two trips to Cal State Bakersfield, the Cal Poly baseball team continued its struggles on the road Saturday, suffering a 10-9 loss to Loyola Marymount in 12 innings.

The defeat brings the Mustangs' losing streak to four games and their overall record to 4-10.

MEN'S TRACK

predicted by Cal Poly head coach Tom Henderson.

There were no surprises, he said. "Cal State LA is definitely the team to beat in the conference meet."

Los Angeles has captured the California Collegiate Athletic Association championship two years in a row and is favored again this year.

Mike Livingston's time of 14:24.7 in the 5,000 earned him a spot in the NCAA meet. Other notable individual performances:

• Brent Warren, who leads the conference in the javelin, won with a toss of 202-7.

• Mike King, undefeated in the See TRACK, page 7

No. 2 Chapman gives Poly first CCAA loss

BY JILL GREGORY

Los Angeles — The Cal Poly men's tennis team gave its best effort, but fell short in its much-anticipated match against second-ranked Chapman College Saturday afternoon, 5-4.

Cal Poly head coach Hugh Brennan, who expected it to be a tough match, was satisfied with his players' performances.

"I am disappointed that we didn't win, but we played well," he said. "We will just have to play better next time."

The loss, the Mustangs' first in CCAA play, plunged the team to seventh in the conference and ninth straight overall.

The Mustangs took two of six singles matches, with freshmen No. 5, Susan Naranjo, No. 6, Amy Velasco, and No. 7, 8-3.

The rest of the Mustangs didn't fare as well. No. 1 singles player Mike Giusto fell to Miles Walker, Division II's top-ranked player, 6-3, 6-4.

"He only had one service break in each set," said Giusto. "I was playing good, but I wasn't returning well enough to break his serve."

Cal Poly's Neal Berryman had a close match at No. 2 singles with Olivier Amerinck, but lost, 7-5, 7-5. Amerinck is ranked No. 3 in the country and sport a 17-8 record.

Bakersfield's Erik Bratlien, who was scheduled to work — they're just a good country and sport a 17-3 record.

Cal Poly got off to a poor start, giving up five runs in the bottom of the first inning. Pitcher Brad Hoyer walked the first three batters, and after a sacrifice hit by Chura with two men on, three runs in and only one out.

But the Mustangs came back big in the second, snatching a 1-0 lead halfway through the half. The win, the Mustangs' first in CCAA play, plunged the team to seventh in the conference and ninth straight overall.

The Cal Poly women's tennis team overpowered Cal State Bakersfield, 9-0, to win its fifth conference and ninth straight match Saturday afternoon.

The Lady Mustangs, coming off a sweet victory over Division I Loyola Marymount, raised their record to 6-2 overall and 5-0 in the California Collegiate Athletic Association.

Cal Poly head coach Miguel Phelps was impressed with his team, which only lost two Saturday.

"I was really pleased," he said. "It was a slow start, but they showed their character and went to work — they're just a good team."

Cal Poly's No. 1 player, Vicki Kanter, who's been competing with an injured foot, was the only singles player who didn't win in straight sets. She lost the first set, 6-3, but came back and defeated Wilson, 6-2, 6-3.

Wendy Elliott, No. 2 for the Lady Mustangs, overpowered Cathy St. Claire, 6-0, 6-1, and No. 6 Amy Lansford defeated Solange Lor, 6-3, 6-1.

In doubles competition, Bakersfield's No. 1 team has taken Cal Poly to three sets the past few years. This time was no exception. Elliott and Lansford had to change their strategy after losing the first set to Wilson and St. Claire, 2-6.

"They (Elliott and Lansford) were giving them two or three chances to hit a ball and you can't do that in doubles," said Phelps. "(When you get your chance you have to put it down.)"

Elliott and Lansford began doing just that and won the next two sets, 6-4, 6-2.

Physical Education

My first time tutoring was a night to remember. My student was something called Bone Crusher Reed, a.k.a. Billy Jo, defensive tackle for the football team.

I had the shock of my life when he answered his dorm room door. He was about six foot seven...in diameter. And when he shook my hand, I thought I’d never get it back. So there I was, face-to-knee with the big man on campus, wondering how I was going to relate American Literature to The Hulk.

But then he pulled out a can of Orange Cappuccino. I was shocked! Could it be that this tough jock liked its delicate taste? And when Bone Crusher brought out the bone china, I was beyond belief.

Reading the expression on my face, he said, “What can I say I like it. The Café Francais is pretty good.” Well, who’s going to argue, I thought. As we sipped our Orange Cappuccino, I discovered that Billy Jo loves reading novels; his only problem was poetry. So I gave him tips on reading Emily Dickinson, and he gave me a copy of Ann Beattie’s “Falling in Place.”

All I could think was, Dad’s never going to believe this!

Does Stress Slow Weight Loss

Stress may have a large impact on your ability to lose weight. For example, if you are a busy executive, your schedule may cause you to eat irregularly. This erratic eating leads to serious overeating at night, when your energy needs are at their lowest, which can cause you to gain weight.

At Diet Center, learning to eat on a schedule is an important part of our Program. This instruction, combined with all of the other aspects of Diet Center’s complete weight-loss program, makes it possible for you to lose weight quickly and to keep it off forever. In fact, on the Diet Center Program you can lose 15 to 25 pounds in just six weeks. Call today for a free consultation and find out how controlling stress can put you in control of your life.

Bromley is a "fine example of someone who has kept himself young by the process of lifelong learning," said former Cal Poly President Robert Kennedy. The largest student-run university open house in the nation will be held on Saturday, April 23, at 10 a.m. Special officers and the campus fire royal queen and her court, ASI officers and the campus fire department can be seen in the parade. Sororities, fraternities and all campus clubs are invited to compete by building floats. All entries will be judged and awards will go to floats in the "most creative" and "best use of theme" categories, said Tawney McKenl, special events assistant. During Poly Royal, Beta Beta Beta will put on a science fair outside the Fisher Science Building. High school science projects will be judged by Cal Poly biology students.

All schools are encouraged to put on their best displays, as the exhibits will be judged for the best overall presentation. Mike Gomes, who represents the School of Agriculture, said Poly Royal "isn't just tractors and plows anymore." In addition, Poly Royal represents modernization, which is reflected in the posters and booths, he said. This year, the School of Agriculture is "keying in on the more high-tech aspects of ag — especially marketing," said Gomes.

In preparation for the university's biggest yearly event, Poly Royal Queen Lori Sousa and her court travel to high schools and junior high schools throughout California, promoting Cal Poly and its "learn by doing" philosophy, said Missy Schulz, director of queen PR.

In addition, they attend Farm- ers' Market at least twice a month to "encourage and get the community really excited about Poly Royal," Schulz said. Other preparations for Poly Royal include a representative going to campus clubs to let students know the Poly Royal committee "is here to help them if they need anything for Poly Royal," said Scott Hublou, executive board member.
