Lacrosse fire: Poly wages war against Santa Barbara

Members of the Cal Poly lacrosse team struggle for control of the ball. Cal Poly was trounced Saturday by an undefeated Santa Barbara, 17-7, dropping the Mustangs' record to 4 and 5. One team member says the lack of a practice field last week hurt the team's chances for victory. For a story on the game plus other weekend sports action see page 8.

Parking permit violators

Public Safety to give fines

By Rebecca Hanner

Because an increasing number of Cal Poly students and faculty members are improperly displaying their parking permits, the Public Safety Department will soon be fining violators.

Beginning April 14, parking officers will issue $5 citations to vehicles on which permits have been improperly placed. This comes after years of not enforcing university parking regulations as stated in the Cal Poly Handbook of Parking Rules, said Cindy Campbell, Public Safety parking officer.

According to Campbell, parking officers recently have found

Design contest results in: no 1st place

By Taffy Renkowitz

No first place award was given in the Dexter Building/Landmark competition because none of the entrants satisfactorily solved all of the significant requirements, according to a judges' report which will be made public tonight.

The winning design will not be constructed during spring quarter as originally planned, but the second and third prize winners will still receive the promised cash awards, said landscape architecture professor Alice Loh.

The award winners were originally announced on March 10, but no explanation was given as to why there was no first prize.

Loh, who was a senior project adviser for the competition and one of the judges, said in a competition a reason is not necessary. Judges need only to announce the winners.

In the competition, students were asked to redesign the entrance to the Dexter Building near the Cellar. The remodeled Dexter Building now houses the departments of art, city and regional planning and landscape architecture.

Guidelines for the competition, which is a senior project of three landscape architecture students, required the designs "to identify the departments within, to make the entrance visible and to be a viable exterior space."

Also, some kind of landmark should be the focus of the space, as specified in the competition requirements.

According to the judges' report, the second place design failed to create a clear, distinctive landmark identity for the departments involved.

Foundation ‘loan’ to athletics is a ‘scam’

Editor — Mustang Daily (April 3) reported that the Cal Poly Foundation ‘loaned’ $250,000 to the Intercollegiate Athletics program. This was ‘to cover’ debts incurred by the athletic department.

This is another example of how athletics is being used as a source of revenue to cover other expenses. Athletics should be self-sustaining and not rely on outside sources for support.

LETTERS TO THE EDITOR

Mustang Daily 2

Editorial: ‘Lord of the Flies’ Revisited

William Golding aptly wrote of man’s return to his natural state of barbarism when devoid of authority. We remember his book, “Lord of the Flies,” a story of boys shipwrecked on an island who resorted to violence and the idolatry of a conch shell to celebrate their independence and paganism.

Golding’s basis in truth not only recalled man’s history but prophesied spring break 1986 across the country. A similar scenario to that deserted island somewhere in the Pacific took place in Palm Springs, California, U.S.A.

Thousands of students across the country, including Cal Poly students (and you know who you are) washed up on the sandy desert terrain: released victims of a quarter of classes and a week of finals.

To enjoy a week of fun and relaxation was the initial intent of most students, but this innocence deteriorated as a mania of barbarism replaced it.

The simple number of students left the Palm Springs Police Department with little authority in their futile attempts at crowd control. Aha! Seize the moment! With independence as a motivation and a beer can as an idol, students of engineering, the arts and sciences, the humanities (or lack thereof), reverted to self-imposed states of delinquency, thievery, pornography and vandalism. Rampant sex and lewd conduct startled none as the fourth, fifth and sixth days of spring break came and went.

And on the seventh day they rested, more out of sheer physical exhaustion than peace. Having conquered the land, they were happy. The cars were loaded up with the remains of belongings and friends and headed back to their respective schools, Cal Poly, San Luis Obispo, one of them.

Perhaps it is the freek-faced woman sitting behind you in calculus class who tore off her shirt. You may never know, as authority has once again imposed a semblance of calm over the university.

