Special meeting on election could cause lawsuit

By Alison Skralt

The legality of the ASI election results has come under scrutiny by Rec Sports because a special Student Senate meeting may have violated a state Senate bill.

ASI decided that the elections were valid, a lawsuit may be filed by a student involved with Rec Sports.

On April 8, ASI decided to hold a special meeting to discuss the fact that the senate had approved a ballot face that lacked a fee increase onto the bowling alley issue. The meeting was announced on the front page of the Mustang Daily on that Monday.

During the special meeting, the fee increase was taken off the bowling alley choice on the ballot and it was decided that the Rec Sports budget would absorb the projected $30,000 a year loss for the lanes.

The decision was made so students could choose between the issues and not have to choose based on a fee increase, according to election committee chair Susan Sinclair. The ballot read, "Both facitilies will be absorbed by the Rec Sports budget."

At last Wednesday’s regular senate meeting, more than 30 concerned students and administrators looked on as Chris McNairy cited California Senate Bill 2286, the Seymour Act, and made hopes for an untainted ASI election go up in smoke.

The act, which was approved by the governor in 1984, concerns student body organizations in the California State University system and specifically defines how special meetings and student issues should be handled.

According to the act, special meetings may be called at any time by the presiding officer by delivering written notices personally or by mail to each member of the board and to any other party to be directly affected by a meeting.

The critical part of the act that concerns Rec Sports cites that “the call and notice of a special meeting shall be delivered at least 24 hours prior to any meeting and shall specify the time and place of the special meeting and the business to be transacted...”

Car accident takes life of Cal Poly mathematics professor

By Marisa Fajikake

A Cal Poly mathematics professor died Wednesday morning after swerving off Los Osos Valley Road into a creek.

Ralph M. Warten was driving east-bound on Los Osos Valley Road around 8:35 a.m. at approximately 30 to 35 m.p.h. Warten swerved to avoid a pickup that started moving forward after it had stopped at a stop sign on Calle Joaquin, the California Highway Patrol reported.

The professor lost control on the wet pavement and went over an embankment, front first, and his car flipped onto its back in a 5-foot-deep creek, said officer Ray Hernandez, who is investigating the accident.

The driver of the pickup, Troy Tyce, 25, of Atascadero, managed to pull Warten's wife, Grace, out of the car, but was unable to rescue Warten because he couldn't open the car door.

Tyce caught the attention of a passing tow truck, which elevated Warten's Honda Accord to a 45-degree angle.

Fire Captain Stan Mello and Tyce managed to pull Warten out of his car, and advanced life support was administered immediately.

Warten was taken to Sierra Vista Hospital where he died from massive head injuries. Grace Warten, 59, was transported to French Hospital Medical Center. Jody Benson, nursing supervisor, said she was admitted to rule out the possibility of internal injuries. She was discharged Friday afternoon.

"These are sad circumstances all the way around," said Frank Stricker, public affairs officer of the California Highway Patrol. "The car went into a ditch of water, and it shouldn't have had water in it."

The ditch was filled with rain water and ranged with 20 students to hold a retirement party for Warten, since this was to be his last quarter at Cal Poly. "He was a wonderful wonderfull man," said Adelaide Harmon-Elliott, mathematics professor who shared a faculty office with Warten. "He's going to be missed by many students, faculty, and friends."

At Cal Poly, Warten touched the lives of many students, faculty and friends. "Ralph and Grace called me their adopted son, and I called them my parents," said Rick Anderson, former student of Warten's and close friend of the couple.

Three weeks ago, Grace Warten arranged with 20 students to hold a retirement party for Warten, since this was to be his last quarter at Cal Poly. "He was a wonderful wonderful man," said Adelaide Harmon-Elliott, mathematics professor who shared a faculty office with Warten. "He's going to be missed by many students, faculty, and friends."

Warten was involved with the co-op program at Cal Poly. "He was a wonder."

Valuable roadmaps

Quarters are but a passing fancy. It seems that last day after the add-drop deadline, we’re dealing with dead week. With this kind of now-you-see-it, now-you-don’t system, a syllabus is priceless.

Unfortunately, the Academic Senate is little more than lukewarm for the idea of mandatory syllabi. That’s too bad because those simple forms benefit professors as well as students. Too often, instructors get sidetracked—whether intentionally or not—from the subject matter. This is close to fatal when all they’re dealing with is 10 weeks. A syllabi can help them stay on schedule. Certainly, it would be unreasonable and unfair for them to map out their lectures to the hour. But by placing topics in the order they will be discussed and setting a firm deadline two weeks before, they will not have to lop off the last three topics they had scheduled because they spent too much time on one subject early in the quarter.

