Student jobs stay despite minimum wage hike

By Karen Williams

Although Cal Poly's budget was not increased for the lowest minimum wage, the number of student jobs available has not decreased, said several Cal Poly sources.

"The money for the university is appropriated by the state legislature," said Thomas C. Harris, director of library affairs at the Chancellor's Office. He said additional funding to Cal Poly would have to be provided by the state legislature and not the Chancellor's office which oversees the 19 CSU campuses.

The increased minimum wage has caused some changes in the types of jobs available to students. There seems to be a larger proportion of work-study jobs, said Ellen Polinsky, coordinator of student employment.

Polinsky said she sees a slight reduction in jobs which are not work study, but not a decrease in total job openings.

"We have more jobs than ever before," said Polinsky, adding that about 700 jobs were listed in the placement center the first two and a half weeks of fall quarter. This is in unusually high number, she said.

She said she has a theory about why jobs have increased when a decrease was expected.

"If an employer is going to pay $4.25 per hour, they may decide to hire a college student instead of a high school student," Polinsky said. Local employers may have decided that college students would be more productive employees.

Rick Ramirez, budget planning director, said cutbacks may have encouraged schools to try for a work study position, rather than a student assistance job. School employers have more of an incentive to create work study positions, because it costs less, he said.

"Work study jobs are financial aid awards," said Ramirez. The federal government pays 70 percent of the salary for a work study position. The remaining 30 percent is paid for by the school's department budget.

An increase in work study positions could greatly lessen the number of student assistant jobs available. The number of student assistant jobs probably has not been significantly increased, said Robert Negranti, staff personnel officer.

A student assistant position is

Catalina:

"With this type of job, you have to keep your head on straight, because you get a lot of rude comments. People can treat you like a prostitute, but you have to keep going because you know you're not."

"Yeah, one time I stepped in a heater vent. There I was in my act, stuck. I kinda laughed and kept going."

Stripper Catalina bares her soul, says she's 'just normal, boring'

By Kelley Cummins

American humorist and illustrator James Thurber once said, "The woman with sex appeal can always make feminine capital out of masculine interest," in reference to provocative dance.

An ad in the Mustang Daily, though not as elegant, says much the same: "Bring him to his knees with a strip-tease." The ad is placed by someone who might know, the Central Coast's infamous stripper, Catalina.

"Strippping isn't as big a deal as it used to be," Catalina nonchalantly said. "In the '50s men and women were really suppressed, kinda laughed and Harriettland. In the '60s and '70s attitudes were to the other direction, which made stripping a direct thing. Soon, I think it will be appreciated in an artistic way."

Appreciated artistically or not, Catalina performs an undisclosed number of shows per week with the norm being bachelor parties. However, she performs in front of a variety of groups, including one birthday party show for a 70-year-old with five generations of his family members present.

Often there is an idea projected by Cal Poly students that San Luis Obispo locals are a little old fashioned or SLO, as the acronym Recreation Center.

"In fact," she continued, "they asked again today what I do for work. I said, 'You know as birthdays and little kids have clowns. Well, at big-people parties, they have girls come and do strip-tease.'" The November election bond act on the November ballot.

"The situation could become critical," said Toni Celebrini, chairman of the University Voter Participation Committee. "The November election bond act on the November ballot..."

"If everybody voted it would be such a perfect representation of what everybody wanted."

"If you look at the voter registration deadline of Oct. 11 is to get as many people registered as possible. She said she would prefer they register in San Luis Obispo County, as opposed to having them vote by absentee ballot.

"Where you live and where you vote."

Proposition 78 will decide Recreation Center's fate

By Suzy Wallace

The future of the proposed Recreational Sports Physical Education Center is dependent on a bond act on the November ballot.

Proposition 78, a bond act dealing with California University building projects, will determine if the state funds required for the construction of half of the Rec Center will be available.

"If the bond does not pass, the project will go back to the University Executive Committee and then the Student Senate, who will then decide where to go with the project."

Also, the project would probably continue on the present course for awhile until the Chancellor helps determine a decision about the student funding," Celebrini said.

Current fundraising efforts will continue to complete the building in July in time for the new Student Gym and the Health Center.

Ground breaking is scheduled for August 1989 and right now the architect is working on the plans for the outside of the building.

