It's not just palling 'round

Poly program pairs kids, students; both learn

By Karin Holtz

Roderick Weston is an only child living with his mother, but for at least once a week he has a brother and a father figure all wrapped into one, to play with, talk with and laugh with.

Tom Oertli, a junior human development major, became 6-year-old Roderick's "big brother" through the Poly Pals program, and Roderick Weston is an only child living with his mother, but for at least once a week he has a brother and a father figure all wrapped into one, to play with, talk with and laugh with.

Tom Oertli, a junior human development major, became 6-year-old Roderick's "big brother" through the Poly Pals program, and Roderick Weston is an only child living with his mother, but for at least once a week he has a brother and a father figure all wrapped into one, to play with, talk with and laugh with.

It's something different. You don't think about school or anything else. We just have a lot of fun. You can do all the things you haven't done since you were a little kid.'

— Tom Oertli

Lopez last weekend and Roderick is still laughing about the big waterfight they had and how he escaped the least drenched.

Tom and Roderick liked each other from the first day they met. Roderick said he liked "how we played together ... (Tom) is sort of weird. He's too funny."

Tom said Roderick "has a really good sense of humor. We sometimes just sit and crack each other up for a long time."

Their whole relationship didn't just happen, though.

"I just wanted him to get comfortable with me and me get comfortable with him before I started taking him all over the place," Tom said as they threw handfuls of grass at each other. "It takes a little time to get used to each other."

By Neil Farrell

The electoral race for the 5th District supervisor is heating up and turning into a bout of political name calling.

The chief name caller, James Webber, has been running a negative campaign against incumbent Carl Hysen. Webber is accusing Hysen for supervisor. The 5th District includes the dorms at Cal Poly, approximately 50 percent of San Luis Obispo, Santa Margarita, rural areas to Creston and half of Atascadero.

Posters placed around campus, Webber claims that Hysen believes in:

• Fabricating false and misleading official reports to serve political purposes.
• Firing employees who refuse to engage in such practices.
• Unlawfully purchasing the resignations of county employees in order to establish a political spoils system.
• Usingmeritorious lawsuits against private citizens in order to chill them in the exercise of their constitutional rights.

The poster then says that Hysen "believes in a government of lies, secrecy, intimidation, manipulation, coercion, lawlessness and corruption."

When refused to comment on the accusations, saying that Webber was a disgruntled former county employee who is running a smear campaign.

"I'm not going to defend myself against those charges. He's trying to get me to debate him, and I'm not going to listen to anything he says," Hysen said in a tele­phone interview.

Hysen's campaign manager, Bob Brown of Brown and Clarkson Advertising of San Luis Obispo, said there is no truth to the accusations, and that the situation goes back several years before Hysen was elected.

By Marianne Biasotti

Most students have experienced the ritual at the end of the quarter — filling out faculty evaluation forms once the instructor has left the room.

Ideally, that feedback is returned to instructors with hopes that they will use the information to improve the quality of their teaching and, thus, the quality of education at Cal Poly.

Students are familiar with the various ways to rate instructors and to express whether or not they think the faculty member is totally incompetent, God incarnate, or just plain mediocre.

Almost every department has a different evaluation and the variations have raised questions of fairness and effectiveness.

Students in ASI felt that in some schools, faculty were not being provided with reasonable feedback about the quality of their instruction, explained Charlie Crab, crop science instructor and Academic Senate chair.

ASI proposed a resolution for a new system of evaluations, which passed in the Student Senate, but was rejected in the Academic Senate last month.

This standardized system of evaluations was to be implemented universitywide and used optionally along with the current system. The Student Instructional Report, or SIR, is put out by a professional testing company and consists of 40 standardized multiple-choice questions.

Van Vleck fights for new faculty evaluation system

By Neil Farrell

Fifth District supervisor candidate James Webber told the County Board of Supervisors last week that a growth management plan revealed to the media the previous week by Supervisor Carl Hysen was setting a bad precedent.

In a prepared statement, Webber said that the plan was developed with the help of Director of Planning Paul Crawford, used by Hysen to advance his personal political interests, and paid for by county funds.

"If county staff were in fact directed by the board itself to prepare a growth-management ordinance," Webber said, "then the proper thing to do would be to turn the ordinance as the board's own.

Parking windfall

Call it a $17 million mistake. But also call it an opportunity — a chance for the California State Student Association to exert some power and prove its value. CSSA — get on the ball!

