Ocean life to be seen in the 1987 rose float

By Jennifer Smagala

The Cal Poly Rose Float Committee hopes to carry on its award-winning tradition with the design chosen for the 1987 Rose Float.

The theme for the 1987 Tournament of Roses Parade is "World of Wonders." The float design is of a submarine exploring sea life with multiple periscopes, said Paul Lewis, chairman of the 1987 committee.

The design was selected this week out of 56 entries and was submitted by a student from Cal Poly Pomona. Students, children and professional artists from Cambria to Grover City participated in the design contest for the San Luis Obispo area, said Lewis.

"The design must be approved and registered by the tour committee before the names of any contest winners can be announced. We are 90 percent sure it will pass, but we want to go by the rules," he said.

The designs were judged by 40 students from both Cal Poly universities. The selection was based upon animation and decoration potential, application to the parade theme, feasibility of construction and potential for winning, Lewis said.

Special effects on the float will include moving periscopes, swimming sea animals and some motion of the submarine. "I'm sure the float will require some engineering feats - we have some large things to build," said Lewis.

Construction of the frame of the float will begin this summer. Lewis estimated that 30,000 volunteer work hours will be spent on the float. "Many donations come from all over the nation, including motors, flowers, steel and equipment," said Lewis.

Chancellor discusses her accomplishments

By Rebecca Hanner

As chancellor of the California State University system, W. Ann Reynolds is proud what she has achieved so far in her position and is determined not to dwell on those past accomplishments.

In an exclusive interview at the CSU headquarters in Long Beach, Reynolds said her administration has worked for more autonomy on each campus, encouragement of fine arts programs, more building projects and more college accessibility for less-privileged people.

Since taking over as chancellor in 1983, Reynolds, 48, believes her administration has managed to give each of the 19 CSU campuses more independence in forming and implementing their own policies and actions.

Reynolds said that because each of the campuses differ largely from each other and have different kinds of strengths, they should all be given more autonomy.

Because Cal Poly has younger students than other campuses, students who attend school here "have a typical collegiate experience," more than at CSU Dominguez Hills or other schools in which the campus doesn't come alive until evening students arrive.

Reynolds is also attempting to make college more accessible to minorities and other underprivileged high school students and to help them succeed when enrolled, in addition to working with public schools to make sure they take the right classes to be admitted.

In the Los Angeles school district, where the majority of students are minorities and state statistics show that about one-third of all high school students drop out, Reynolds said his administration is working with the public schools to make college a possibility for those students.

"Not only do we want them to finish high school, but we think they can go on to college and succeed there," he said.

To achieve this, an elaborate freshman orientation, Summer Bridge Program, was formed, with students going to college the summer before they enter. They can get ahead academically by being tutored, taking tests and taking part in social activities, said Reynolds.

A new program, Step to College, which was an idea of Los Angeles Unified School District Superintendent Harry Handler, attempts to increase the aspirations and self-esteem of high school students by showing them that they are capable of doing college-level work.

"Housing is so expensive in California that unless we have affordable campus housing, students won't want to come," said Reynolds, adding that in addition to housing, her administration is attempting to make the entire campus an attractive 24-hour-a-day facility to increase student population.

In a time when the focus is turning away from fine arts programs at major universities around the country and the number of student majors in the arts is dropping, Reynolds is impressed with the thriving fine arts program in the CSU system.

Programs such as the Celebration of the Arts Summer Festival, which is sponsored by the CSU system and will be held at Cal Poly this year, will continue to receive such encouragement and support from Reynolds, who is "trying in every way possible to bring the program to prominence."

One final area of achievement Reynolds said her administration has accomplished is making teaching once again a desired profession, with statistics showing teacher enrollment up 18 percent this year.

"I've gone after faculty salaries with the governor for the past three years and have gotten them raised 23 percent."

- W. Ann Reynolds

Election day in Carmel

Eastwood feels confident

CARMEL-BY-THE-SEA, Calif. (AP) — Millionaire actor Clint Eastwood, gunning for a fifth term of office as he wrapped up his campaign for the $200-a-month mayor's job, felt confident about winning his first try for office today.

Eastwood, 55, the macho hero of spaghetti Westerns and detective flicks, attended three coffee klatches with several hundred residents Monday, hiring on his campaign pledge to return "courtesy and responsible leadership" to this genteel resort village.

"We feel very strong today," said Eastwood aide Betty Ghent, noting that the actor won the support of 61 percent of the voters contacted in a recent telephone poll and has received the backing of..."
ON THE STREET

Do you take advantage of the falling oil prices?

Steve Wildcombe, speech communication, senior; Frank Warren, speech communication, freshman: We have taken advantage of the falling oil prices. We bought gas. It's scary because in the long run it will hurt the American economy.

Dean Sakamoto, environmental studies, senior: I only have a car I wish I did but I don't.

Eleanor Mak, architecture, junior: No I haven't. I don't have a car. I wish I did but I don't.

Donna Moser, microbiology, junior: Well, I haven't really had to worry about it because my boyfriend buys all my gas. I don't feel as bad about it now.