When completed, the new Recreation Center will be open seven days a week until midnight with expanded recreation programs specifically designed for students.
Editor — I am impressed by the sheer number of citations issued by local law enforcers. It seems obvious to me that we are not being punished for quantity rather than quality of law enforcement. It is easier to cite “bicyclists breaking the laws” than it is to cite drivers violating the rights of cyclists. These violations are harder to spot, especially if you’re looking around waiting for bikes to run stop signs) but are just as prevalent as biking violations. Those of us who ride bikes are well aware of which of our rights are violated, and those who drive don’t know what I’m talking about. It is reassuring to know I live in a safe town even when police can’t “focus their patrols” on drivers. I won’t know what I’m talking about for some time. The solution in Conway’s article about the “Bike Citation month” rather than Public Safety is trying to punish people for their lack of knowledge of which of our rights are violated. I can’t understand why Public Safety is not more concerned about the Wow program. I have seen positive changes in the Wow counselors and students who received tickets for parking in staff lots over WOW. Since parking regulations are normally not enforced while school is not in session, many counselors and new students packed in the staff lots near the Music Building. That was the closest spot to where most WOW groups met and got organized. I received a ticket for parking in a staff lot, took the ticket off my windshield, then remembered that I drive a U-U. In my rush, I forgot to put the ticket back in, and in the 10 minutes I was consumed with my ticket. I received this letter and asked an explanation for sustaining the ticket. State

Report depicts LA earthquake worse than ‘the big one’

LOS ANGELES (AP) — A major earthquake beneath the metropolitan area would trigger raging fires, collapse buildings, pour oil and sewage into harbors and knock out many hospital beds and utilities — a disaster worse than “the Big One” on the San Andreas Fault, a new state report says.

A quake measuring 7 on the Richter scale on the Newport-Inglewood Fault Zone “poses one of the greatest hazards to life and property in the nation,” California’s Division of Mines and Geology said in the disaster scenario report issued Tuesday.

The fault zone stretches 45 miles through the urban area, from near Beverly Hills through Long Beach to Laguna Beach.

The quake would cause much greater damage in metropolitan Los Angeles and Orange counties than a magnitude 8.3 along the more distant San Andreas Fault, said Joseph Ziony, an assistant director of the division’s parent agency, the Department of Conservation.

The fault zone caused the 6.3-magnitude Long Beach earthquake in 1933, killing 115 people and injuring hundreds. Scientists don’t know how often big quakes occur on the fault, but believe a magnitude 7 is possible.

“There is no evidence this earthquake will occur in the near future,” Ziony said. “We’re providing this scenario as a worst case for the LA Basin so that officials can develop the best possible emergency response plans.”

The report predicts one-third of the 43,000 hospital beds in Los Angeles and Orange counties would be unusable after the quake.

It doesn’t estimate casualties, but cites a 1981 federal study indicating a magnitude-7.5 quake could kill up to 21,000 people, hospitalize up to 84,000 and injure another 630,000 less severely.

Shaking capable of damaging ordinary buildings and partly collapsing brick structures would occur on loose sediments throughout the basin, east to Montevina, north as far as San Fernando and south to San Juan Capistrano, said the report written by senior seismologist Tousson Topposada and others.

San Fernando and San Juan Capistrano are about 80 air miles apart. There are 362 area hospitals. Those areas are the Los Angeles-Long Beach harbor area — where ground may turn to quicksand — the 1.25-mile-wide fault zone itself, and landslide-prone areas of the Santa Monica Mountains and Palos Verdes Hills.

“A major fire rages for several days at one of the refineries in the Carson-Wilmington area,” the report said. “Fires occur in the harbor area; these and ruptured oil storage facilities pose the threat of a major fire.”

Seawage treatment would be halted at Los Angeles County’s main plants and 115 people and injuring hundreds. Scientists don’t know how often big quakes occur on the fault, but believe a magnitude 7 is possible.

“The $10,000 we give the university is a lab for testing the great ideas of the culture,” CSULB President Curtis McCray said. “This issue goes clear back to the Magna Carta. I hope the students use it as a learning experience.”

The university president is remaining neutral on the issue, but thinks the debate itself is valuable educationally.

“Without taking a position myself, I think it’s interesting that the university is a lab for testing the great ideas of the culture.” CSULB President Curtis McCray said. “This issue goes clear back to the Magna Carta. I hope the students use it as a learning experience.”