The California Faculty Association alleges the California State University has an extra $17 million in cash reserves in its parking budget. Seventeen million dollars — that's a little more than pocket change. The money could be used to avert the much-disputed parking-fee increase slated for this fall.

The CSU denies the $17 million discrepancy, so the CFA's calling for an audit to determine exactly where the lost revenue? The students.

One of my professors last told us he didn't want to be interrupted while he was lecturing, but that he would answer questions at the end of the period. He would lecture until a minute or two before the end of the period and then say there was some time left to answer questions. Right.

The last minute of class, when everyone is packing up to leave, it's great timing to ask a question. If a student had asked a question, chances are the teacher wouldn't have heard it clearly enough to answer.

Good work on Camp San Luis

Editor — I am proud of the students from architecture, home economics/interior design and landscape architecture who worked to enhance the National Guard's Camp San Luis facilities for the students during the National Collegiate Cycling Championships last weekend. I had the privilege of working with many of the 200 athletes who participated in the event. From them, I heard nothing but praise and thanks for the excellent organization and for all that was done for them. As a result, collegiate cyclists from across the country will come back united in their love for the sport and for Oregon to Maine will not soon forget the weekend they spent here.

Also well deserving of recognition and thank you are the Wheelmen, who raced and placed more than impressive third place, and the club members who gave up their study and sleep time to make sure everyone felt at home. Every bit of work done made the championships more successful than ever imagined.

MARK GALICIA

Cycling success

Editor — I would like to acknowledge Cal Poly Wheelmen President Jeb Thorsburg and Vice President Mike Bittleston on their successful running of the first ever National Collegiate Cycling Championships last weekend. I had the privilege of working with many of the 200 athletes who participated in the event. From them, I heard nothing but praise and thanks for the excellent organization and for all that was done for them. As a result, collegiate cyclists from across the country will come back united in their love for the sport and for Oregon to Maine will not soon forget the weekend they spent here.

Also well deserving of recognition and thank you are the Wheelmen, who raced and placed more than impressive third place, and the club members who gave up their study and sleep time to make sure everyone felt at home. Every bit of work done made the championships more successful than ever imagined.

MARK GALICIA

Bizarre, indeed

Editor — As bizarre as this may seem, I feel that it is my duty as a contributing member of this society to comment on all interested parties, with the intention of reaching one particular person.

I have recently conferred with my astrologer and she informed me of an event that will occur within the next week. This event will involve a local law-enforcement officer who will destroy my car. I will be away — 101 after observing my vehicle be towed about the freeway lanes. This is not a joke. I am offering the officer for the following reasons. He has not been seen in two weeks and is almost over.

There will always be some students who ask questions, but many of us will give if the opportunity. We're not that bad.

Alleged molestation causes yanking of boys' home license

LOS ANGELES (AP) — A minister's alleged child molestation of a 14-year-old runaway prompted state officials to temporarily suspend the license for a boys' group home.

The suspension order by the Department of Social Services contends the Rev. Roger W. Burt molested the boy in 1984, before he secured a license for the Youth Encounter Home in Van Nuys, agency attorney Mark M. Reese said Monday.

Burt, president of the home's parent company, Christian Counseling Association, also was accused in a 17-page complaint of disciplining a boy by handcuffing him to a chair for several hours, Reese said.

The suspension order said Burt failed to notify state authorities that he was arrested in 1986 for investigation of committing a lewd act in public with a male prostitute, the lawyer said.

The lewd conduct charge was reduced to a trespassing violation on April 2, 1987, under a plea bargain struck with prosecutors, Reese said.

Burt was unavailable for comment Monday. The temporary suspension order, issued May 13, prohibits the Youth Encounter Home from caring for boys. It is located about 15 miles northwest of downtown Los Angeles.

The home, licensed in 1985, contracted with Southern California juvenile probation departments to house teenagers with emotional, drug abuse or behavioral problems.

Christian Counseling has until May 31 to appeal the suspension, Reese said. If the home fails to appeal in time, it will automatically lose its license permanently, Reese said. If the home fails to appeal in time, it will automatically lose its license permanently, Reese said.

Under state laws, the alleged molestation would go to the district attorney.

Reese wouldn't say whether information about the alleged molestation would go to the district attorney.

State

State pushes to nab troubled Jersey City school district

TRENTON, N.J. (AP) — State officials began efforts Tuesday to take control of the troubled Jersey City schools, citing rampant political patronage, mismanaged schools and a chronic failure to educate the district's 32,000 students.

It is believed it would be the first time a state has taken over such a large urban district.