On the other hand, students will know what to expect in terms of subject matter, workload and exams. Because every professor has his own methods, students should know exactly what they are getting into. By accepting the syllabi, students accept their obligations and are fully accountable for their performance.

Time flies here. With syllabi, it’s less likely that professors and students will crash and burn.

Equality, not special treatment

Have you ever wanted to be a minority? Probably not, but think about it—it could be lucrative.

But before I go any further, let me make it perfectly clear that I am an unwavering supporter of across-the-board equality. And this explains why I see a problem. We have been trying so hard to make it look like we support equality that we have actually thrown it out the window.

There are a couple of terms that represent this phenomenon. They are reverse discrimination and overcompensation. The first isn’t as serious as the second, for reverse discrimination is the client of overcompensation. Many of the so-called “majority” feel compelled to overcompensate for the plight of the minority by doling out special treatment. But they are simply treating the various races differently, and this brings us right back to the good old names of discrimination. The simple solution is to treat everyone exactly the same. We’ve got to stop looking at our friends as ‘minorities’ of one kind or another. People are people.

Except for a select few social degenerates, we all realize that discrimination is a bad thing. Therefore, we have created many programs designed to benefit the minority and supposedly help him achieve equality. On this campus, there are many such examples, including minority quotas. When such programs are labeled as reverse discrimination, there are those in the “minority” who rise up in defiance, saying that the “majority” must be punished for the hundreds of years of inequality and harsh treatment that have reared into history.

I feel all truly believed in equality, we would do away with such attempts at justice and treat everyone the same. We would not even use the labels “minority” and “majority.”

In reality, minority assistance programs only increase discrimination and animosity between the races. A university can only admit so many students a year, and it sets aside some of these openings for minorities. Many good students are labeled as ‘minorities’ who rise up in defiance, saying that the “majority” must be punished for the hundreds of year of inequality and harsh treatment that have reared into history.

For example, if a hard-minded woman gets the job instead of a man, it is because she is one of the “minority.” If a hard-minded man gets the job instead of a woman, it is because he is one of the “majority.” And if you have a hard time believing that, you are one of the “minority.”

Poly should join ban on styrofoam

Editor — Thank you for commenting on the dangers of chlorofluorocarbons to the Earth’s fragile ozone layer. I have long tried to use ozone-safe practices, but it is hard when campus food services use many cups, plates and trays made of the dreaded styrofoam. I don’t know how much CFC is used to puff up the non-biodegradable substance yearly, but I am quite sure that it numbers into thousands of tons. Our sister campus in Humboldt and U.C. Berkeley have the right idea by banning styrofoam. I am sure that a battle waged on the campuses will stay on our campuses, but it is up to us to exercise our wills and spread the word to our families, friends and other institutions. A national switch to styrofoam to paper products on our campus could be a way to show our determination to change. Decreasing use of styrofoam will generate fewer harmful by-products that inevitably end up in Earth’s air, soil and water. Increasing use of paper products can create more jobs in local printing and papermaking industries. Besides, humus is a renewable resource, where styrofoam (who knows what’s made of?) is not.

Granted paper is probably more expensive, but I gladly pay more for the peace of mind that use of biodegradable paper products would bring. I’m not suggesting midnight raids on the food services by radical Styrofoam Busters, but action by us on the leading edge of society could figure prominently in our future and bring an end to the stereotyping of policies. If it is recyclable, I figure all the styrofoam left in the U.S. will be converted to bricks and will not come up with so much as a minor minority. But what if “minority” is because we see Scott as a qualified human being, not as a black woman? We can only hope.

Stanislaus rapist ends parole; victim says fear is revived

SAN FRANCISCO (AP) — Today, a 60-year-old man who has spent eight years in prison has finished his parole, paying in full his legal debt. But Lawrence Singleton and the young woman he raped and savagely mutilated are likely to always be haunted by the case.

"I never live in the past," Singleton said in a recent television interview. But he continually argues that he was innocent.

"I'll never get over this," said Mary Vincent, whose body is a lifelong reminder of the terror she endured on Sept. 29, 1978, when Singleton hacked off her forearms with an ax and left her for dead in Stanislaus County.

Vincent, who lives in seclusion in the Pacific Northwest, has said in published interviews that her fear has been revived by Singleton's impending freedom. Parole officials and friends, worried by public fear and hatred, are concerned about Singleton's safety wherever he tries to settle.

