Leadership program

Ag group travels abroad

By Greg Colbert

This spring a group of 30 agricultural leaders and staff personnel from California will travel to the Soviet Union, Poland and West Germany to learn more about the culture, art, education and the agricultural future for these countries. The trip is part of the training for a class in the Agricultural Leadership Program, a two-year program designed to bridge the communication gap between urban and rural sectors not only in California, but throughout the world.

Through his continued involvement with the Ag Leadership Program, a two-year program designed to bridge the communication gap between urban and rural sectors not only in California, but throughout the world.

Voting on rec facility this week

By David Eddy

Cal Poly students have an important decision to make this week, whether or not they want to help finance a proposed $10.7 million recreational facility.

Voting on the referendum will be Wednesday and Thursday at polling places throughout the campus.

Funding for the facility is unusual in that it would be come partly from the students and partly from the state. The state would provide $3 million and students would pay the remaining $7.7 million through an increase in the quarterly University fee.

The student U.U. fee would be raised by $3 in the fall quarter of 1986 and an additional $3 in the fall quarter of 1987, for a total increase of $6 per quarter.

If the proposal passes, construction of the recreational facility would start in summer 1988 and would be completed by winter 1989. The construction of a new 25-yard swimming pool, which is included in the proposal, would also begin in summer 1988 and would be completed by winter 1989.

The proposed facility would include a multipurpose gymnasium with space for three full-size basketball courts, six volleyball courts, 12 badminton courts, a 5,000 square-foot weight room with Nautilus equipment, universal machines and free weights; an exercise room with mats for aerobics, martial arts, and wrestling; a gymnastics room; nine racquetball courts; locker rooms and showers; an equipment room; a ticket office for concerts and sporting events; and would be completed by winter 1989.

College Republicans call Daily 'liberal'

Editor — The editorial about Congresswoman Fiedler on campus exemplifies the kind of liberal coverage Mustang Daily gives. The article was a personal attack on the College Republicans on this campus. The article clearly states that having Congresswoman Fiedler on campus was an embarrassment to the College Republicans. If you want to make this a conservative versus liberal issue then I'd like to state that the only embarrassment, besides Mustang Daily, is losing 49 states. Mustang Daily should refrain from making such cheap shots. The action taken by Mustang Daily was very unprofessional. It is really too bad this had to occur. Hopefully this won't happen in the future.

BRETT HABELKERN
ASI Chief of Staff

Student urges 'no' vote on rec center

Editor — If you don't intend to vote Wednesday and Thursday be advised that the people who do vote are interested in recreational sports and music concerts. This is an issue that goes beyond mere entertain- ment. It is a question of economic priorities. San Luis Obispo has an excellent array of recreational facilities, night spots and natural scenic wonders open to the general public.

Would the additional $93 fee ($31 for three quarters) be better spent on books and educational materials or spent on concert space for the indulgence and stupification of rock fans? Could the scheduling difficulties be resolved by the use of the Cal Poly Theatre or off-campus sites (the Ven-Hall)?

Would the $93 fee be better spent on five units to expedite completion of one's college career (isn't that why one is here?) or spent on indispensable diversions at optimum times?

Shouldn't we make the existing facilities accessible to the disabled people and Is one of the largest and well respected College Clubs in the state. I'd like to encourage the Mustang to cover the news as completely and unbiasedly as possible. A proud College Republican.

KURT KRONNER

LETTERS TO THE EDITOR

College Republicans call Daily 'liberal'

Mark Reichel, ASI Community Relations Officer, political science, senior: I oppose it. Although I believe there is a need for a recreational space, I don't believe the student body should be taxed so heavily. What of the students who will not be using the facility yet still be paying?

Anna Cekola, journalism, sophomore: I support it. I'm on Concert Committee and I know the problems of getting a facility.

Harvey Martinez, physical education, senior: I support it. That's what we need around here — fun, activities, weightlifting. We're lacking in a lot of areas that other universities, not up to our standards have.

Jennifer Randall, English, freshman: I oppose it because I think it's too expensive.

Greg Anderson, mechanical engineer, sophomore: I'll vote for it. I'd like to see them put one in but it will be hard to get it through because it will be paid for by us and we won't get to use it.