Education Commissioner Saul Cooperman said his decision to seek control of the district, New Jersey's second-largest, is based on results of separate, yearlong investigations by independent auditors and state officials.

"Political patronage, union pressure and cronyism is a consistent motivation, at all levels, in the hiring, firing and promoting of staff," Cooperman said in his formal notice of takeover plans.

The auditor's report cites "a state of managerial bankruptcy" in the district and a "disorganized and dysfunctional" administration. Both reports were highly critical of the school district, from the local board of education and top level administrators to school principals.

Assistant Education Commissioner Walter McCarron said the probes revealed an "overwhelming failure" by the district to provide an education to its largely poor, inner-city student population.

Cooperman concluded that district administrators were incapable of properly running the schools or fixing widespread problems.

If Cooperman's tenure of the district is successful, it would mark the first such takeover of such a large urban district, according to the National Governor's Association. The Washington-based group has been monitoring the growing movement by states to obtain more power to take control of districts deemed failures.

Nation

Communist Party may hold Soviet leaders to two terms

MOSCOW (AP) — A ranking official said Tuesday the Communist Party may limit leaders to two five-year terms, ending the perpetual tenure that cements personal power, but he did not indicate it would apply to Mikhail S. Gorbachev.

"This is a big step in the development of intraparty democracy," said Karl Vayo, party chief for the republic of Estonia.

Gorbachev, the Soviet Communist Party general secretary, has said he favors restrictions on tenure. Terms for party leaders now are unlimited and longevity is a tool officials at the local, regional and national levels use to build power and privilege.

Vayo spoke to reporters during a break in the opening-day session of the Supreme Soviet, the national parliament that formally adopts party policy.

Officials announced an agenda focused solely on domestic affairs, indicating the 1,500-member body would not consider the U.S.-Soviet treaty eliminating medium- and shorter-range nuclear weapons.

A joint meeting Monday of the Foreign Affairs commissions of the parliament's two chambers approved the treaty. The Supreme Soviet's Presidium has authority to ratify it, but there was no indication when it would do so.

Both Gorbachev and President Reagan had hoped for ratification by the time their Moscow summit begins Sunday, but the U.S. Senate also has yet to act.

According to Vayo, a meeting Monday of the party Central Committee adopted proposals for consideration at the June 28 party conference, including a limitation on tenure of party officials.

He said other items would exclude certain party jobs from the rule, among them Gorbachev's as national party chief.

World
CFA endorses spending limitation amendment

Association says Prop. 71, not 72
will help gain more school money

By Claire Nickelson

The California Faculty Association is endorsing Proposition 71 and opposing Proposition 72, two issues on the June 7 ballot, in hopes of obtaining more funding for education.

Prop. 71, which amends the Gann limitation initiative on government spending, would allow state and local governments to spend already collected revenues on public services such as health care and education.

The proposition takes population growth into consideration and redefines the adjustment formula using the California Consumer Price Index rather than the National Consumer Price Index. This is important since the National Index average, which includes poorer states such as Mississippi and Tennessee, is much lower than that of California.

The proposition will not call for a tax increase and will allow for increased state appropriations of up to $700 million in 1988-89, according to reports issued by the state Legislative Analyst.

In April the CFA lobbied in Sacramento for Prop. 71 and called for these revenues to be directed toward education.

George Gowgani, who was chairman of the Cal Poly PAC, said earlier, "The money is there, but state law needs to be opened up to allow the increased spending. These extra funds would enable needed educational programs to expand."

"Not only are there problems with enrollment growth but because of the high cost of living in California, it is difficult to attract top-notch teachers at current salaries," explained Dominick Perello, a state representative on the PAC legislative committee.

The CFA is one of the initial proponents of the proposition, while the Farm Bureau, the Chamber of Commerce and Paul Gann, author of the original initiative, remain in opposition. These opponents have said that although the proposition does not initially call for increased taxation, it is the first step toward eventual runaway government spending.

To counter Prop. 71, Gann has poured millions of dollars into Prop. 72, which keeps the government spending limitation intact, while increasing appropriations toward transportation and highway maintenance, roads and mass transit.

Currently these revenues are going towards the state's General Fund that supports education, health care, law enforcement and See PROPOSITIONS, page 7

Local residents rally in Atlanta to be Democratic Party delegates

By Christine Kohn

With hopes to be among those chosen to go to the Democratic National Convention in Atlanta, two San Luis Obispo residents traveled to the Jackson caucus held in Watsonville earlier this month and ran for delegates, including one Cal Poly student.