Editor — Mustang Daily (April 3)

Is to go to athletic scholarships (as a result of the Foundation ‘loan’) a form of aid or another attempt to perpetuate a system that we read is called a “loan?” It’s a scam! We, the students, haven’t been asked (through referendum) if we want to raise our fees, and if we refuse to in the future they’ll just raise prices at El Corral and Food Services to get our money that way. Maybe this “creative financing” wouldn’t bother me so much if the money was to be spent in a way that benefitted the majority of Cal Poly students, but it won’t be. The money is to go to athletic scholarships (as you reported so) that a few hot-shot athletes can attend Cal Poly while the rest of us finance their education, as well as our own.

Greek community is active at Cal Poly

Editor — Frequently we read in Mustang Daily complaints concerning Greeks. I would like to enlighten Cal Poly of the positive aspects of the Greek system.

Each fraternity and sorority organization owns their events to raise money for local and national charities such as canned food drives for the local Grassroots Association, marathon-type events for the National Heart Association and local blood drives.

Greeks are also involved in campus projects. Alpha Sigma is in charge of maintenance of the “P.” All the fraternities operate and participate in the Interfraternity Council Escort Service, and on Good Neighbor Day every fraternity and sorority participates. Last year, more than three-fourths of the participants were from the Greek community.

In addition to philanthropic activities, most Greeks are very active contributors to Cal Poly. Each year at least one-fourth of the ASI student senators are Greek. This year more than half of the ASI President’s executive staff is Greek. Greeks are also involved in ASI committees, clubs, sports and extra-curricular activities.

Video camera set up in bookstore

By Rebecca Haner

In an effort to control the increasing number of backpack thefts at El Corral Bookstore, a video camera has been installed to monitor the backpack locker area at the front of the store. Public Safety Investigator Ray Berrett hopes the video camera, which was installed by the Cal Poly Public Safety Department about two weeks ago and continually monitors the backpack storage area, will aid the department in catching backpack thieves.

According to Berrett, the video camera has been very successful in assisting the department in its efforts to control such thefts. In a four-day period between March 28 and 31, four backpacks were reported stolen from the bookstore and an additional one was reported taken from the Snack Bar.

But according to Berrett, many more backpacks are stolen from these areas on campus, yet students often will report such incidents only to the bookstore and not inform the Public Safety Department. To reduce the chance of having their backpacks stolen, Berrett suggests students check their packs into the check-in booth in front of the bookstore during the first week of the new quarter or put them into the coin-operated lockers.

Berrett reminds students that the locker space is free, and although students must put a quarter in the locker to get the key out to lock it, the money is returned when the key is replaced.

If students leave their backpacks unattended anywhere on campus, Berrett warns, the odds are the packs will be stolen.

Students should take their backpacks with them or have someone they know watch the packs while they're gone, said Berrett.

Reagan ends vacation; set to work against terrorism

WASHINGTON (AP) — President Reagan ended a 10-day California vacation Sunday, returning to work on a renewed campaign against international terrorism in the wake of another wave of attacks aimed at Americans.

While stopping short of blaming Libyan leader Moammar Khadafy for two attacks last week in which Americans were killed, an administration official accused Khadafy of sponsoring "a master plan ... to cause terrorist incidents worldwide."

Reagan, who spent a working vacation at his mountaintop ranch near Santa Barbara doing chores and horseback riding, was briefed on the explosions on a TWA airliner approaching Athens and in a West Berlin discotheque popular among U.S. soldiers.

Earlier in the week, the White House responded cautiously to placing blame on Libya as the possible agent behind the bomb that killed four Americans on the TWA flight bound from Rome to Athens on Wednesday.

In Thursday's news briefing, however, White House spokesman Larry Speakes stressed the Reagan administration was not ruling out Khadafy as a possible suspect.

Scientists predict major earthquake in Southern California

LOS ANGELES (AP) — Southern California should expect a major earthquake soon, say two local scientists who suggest that the gravitational pull of the sun and moon may have helped trigger great quakes here in the past.

