Training the ROTC way

Above, ROTC cadet Pat Corey climbs a 70-foot high wall at the Winter Field Training Exercise at Vandenberg Air Force Base this weekend. This event was the first of a series of 21 that the cadets went through. Becky Schneider and other cadets receive a briefing prior to the start of the obstacle course. The entire ROTC department participated in the two days of training. The cadets spent Saturday morning running through the advanced confidence course and returned in the afternoon to go through navigation exercises. The Cal Poly ROTC department participates in winter exercises every year, but this was the first time it has used the facilities at Vandenberg.

Anthropologist speaks

Cavemen weren’t hunters

BERKELEY, Calif. (AP) — An anthropologist says the earliest humans may have been a little on the wimpy side, scavengers rather than the big-game hunters and hearth-hugging cave dwellers depicted in cartoons.

Humankind’s ancestors were by no means the “snarling creatures who ate meat and devoured their own grandmothers,” Lewis R. Binford told a symposium at the University of California on Sunday.

“Our ancestors had not been killC T apes htmting the large and fe­ rocious animals of their times,” the University of New Mexico scientist said in an address to 1,500 persons at the symposium on diet in evolution sponsored by the L.S.B. Leakey Foundation.

IN A WORD

demi-vierge — n., a girl or woman who engages in lewd or suggestive speech and usually pro-miscuous petting but retains her virginity.

WEATHER

Increasing cloudiness Wednesday with a chance of rain by Thursday morning. Highs should be in the mid-60s.
ON THE STREET

What music group would you like to see at Poly?

Jeff Toole, agricultural business management, junior:
The Hooters would be a good group — the Simple Minds. The music's popular but not real Top 40.

Becky Jones, aeronautical engineering, junior:
General Public — seems like everyone likes them. I'd love to see the Talking Heads but I don't think they'd come here...

Anyone, God — a concert, period. I'd love to see Big Country. Eddie Money two years ago. The last concert I saw was Oingo Boingo. They're really good. Steve Widelicube, speech communication, senior:

I'd like to see a nice jazz or mellow concert. Everything else is starting to sound the same.

Dave Lopez, Dietetics and Food Administration, junior:
Bruce Springsteen — The Boss or John Cougar Mellencamp.

Joan Mary Laubacher, physical education, senior:
Oingo Boingo. They're really energetic and put on a good show. The last concert I saw was Eddie Money two years ago. The best concert was Big Country.

Brady column called 'pompous hogwash'

Editor — Pete Brady's latest contribution to our opinion page was a pompous assualtment of inaccurate and pompous hogwash. I was not aware that the First Amendment protected the right to say virtually whatever they want (to say) however they want to say it" as Brady claims. I presume that Brady has in mind to redefine the First Amendment for us, so I think a summary of the important limitations imposed on freedom of speech by the Supreme Court will clarify this issue.

First of all, obscenity, as defined by the Roth/Alberta Standard, is not protected by the First Amendment. Second, Justice Oliver Wendell Holmes restricted freedom of expression in cases of "clear and present danger" to the public. The famous scenario of yelling "Fire!" in a crowded theater illustrates the need for this restriction.

Third, freedom of speech is restricted by the "bad tendency test" which seeks to avoid injudicious expression (World War I leaflets were distributed in some parts of this country discouraging citizens from joining the armed forces). A fourth form of expression not protected by the First Amendment is the burning of draft cards. The Constitution does not uphold this act as a right of the individual. In these and many other court cases, the Supreme Court has shown itself to be zealous for the preservation of our right to freedom of expression. I don't think any of us needs a junior journalism major to champion our freedoms for us — we already have an excellent authority on the subject.

Further, I do not appreciate being quoted out of context by Brady. In my previous letter, I did not argue "that American television raised the level of 'fear and anxieties' throughout the world!" I did, however, point out that American television program depicting a Soviet takeover of the United States would indicate to the peoples and leaders of other countries in the world that Americans are obsessed with a Soviet-American confrontation. The Soviet Union has announced any "first strike" policy; it's the United States that still holds onto that ideal! This program "America" is bad press, slapping us in the face with every episode. I also do not appreciate Brady's insinuations. He holds his readership in contempt, attaching assumed derogatory traits onto people he has never even met. If misleading statements and shoddy journalism were the guarantees individuals who are paid nothing as reporters and little as editors, carry full class loads, and still put in the hours during day and night to get out a daily paper.