"It was like a high-school pep rally," said political science senior Ilona Ing. "About 400 people were crowded into the high school auditorium. The 30 people running for delegate were on stage. They campaigned and gave short speeches, and every time one of those people stood up, all of their friends applauded."

Any registered Democrat can run for delegate or go to a caucus and vote in the district. San Luis Obispo is included in the 16th District, which runs up the coast to Monterey.

Ing said the majority of people attending the caucus were Hispanic. "Then there were a very small handful of blacks. Another large group of people from the Santa Cruz area looked like they came out of the '60s — the 'Mother Earth' type, women with no makeup and long skirts."

Others who ran included the first gay mayor to come out of the closet for a major political campaign, a quadriplegic worker who had picked broccoli for 24 years, a boy who grew up run for delegate or go to a caucus and vote in the district. San Luis Obispo is included in the 16th District, which runs up the coast to Monterey.

Ing said the majority of people attending the caucus were Hispanic. "Then there were a very small handful of blacks. Another large group of people from the Santa Cruz area looked like they came out of the '60s — the 'Mother Earth' type, women with no makeup and long skirts."

Others who ran included the first gay mayor to come out of the closet for a major political campaign, a quadriplegic worker who had picked broccoli for 24 years, a boy who grew up

There is a solution.

Allan Hancock College offers Cal Poly students general education courses and courses in their majors that are accepted toward a Cal Poly degree. Don't let the frustration of closed classes stop you from getting the classes you need now. CALL ALLAN HANCOCK COLLEGE TODAY.
Sixty cents each Saturday could help fill a lot of time for a little girl growing up in a small town outside of Bakersfield. It meant all day at the movies and left enough change to buy a bag of popcorn.

And remembering scenes from those movies meant there was something to dream about during the work.

That weekly bag of popcorn and those never-ending dreams did more than fill the time for Cal Poly alumna Buffy Snyder, the costume supervisor for the television series "Moonlighting." It helped her decide what she wanted to do with her life. "Growing up in Delano I had a lot of time to dream and I was always going to the movies," said Snyder, who was on campus last week to talk with theater students. "That was glamour up there, that was big time, that was creative. And I wanted somehow to be involved and I didn't know how.

So she came to Cal Poly. "Polyn has a great motto — 'learn by doing' — and that was what I was interested in," Snyder said. "Coming here I was able to work in the theater department and work hands-on sewing the costumes, hammering the sets and acting.

"I had the privilege of working on all the projects even though I wasn't a theater major," Snyder said.

Snyder graduated from Cal Poly in 1975 with a major in speech communication and a minor in theater arts. After working in different capacities for several productions on campus, Snyder said costumes seemed to fit her best.

"Coming to Cal Poly I saw I could do costumes and that it was an avenue in which I could express my creativity,' Snyder said. "And there's money to be made in film and television. 'It's my job to make them look as good as possible on the screen,' Snyder said. "And remembering scenes from those movies meant there was something to dream about during the work.

Working among some of the most well-known people in film and television hasn't made Snyder forget the childhood dreams that brought her to Hollywood. "There's still a certain awe," Snyder said. "There's a lot of people in this industry I admire.

"But I don't get so tongue-tied as I used to. I had a great mystery about me

The controlled use of color in costumes and set design on the show was developed four years ago when "Moonlighting" began with the idea that it would put the main focus on the acting, Snyder said. But that color look has since become a part of the show.

"It was an amazing concept, really the first of its kind," Snyder said. "And I think what's happened is because it was such a novel concept it's now become a look.

"That's something we never intended it to do," Snyder said. Although Snyder doesn't consider either "Moonlighting" or costuming to be stepping stones in her career, her dream is to produce musical comedy theater.

"It's almost like theater in that the scripts are so up to date, so conversational and so spit of the moment," Snyder said. Even though the current writers' strike has left Snyder without a job, she said it is giving her a chance to talk to producers in theater. "It's also the first time-off she's had in two years. "When 'Moonlighting' finished it took me quite a while to get back into the human race because I was really tired," Snyder said. "So now I'm back.

"I would like to get my hands into the theater right now and pursue it a little bit during 'Moonlighting.' And then after wards, who knows."

"The show's been sold for one more season and once the writers' strike is over, Snyder said it will go back into production. But Snyder thinks this next season will be the show's last. "'Moonlighting' won't go on forever, no matter what people think — it wouldn't. There comes a time when all good things must come to an end."

So she's looking to other projects.