Astronomer Steven Kilton and geophysicist Leon Knopoff say Southern California has entered a time when the pull of sun and moon, and moon may have helped trigger great quakes here in the past.

Knopoff emphasized this month.

They said 10 of the 13 major earthquakes in the area in the last five decades occurred nearly 11.6-year intervals that coincide with the northernmost position of the moon.

Their findings were published in a 1983 article in Nature, a British science journal, and have generated several studies since then.

Ag-science building is project of Poly grads

By Tim Robinson

A local architecture firm made up almost entirely of Cal Poly graduates has finished designs on the new agriculture-science building scheduled to begin construction later this month.

Venture Architects, a consortium of two local firms, was given the contract last December. It marks the first time in Cal Poly history that a local firm has been given a major design project.

The new building will be located in the parking lot in front of the Campus Store, near the Robert E. Kennedy Library. It will cost an estimated $5.5 million and incorporate a nostalgic look to blend in with some of the older structures on campus.

"We were anxious to do a building that would attempt to tie in the traditional architectural elements, such as sloping roofs, making our building fit in with the solar gravity. Also, most occurred in nearly 11.6-year intervals that coincide with the northernmost position of the moon."

The theme is the motto of Cal Poly. "We were anxious to do a building that would attempt to tie in the traditional architectural elements, such as sloping roofs, making our building fit in with the solar gravity. Also, most occurred in nearly 11.6-year intervals that coincide with the northernmost position of the moon."

Their findings were published in a 1983 article in Nature, a British science journal, and have generated several studies since then.

The model of the new ag-science building blends modern style with traditional lines to tie in with the architecture of older buildings on campus. The building will cost $5.5 million and is scheduled to begin construction this month.

The bid is $300,000 lower than the $5.8 million allocated by the state.

By Jennifer Smagali

The 1986 ASI presidential campaign has surprised students and administrators with a large turnout of candidates seeking the office. Six students are running for the position: Kevin Fox, Tyler Hammond, Mike Hogan, Steve Johnson, David Kaminskas and Kevin Swanson.

Both students and administrators expressed that an increased awareness and concern about student government has had an impact on the amount of interest in the election. "The increased awareness and concern that ASI has seen," said Mike Hogan, "is a reflection of how productive ASI has been this year, and students want to get involved," said Tyler Hammond, presidential candidate.

Roger Conway, director of the University Union, said people are realizing ASI is a student corporation for the benefit of students. ASI services and programs control $3 million a year. "Legally, they (presidents) have responsibilities that most people don't have until they have been out of school for 10 years," he said.

Stan Van Vleck, a candidate for ASI vice president, believes the number of students running for president will encourage the student body to become involved. "Every vote will make a difference, especially in this year's election," he said.

Because so many people are running for office, Kaminskas, a presidential candidate, anticipates a run-off. The problem with having a run-off election is students assume a candidate will win because he had the most votes in the first round. Students fail to vote in the run-off election, resulting in poor student representation, Kaminskas said.

The six candidates will talk about student issues on KCPR radio from 7 to 9 p.m. Tuesday. Listener phone calls will be taken on the air.

Great Peace March to cross Nevada border Tuesday despite rain

CAL NEVA, Calif. (AP) — The Great Peace March for Nuclear Disarmament, camped just 400 yards from the state border, planned to cross into Nevada on Tuesday after getting federal campsite permits, a spokesman said Sunday.

Rain fell on the 250 marchers shortly before noon Sunday, said spokesman Bill O'Neill.

He said they will obtain U.S. Bureau of Land Management permits Monday and "we will cross the border Tuesday."

About 1,200 people began the 3,200-mile trek to Washington, D.C., on March 1 in Los Angeles, but they ran out of money and all but a few hundred quit before more cash and equipment got them started again.

Dropping oil prices hamper renovation

By Brad Curtis

Plans to renovate the Engineering East building may be waning due to California's declining oil revenue.