In contrast to this dedication, your motivation is based not on selfless concerns but on the handling of an advertisement for the recreation center, an issue also known as Mike Mendes' pet project. And then you call this your "daily"? What a populist you are. To think I voted for you before graduating.

My apologies to the present staff of the Daily and the readers they serve for that mistake.

ROBIN LEWIS
Former editor, Mustang Daily

Reader is proud of students for rec vote

Editor — Once again I have reason to be proud of our students. You have given yourselves to the class of '83 as you have benefited from the University Union building. My hat is off to all of you who demonstrated the courage and foresight to help in the building of a better Cal Poly.

MARK A. COOPER

Letters Policy

Mendes doesn't know First Amendment

Editor — Mendes's statement that this year's ASI President, Mike Mendes, read the First Amendment to the United States Constitution before again suggesting an outside policy board for Mustang Daily. He might discover a little-known provision (at least, apparently, to him) for "freedom of the press."

You see, freedom of the press is a right (not a privilege) that protects the news media from people such as ASI presidents who think they know what's right or who overreach when their special interests (as in your case) are affected by unfortunate circumstances.

Your proposal of an outside policy board is a veiled suggestion that the news media from people such as ASI presidents who think they know what's right or who overreach when their special interests (as in your case) are affected by unfortunate circumstances.

Letters and press releases should be typed within 250 words, must be signed and include the writer's signature and phone number. Editors reserve the right to edit all letters for length and style and omit libelous errors. Letters will not be published without the author's name.

 Mustang Daily encourages readers' opinions, criticisms and comments. Letters and press releases should be submitted to Room 226 of the Graphics Arts Building, Cal Poly, San Luis Obispo CA 93407. Letters should be shorter than 250 words, must be typed and include the writer's signature and phone number. Editors reserve the right to edit all letters for length and style and omit libelous errors. Letters will not be published without the author's name.

Shuttle documents requested

WASHINGTON (AP) — A presidential commission investigating the Challenger explosion told NASA to turn over all internal space agency documents on what a newspaper called the “potential failure” of critical seals in the shuttle’s booster rockets.

Commission Chairman William P. Rogers said he asked for the documents Sunday after a New York Times article described discrepancies between internal memorandums of the National Aeronautics and Space Administration and what space agency officials told the panel last week.

Rogers said in a telephone interview that NASA had agreed to cooperate with the request, but he declined to discuss the matter further.

Five South Africans found dead

JOHANNESBURG, South Africa (AP) — Police said Monday they found the bodies of five blacks who were bound, stabbed and burned with what has become known as the “necklace” — gaso-line-soaked tires placed around them and set afire.

The killings appeared to be part of the struggle between rival anti-apartheid groups that differ on how to fight white-minority rule.

Four of the bodies were found together, with more tires piled on them to form a funeral pyre, and the fifth was a short distance away.

Assembly starts final vote count

MANILA, Philippines (AP) — The government-dominated National Assembly held the first meeting Monday on its official vote canvass, which by law will determine who won the disputed presidential election.

In the slow count of ballots cast last Friday, the government election commission showed President Ferdinand E. Marcos leading by 53 percent to 47. An unofficial count by a citizens’ poll-watching group of more votes showed challenger Corazon Aquino ahead by the same margin.

Students to rebuild shantytown

STANFORD, Calif. (AP) — Black student leaders at Stanford University, calling the destruction of a small shantytown on the campus “a racist act,” vowed Monday to rebuild the symbol of solidarity with the anti-apartheid movement in South Africa.

Campus police said they are investigating the apparent vandalism, but have no leads.

“First we see somebody just passed it over,” said police Capt. Raoul Neimeyer. “It was pretty flimsy. We didn’t see any graffiti or painting or anything. Typically, we have a lot of vandalism over the weekend, bikes run over windows broken, things like that. We don’t know if this was politically motivated.”

The three cardboard, wood and plastic shacks, erected by a student group called Stanford Out of South Africa, were seen standing about 11 p.m. on Saturday by a campus security officer, but were flattened when the officer passed by three hours later, Neimeyer said.

University President Donald Kennedy, alerted to the destruction by S0SA members, asked campus police to investigate on Sunday evening.

“We need to try to find out what was done, by whom and for what reason,” Kennedy said through a spokesman.

Black Student Union president Steve Phillips called the act “racist” and “a disgrace,” adding that it showed “a total disregard for those people struggling to aid the people of South Africa.”