Singleton was sentenced to 14 years and four months in prison. He was released early last April on a year's parole because of good behavior and work credits.

He is free today.

LA workers uncover remains of woman killed 14 years ago

LOS ANGELES (AP) — A skeleton found by construction workers shoring up the foundation of a house was identified as the remains of 30-year-old woman who was stabbed to death about 14 years ago, police said.

Detectives identified the victim as Adrianne Piriano last week, said Lt. Ross Moen. The skeleton was discovered Dec. 19, buried under concrete.

The woman was slain more than a decade ago, when the Venice Beach neighborhood was a haven for drug addicts, derelicts and other miscreants.

Clues that aided officers included a blue-and-green cigarette pack that was only distributed in 1974 and 1975. Property records from those years led police to a previous owner of the house, who had lived with the victim.

Another clue was the life-like mask produced after cement had been poured on the woman's face when she was buried. The mask preserved her facial features and some of her fingerprints.

Composite drawings of the death mask were distributed to the news media, and people claiming to know Piriano came forward.

Thousands of Japanese rally against nuclear plant power

TOKYO (AP) — Buddhist priests rang gongs and housewives marched with their babies as thousands rallied against nuclear plant power.

Police said more than 6,200 people joined the rally at a downtown park and the march through Tokyo's Ginza district, but organizers estimated the crowd at 20,000.

The sponsors said it was one of the largest anti-nuclear power demonstrations ever held in Japan.

Buddhist priests and members rang gongs. Other protesters included members of environmental, consumer and parents' groups.

At the rally in downtown Hibiya Park, children staged a drama showing ways of stopping nuclear power plants.

The crowd cheered when speakers denounced a recent U.S.-Japan nuclear agreement that they said will allow Japan to refine and transport plutonium.

Some demonstrators were signs reading "Protect our children" and "Don't repeat Chernobyl," referring to the nuclear power plant accident in the Soviet Union nearly two years ago.

IT'S SECRETARY'S WEEK!

Your secretary's desk is dreary, filled with memos, typos, and assorted burdens. Why not brighten that desk this week with flowers from the Campus Store to show your appreciation.

Your secretary deserves it!

"It's Our Style to Wait Awhile," a logo designed by engineering major and student senator Andy Herrick, is printed over a CAR study list showing a graduating senior named Warren Baker as getting a total of 0.0 units in classes such as History 315, English 253 and Philosophy 125.

The board sees the satirical T-shirts as damaging to the theme and meaning of Poly Royal.

"We have unwritten laws which clubs abide to," said Poly Royal publicist Scott Hublou. Using the theme style as it is on the posters was never a problem because clubs knew they couldn't use it, he said.

Herrick's design is not a firing representation of Poly Royal, Hublou said, adding that Poly Royal should remain a classy organization. The board did not have a specific problem with the T-shirts this year, they will be forced to get a copyright on all future themes.

That would cost an added $2,200 plus time delays, a cost which would be absorbed by clubs who pay to have booths, Hublou said.

Herrick, who has consulted an attorney, said his intent was not to undermine Poly Royal, but to make a statement.

"A lot of people spend more than four years to get a degree because they have to wait," Herrick said. "They have to wait for the university to hire professors to teach more classes, they have to wait for more buildings to be built to hold more classes ...

"Poly Royal has become more of a fund-raiser for clubs," Herrick said. "The real meaning has been glossed over in all of that. I'm kind of frustrated with CAR and Poly Royal, I decided to take all those things and put them in a satirical form that's protected under the First Amendment."

Poly Royal Superintendent Bob Olshausen, after talking with university attorneys, said the board has no legal recourse because there is no copyright on "It's Our Style" design theme.

"Getting a copyright is something we don't want to do," the board threatened a lawsuit if he distributed the shirts before Poly Royal and not on or near campus.

Herrick said the Poly Royal board threatened a lawsuit if he distributed the shirts, but to give them away with donations after Poly Royal and not on or near campus.

Herrick, whose design was denied by the committee, had 100 "It's Our Style to Wait Awhile" T-shirts printed by a local shirt company. He said he agreed not to sell the shirts, but to give them away with donations after Poly Royal and not on or near campus.

Olshausen denied the threat. Judy Philbin, ASI information director, said a lawsuit was a possible alternative discussed by Olshausen.

"Some people on the board were upset," Philbin said. "They talked about everything possible (to stop the selling of the shirts).

"The question is if (Herrick's design) is so loosely used that it falls under satire. No one knows if the design falls under copyright."