Bret Habelkern, ASI Chief of Staff: I think the College Republicans should be proud (not embarrassed as the Mustang Daily article implies). The College Republicans are providing a great service by bringing state and national figures to our campus to educate us and I'd like to encourage them to continue to do so. It is very unfortunate that Mustang Daily fails to recognize and report the positive aspects of the College Republicans on this campus. For your information, the College Republicans from Cal Poly recently met with the governor of the state of California at the state capitol in Sacramento. This should have been a front page story but the Mustang Daily staff must have felt it was not important enough to mention because it wasn't even in the paper. Also, last year the Cal Poly College Republicans had the largest delegation at the State College Republican Convention, yet this was never mentioned either. Currently the club has three state offices and is one of the largest and well respected College Clubs in the state.

I'd like to encourage the Mustang to cover the news as completely and unbiasedly as possible. A proud College Republican.

FAA orders inspections of 747s
WASHINGTON (AP) — The Federal Aviation Administration has ordered special inspections on an estimated 150 to 160 Boeing 747s to ensure against severe cracking in the fuselage frame of the jumbo jets.

FAA spokesman Stephen Hayes said Monday the FAA learned in recent weeks of four incidents in which routine maintenance examinations revealed cracks in the frame, or rib cage, of 747 fuselages.

Prisoner exchange in the works
BONN, West Germany (AP) — An East-West prisoner exchange will be made next week on a Berlin bridge, a Western government source said Monday, and the word in Israel was that it includes Soviet Jewish dissident Anatoly Shcharansky.

The source in Bonn said the swap was arranged by U.S., Soviet and West German officials. Officials in Bonn and Washington refused comment on newspaper reports that such a swap was in the making.

Manson to boycott sixth parole hearing
SAN QUENTIN, Calif. (AP) — Mass murderer Charles Manson, convicted 15 years ago of the brutal massacre of pregnant actress Sharon Tate and six other people, is expected to boycott his parole hearing today, according to his attorney.

Manson, 51, told officials he did not want an attorney for the sixth parole hearing on his life sentence, but the state Board of Prison Terms appointed one for him.

"I didn't want to take any chances that a psychological or legal problem could arise where he could claim that he wasn't represented by an attorney," said Gilbert Saucedo, executive officer of the board.

20. **The Sports Car Club** will hold an autocross starting at 7:30 a.m. in the H-2 parking lot directly across from the Robert E. Kennedy Library.
21. **The Poly Royal Board** will sponsor a "Annual Poly Royal Queen's Pageant and Recognition" at 6 p.m. in U.U. Room 2170. Admission is $5. The session will include translation games and mini-courses in languages such as French, Spanish, German and Chinese.
22. **The Poly Royal Board** will sponsor a "Annual Poly Royal Queen's Pageant and Recognition" at 6 p.m. in U.U. Room 2170. Admission is $5. The session will include translation games and mini-courses in languages such as French, Spanish, German and Chinese.
Rec facility: should you vote for it?

**YES**  
By John Sweeney  
ASl Vice President

**NO**  
By Steve Dunton  
Chair, Engr. Council

Currently the students are playing on overused and overcrowded recreational facilities. The facilities were built to serve a maximum student population of 7,000, but are currently serving 16,000 students. ASI Concerts is often unable to book concerts in the Main Gym because of programming conflicts and recreational and intramural activities are scheduled at odd hours, occasionally up to 2 a.m.

The State of California would provide $1 million of the total cost along with approximately $590,000 a year for operating expenses. The remaining $5.8 million will be paid by the Associated Students, Inc. This allows for a bigger building for both the state and student body at almost half the cost.

Here's why you should vote "yes" on the proposed rec facility:

- □ It will more than double the amount of space and time available for recreational, instructional and athletic use.
- □ It will make scheduling of concerts and special events easier.
- □ The facilities and equipment will be new and modern.
- □ Fee increases will be less than the cost of similar off-campus facilities, only about $20 a month.
- □ The proposal is well planned: over two years of planning and five months of research.
- □ Cost overruns: Because the State of California provided $1 million, the cost of the building will be less than $1 million and the student body will not be affected.
- □ The proposal is under construction approximately 100 faculty and staff parking spaces will be removed while the facility is under construction.
- □ Ninety-five of those will be replaced when the building is finished. A LOSS OF ONLY 5 SPACES.
- □ FINANCIAL AID: "No students would be kick out for financial aid because of a fee increase," according to Lawrence J. Wolf, Director of Financial Aid. "A fee increase would push some 75 to 100 people from eligibility for supplemental grants administered by the Financial Aid Office TO ELIGIBILITY for Pell Grants and Guaranteed Student Loans.
- □ Twenty years ago, students voted to build the UU because they wanted and needed the facilities it would offer. You are asking the students to vote for a similar plan to build the Rec Center.
- □ The 1984 proposal was done by students, administrators, while this one is coordinated by research on the project. You're being asked to trust the Chancellor's office to complete a project that looks like its original proposal. How does that sound to you?
- □ THERE'S ALSO A HIDDEN ASI FEE INCREASE. Currently, you pay for Rec Sports as part of your ASI fee. If the Rec Facility is approved, Rec Sports will be paid for under the new fee. This will free up over $1 million in ASI funds. Do you think the ASI will reduce its fee to return this money to the students? NO! The ASI is already looking up to spend the money from this hidden fee increase! How does this sound to you?
- □ IT'LL HURT PARKING. The facility is under construction approximately 100 parking spaces will be lost. When the facility is complete it will INCREASE the demand for parking while having DECREASED the number of spaces. How does this sound to you?
- □ IT'LL HURT STUDENTS ON FINANCIAL AID. By increasing fees the facility will remove financial aid to pay out money to students in need. Since there won't be any additional money to give out, 75 to 100 students could lose their Cal Poly financial aid. How does this sound to you?