A similar incident occurred last month at Dartmouth University, causing the school to shut down classes for a day.

LOOKING FOR A QUIET PLACE TO LIVE?

Murray St. Station is now beginning their application process for fall. Stop by our office any time M-F 9-12, 1:30-5 or Sat 9-12 to pick up your application. Applications may be returned beginning March 1 at 2pm on a first come, priority basis.

MUSTANG DAILY
One week each month, 24 United States Forest Service employees take courses at Cal Poly in an effort to advance in their careers.

The students, who are mostly between the ages of 30 and 40, were chosen out of 150 applicants throughout California because of their perceived ability to become managers, said the head of the natural resources management department, Norm Pillsbury. "This is an intensified program in which the students go to school here one week a month and complete 12 units in five weeks," said Pillsbury.

The special U.S. Forest Service Training Program was proposed in May 1973 and was designed to help give select foresters the education needed to move up within the Forest Service. Pillsbury said the program was put into action quickly because of a class action suit filed against the U.S. Forest Service because of the lack of upward mobility for women in the service. Exactly half of the students in the program are women, which helps alleviate the underrepresentation of women in forestry.

Pillsbury said Cal Poly was selected by the Forest Service because "it felt our view of forestry management was more progressive than any other university on the West Coast."

Pillsbury, who teaches one of the courses offered in the program this quarter, said the students are helpful because they are working in the forestry field and can relay new information to undergraduates about the profession.

Anne Carlson, an archaeologist for the Tahoe National Forest and a student in the program, said the courses she is taking at Cal Poly will allow her to apply for a higher position which would otherwise be closed to her. "I think it's good that the professors here aren't watering down the courses we take. I know I'm receiving as much information as I would if I was on the quarter system."

Steve Gallegos, a student in the program and a fire staff officer for the Cleveland National Forest in San Diego, said the hardest part about going back to school after 20 years is re-establishing study habits. "It's hard to hold down a job, manage a family and go to school," said Gallegos.

Rick Larson, a forestry technician for the Sequoia National Forest, said: "Because the program is so intense, studying for my classes takes up all my free time and takes time away from my family."

Pillsbury said part of the problem of the intensity of the program might be alleviated with the installation of a new computer at Cal Poly. "It's called the Data General 10,000 and is the first mail electronic office hour in the United States," said Pillsbury. He said it will allow the students in the program who are working in various places throughout the state to send homework and ask questions through the computers at their work stations. "That way if any students have questions about assignments or material they can send messages to the faculty here and don't have to wait four weeks to get their questions answered," said Pillsbury.

Part of Lucasfilm Ltd. purchased by Apple co-founder

SAN RAFAEL, Calif. (AP) — A computer graphics division of Lucasfilm Ltd. has been acquired by employees of the department and Steven P. Jobs, the Apple Computer Inc. co-founder who lost a bitter power struggle in that company last year.

A majority interest in Pixar, formed by George Lucas in 1979 to bring high technology to the film industry, was purchased by Jobs for an undisclosed sum in the millions, according to a written statement released Monday. Jobs plans to market the Pixar Image Computer, which is 300 times faster than conventional minicomputers at performing complex graphic and image computations.
8 ways to get a man to ask you out again.

1. When he mentions “The Bears,” know they’re from Chicago.

2. Seem unimpressed when he tells you he scored a hat trick in the third period.

3. Take his word for it when he tells you that 1984 was a very good year for Chardonnays.

4. Laugh at his jokes, even when he forgets the punch lines.

5. Avoid, at all costs, letting him see you reapply your lipstick.

6. Order something more exotic than a white wine spritzer.

7. Compliment him on his taste in colors, even if he arrives in jeans and a T-shirt.

8. Tell him you’d ask him up for a Suisse Mocha, but you only do that on second dates.

"Instead they regularly scavenged the carcasses of animals killed by other predators and only relatively recently turned to hunting as a way of life."

He said the races that evolved before homo sapiens were timid, "not very swift" hunters at best and used their stone tools merely to crack bones of dead animals.

All the speakers except Binford held that pre-humans of two million years ago had rudimentary social groups with men hunting game and women gathering nuts, roots and fruits that were shared with small clans.

Binford contended the large brains of the earliest ancestors of humankind did not mean they were as smart as true humans, nor did they possess much language or social organization.

Binford said he examined fossil bones at sites where the earliest pre-human remains have been found.