"There's always more avenues and there's always more to do," Snyder said. "Once you see what there is you see how much more there is to do."

Snyder said she also reminds herself not to put limits on what she can do. "It just goes up painting and I think that's a hoot. And now Saks has commissioned me to do a painting. So now I'm a painter."

"I love film, I love good television and I love the theater," she said. "I want to be involved in it all. Is that too much to ask?"

WHY DO MORE CAL POLY STUDENTS CHOOSE TO LIVE AT MUSTANG VILLAGE?

LOCATION - ACROSS THE STREET FROM CAL POLY

LOCATION - 18 ACRES, 2 CREEKS, NATURAL WOODED OPEN SPACE

LOCATION - CONVENIENT TO BANKS, SHOPPING AND RESTAURANTS

Microwave Ovens In Every Apartment

UNIQUE - PRIVATE PARK & BBQ AREA

LARGE - LAWN AREAS WITH BBQ'S

BEAUTIFUL - NATURE WALK/JOGGING PATH (in park and creek)

MODERN - LAUNDRY FACILITIES (5 located throughout complex)

BEST - CLIMATE AREA IN SAN LUIS OBISPO

RESERVED PARKING - (AND GUEST PARKING) ASSURES TENANTS A PLACE TO PARK NEAR CAL POLY AT ALL TIMES

Year Round Heated Pool, Security, Full-time Maintenance. Fully furnished townhouses available from $170/mo. per person. Private studio apartments in a quiet, scenic setting from $370/mo. or $339/mo. on a 12 mo. lease.

Propositions

From the Legislative Analyst.

If Prop. 71 fails and 72 passes, Perello said California schools can expect drastic cuts.

"It will put a severe strain on the current budget," he said. "In the reshuffle of dollars, it would mean a $700 million loss to CSU education and would adversely affect city colleges and the UC system as well."

According to another report, the state finance director has said that $300 million would be taken from the General Fund and directed toward transportation within eight days if Prop. 72 passes.

If both propositions pass, the one that receives the most votes will be put into effect.

DELEGATES

From page 4

and gender, said McGee. "It was nice to see high school and college student activists," she said. Some candidates had hospitality rooms in which they served coffee and doughnuts in an attempt to get to know the voters better, said McGee. All candidates gave a one-minute speech.

Winners included a Monterey County supervisor, an administrative aide to a state senator, the secretary for California's Democratic Party, and a senior activist from Monterey.

From the application process to the voting, each congressional district in the state held a caucus in the same manner.

"It was easy to apply. You simply submitted your application to the Democratic headquarters in Los Angeles or San Francisco," said Ing. "And then you were notified according to which candidate you pledged, whether it's Jackson or Dukakis or (Paul) Simon or (Al) Gore, as to where in your congressional district they were going to have their caucus."

Each person who received the most votes at the caucuses, alternating male and female (the highest vote-getter in their category and the gender sequence) was chosen as a potential delegate and alternate in their district. The 16th District chose five delegates and two alternates for each candidate.

The final determination will be made June 7 at the presidential primaries. At that time, the candidates will be allocated delegates based on the proportions of the actual vote each receives in each congressional district.

Both delegate candidates from San Luis Obispo were not disappointed that they didn't win.

"When I walked into the auditorium, I knew there was no chance," said Ing. "I didn't expect to be elected."

McGee said. "Since San Luis Obispo is located at the very bottom of the district, it's hard to get local people to the caucuses to support you."

Another way to get to the national convention is by being a delegate-at-large.

"The Democrats feel that in order to be properly represented you should have an equal number of men and women at the convention and you should have a proportional amount of lesbians and homosexuals, minorities and physically disabled," said Ing. "So if you fall into any one of those categories, you qualify."

Application deadline to be a delegate-at-large is June 9.

The candidate who takes the slate in the primaries will choose the at-large delegates from the applications submitted. "And most likely they will be the major contributors or moral supporters that will not sway at the national convention," said Ing.

For those considering running for delegate in the next presidential election year, Ing suggests: "Put in your application early. Work very hard for your candidate and take as many friends and supporters to the caucus as possible," she said. "Everybody should go and run as a delegate, or at least go observe and be a part of it. Going to the national convention is something I think you'd always remember."

Programmers

Developing Technology With Talent

We are Unix Software Operations, a Division of Unisys Product and Technology Operations, located in the Southern Orange County communities of Lake Forest and Mission Viejo. Representing the best of Sperry and Burroughs Corporations, we are a world leader in the information systems industry. We are looking for talented recent graduates to join us for outstanding career challenges.