YOU'LL NEVER SEE IT. If nothing goes wrong and everything happens on schedule (how many times has that happened at Cal Poly?) the earliest this facility could be completed is Summer 1990, when NEXT YEAR'S freshmen will be seniors. You'll have to pay for a facility you'll never use. How does this sound to you?

YOU'LL TAKE MONEY AWAY FROM THE UU. Money that's already been set aside for the facility could be used to help pay the Union's rising operating costs. If the Rec Center is approved the UU will lose this money AND the interest it makes, forcing the Union to raise its own fees. If you vote for the Rec Center, you'll be voting for higher Union fees, too. How does this sound to you?

This proposal includes a hidden ASI fee increase. It will cost students a least $40 million. How does this sound to you?

Campus administrators and student politicians want this facility no matter what the cost. Only your vote can stop them.

Vote "NO" to big spending.  
Vote "NO" on higher fees.  
Vote "NO" on the Rec Facility.

From page 1

and a recreational sports office. The gymnasium would also be located between the Health Center and the Physical Education Building, at the corner of Via Carta and South Perimeter Road.

If the proposal passes, approximately 100 faculty and student parking places would be unavailable while the facility is under construction, and five spots would be permanently lost.

Two years ago a proposal to build a recreation facility was rejected by students. According to John Rembao, a senior marketing student and coordinator for research on the project, there are three major differences between that proposal and the current one.

The 1984 proposal was done by administrators, while this one has been done by students, Rembao said. In addition, the earlier project was to be entirely funded by students, rather than sharing the cost with the state, as this proposal does. Few, if any students simply didn't know enough about the 1984 proposal. "The distribution of information was atrocious," he said.

Rembao said neither the proponents nor the opponents of the proposal could point to a lack of information as the cause of defeat in this voting.

YOU'VE LISTENED TO HER TALK—REALLY HEARD WHAT SHE SAID.

Talk of pressure to compete in classes. Parents hardly caring.

Grades from instructors that are hard to understand. Let her know that you understand.

And let it all begin with a rose.
Water polo team fights to gain NCAA status

By Kerry Blankenship

Members of the 1984 United States Olympic water polo team, as well as the coach of that team, will be in San Luis Obispo Wednesday as the first stop of a promotional tour for water polo.

Olympic coach Monte Nitzkowski along with players Terry Schroeder, Jody Campbell and Joe Vargas will be guest speakers at a water polo banquet taking place Wednesday night at the Achievement House behind Cuesta College.

The coach and players will be at the banquet as part of the promotional tour, which will inform representatives of collegiate athletic departments about the relatively down-played sport of water polo.

"The critical thing is to get as many colleges playing the sport as possible," said Nitzkowski.

In 1985, 53 institutions participated in NCAA water polo, including 24 from the West Coast, 24 from the East Coast and only five representing the Midwest.

According to Nitzkowski, the strength of the sport needs to be moved out of California and it needs to become more of a national sport.

"If we lose NCAA water polo, I don't think we will be able to compete internationally," Nitzkowski said.

Cal Poly water polo club president Bob Frappia said this tour and the assistance of Nitzkowski may be just the push needed to gain NCAA standing.

According to Frappia, the club applied for non-funded NCAA standing in September 1985, which leaves all financial responsibility with the club, not Cal Poly. The club was denied NCAA standing though because of "too many hidden costs," Frappia said.

If and when the club does attain NCAA standing, it will receive $5,000 in funding from the NCAA and the United States Water Polo Association.

"We hope this tour will get people out and aware of water polo and then by next spring quarter we'll try for NCAA status again." The water polo banquet is open to all. Tickets are $10 and include a top sirloin barbecue and door prizes by Speedo. For more information about the banquet call Mike Rowley at 549-0558.