There is no evidence the animals were killed by hunters, he argued. The scientist said the bones are curiously limited to bits of animal forelegs and scalps that contained very little meat but whose cavities were exceptionally rich in fatty substances such as marrow.

Binford said the animals had most probably died at a distance from the habitation of pre-humans who later scavenged the remains.

Congratulations to the following people for their noteworthy achievements:

Students

- Speech and debate team - At the recent Governor's Cup Invitational Tournament, hosted by Sacramento City College, senior Mark Crossman and junior Barbara Whipple placed first in the open division of debate. The pair won four of six preliminary debates. They defeated San Francisco State University in the quarter-final round and the University of Nevada, Reno, in the semi-final round, both on unanimous decisions. Crossman and Whipple then won the tournament championship by defeating Cal State Sacramento on a split decision. Whipple was the second-rated individual in the division.

- Individual speaking events, freshman Craig Harris was a finalist in novice prose interpretation. Also competing for Cal Poly were freshmen Debbie Dougerty and Laura Jimenez and senior Mike Pierson.

- At the Willamette Invitational tournament in Salem, Ore., senior James Solomon and junior Tim Blanton were awarded third place in the open division of debate. Solomon and Blanton won four of six preliminary rounds and advanced to the semi-final round, where they lost a split decision to Whitman College. Solomon and Blanton also received recognition as the sixth and seventh rated individual debaters in the division.

- School of Agriculture - Students representing the School of Agriculture won two of the top three places in a speech contest held as part of the California Livestock Judging Conference recently in Sacramento. Sophomore Erik Wilkins competed in the semi-final round, where they lost a split decision to Whitman College. Wilkins also received recognition as the sixth and seventh rated individual debaters in the division.

- Ag Students - A 1985 graduate of the metallurgical engineering department, LaFonALLE was known for his senior project. He worked on the Mechanical Properties of a Cu-Zn-Al Alloy and was his senior project.

- School of Agriculture - Students representing the School of Agriculture won two of the top three places in a speech contest held as part of the California Livestock Judging Conference recently in Sacramento. Sophomore Erik Wilkins competed in the semi-final round, where they lost a split decision to Whitman College. Mustang Swimmers sunk by Bakersfield

By Chris Counts

Despite losing to Cal State Bakersfield Saturday, Cal Poly swimming coach Bob Madrigal offered nothing but praise for his team after its final conference meet.

The Mustangs won every stroke event, but the Roadrunners took all the freestyle events.

"Everytime we won an event they (Bakersfield) placed second and third," coach Bob Madrigal said. "You can't expect to win a meet and give up second and third place in every race. We just lack depth." The lack of depth Madrigal referred to was clearly evident Saturday as they lost the meet 57-38.

Hosting Bakersfield, a team ranked second nationwide among Division II schools, brought out the best in many Cal Poly swimmers.

Cal Poly's 400-yard medley relay team of Rich Swoboda, Neil Leary, Jim Lawrence, and Erik Rinde posted its best time of the season at 3:37.7. Rinde paced all Cal Poly swimmers, winning the 400-yard individual medley and 200-yard breaststroke races with times of 4:13.27 and 2:15.02 respectively.

Swoboda won the 200-yard backstroke in 2:00.21 and Leary took first in the 200-yard butterfly, posting a time of 1:56.49.

Kevin Walker posted his personal bests in both the 200-yard and 500-yard freestyle races, clocking in at 1:48.3 in the former and 4:57.1 in the latter.

Bob Frappia posted his best time of the season in the 1650-yard freestyle race with a time of 16:44.5.

Jim Lawrence also swam his season's best in the 50 and 100-yard freestyle, posting times of 22.2 and 48.48 respectively.

Cal Poly's women's swimming team also competed against Cal State Bakersfield last weekend, but only on an exhibition basis.

Claudia Watters posted her best time ever in the 200-yard backstroke, missing national qualification by only a half-second.

"I expect Claudia to qualify for nationals," Madrigal said. "She should hit her peak at the conference finals next week."

Lacrosse Club splits games

By Chris Counts
Staff Writer

After soundly defeating Sacramento State Saturday, Cal Poly's Lacrosse Club ran into both midterms and top-ranked University of Arizona Sunday, suffering its first loss of the season.

Cal Poly went into Sunday's game against Arizona at UC Santa Barbara missing three starters due to academic conflicts. After a disastrous first period in which Arizona built an insurmountable 9-0 lead, the missing players returned. Cal Poly battled back, but Arizona triumphed 15-4.