“It’s an unsolvable alliance that invites this kind of thing to occur,” said Cunningham, adding that the editor exercised poor judgment and the student government overreacted.

“If the politicians didn’t want to pay for a student newspaper, this wasn’t the time to make the decision. What they did was to make it very clearly a First Amendment issue,” said Cunningham.

CSULB journalism professor Ben Cunningham said there is friction whenever campus papers are funded by student fees.
VOTER

From page 1 should be involved ... is where you're spending your nights," she said.

Last year about 75 to 85 percent of Cal Poly students were registered to vote, James said.

From Oct. 11 to election day on Nov. 8, she plans to use ASI resources, such as the various campus clubs, to spread information about how to vote, to explain the issues and motivate students.

"So many people are fighting for the right to vote, and we have this opportunity," she said. "Let's use your right."

Students who want to register to vote can do so until Oct. 11 from 9 a.m. to 3 p.m. in the University Union Plaza.

Shuttle only suffers 'some normal dings' during its flight

EDWARDS AIR FORCE BASE, Calif. (AP) — After losing some heat-shield tiles while orbiting Earth nearly 65 times, Discovery, the space shuttle garage where it gets serviced for a piggyback jet ride home to its Florida launch site,

"The crews are working, and they will work round the clock until the orbiter leaves," said, "We're not entirely innocent in this," Peck said, acknowledg-

The lost tiles posed no hazard because they weren't on part of the shuttle where heat is most intense during re-entry, he added.

Ayers said the other tile flaws "are nicks from dirt particles on the laked." The same device is a red-painted steel trusswork structure, in which the 193,000-pound orbiter is serviced, then hoisted 60 feet and placed atop a modified Boeing 747 jet that will fly it back to Cape Canaveral, Fla.

Tasks to prepare Discovery for the trip home include decontaminating fuel cells, photographing tile damage and replacing missing tiles, purging main engines and orbital maneuvering engines, and attaching locks to prevent control flaps from fluttering during the piggyback flight.

Discovery's next mission is scheduled to start in about a month, after Atlantis' planned Nov. 17 liftoff with a classified Defense Department payload. On its five-day February flight, Discovery will deploy another TDRS communications satellite, the same type it placed in orbit last Thursday.

Ayers said the shuttle took 7,451 feet to slow down at an altitude of 39,337 feet before it landed at 9:37 a.m. PDT Monday.

After hours of initial work on the laked, a vehicle towed the Discovery, and a crane brought it down to the area where NASA workers began servicing work.

Some of the first efforts included removing experiments from the shuttle and shipping them to researchers around the country, Ayers said.

Some groups have much less representation

By Christine C. Temple
Staff Writer

Enrollment of cross-cultural students is a primary concern of many college campuses. However, the number of faculty to represent these students has remained an uphill battle for Cal Poly.

Throughout the years, racial differences have stifled the progress of many societies. The 1980's mark a definite time of reform as women, minorities and ideology have both played a role in altering the old ways of thinking.

When the term minority is used it is in reference to anyone who does not have a majority. For instance, a white male is a minority in the Child and Family Development Department. Minorities are not necessarily underrepresented in society or on any level represented.

Groups of people that have fewer numbers of representatives are coined underrepresented. These are ethnic groups such as blacks, Hispanics, Pacific Islanders and American Indians. Groups of people that may have more representation that others are referred to as overrepresented. The majority of the American population belongs to this category.

The increase in numbers of underrepresented students at Cal Poly over the last few years has been minute. There were 200 blacks in 1986 and only 226 in 1987. With the largest increase, Hispanic students numbered 947 in 1986 and 1,096 in 1987.

The number of Pacific Islanders decreased from 72 to 69 from 1986 to 1987. And the number of American Indian students decreased from 142 to 136 in the one year period.

The small percentage of underrepresented students at Cal Poly is only outdone by the small percentage of faculty positions held by underrepresented scholars.

There are currently 163 underrepresented faculty and staff members at Cal Poly. This is compared to the 14 percent of all underrepresented faculty positions held in the California State University System.

Cal Poly’s Affirmative Action Coordinator, Smiley Wilkins, said it is very difficult for students of non-white faculty.