Key Areas of Concentration:

- Operating Systems
- Compilers
- Computer Networks
- Data Base Management Systems
- Application Development Tools
- Qualification of System Software
- Technical Support for System Software

We primarily have openings in the following areas:

Operating Systems

- Resource Management
- I/O Interfaces
- Computer Security
- Operator/User Interfaces
- Operating systems coursework and related project experience highly desirable.

Compiler Development

- All phases of development for compilers and related tools
- Design and development of compiler interfaces to data base systems
- Screen design facility
- Networking system and operating system
- Compiler development courses preferred.

Computer Networks

- Host-to-Host Protocols
- Workstation Integration
- File Transfer Systems
- TCP/IP Networks
- Knowledge of high level protocols preferred.

Transaction Processing

- High performance transaction processing
- High availability systems
- Distributed transaction environments
- Related coursework or project experience desirable.

All candidates must have a BS or MS in Computer Science, Mathematics or Electrical Engineering and, preferably, proficiency in a block structured language such as FORTRAN or Pascal.

We offer highly competitive salaries and a benefits package that is as advanced as our technology. The program is modular and flexible, designed to meet the personal needs of our employees. Option areas include medical, dental, life and long-term disability insurance and tax deferred savings. New employees are immediately eligible for disability income protection, reimbursement accounts and a 401K plan at six months of joining us.

If you have the talent we are seeking and are attracted by our technology, please send your resume (no phone calls, please), to:

Unisys Corporation, Dept. SBAH, 19 Morgan, Irvine, CA 92718. We're an Affirmative Action Employer M/F.
By Shelly Evans

Councilmember Peg Pinard called on Cal Poly to absorb half its student population into campus housing at a public meeting on Monday.

"Being one-half the city’s population is not a normal distribution," Pinard said.

That only drives rental prices up and forces young families to find housing in nearby communities instead of San Luis Obispo, she said.

A follow-up to the March 19 community workshop, "Density and Unit Size," the May 23 meeting discussed issues such as increases in the number of apartment buildings, mandatory open space, up-zoning in areas where the number of students in sorority and fraternity houses will meet zoning population regulations and placing regulations on apartment owners.

Nearly 30 Cal Poly students crowded into the meeting room to hear the council’s discussion.

Cal Poly will never house half of its students, Pinard said. "It’s not realistic. Students don’t want to live on campus past their first year." He noted that since Cal Poly is a dry campus, it doesn’t allow for the "carefree lifestyle of a student."

Doug Gerard, executive dean of Facilities Planning and Operations, said that Cal Poly already has vacancies in the housing it provides for 3,000 students.

There is no demand for on-campus housing, Gerard said. In response to pressure from the Board of Trustees which governs the California State University system, Cal Poly is planning to increase enrollment by 800 students in the next three to four years, Gerard said. A proposed addition of 2,000 students by the turn of the century will boost enrollment to 17,000, he said.

The plan to increase the number of students will have to be approved by the council.

"We’re already bulging," Mayor Ron Dutil said. "Single family.

Political science freshman Tony Leonard won $1,000 from Y-97, a Santa Barbara radio station on Wednesday, May 18. He plans to buy his brother, Joey, a biochemistry senior, a graduation gift.

Will M. Coleman, assistant director of Student Life and Activities, has received the 1988 Women of Achievement Award from the Women’s Council of the University, Coleman, also a published poet and essayist, has been a Cal Poly staff member since 1980.

Jude Lim, industrial engineering sophomore, has been named a Collegiate Scholar All-American by the United States Achievement Academy. Collegiate All-American Collegiate Scholars must earn a 3.30 grade point average and potential problems on the council.

The university wants to work with the city, (with the city) to solve the problems that we both face."
Men’s track team’s national effort brings many honors to Cal Poly

The Cal Poly men’s track team accomplished more than just a fourth-place finish at the NCAA Division I championship track meet last weekend.

• The Mustangs finished ahead of all western and all California Collegiate Athletic Association teams, and were the top athletes from the west in all but one event.
• Eleven of the 12 Cal Poly athletes competing in the meet scored and combined for 15 all-American honors. Four athletes were double all-Americans.
• Of the 12 Mustang athletes, only two were seniors.
• Two school records, one freshman record and eight lifetime bests were set at the meet. Seven additions were made to the Cal Poly all-time top 10 lists.
• Cal Poly has its first national champion since 1983.
• Of the Mustang pole vaulters or distance runners were teams of their own, each would have placed 14th in the meet.