Douglas Gerard, assistant dean of facilities and planning, said funding for the capital outlay program is used for projects in the CSU system and comes from the California oilfield revenue.

Gerard said dropping oil prices have lowered the amount of income available to the system. "Some programs may not make it," said Gerard.

Gov. Edmund G. Brown included $160,000 for the project in this year's budget, following recommendations from the California Board of Trustees.

Building and Grounds Chairman John McDermott said the California legislative budget analyst has recommended the project, along with others in the CSU system, be canceled because of the lack of funds.

James Harris, head of the electronic and electrical engineering department, said he is cautiously optimistic about the project. "I fully expect to see an architect around here sometime this spring or summer," said Harris. "Getting the project into the governor's budget was a major step, said Harris. "The next critical step is to get the budget past the legislature."

In March, the California Board of Trustees recommended the governor's proposed budget be amended to add $268,000 for preliminary plans and working drawings for the project. Now, said Gerard, only preliminary planning funds are being supported at an estimated cost of $85,000.

Harris said there is a demonstrated need for the project. "We don't have the resources we need to run an efficient department," said Harris. "We are working in a 1957-58 time frame when vacuum tubes were used. Things have changed and we need the facilities to keep up with the new technology," said Harris.

The remodeling plans include the total renovation of all existing labs and shop areas, Harris said, plus plans to build new shop areas, laboratories and additional space for faculty and department offices.

"We may add a second floor," said Harris.

McCombs said the cost of the project is estimated at $4.5 million and should be completed in 1989. "From what I hear, I'm about 90 percent certain that the project will go on," said McCombs. "I just hope it doesn't take 17 years to complete like the new engineering building did."

Harris said there is a lot of red tape. "So far we've jumped through every hoop they've asked us to. I'm still very positive about the project."
New title is part of restructuring

By Dawn J. Jackson

The Director of Business Affairs for Cal Poly had his title changed to Vice President for Business Affairs April 1 as part of President Warren J. Baker's reorganization of his staff.

Jim Landreth, who held the position for almost 15 years, will have the same job duties. He has five distinctive areas of responsibility which include campus fiscal operations, budget planning and administration, planning and support services, public safety and the business and plant operations functions of housing and conference services.

"I am pleased that the president has seen fit to change my title," said Landreth, who has been working at the Cal Poly, here and in Pomona, for almost 30 years.

In a memorandum to his top staff members, Baker wrote: "With the title change for Landreth, I note the restructuring of the administration of the university and I also recognize the exemplary job that (he) has done in a vital role."

There will now be four vice presidents directly accountable to Baker: the vice president for information systems, the vice president for administrative affairs, who will also act as senior vice president to Baker, the vice president for information systems, the vice president for university relations and Landreth's position.

The vice president for academic affairs is a title change for the provost position. Provost Tomilson Fort will leave his position on July 1, and an interim vice president for academic affairs will take over on that date. Landreth said they hope to initiate recruitment for that position soon. A permanent vice president for academic affairs is expected to be appointed by Jan. 1.

The position of vice president for information systems is new to Cal Poly. That person will be in charge of administrative and instructional services for communications on campus, including data base management, information systems planning, university computer systems and telecommunications.

Baker formed a committee to choose the vice president for information systems; Landreth is on the 13-member committee. He was also named to the 14-member task force for solutions to the problems of funding athletic scholarships.

James Stroom has been the vice president for university relations for almost two years.

According to Howard West, associate executive vice president, Landreth's title change came about because of the resignation of Provost Tomilson Fort, the recommendation that a vice president for information systems be established and that the chief provost title will be changed.

"With those issues at hand, it probably seemed an appropriate time to recognize the function that Landreth has been performing all of this time," West said.

Landreth said his title change, along with the restructuring of Baker's staff, was prompted by a new CSU system policy. "It's now a trend in the CSU for people in my position and with my responsibilities to have this title," said Landreth.