"We don't just compete with industries, but other institutions," said Wilkins.

Wilkins recalled a recent incident when a black woman with a doctorate in business was offered a position at Cal Poly. Despite a top-scale salary offer, another institution was able to entice her with a more appealing package.

Although San Luis Obispo has much to offer, the exposure to entertainment, the arts and other cultural events is limited in a smaller community.

Wilkins said he feels it is a possibility that different ethnic groups might be restricted in their social life.

Without a common group to relate to during school and private time, working in San Luis Obispo may be undesirable, he continued. The transition may be too great a price for a desired employee, he said.

To locate possible candidates, the Affirmative Action staff coordinates with facilitators within each department of the school. Colleagues are contacted all over the country, creating networks to seek out qualified minorities.

Training programs for the facilitators and managers are held to improve the odds of finding staff members.

There are no government or administrative incentives to increase the numbers of minorities at Cal Poly, said Frank Lebens, associated vice president for Academic Affairs. Ultimately, each department is responsible for increasing educational equity, he said.

Lebens, said that policy in that area is not mandated from the top down.

"You stand a strong risk of internal resistance," he commented. If the applicant makes a commitment, Lebens said they would extend the criteria beyond the usual.

According to Lebens, it is a top priority to expand learning opportunities for students, as well as economic opportunities for underrepresented scholars.

Wilkins said that a black woman with a doctorate in high demand, and that sometimes Cal Poly simply cannot offer the same benefits that other schools can.

According to Lebens, it is a top priority to expand learning opportunities for students, as well as economic opportunities for underrepresented scholars.

“Ought weight should be given to the underrepresented,” he said.

In 1964-65 more than 400 students from groups considered to be underrepresented, were enrolled at Cal Poly. The 1960s marked the beginning of the movement against segregation in all levels of society, be achieved."

The report revealed that while there had been a redistribution within the ranks, the number of professors increased by 222 and the number of both associate and assistant professors declined by 213 from 1977-79.

The representation of women and minorities had increased or stayed the same, and the proportion of white males and Native American females slowed down during these years.

The largest growth for women and minorities was at the associate professor rank, where the percentage of women increased by 3% and minorities by 2%.

The commission addressed the underutilization of minorities by implementing Affirmative Action Programs throughout the state.

Affirmative Action directors were responsible for coordinating efforts among institutions and private industry to increase the number of minorities in professional positions.

Equal opportunity is a two-fold program.

With educated scholars from numerous ethnic origins, students alike will seek out Cal Poly. And the students currently enrolled can have the opportunity to grow in many more ways than education once prescribed.

"For only through the proper development and training of the talent that lies latent in all levels of society will the true equality of opportunity and that core of the democratic idea, an upper mobile society, be achieved."

-- Frank H. Blackington III
Drugs soil athletes’ image

By Lisa Parsons

Sports project an image of health and fairness into the minds of most people but with the injection of steroids into the sportsworld the heroic vision of athletes is being tarnished.

Athletes have observed that steroids will increase lean body mass, strength and aggressiveness in people who are already physically developed. What athletes tend to overlook are the possible harmful side effects of steroids.

There are many minor side effects to steroids such as sleep disturbance, acne, and premature baldness. Serious side effects can include cholesterol imbalance, liver tumors, hepatitis and heart attacks.

Tim Gibbons, a local weightlifter, suffered a heart attack at age 21 from steroids. He says he took, "too many and too much over too long a period of time." Two years later, Gibbons is back on the drugs. "I'm doing it safely now. You can't make it without them."

Gibbons seems unconcerned about possible drug testing, "They don't drug test unless it's a really big show and anyway, there are many ways to get around drug tests."

A health center physician, Dr. David Zarek, said that one of the ways to get around drug testing used to be diuretics. "Diuretics flush the steroids out of the systems. That’s why they have become illegal in international competition also."

Steroid usage has been compared to cocaine addiction. "The athlete's body adjusts to a low dose of steroids and higher doses are required to obtain the desired effect," said Dr. Zarek.

Although Cal Poly football player Cornell Williams does not use steroids, he commented on their availability. "Steroids are just like dope," he said. "If you need it, there's someone out there to get it for you."

Williams does not believe in "popping roids" because he says, "the risks aren't worth it. If you do the work in the weightroom, the effect is the same. It just takes more time."