Olshausen said the board is concerned about what will happen with the theme logo next year if its misuse is left alone. "We have to scrutinize these things," Olshausen said. "It's opened a Pandora's box."

Copyrighting future designs could cost $2,200, which would be absorbed by participating Poly Royal clubs.

"This year we've tried to decentralize and decommercialize Poly Royal," Olshausen said. "Our main emphasis was to push the exhibits ... to emphasize them and de-emphasize the booths." The shirt represents a negative statement about Poly Royal, he said.

In order for a club to use the Poly Royal theme logo in a design of its own, a sketch must be brought before the board's commercialization committee for approval. Only one club per year is approved to use the design in each form, meaning shirts, buttons, etc.

If 10 people used the logo, it would lose its value and become just another commercialized design, Olshausen said.

Herrick, whose design was denied by the committee, had 100 "It's Our Style to Wait Awhile" T-shirts printed by a local shirt company. He said he agreed not to sell the shirts, but to give them away with donations after Poly Royal and not on or near campus.

Herrick denied the threat. Judy Philbin, ASI information director, said a lawsuit was a possible alternative discussed by Olshausen.

"Some people on the board were upset," Philbin said. "They talked about everything possible (to stop the selling of the shirts).

"The question is if (Herrick's design) is so loosely used that it falls under satire. No one knows if the design falls under copyright."

Women take top spots at home meet

By Diane Wright

Several Cal Poly men's track team members had top finishes as the nine-team Poly Royal Invitational Saturday.

Head coach Tom Henderson called Chris Craig's performance the first time he had broken 3:50. Craig finished first with a time of 3:49.45.

Craig's time qualifies him for nationals. The Mustangs played for more than two hours, trying about 120 plays. Assistant coach Bill Macdermot said he was pleased with the way the team performed, on both sides of the ball. Here, defensive tackle John Fassett stops running back Jim Mains countered in the second, scoring two runs off an error by the third baseman. The Mustangs pitched Keith Chura went the distance, giving up seven scattered hits. Chura is now 6.3 overall, 4.1 in league.

In the first game Saturday, the Mustangs blew away Northridge, 15-5.

But in the eighth inning, the game was blown wide open as the Mustangs rallied to score nine more.

Women take top spots at home meet

By Kelly Cummins

While a portion of Cal Poly's women's track team went to Southern California to compete, the base of the squad stayed to compete against six universities during the sixth annual Poly Royal Invitational Saturday.

The Mustangs faced stiff competition from UC Santa Barbara, Occidental College, UC Irvine.

WOMEN'S TRACK

Davis, Sonoma State and Army

Concerning the team's performance, Tom Henderson, meet director and Cal Poly men's track head coach, said, "The level of competition here (Poly Royal Invitational) is good for them. It can give them the chance they need."

The team took that "chance" and turned it into an opportunity. One such athlete was freshman Karen Lawson who won both the long jump, with a leap of 18-8, and the 100-meter dash, with a time of 12.4. "Sure, I'm pleased with my performance," said Lawson. "I like bigger meets, and I do better."

Another top competitor was Hana Novak who placed second in two events. Novak broke her personal record in the 100-meter hurdles.

Baseball chalks up 2, drops 1 to Matadors

The Cal Poly baseball team is still alive in the CCAA Division II race after taking two of three games from league rival Cal State Northridge at home over the weekend.

The weekend outcome boosts Cal Poly’s league record to 10-11, and its overall record to 21-23.

Cal Poly had Friday’s 3-1 win wrapped up early. The team took a 2-0 lead in the first inning when Pat Kirby doubled to knock in one, and Gary Renko singled to score Kirby.

The Mustangs added one more in the fifth as Chris Vodanovich was hit by a pitch and Todd Rice singled to bring him home.

Northridge managed to score once in the eighth, and that was all the team could produce.

Saturday’s pitcher Keith Chura went the distance, giving up seven scattered hits. Chura is now 6.3 overall, 4.1 in league.

In the first game Saturday, the Mustangs blew away Northridge, 15-5.

The game was tight for the majority of the game, as the Mustangs led 1-0 after scoring three runs off an error by the third baseman. The final score: Cal Poly 3, Northridge 1.

In the second game, Northridge squeezed by Cal Poly, 6-5, over a couple of foot faults in the seventh inning.

The Mustangs led 3-2 going into the seventh inning. Cal Poly then scored three more in the seventh inning to make 6-2.

But in the eighth inning, the game was blown wide open as the Mustangs rallied to score nine more.