The CSU system was structured for years by a unique policy that only allowed for two vice presidents per university. Traditionally there was always a vice president of academic affairs, said Landreth.

About two years ago the CSU implemented a management personnel plan as a byproduct of collective bargaining. Those persons that held management or supervisory position levels were exempt from collective bargaining.

"With the new policy, presidents were given more flexibility to change job titles and assignments," said Landreth.

"The real impact occurred at the vice president level," said Landreth.

Three other administrators work under the general direction of Baker, and won't have title changes: Jan Pieper, director of personnel and employee relations; Russ Brown, dean of students; and Douglas Gerard, executive dean of facilities administration.

The CSU system was structured for years by a unique policy that only allowed for two vice presidents per university. Traditionally there was always a vice president of academic affairs, said Landreth.

About two years ago the CSU implemented a management personnel plan as a byproduct of collective bargaining. Those persons that held management or supervisory position levels were exempt from collective bargaining.

"With those issues at hand, it may be of help in hostage situation

Gunman's brother

EULESS, Texas (AP) — A two-day-old standoff continued Sunday between police and an armed man who held his ex-wife hostage in a convenience store, but a brother of the gunman was allowed to enter the store in an effort to end the impasse.

Police talked to Malone Mataele, the brother of Mataele, who was arrested late Sunday. At one point, some of the more than two dozen police officers surrounding the store began putting on gas masks, but no move was made to go inside.

Mataele, 27, had been holding his ex-wife, Sane, since Friday night in the store where she works. He allegedly shot and wounded a policeman who answered a silent alarm at the store.

PARKING

From page 1

themselves spending an increasingly longer amount of time "searching on our hands and knees for the permits."

Such permit searches not only cost parking officers valuable time, but in turn cost the Public Safety Department more money, she said.

The only correct placement for permanently affixed parking permits is on the right rear bumper of the vehicle, according to the official rules.

The Parking Handbook also specifies that a floating parking permit — one that is detachable — may be issued to an individual who is in a car pool or owns and registers more than one vehicle to a single permit.

A floating permit can also be used if the vehicle bumper design will not accommodate affixing the permit, specifically if there is no bumper or if it's wooden, corrugated, painted, Fiberglas, plastic or rubber, said Campbell.

Floating permits must be hung from the rearview mirror or from a flipped-down sun visor, with the writing on the permit facing toward the back of the vehicle, according to the handbook.

Daily or weekly parking permits can only be legally be placed face up in the center of the dashboard.

Citations will be issued if any out-of-date parking permits have not been removed from vehicle bumpers after they have expired, the rules stipulate.

Individuals who receive fines for any of the above parking permit violations will have 14 days to appeal the citation or pay the fine, said Campbell.

If the violation errors are corrected in that 14-day period and the vehicle is taken to the Public Safety Department to prove that, the citation will be voided, she said.

APPLICATIONS are now being accepted for editor of Mustang Daily for the 1986-87 school year. For more information call Donald at 546-1143. The deadline for applications is April 11.
Wrestlers return to Poly

The human drama and excitement of flying head butts, body slams and strangle holds will return to Cal Poly Wednesday night when international professional wrestling comes to the Main Gym.

The main event of the night will feature the continuing feud between "Chief" Jay Strongbow Jr. and challenger "Wildman" Jack Armstrong. The Chief, who got his name by wearing mocassins, head feathers and war paint in the ring, has been on the warpath for Wildman all year, but neither wrestler has been able to achieve a decisive victory.

However, Wednesday night a winner must be declared by either a pin or submission, with no stopping due to injury, time limit or disqualification.

"I'm sick and tired of this loser (Wildman) buying his way out of being beat," said the Chief. "This time we'll settle it once and for all, and when the smoke clears I'll be the one left standing in the middle of the ring."

In reply the Wildman said, "The Indian's a crybaby - a nothing."

Other matches on the bill will include one between two women, Ava Savage and "The Perfect 10" Reggie Bennett, who has been called the "strongest, best built and most beautiful gladiator."