The widespread use of steroids in sports is being blamed on big business. The pressure to win and get sponsors pushes athletes to the point where they will do anything to win, including putting their bodies at risk. "People feel they gotta have that edge," said Williams.
The athletic challenge of the piano

By Terry Lightfoot

Like that of a marathon runner, his quest for success is a lonely one.

He spends hours in solitude perfecting his skills, honing his instincts.

Steven Mayer exemplifies the basic athletic persona, drive, commitment and infinitesimal fortitude.

to look at a Macintosh today, here's another:

Right now, you have three chances to win one of Sony's Discman® CD players—including the exciting Sony Pocket Discman, which also plays the new 3-inch CDs. And even if you miss out on the CD player, you may still win one of 15 Apple T-shirts. No strings attached—just fill out a registration form at the location listed below.

So come in and get your hands on a Macintosh. If not for yourself, do it for your folks.

The power to be your best.

It's all opinion," he said. "Two people can be great but only one can get the job."

Mayer said that he is obligated to turn people on to music.

"If I can get one person to get interested in my music then I feel like I've done my job," he explained.

Amateur athletes have their Olympics and pro teams have the Super Bowl and World Series.

On October 19, while the stage is being set for baseball's Fall Classic, Mayer will command the attention of 3200 people at center stage Carnegie Hall.

"That will be my World Series."
Interview Sign-Up and Information Day

Wednesday, October 12

- meet with Hughes
- Student Union-Room 220
- bring 5 resumes

Make a date to get to know us on October 12th. Drop by between 9:00am and 3:00pm and we'll tell you what's on the horizon at Hughes Aircraft Company, and we'll answer any questions you may have.

Meet representatives from our different organizations and present your resume to those that interest you.

Interviews will be scheduled for October 13th.

We're seeking qualified graduates in:
- Electrical Engineering
- Mechanical Engineering
- Computer Science
- Industrial Engineering
- Applied Math
- Physics
- Engineering Technology

We want you to have all the information you need to make one of the most important decisions of your life.

Hughes Aircraft Company is an equal opportunity employer. Proof of U.S. citizenship required for most positions.

Creativity America depends on.

Hostage says he was treated well; grievances for those still held captive

DAMASCUS, Syria (AP) — Indian professor Mithileshwar Singh said Tuesday his kidnappers treated him well during 20 months as a hostage in Lebanon, but there is no substitute for "freedom" and he grieves for those still held.

His release Monday leaves nine Americans and seven other foreigners still in the hands of extremist Moslem kidnappers in Lebanon. Held longest is Terry A. Anderson, chief Middle East correspondent of The Associated Press, who was abducted March 16, 1985.

Singh, a 60-year-old resident alien of the United States, was reunited with his wife, Lalmani, at the U.S. Embassy on Tuesday afternoon. He was freed Monday night in Beirut and driven to Damascus by Syrian army officers, then turned over to U.S. Ambassador Edward Djerejian.

A U.S. Air Force plane arrived to take him to an American military hospital in Wiesbaden, West Germany, for a medical checkup.

"Our plans, depending on logistical arrangements, are to transport him to Wiesbaden for further medical checks and then on to the U.S.," Djerejian said.

He said Singh had asked to be allowed to rest, and "given the circumstances, he is feeling relatively well." A Syrian doctor pronounced him fit to travel.

In New Delhi, the Foreign Ministry said India had worked for Singh's release through contacts "with the Syrian government" and others.

The captive was released to the U.S. ambassador "because of the confusion that still existed" in the Middle East about his nationality, a spokesman said.

India has maintained Singh was kidnapped because his abductors thought he was an American.

Armed men dressed as policemen took Singh hostage Jan. 24, 1987, on the Beirut University College campus in Moslem west Beirut, along with Americans Alann Steen, Robert Polhill and Jesse Turner. A group calling itself Islamic Jihad for the Liberation of Palestine claimed responsibility, and said it freed Singh as a goodwill gesture to the United States.

Nearly all the foreign hostages in Lebanon are believed held by pro-Iranian Shiite Moslem groups.

A U.S. official in Damascus said the Americans decided to accept custody because Singh had applied for citizenship before his abduction.

Singh said Tuesday he felt "wonderful" and added: "Thank God I'm free, but I'm very sorry that my colleagues and friends are still in captivity. I hope they'll be free soon."