Head coach Tom Henderson said the event was Cal Poly’s best national meet in five years. “It was a perfect meet. Everything went exactly as planned,” he said, adding that the pressure to perform was intense.

Cal Poly’s Steve Horvath is the new national champion in the pole vault. His 17.9 vault was more than a foot higher than the second-place vault, and sets a new school and CCAA record.

Horvath, a junior, attempted to set a meet record and make the 18.2 1/2 Olympic qualifying mark, but missed. He will compete in the NCAA Division I championships in Eugene, Ore., in two weeks.

Cal Poly had two other all-Americans in the pole vault. Sophomore Steve Williams, in a surprise performance, placed second in the competition with his 16.8 3/4 vault. The distance was a personal record.

Mustang Todd Arnott tied for eighth and matched his lifetime best mark of 18.4 3/4 in the pole vault.

In the javelin throw, Cal Poly’s Brant Warren barely qualified for the finals, but then greatly improved his distance to take third place. On his first throw in the finals, Warren set a lifetime best by eight feet and a new school record.

Chris Craig earned two all-American honors by running one of the strangest doubles ever. Craig finished third in the 1,500-meters, and then placed seventh in the 10,000-meters.

Henderson said he doesn’t think anyone has ever run both events successfully at nationals.

Cal Poly’s Mike Livingston was another double all-American with his second-place finish in the 10,000-meters and his seventh-place finish in the 5,000-meters.

Freshman Reggie Johnson was a hot competitor for Cal Poly. Johnson finished sixth in the 400-meters, and his time trial score of 46.59 set a new school freshman record.

Johnson was also awarded all-American honors for his part on Cal Poly’s fourth-place 1,600-meter relay team. The team of Johnson, Mike King, Rudy Huber and Brian Strieff was fourth-tenths of a second out of second place.

Cal Poly’s Michael Miner placed eighth in the 3,000-meter steeplechase.

Counts of bilking investors in mission as an appointee of pointee at large and was not ap­ my head to the Deputy Planning head of the Civil Service Com­ systematically forced out of the said he refused and was admitted to me that he wanted to Webber, Deasey " went over Board of Supervisors. Webber said that Odom was an ap­ to cover up some things." admitted to me that he wanted stating that the Marsh Street Webber ordered architect Webber said that Sorenson with him in exercising his right the $5,000 and asked for an in­ ed that he wouldn't get a fair hearing and to take the money. Listed in the documents provided by Webber is an exchange of memos between Webber and Rogoway. The memos state that the department would cooperate with him in exercising his right of discovery to collect infor­ mation to use in the Civil Service Commission hearing. In subse­ quent letters, the department seems to reverse its position and refuses to provide the requested information, but points out that the documents are available and Webber can look them up himself.

After the Civil Service Commission hearing, Webber learned that Odom was concealing a direct conflict of interest. Alex Madonna, owner of the property adjacent to the Marsh Street Project, figured prominently in the charges Webber made in his request for an investigation, and Odom had represented Madonna on other matters.

Four or five weeks later, Webber said he rebuffed his offer, to pay back the $5,000 and asked for an in­ vestigation of the Marsh Street Project and the Civil Service Commission. The Board of Supervisors, headed by Man­kins, refused to repeat, to Webber said. Mankins said that Webber sign­ ed an agreement to leave the county and was paid to leave.

"He kept the money," Mankins said. "Then he refused to adhere to the agreement and filed a lawsuit to get reinserted." Mankins said that there was nothing to competency allegations made by Webber.

The lawsuit has led to an en­ tertainment of legal battles that includes a libel case against the County Telegraph-Tribune and a suit naming the county, the Board of Supervisors, the Plann­ ing Department, Mankins, Odom, Rogoway and others.

Webber said the county's at­ torneys have used delaying tac­ tics and filed frivolous motions aimed at dragging out the case and that Odom is feeling the fees for the motions.

"The county has based their defense on the notion that it's legal to purchase the resignation of an employee," Webber said. That legal point was referred to a retired judge, Richard Harris. According to Webber, Harris has been reviewing the case, and at times has said that there never was a trial. Harris said he doesn't know what the current situation on the case is, but that he has completed it with it is over and done with. He said he assumes that another judge took over the case after he stopped his involvement two years ago.

"He's too cowardly to render a decision against the county," Webber said. "Precedents and the evidence show that it's illegal to buy off an employee. After four-and-one-half years, don't you think he could reach a deci­sion?"