"We weren't disappointed," Cal Poly Lacrosse Club member Dick Abano said. "Arizona is the best team in our league. They recruit players from back east. And we played well after the first period."

"We just had a bad day," Lacrosse Club member Bryan Palmer added. "We just weren't up for the game."

Cal Poly had little trouble with Sacramento State, winning at home Saturday, 16-6. Pacing Cal Poly were club president Gary Schare with three goals and four assists, Russ Rodewald with three goals and an assist, and Renston Krelling with three goals. Overall, Abano and Palmer agree that Cal Poly, at 2-1, is in good shape.

"We're looking real good in spite of Sunday's loss," Abano said.

Women scorcher track

The Mustangs had the weekend off after a disappointing showing at the Roadrunner Invitational Saturday in Bakersfield as a check-in their training schedule.

The primary purpose of our 1986 season debut was to serve as a dress rehearsal and to get a status check of our fall season training program," said coach Lance Harter.

Celeste Paquette put the shot a personal best of 42'6", which was good enough to put her in second place. She also threw the discus 136'1", which was a personal best and good enough to win the discuss event. Carolyn Giovando won the 400-meter low hurdles with a time of 67.0.

The Mustangs also had the strength of three activated red-shirts this year with a regular event in their training schedule. Patricia Carpenter had two firsts in both the distance medley and mile relay. She is a four-time all-American and, according to Harter, she looks tougher this season.

"Our goals as a staff, regarding training were exceeded beyond expectation," Harter said. The Mustangs will meet Fresno State at Fresno Saturday.

Men tracksters off to good start

By T. Williams
Sports Editor

The Cal Poly men's track team got out of the blocks quickly at their first meet of the season Saturday.

The Mustangs logged six victories, 12 lifetime bests and their first three national qualifying marks at the Roadrunner Invitational in Bakersfield.

"The meet was very successful," said coach Tom Henderson. "We didn't have any injuries and we ran some very fine races."

Senior Jim Halter had a field day in the field events. He placed first in the shot with a put of 55'3", which was a national qualifying mark, and he placed first in the hammer throw, launching it 186'11", also a national qualifying mark. In an indoor event, Halter threw the 35-pound weight 67'2" which is only about two feet shy of the NCAA Division I qualifying standard.

Division II has no indoor championships in the weight throw.

The 10,000-meter race was full of lifetime best as the Mustangs finished in four of the top five spots. Chris Craig broke the tape with a lifetime best time of 30:31.2 and it was also his first win as a college athlete.

Jerry Hernandez followed Craig across the finish line in second place with a lifetime best of 30:53.6. Robin De Sota finished fourth with a lifetime best of 31:31.2 and Craig Godwin placed fifth and improved 46 seconds with a lifetime best of 31:73.2.

Dave Johnson started the season off with a bang, winning both the 100-meter high hurdles and the 400-meter intermediate hurdles. He ran a lifetime best in the highs with a 14.6 and recorded a national qualifying mark of 52.6 in the intermediates. He also ran the anchor leg of the 4X100-meter relay.

The sprint medley team ran away from the rest of the field, winning by 14 seconds with a combined time of 3:26.7. Craig Griffin ran 200 meters, Erik Josephson ran 200 meters, Jeff Gardner ran 400 meters and Brian Porter ran 800 meters.

Coach Henderson is pleased with the team's progress. "The team is on or ahead of schedule for this time of year. It looks to be a very good season for us," he said.

Saturday the Mustangs will travel to Henderson's alma mater -- Occidental College -- for a double dual meet with Occidental and Division I San Diego State.

It will be the first scoring meet of the season and the first meet this year with a regular event schedule.

"Last year San Diego beat us," Henderson said. "We would like to return the favor this year."
Mark Tracey wrestles his way toward a dream

By Tim Robinson

Last year Mark Tracey wrestled in 190 pound weight division, he finished seventh best in the nation, and for many that would be a life dream come true.

However, for Tracey, ranked number two in the nation this year, his dream doesn't stop until a life long dream come true. He finished seventh best in the 190 pound weight division, and for many that would be a dream come true.

"Ever since I was eight years old, I've read magazines on wrestling, where they keep the records of amateur wrestling, and I remember seeing the National Championships dreaming one day I'd be up there," said Tracey, who is close to that threshold and has a legitimate shot at the dream.