Steen, Polhill and Turner were the only hostages he saw while in captivity, Singh said.

Asked about the conditions under which he was held, he said: "The treatment was better than I had expected, but there's no substitute to freedom in this world."

After a few questions, he said: "Please. I'm very tired now... Respect my feeling of freedom."

Relatives of hostage wait in vain

SANTA CRUZ, Calif. (AP) — The brother of Alann Steen, a California educator held hostage in Lebanon since Jan. 24, 1987, says he is encouraged by photos in which his brother seems healthier.

"Alann looks better," Bruce Steen said on Monday when relatives gathered at his home following reports his brother might be released.

Steen was reported in April 1987 to be near death, his health "deteriorating day by day despite continuous medication," according to his captors.

The released hostage turned out to be Mithileshwar Singh, 60, who was seized along with Steen by Moslem kidnappers.

"We hear rumors every week, and we try to ignore them," Bruce Steen said. "But this time, we thought Alann would be released. We thought this was it."

Amnesty Int. cites abuses in record high 135 nations

LONDON (AP) — Amnesty International on Wednesday accused a record 135 nations of human rights abuses ranging from the jailing of draft evaders in Western Europe to the massacre of unarmed civilians in Iraq and Sudan.

The international human rights group said the list of offenders in its annual survey was the longest it has published since its establishment in 1961.

Amnesty, which won the Nobel Peace Prize in 1977, recorded abuses last year in more than 80 percent of the 159 U.N. member states.

But it said it was encouraged by the emergence of more than 1,000 human rights groups in recent years and the proliferation of laws to protect prisoners' rights.

"In at least half the countries of the world, people are locked away for speaking their minds, often after trials that are no more than a sham," the 278-page report said.

"In at least a third of the world's nations, men, women and even children are tortured. In scores of countries, governments pursue their goals by kidnapping and murdering their own citizens."

It added: "More than ever before in world history, governments are exposed to the glare of international publicity — the greatest weapon we have."

The report cited the United States, where 25 prisoners were put to death last year, for executing John Brogdon, a man diagnosed as mentally retarded, and Edward Earl Johnson, despite "substantial doubts" about his guilt. Amnesty opposes the death penalty.

In China, more than 200 convicted criminals were put to death, but that represented "only a fraction of the total number of death sentences and executions," it said.

The report said at least 760 political prisoners were executed in 39 countries in 1987 but estimated the number probably was much higher because of secret executions.

It said governments used a variety of methods to deflect criticism, including death squads in Latin America.

It said India, Britain and Israel set up inquiries into human rights abuses that were not made public or that amounted to a whitewash.

"In at least a third of the world's nations, men, women and even children are tortured. In scores of countries, governments pursue their goals by kidnapping and murdering their own citizens."

The report said at least 760 political prisoners were executed in 39 countries in 1987 but estimated the number probably was much higher because of secret executions.

It said governments used a variety of methods to deflect criticism, including death squads in Latin America.

It said India, Britain and Israel set up inquiries into human rights abuses that were not made public or that amounted to a whitewash.

Turkey, Czechoslovakia and East Germany closed channels of information to hide violations, it said, and China, Haiti, Syria and South Africa clamped down on the reporting of abuses by denying prisoners access to lawyers or families.

"Today, even one death can set off waves of anger and protest worldwide... It doesn't always happen but it can," Amnesty said, citing the death in January 1987 of South Korean student Park Chong-Chol. The death sparked widespread protests that resulted in the prosecutions of eight police officers and the resignation of government ministers.

On the other hand, communist North Korea didn't even reply to Amnesty International's questions about legal practices, the report said.

Among other alleged abuses were reports that Sudanese forces massacred hundreds of unarmed Dinka tribespeople; the summary execution by Iraq of hundreds of unarmed Kurds and the disappearance of hundreds of Peruvian farmers seized by government forces.

In Western Europe, Spain was cited for allegedly torturing Basque separatist prisoners, Britain for failing to publish a police inquiry into the killings of six unarmed Irish Republican Army guerrillas in 1982, and France, Italy, Austria, Greece, Malta, Norway and Switzerland for jailing draft objectors.

The report alleged politically motivated killings by government assassins in Brazil, El Salvador and the Philippines.