And as a special attraction there will be midget wrestling. "Pepper" Gonzales will square off against the shifty "Little Tokyo."

Tickets for this evening of pure athletic competition are on sale now at the University Union, Cheap Thrills, Boo Boo records and will be on sale at the event. Prices are $9 ringside, $7 general admission and $5 for students and kids under 12. Matches will begin at 8 p.m.

Lady Mustangs ace UC Riverside 9-0

The Cal Poly women's tennis team easily defeated visiting UC Riverside Friday 9-0.

Mary Langenfeld, Chris Calandra, Cristin Leverete, OCI Barbe and Lynn Jyson won their singles matches to lead the Lady Mustangs to the victory.

This win improved the Mustangs record to 3-3, to put them in a tie for third place behind first-place Cal State Northridge and second-place Cal Poly Pomona. The Lady Mustangs were forced to take cover on Saturday and Sunday because of rain and their matches scheduled against Chapman College and Cal Poly Pomona were cancelled.

The match against Pomona was supposed to be a make-up that was originally cancelled because of rain. So now it looks like they'll have to schedule a make-up match to make-up the make-up match.

Lacrosse team ousted by UCSB

The Cal Poly lacrosse team suffered a loss to the undefeated UCSB Gauchos Sunday, 17-7.

"It was a very disappointing loss," said team member Mark Anderson. "They just outplayed us."

Anderson also said that he felt the team "wasn't as intense this week."

Part of the problem could be that they lost their practice field to the soccer team. "We didn't have a place to practice all week," said Anderson. "They just outplayed us."

Anderson also said that spring break might have played a part in the team's lack of intensity, because of the week-long layoff from competition.

Scoring for the Mustangs were: Rente Kreling with two goals; Russ Rodewald with two; Dick Abano with one; Gary Schare with one and Larry Hansen with one.

The loss dropped the Mustangs overall record to 4-5.
Dodgers, Padres square off in season opener

LOS ANGELES (AP) — The Los Angeles Dodgers and San Diego Padres, who captured the division title in 1984, meet Monday in a 1986 season-opener at Dodger Stadium.

The game has been a sellout since February. According to a Dodgers spokesman, it's the earliest sellout in the club's history.

Right-hander Eric Show, 12-11 last year, will start for the Padres against left-hander Fernando Valenzuela, 17-10 with a 2.45 earned run average for the Dodgers in 1985.

After a slow start, the Dodgers rallied to win the NL West by 5½ games over Cincinnati in 1985. The Padres, meanwhile, started fast in an attempt to defend their title, but faded and finished in a tie for third place with Houston, 12 games back.

The Dodgers were favorites to repeat as champions, but their situation changed drastically last Thursday during their final Florida exhibition game.

Shagging Los Angeles outfielder Pedro Guerrero suffered a ruptured patella tendon below the left knee while sliding into third base in the first inning of a game against Atlanta and will be lost to the team for at least three months.

Guerrero was moved from third base to the outfield last June 1 and thrived on the switch immediately, hitting 15 home runs in the month of June. He finished the year with 33 homers and a .320 batting average.

"It's a terrible, terrible thing," Dodgers Manager Tom Lasorda said of Guerrero's injury. "Pedro means so much to our club. It's a tragic loss, but we still have a season to play. We'll fight and do the best we can without him."

Lasorda is beginning his 10th year at the Dodgers' helm. Meanwhile, San Diego Manager Steve Boros will be managing his first game for the Padres. Boros was hired at the start of spring training, shortly after Dick Williams resigned as the Padres manager.

Valenzuela, 25, will make his fourth straight opening day start and his fifth in six years. Valenzuela, who signed a three-year, $3.5 million contract shortly before spring training, had a brilliant exhibition season, allowing only two earned runs in 31 innings while walking eight and striking out 27.

He had identical performances in his last two outings, against Minnesota and Montreal, hurling seven shutout innings and allowing four hits while walking none and striking out six in each game.