On the mat Tracey is all business, and has been in the business since the not-so-tender age of eight. Meaning that Tracey, at 22, has been wrestling for nearly 14 years.

Tracey credits his older brother Tony, who was also highly ranked in the nation last year, for his start in wrestling. Tracey admits that his brother, who wrestled for Louisiana Tech last year, beat him the only time they ever wrestled in high school. Now, however, Tracey says he can beat his brother who wrestles in the smaller 167 pound class.

Tracey, a senior social science major, is originally from Albuquerque, N.M., where he wrestled for Fandia High School. From there, Tracey was recruited by the Arizona West Junior College wrestling coach Jim Teem.

Teem, who wrestled for Cal Poly and was a former all-American, was one of the reasons responsible for bringing Tracey to Cal Poly.

"I use to think about coming to Cal Poly even in high school, and he (Teem) definitely pushed me towards Cal Poly when I was there," said Tracey, who also added that former Cal Poly wrestling coach Vaughn Hitchcock was a personal friend of Teem's, and was also instrumental in his decision.

It was probably the reputation. I would read about Cal Poly in high school and how well their wrestling team did. Also, I would hear about how good their academics were," said Tracey.

That led Tracey to Cal Poly and has now taken him to the doorstep of a possible NCAA Championship. However, the road to the title goes directly through Norman, Okla., where a certain Melvin Douglas resides.

Douglas, who is currently the defending champion and ranked number one in the country, defeated Tracey rather handily in their first meeting. Tracey, who wrestled Douglas in early January at the end of a grueling roadtrip, is not about ready to concede the title to Douglas, however.

"I need to work harder and get in better shape, he was a little stronger than I was, but I think I could still beat him," said Tracey, who adds that Douglas is very large and exceptionally strong for a wrestler at 177 pounds.

Douglas has cut a great deal of weight to make the division, which is similar to Tracey's situation and was the reason he wrestled in the 177 pound class.

"I was kind of small for my weight class, and I ended up seventh in the nation," said Tracey, who believes his chances for a National Championship are much better in the smaller class and justifies his jump to that weight with one thing in mind."I just want to win," he said.

Tracey, his coach and teammates still believe that when the PCAA championship rolls around, they'll still be a team to contend with. However, for Tracey, a nationally-recognized standout and a very unselfish team player, there is still a slight agony when the Mustangs lose.

"I'm kind of depressed with the team not doing very well. It is kind of hard not to let it interfere with your performance. It is an individual sport, but your teammates, those are your best friends out there, and you want to succeed as well, so it definitely has an effect on you when you're not winning," said Tracey.

However, wrestling in college for Tracey is only part of his story. He also has big dreams and has been accepted at George Washington University law school, located in Washington D.C.

There is also some thought of the 1988 Olympics in Seoul, Korea, but that is not likely.

"I have not put a lot of thought into it (Olympics). I just want to concentrate on the nationals, and then take it from there. But I kind of think it will be my last year of competition."

ENGINEERING GRADUATES

The more you have to give, the more you have to gain.

WATKINS-JOHNSON

If you're looking for real project responsibility right from the start... Watkins-Johnson is the place! The more you put in, the more our flexible, fast-paced program has to offer - challenge, educational incentives, and professional dialogue with some of the best minds in the electronic industry.

For over 27 years, Watkins-Johnson has been developing new microwave electronic products -- devices and systems -- for defense, communications and commercial applications. And, although we're one of the biggest names in the industry, our total employee population of 3,000 worldwide ensures that you'll never be just another face in the crowd.

If you have an excellent academic record and are graduates with a BS, MS or PhD in one of the following disciplines, let's talk about opportunities at our San Jose, Palo Alto, Scotts Valley, CA and Gaithersburg, MD facilities.

WE HAVE A LOT IN COMMON

Intel Corporation has created a new environment in which you can really grow. We believe that the best way to make the most of your high-caliber degree is to consider some of our most important facts: Random Access Memory, RAM. Intel's Microprocessor. Intel's EPROM. the first microprocessor. the first single-board computer. the first microcomputer development system. and the first Intel-based bubble memory. (Listed in the same order as the book you are reading.)

The kind of environment where you can become a major force behind the shape of future technology. If you're looking for the kind of career that gives you almost immediate opportunities for success, look to Intel. You'll find we have a lot in common.

If you are unable to meet with us, please contact Intel College Relations at the location of your choice:

Arizona 1080 West Williams Field Road, Chandler, AZ 85224