See BASEBALL, page 9

Cal Poly's Melissa White won the discus event.
SOFTBALL

From page 5

Top hitters for the Mustangs were Mackey, hitting 3 for 3 and scoring three runs, and Michelle Gardiner, who went 2 for 3 and added two runs. Even with five freshmen and three sophomore starters, Cal Poly's softball team is ranked ninth in the nation. "This was a big win for us," said Heidesch-Zoller, adding that her young players are "really coming together at the right time."

In the second game against the Panthers, the Lady Mustangs played tough, and pulled out a 1-win victory.

Laura Fawcett pitched the shutout for Cal Poly, giving up only five hits.

With runners on first and second base in the third inning, Kathy Jones hit a single to left field bringing in the lone run for the Mustangs.

The team will travel to Sacramento Thursday for a tournament.

SUMMER JOBS...
And Much More!

When is a summer job a summer job and then some?

When it could lead to permanent employment, management training and an unparalleled career opportunity with the world's largest grower/processor of peaches, plums and nectarines for fresh market, that's when Gerawan Company says "grossen" currently has openings for Production Manager Interns to work at our state of the art fresh processing facility. Our modern plant and cold storage facilities are located at the base of the Sierra foothills in Reedley, California, twenty miles south-east of Fresno.

If you're interested in working in the high-tech, automated world of modern fresh fruit processing,

Gerawan Company can offer you some enticing rewards. For starters, we'll pay you a salary of $1,600 a month. And, for the duration of your summer job, we'll pay apartment rent and utilities. Plus, you'll have the opportunity to work directly with our world-class automated processing and packaging equipment, under the supervision of our world-class production-line team. You'll earn and you'll learn!

If this sounds good to you,

here are the qualifications we're looking for. You must have a major in one of the following: IE, IT, POM, MGT, AM/AE, ALLENG, and have a graduation date not later than June 1989. Start with us? OK! We'll fit for campus-interviewing on April 28th and 29th and we'd like to talk with you. To sign up, or get more information, please see the college placement office. THIS summer job could be YOUR opportunity knocking.

GERAWAN CO. INC.

Crew teams win 5 of 14 in Poly Royal Regatta

Women's varsity 4-person team wins by 42 seconds

By Neil Farrell
Staff Writer

The Cal Poly men's and women's crew teams took it on the chin Saturday, winning just five of 14 races against UC Santa Barbara at the first Poly Royal Regatta in Morro Bay.

The Mustangs were paced by the women's varsity heavyweight four-person crew that whipped its UCSB rivals by 42 seconds. That race — held early in the day, before the wind picked up — showed the strength of the veteran crew of Sonya Veldhuis, Jennifer Lenker, Suzanne Kehoe, Tracy Fletcher and coxwain Dominique Le Blanc, who drove her crew on with a bellowing voice.

Cal Poly's women's novice lightweight eight-person crew won its race, turning a close contest into a rout. The Mustangs pulled away at the end to post an eight-second victory and take home the medals. That team of Eileen Madden, Tammy Norman, Megan Purcell, Karen Dill, Megan Purcell, Karen Dill, Tenaya TaVelle, Ili/ Erwin, Taura Schillting, Amy Alessandrini and coxwain Malien Yen put on a spirited and determined effort that was greatly appreciated by the onlookers stretched along Morro Bay's Embarcadero.

The women's mixed novice eight-person B crew took one of two very tight races on the day with a two-second victory over UCSB on the 2,000-meter course. That team of Erin Looney, Johanna Main, Susan Kirk, Lisa Warren, Karen Tindall, Kristin Kacskovics, Kelly Lawler, Maria Schied and coxwain Shannon Crane were elated at the victory.

The other tight race resulted in a loss for the women's varsity lightweight eight-person crew as it lost by 1.4 seconds. The race was a dead heat until, with about 100 feet to go, one of Cal Poly's crew dragged an oar, slowing the boat just enough to let UCSB sneak out the victory.

The Poly men's novice heavyweight eight-person crew won its race by five seconds with a time of 6:59, and the men's varsity lightweight four-person crew was awarded a victory when officials ruled that the UCSB boat had interfered several times during the race.

The Mustangs protested the race and UCSB filed a counter-protest. After the regatta, officials and coaches argued the merits of the protests.

The interference occurred at the spot in the course where boats had to turn near a buoy. Cal Poly crew members and coaches argued that the UCSB boat had turned outside of the buoys and cut them off. UCSB coaches argued that their boat had won by 21 seconds — too much of a discrepancy to be justified by interference.

The problem was that race officials didn't follow the boats through the entire course, and turned around to return to the starting line prior to the incident, an official said.