"I hope for the same thing during the season," Valenzuela said after blanking Montreal last Wednesday in his last start.

Rockets upset Lakers

HOUSTON (AP) — Houston's Magic Johnson scored 20 points and added 20 assists to lead the Lakers, who already have clinched the No. 1 playoff position in the Western Conference.

Magic Johnson scored 20 points and added 20 assists to lead the Lakers, who already have clinched the No. 1 playoff position in the Western Conference.

The game has been a sellout since February. According to a Dodgers spokesman, it's the earliest sellout in the club's history.
Before you make a long distance commitment, make sure you know what you're getting into.

If Fletcher Christian and Captain Bligh had known what being stuck in the same boat would mean, chances are neither would have set foot aboard.

And if you're stuck in the same boat with a long distance company that doesn't give you all the services you need, it's easy to harbor mutinous thoughts.

But when you pick AT&T as your long distance company, you know you're in for smooth sailing. You'll get trouble-free, reliable service. Immediate long distance connections—even at the busiest hours. And long distance operators to assist you with immediate credit for wrong numbers and collect calling.

And you'll get discounts off our Day Rate on your state-to-state calls. With savings of over 50% during weekends until 5pm Sundays, or nights from 11pm to 8am, Sunday through Friday. And 40% discounts evenings between 5pm and 11pm, Sunday through Friday.

So when you're asked to choose a long distance company, sign aboard with AT&T. With AT&T Long Distance Service, you'll never be left stranded. Just call 1 800 222-0300 for more information or to choose AT&T. Reach out and touch someone.

**DESIGN**

**From page 1**

The two-Bauhaus architecture team which won second place said they used colored banners as part of their design, because they felt the area would stand out from other parts of the campus.

**Frank Dost, one of the second place winners, said:** "I think ours met the criteria."

Dave Gal, a junior landscape architecture major, said by definition a landmark is something different from its surrounding.

**Gary Dwyer,** said the primary reason for the competition was that it is very difficult to describe where anything is at Cal Poly.

"Visitors have enormous difficulty identifying where anything is on this campus," he said.

"The landmark was simply an attempt to give us a space that was more readily identifiable."

Dwyer, who required the students in one of his classes last quarter to turn in competition submittals, said many of the designs were good. Although many of the submitted designs were impractical, Dwyer said, they were provocative and exciting attempts to solve a complex issue.

Charlie Daniels, a landscape architecture junior, said the fact that no one was awarded first place was an insult to a lot of the attendees. "I think ours was the best," a junior landscape architecture major, said by definition a landmark is something different from its surrounding.

**Take the plunge this summer.**

Sign up for Army ROTC Basic Camp. You'll get six weeks of challenges that can build up your leadership skills as well as your body. You'll also get almost $700. But hurry. This summer may be your last chance to graduate from college with a degree and an officer's commission. Be all you can be.

Contact your Professor of Military Science for details.

---

**What's the difference between an executive and an administrator?**

An executive gives the orders. An administrator follows them.

---

**Alice C. Loh,** for Women in Environmental Design Competition Award.

Loh stressed the prize money should have gone for prizes and not to the organizers of the competition.

Loh said the entry fee money went to the organizations that put on the competition.

One of the student organizers, landscape architecture major Elaine Shaw, said the money should have gone for prizes and contest costs, with any remainder donated to the construction of the winning design.

Some of the students who entered the competition also expressed concern about where all of the money was going and believed the event was being taken in than had been put forth.

Loh said she plans to advise the organizers to make the competition's budget available to the public and to advise the organizers' intentions.

"I think there is some confusion, but I don't think there's any intention of unethical behavior," Dwyer said.

According to Loh, she and the other judges hope everyone sees this competition as a positive experience instead of a negative one.

"I'll be willing to try again next year," Dost said.

The judges' evaluation statement regarding the competition outcome will be posted tonight at a public reception to be held in the Architecture Building Gallery at 7:30.