Webber sent a letter to newly elected Supervisors Hysen in December 1985. That letter, made available to Mustang Dai­ ly, outlined the cases and evidence that Webber said showed the unethical practices and lawlessness carried out by county planning officials.

Webber, in that letter, and a subsequent letter dated March and each was 16, 1986, asked Hysen, as his elected representative to the board, to investigate this matter and do everything in his power to correct the situation.

To this day, Webber said, he has never received an answer from Hysen.

"I think Hysen has an ethical duty in this case," Webber said. "If a member of the Board of Supervisors does nothing to in­ vestigate or correct the matter, they can be considered as co­ conspirators, if they sanction these acts." Webber claims there was never a good-faith investiga­tion by the Board of Supervisors and that Odom has never been con­ tacted by the board concerning any documents he has avail­ able.

County Supervisor Evelyn Delany refused to comment on the charges made by Webber and said that the Board of Super­ visors has been instructed to refer any inquiries about Webber to the County Council. A recep­ tionist in the County Council office said that office does not deal directly with the public or with the press, and that all phone calls by Mustang Daily to the of­ fice were not returned.

Jim Lindholm, of the County Council's office, was named in Webber's original suit against the county.

Webber said he decided in December 1987 to run for super­ visor and try to change the situ­ ation from the inside but that he would not drop his suit against the county. He said he believed the case would be decided before he could tell the county. 'I offered the county a settle­ ment in February of 1983,' Webber said. 'That offer was for reinstatement and back pay. Ac­ cording to Webber the back pay amounted to about $70,000. The county refused the settlement. Webber said that he has made various offers through the years to the county.

"I am never going to drop the case. Back pay alone is over a half a million dollars. That's not money owed to me," Webber said. 'Damages would have to be paid as well. The case could come to $750,000.'

The case is currently on appeal to the Supreme Court. After a summary judgment was re­ quested by Mustang Daily, the case was granted for the individual defendants, but not the county.

Coast Guard finds 45 tons of drugs on S.F. Bay barge

SAN FRANCISCO (AP) — Approximately 15 tons of mari­ juana and 30 tons of hashish were seized and four men were arrested Tuesday after the U.S. Coast Guard boarded a 75-foot supply tug boat pulling a barge into San Francisco Bay. The tug and the barge were seized in one of the largest marijuana seizures in the nation this year. The marijuana was packaged in one-kilos, two-kilos and five-kilos, stacked in cardboard boxes inside welded compart­ ment boats. The Coast Guard and the FBI seized the barge, valued at $162 million, and the tug boat, valued at $2 million.

A three-eights-inch steel plate was used to break into the barge to recover the marijuana packaged in one-kilos, two-kilos and five-kilos, stacked in cardboard boxes inside welded compart­ ment boats. The Coast Guard and the FBI seized the barge, valued at $162 million, and the tug boat, valued at $2 million.

Those arrested included: Calvin Osburn; John Robinson; William Robinson and Wesley Bastin.

they were worried about themselves. "A good professor doesn't have anything to worry about," said Joe Weatherby, a political science professor and Academic Senate member who spoke against the proposed faculty evaluation system, disagreed. "I'm not afraid of doing it because I'm a bad teacher," said Weatherby, who is a two-time recipient of the Outstanding Teacher Award.

"What I objected to was students trying to pursue their own project through the Academic Senate," he said. He said that this is about the fifth time students have tried to improve the faculty evaluations system, but the student turnover makes it hard to maintain consistency on this issue.

Weatherby said the most effective effort by students to evaluate faculty was in the early 1990's when they published a booklet rating faculty who consented to the publication, but after a couple of years the project fizzled out.

The cost of SIR, estimated at about $30,000 for the implementation of the program, was a major concern of the Academic Senate. "It's an awfully expensive system," Weatherby said. "...while a research system on campus could do the job for about $500." He said he is against spending money for extra evaluations when there is not enough money to pay for existing programs.

"I do believe this school is primarily made up of excellent teachers who spend a lot of time teaching... and I think that spending the money to prove it is worth it," said Lee Burgunder, business professor and propagator of a new faculty evaluations system.

"I want more information on what makes me a good teacher... the current system doesn't give me as much as I'd like," he said. In the School of Business, faculty evaluation forms ask, "Why do you like the class/instructor?" Burgunder said not all students fill out these evaluations, as he usually gets about 15 responses out of 50 students. These responses don't give representative feedback, he said, because the comments are usually extreme.