The original interference call was made by an official in a small outboard launch who followed the boats through the second half of the race to the finish line. The UCSB crew team asked for a row-off but officials and Cal Poly declined, and the Mustangs were awarded the victory.

The other tight race resulted in a loss for the women's varsity lightweight eight-person crew as it lost by 1.4 seconds. The race was a dead heat until, with about 100 feet to go, one of Cal Poly's crew dragged an oar, slowing the boat just enough to let UCSB sneak out the victory.

The Poly men's novice heavyweight eight-person crew won its race by five seconds with a time of 6:59, and the men's varsity lightweight four-person crew was awarded a victory when officials ruled that the UCSB boat had interfered several times during the race.

The Mustangs protested the race and UCSB filed a counter-protest. After the regatta, officials and coaches argued the merits of the protests.

The interference occurred at the spot in the course where boats had to turn near a buoy. Cal Poly crew members and coaches argued that the UCSB boat had turned outside of the buoys and cut them off. UCSB coaches argued that their boat had won by 21 seconds — too much of a discrepancy to be justified by interference.

The problem was that race officials didn't follow the boats through the entire course, and turned around to return to the starting line prior to the incident, an official said.

hurdles running 15.04, and in the high jump, she leaped a season best of 5-7.

Novak said she was happy with her performance in the hurdles, "...but I'm disappointed with the high jump. I haven't qualified for nationals, but I do better with better jumpers." The qualifying mark for nationals in the high jump is 5-9.

Henderson said another reason for the outstanding effort was having the meet at home. "It's always exciting to run at home, people seem to run better. We are excited to run for the home crowd."

Kelly Donelson, who placed fifth in the 3,000-meter race with a time of 10:46.80, agreed with Henderson. "It may not be easier, but we have more fun at this meet. A home meet enhances us, because we're relaxed and can have fun."

One top competitor was Buffy Sexton, who placed in three events. She won the shot put with a throw of 41-4-1/4; placed second in the javelin, throwing 125-10; and came in sixth in the discus, throwing 123-8.

Other competitors were able to place in more than one event during the meet. Melissa White had two first-place finishes in the javelin, throwing 138-4, and in the discus, with a throw of 134-10.

Jeannie Paton placed in both hurdle events with a first in the 440-meter hurdles with a time of 65.03 and third in the 100-meter hurdles running 15.25.

Laure Edelbrock also placed in two events with a third in the javelin throwing 125-0 and fourth in the discus throwing 126-2.

In the triple jump, Kami Tarman earned a first place with a jump of 37-9-1/2.

Competitors with second-place finishes were Melanie Hau in the 1,500-meters, running 4:37.3; Charzet Polk in the 100-meter dash with a time of 12.15; and Emily Ethington, throwing the discus 132-11.

Nancy Long placed fourth in the 1,500-meters in the time of 4:49.3.

The team's overall dual meet score is 12-0. Team members have two weeks to qualify for nationals, which will be held May 4-6.

Huber earned second place in the long jump with a distance of 23-2-3/4. Bruce Storms was fourth in the discus throw and fifth in the javelin throw.

Rain early Saturday morning left the field in less than an ideal condition for the hammer throw. "It was just a nightmare," said Henderson. When he arrived at 6 a.m., the center of the field was under water.

Chris Coleman placed fourth in the 110-meter high hurdles at 15.10.

The team's next meet is the conference championships at Cal State Los Angeles.

The Mustangs shot 15 of the last 16 Poly Royal match-ups. The city team scored late in the first half on a penalty kick by Matt Crevin.

The Mustangs shocked SLO by holding the score to 3-0 to late in the second half. But the city team again scored on a penalty kick by Crevin. SLO's then raised its lead to 12-0 when Bob Kelly scored a try, and Crevin made the conversion.

Jeff Thompson, city team member, said both teams played well, but his team has more intensity and experience.

Cal Poly head coach Paul Fritz said if his team was going to win the game, it would have to done with the forward pack, and if they lost, it would be because of SLO's more experienced back line.

Mustang alumni Kevin Jones and Bruce Storms finished second and fourth in the 5,000-meters with times of 14:39.9 and 14:51.1, respectively.

Chris Coleman placed fourth in the 110-meter high hurdles at 15.10.

The team continued tradition Saturday as it defeated the Cal Poly rugby club, 12-0. The city team has now won 13 of the last 16 Poly Royal match-ups.

The city team scored late in the first half on a penalty kick by Matt Crevin.