Polo Club lacks funds, facilities, not talent

By Chris Counts

Considering it lacks a coach, a field, horses of its own, and isn't recognized by the school, the Cal Poly polo team has done surprisingly well.

Despite seemingly insurmountable obstacles, such as opponents using virtually unlimited budgets, Cal Poly has held its own and even made a name for itself in collegiate polo.

- Making a name for itself on the Cal Poly campus, though, has eluded the polo team.

We're one of the poorer teams on the collegiate circuit," Cal Poly polo enthusiast Susan Calender said. "We have no facilities. The school doesn't even recognize us as a competitive team.

On many campuses, Calender explained, polo is taken as seriously as football. On the East Coast, collegiate polo programs have huge budgets, experienced coaching staffs, and state-of-the-art facilities. Even Stanford and UC Davis have budgets that allow them to recruit polo players.

Still, the Cal Poly polo team has come a long way since it was conceived as the polo club in 1975. The polo team is actually the best four players in the polo club at any given time. The club, which is self-supporting, is financed by dues and fundraisers.

The semi-automated, polo is a complex game involving two teams of players, with each competing on a horse and wielding a mallet. Bound by a set of guidelines, each team tries to hit a ball between two uprights, a complex with the club, not Cal Poly.

According to Nitzkowski, the polo club lacks funds, facilities, and isn't recognized by the school.

Bill would require warning labels

WASHINGTON (AP) — The House, faced with mounting evidence that youngsters are turning to smokeless tobacco as alternatives to cigarettes, voted Monday to require health warning labels on smokeless tobacco and to ban their broadcast advertising.

The bill, approved on a voice vote, would require one of three rotating warning labels to be added to tins and pouches: "This product may cause oral cancer."

"This product may cause gum disease and tooth loss" or "This product is not a safe alternative to cigarettes."

Arrows and circles would draw attention to the warning labels. And television and radio advertising, which now often feature professional athletes touting the products, would be banned.

"The passage of this bill will allow us all to go home, and say that we've made a major step toward protecting the health of young people throughout our country," said Rep. Mike Synar, D-Okl., a sponsor of the bill.

Rep. Henry Waxman, D-Calif., chairman of the House Energy and Commerce health subcommittee, said he hoped the labels would persuade teen-agers not to take up "this filthy habit." He called snuff and chewing tobacco a "very, very dangerous product."

The bill was supported, reluctantly, by most of the tobacco industry as the most palatable alternative to a myriad of state labeling requirements.

Rep. Thomas Billey, R-Wa., a tobacco industry supporter, said Monday he would not attempt to delay the bill although he still opposed it.

Another point is to keep copies of important documents related to taxes for four to six years. This includes the W-2 and 1099 forms.

Carr said anyone filing an interest or dividend income should use form 1099. She said even, though it's not necessary to file the 1099, it is useful to tell the student to much to report for interest or dividends.

Carr said the basis of the tax system is the reliance on people voluntarily mailing income information.

"But a lot of people just don't file. Sometimes they are people who work for themselves," said Carr.

For example, the federal government has a new law which requires waiters or waitresses to keep a daily journal on their tips.

"It's the law — and by faking a tip you're breaking the law in a sense," said Carr. "Not reporting a big tip is equivalent to someone who makes a lot of money not claiming $1 million." Carr said in the long run it's the government which gets its primary revenue from taxes — which will be hurt.

"Everybody has a threshold for breaking laws. Some people drive over 55 miles an hour or cross a red light," said Carr. "But people have to realize that if everyone breaks the law, it would be chaotic."

ATTENTION:
GRADUATING SENIORS PLANNING TO ATTEND
GRADUATE or PROFESSIONAL SCHOOL

The Cal Poly Chapter of Phi Kappa Phi National Honor Society will nominate a graduating senior for one of fifty $6,000 Fellowships offered by the National Honor Society of Phi Kappa Phi.

Criteria considered are:
* Outstanding Scholarship
* 3.6 G.P.A. or higher
* High Standardized Test Scores (GRE, MCAT, LSAT, etc.) in fields where such scores are required for admission.
* Leadership Ability
* Participation in University and Community Organizations and Activities.
* Academic standing of Institution chosen or Graduate Study

Students who feel they meet these criteria can pick up an application from the Industrial Engineering Secretary in Graphic Arts room 100.

Completed applications are to be submitted to Dr. Donald E. Morgan, Head Industrial Engineering Department, Graphic Arts room 100, no later than February 15, 1986.