The Mustangs shocked SLO by holding the score to 3-0 to late in the second half. But the city team again scored on a penalty kick by Crevin. SLO's then raised its lead to 12-0 when Bob Kelly scored a try, and Crevin made the conversion.

Mustang pitcher Lee Hancock was credited with the win, and he struck out nine, walked two and gave up five hits. Bill Crumback came in to relieve in the eighth inning, and gave up a three-run homerun.

But the Mustangs' luck turned on them in the second game, as Northridge went ahead, 3-0, in the first inning, and held onto the lead for the rest of the game. Northridge defeated the Mustangs, 7-5. Cal Poly's Erik Bratlin pitched the whole game and was marked with the loss.

The Mustangs will host conference rival Chapman College Thursday, Friday and Saturday.

Head coach Steve McFarland said the series is important. "The intensity and experience.

SLO rugby outplays Cal Poly club, 12-0

Poly's B team takes 2nd game, 8-4

The San Luis Obispo rugby team continued tradition Saturday as it defeated the Cal Poly rugby club, 12-0. The city team has now won 13 of the last 16 Poly Royal match-ups.

The city team scored late in the first half on a penalty kick by Matt Crevin.

The Mustangs shocked SLO by holding the score to 3-0 to late in the second half. But the city team again scored on a penalty kick by Crevin. SLO's then raised its lead to 12-0 when Bob Kelly scored a try, and Crevin made the conversion.

Cal Poly head coach Paul Fritz said if his team was going to win the game, it would have to done with the forward pack, and if they lost, it would be because of SLO's more experienced back line.

In B team action, Cal Poly defeated SLO, 8-4.

Mustang Mark Hagy scored a try on an overlap run in the first five minutes of the game to give his team a 4-0 lead.

Cal Poly scored again in the second half when Brian Kane broke two tackles and made the try.

The city team scored a try in the second half, but it wasn't enough to take the game.
Police seek suspect in molestation

Ten days after the alleged molestation of a minor in the University Union, investigators are still searching for the suspect, according to Cal Poly Public Safety. The molestation occurred April 15, around 5 p.m.

The suspect was described as a white male, between the ages of 20 and 25, with short dark hair and a mustache. He was wearing a long-sleeved gray sweatshirt, jeans and white tennis shoes.

Further information was withheld due to complications involving a minor.

Investigator Ray Berrett asks that anyone who may have seen a suspicious subject during that time in the U.U., or who has any further information, contact Public Safety.

Loan encourages graduate students to accept faculty positions in CSU

By Marianne Biasotti

Women and minorities now have an edge when seeking a doctorate, in light of a loan program offered by the California State University System.

For the second year, the CSU Forivable Loan/Doctoral Incentive Program for minorities and Women has budgeted $1.5 million out of lottery revenues, with a maximum per person loan of $10,000 a year for three years.

This program, which will support about 60 students this year, was created to give financial assistance to under-represented graduate students in fields which are determined to be of great need to the CSU, said Robert Lucas, associate vice president for Graduate Studies. Areas such as computer science, science, math, engineering and other technical fields will be targeted.

After students receive their degrees, the CSU hopes the program will encourage students to return as full-time CSU faculty members.

Each candidate needs a campus sponsor and an endorsement from a department in his particular field of study. Any unsponsored candidate will be matched up with an interested campus.

Anyone with a bachelor's degree is eligible, but if applicants don't have any contacts within a CSU campus, they can obtain a CSU sponsor through this program.

Preparation for the May 27 deadline is important, stressed Lucas, because faculty need time to consider and recommend the appropriate selection committee, made up of faculty from each school, which makes recommendations which will go to the Chancellor's Office for the final review.

Lucas said that although the sponsoring campus doesn't promise to hire the doctorate students back, there should be a reasonable expectation of a job opening when a fellow faculty member resigns or is refused an applicant. He said this program helps the CSU to attract these students to faculty positions, while other universities and businesses compete for them.

The loan is not contingent on the student pursuing a position in the CSU system.

Bradbury links design, fiction to build utopia

Author says space travel could help guarantee human race immortality

By Meda Freeman

Science fiction author Ray Bradbury's ideas of futuristic cities and space travel earned him a standing ovation Thursday night at Cal Poly.

On the opening night of Bradbury filled Chumash Auditorium to hear the author, whose work includes "Fahrenheit 451," "The Martian Chronicles" and "Something Wicked This Way Comes." The lecture was sponsored by the Design Village Conference of the School of Architecture and Environmental Design.

The legendary author discussed his philosophy on design, which he described as "the first thing we should do before we speak tonight is go blow up half the buildings on this campus," said Bradbury. "These are some of the ugliest buildings I've ever seen in my life."

In addition to Bradbury's literary accomplishments, the author has worked with the Walt Disney company in designing Epcot Center's Space Ship Earth. They have also asked him to design a museum of animation. He created the "Windows on the Future," an interactive exhibition at the new air and space museum in Los Angeles. He has also helped with Mitsubishi to build a museum of animation in Tokyo. Bradbury also contributes articles to Design West magazine.

Bradbury, now 76, started writing at the age of 12, said that his archeological and science fiction interests are closely related. His interests began when he was a child and fell in love with the Buck Rogers comic series, science fiction magazines and walked through the cities of the future at the Chicago World's Fair.

"I could hardly wait to see the Buck Rogers exhibit in the Sunday paper because it was full of architecture, cities of the future, great space ships going into space and dreams of times so far away you couldn't even imagine them," he said.

Bradbury, 67, said he has been successful and has gotten his way when he has "gone over the heads of people," to his initial love — design of the future. And he is pleased with the rule of aesthetic judgment, not to listen to anyone else, after his colleagues made fun of him for his interests.

"I can write myself, from Now on I'm not going to listen to anyone about what I need to survive by, what I need to love," said Bradbury. "My madness has got to be mine. I've never listened to one damn fool since. "It took me years to learn to write short stories correctly. Now I'm writing novels that I'm pleased with. You should take advice that's positive, but it's the negative people, who make fun of you, who laugh at you, who disbelieve in your future. Get them out of your life immediately." He said the United States doesn't promote the idea of space travel enough, and the people at Earth put it in the forefront. The author understands the world there because they're caught up in their bureaucratic. The concept of space travel is not only for military or political purposes but for the immortality of the human race. He warned that Earth may not be around much longer, and "The society's future is in its own hands and their options are limited now."

"It's our choice to take the uphill battle of Earth and put it on the moon and then on Mars and then on Alpha Centauri, so we can live forever," he said.

Bradbury told the audience that it is their job to go out and look at the world and put it in their generation is a living one and has the responsibility to repay and build on the advances of their country. He said the greatest challenge for people is to be "excellent and creative," in designing the cities of the future.

NOTABLES

• Kim Donaher, an agricultural science and technology professor from the College of Agriculture, Manor, will be part of the College of Agriculture panel on the campus the weekend of May 7. Tea agriculture students will join Donaher in the effort.

ful supporter of the co-op education program, said Patricia Howard, assistant director of co-op education program. He made sure they (students) were prepared before they left.

Howard said that even when students left for co-op, they liked to keep in touch with him and he reminded the faculty that he was always interested in students, an exceptional quality to students beyond just math.

He took a special interest in students, the said. He was a big hugger and always excited to see me.

Candi Ewalt, agricultural business major, explained that Warren was a friend and a teacher. "I had a lot of trouble with math," Ewalt said. "I took of time out to convince me that I could do it.

As a friend, Warren was always interested in students, their academic majors. He was a major mathematician.

Pohimeyer.

According to Bob Jones, president of the San Luis Obispo County Land Conservancy, their goal is to "plan a flood control system." They will plan a flood control system.

The report received by the council identified the following aesthetic resources of the creek: set restoration goals for enhancing its biological and scenic values; listed management ob­jectives for recreation, agriculture and flood control; identified conflicts and opportunities; and made a number of specific recommendations.

ACCIDENT

From page 1: 

He was a good influence on students and younger faculty members, who were watching their careers at Cal Poly, said Philip S. Bailey, interim dean of the School of Science and Mathematics. "He was respected and appreciated him." 

In addition to his involvement with co-op, Warren was heavily involved with Kappa Mu Epsilon, an honorary math club.

Warren worked very closely with Jill Terry, math instructor at Atascadero High School. For the past two years, Terry was involved in the math and science achievement workshop put on by Student Academic Services.

For this program, Terry sat through Warren's calculus lec­tures and taught the workshop twice a week.

Terry said that sitting through his class was like learning calculus all over again. "I learned it well, and it could explain it and give pertinent examples," Terry said. "He knew where students were going to have problems, and he told me areas to concentrate on.

"He was a fine gentleman," Bailey said. "He was a good person, and he was always interested in students," she said. "He was a fine gentleman,

Pohimeyer is one of the several students who is planning to stay with grace to keep her company over the next couple of weeks.

Warren's office board was decorated by students with an er­chord and poems that they had left in memory of him.