Jon Jaeger, architecture, junior: No, I have a scooter. I take about two cents worth.

ON THE STREET

Food for thought

I've decided to give up my career in journalism (stop the cheering) and instead open a small (but tasteful) restaurant in the Washington D.C. area. Here's what I had in mind for the menu.

Hors D'Oeuvres

Bush Milk Toast: A wonderful, bland dish for people who find politics hard to stomach.

Main Courses

All main courses come with free federal cheese and either soup or salad. Your waiter, Jesse Helms, will kindly make the choice for you.

Jerry Falwell Half-baked Chicken: Six pieces guaranteed to be right wings.

Jerry Falwell Apartheid Turkey: Chef Jerry has painstakingly separated all the white and dark meat (for the discriminating appetites).

Reagan's Prime Cuts: In accordance with the Gramm-Rudman Diet, Chef Reagan has butchered many sacred cows for this entree. He has then carefully trimmed away all the fat (kindly feeding it to the many starving people in this country).

Reagan Sweetbreads: (Not available at this time.)

Pork Tip O'Neill: A large old pig, cooked slowly over an open fire. Seconds are on the House.

Desserts

All desserts come with free federal cheese.

Banana Cream Strategic Defense Initiative: Pie in the sky. flaming Kadettffy Dessert: This fruitcake (carefully aged and soaked in brandy) is the house specialty. After being brought to the table, it is set aflame (much to the delight of our guests).

Beverages

All beverages come with free federal cheese.

Coffee. (Served with Klaus Von Bulow sugar substitute.)

House Wine: Mendes Whine from the Gallows winery.

On Wednesdays we'll have the Indiana special, which is everything on the menu 500 times.

LETTERS TO THE EDITOR

Good politics can make bad theology

Editor — President Reagan said, "We know that living in this world means dealing with ... the doctrine of sin ... There is sin and evil in the world. And we are enjoined by Scripture and the Lord Jesus to oppose it with all our might." Then Reagan made his now well-publicized remark: the Communists are "the focus of evil in the modern world," and that U.S. military strength is necessary to restrain the "aggressive impulses of an evil empire."

There is nothing wrong with the President urging church people to back a position he feels is vital to national security. But there is something wrong with the President's theology. The Bible tells us that all men and women share the same natural disposition. As common dependents of Adam and Eve, we are all sinners, both American and Russian. This is a cause sin is in us — innately.

I know that this will go against the teaching of the Ruling Orthodoxy here at Poly, which are constantly trying to persuade their students that humanity is innately good, and can even be perfected through evolution and education. This belief that we can make ourselves better and are in the process of doing so, is the very essence of humanism. It is also the most subtle and dangerous delusion of our time. This is a position of the "evil empire" that President Reagan spoke about. Following his conversion to Christ in the Soviet gulag, Alexander Solzhenitsyn wrote, "It was disclosed to me that the line separating good and evil passes not through states, nor between classes, nor between parties either — but right through the human heart — through all human hearts."

The search for the evil empire need not take us to distant continents. The Bible tells us where to look. It is in us.

Body of third fire victim found

SAN FRANCISCO (AP) — With worried relatives standing by, investigators on Monday found the remains of a third victim as they searched by hand in the rubble of a sprawling industrial complex leveled by an explosion and fire.

Seven people were known missing and feared dead. Investigators don't yet know if the remains represent any of people missing since the Bay View Industrial Park exploded and collapsed Friday in a five-alarm blaze. Of the 22 people treated at hospitals, two remained in serious condition on Monday.

Heavy equipment will be used to remove beams and heavy pipes. The rest of the searching will be done with "shovels, wheelbarrows and muscles, mostly," said Walt Wysocki, an investigator with the federal Bureau of Alcohol, Tobacco and Firearms. The agency is assisting local fire officials.

Philippines asks for US aid

WASHINGTON (AP) — The Philippine finance minister said Monday his country needs an additional $100 million in U.S. economic aid, plus $580 million in loans, to avert a financial crisis that could undermine the new government of Corazon Aquino.

"We are in an emergency situation," Jaime Ongpin said in a speech at the Carnegie Endowment for International Peace.

He said the Aquino government will not have enough money to pay its bills for the rest of the year unless it gets help. "We are in trouble, I can tell you."

Congress is already considering $100 million for the Philippines, in addition to $214 million previously approved, and is considering likely to appropriate the larger amount.

Bush visits with Mideast leader

MANAMA, Bahrain (AP) — Vice President George Bush said Monday the United States and Saudi Arabia found no "common solution" on stabilizing the volatile oil market during three days of talks.

He also said the two countries disagree about what oil price level is desirable. From the Saudi standpoint, "the stronger the price for international oil the better ... That does not coincide with the best interest of the United States," Bush told a news conference in Dhahran, Saudi Arabia.

However, he said it is not the role of the United States "to dictate to countries around the world what the price oil should be."

The vice president later flew to Bahrain on the second leg of a Middle East visit that includes Oman and North Yemen.

General speaks on military role in space

Air Force efforts in space focus on peaceful measures

Increased military activity is needed in space to protect American sovereignty and freedom, an Air Force general told an audience in Chumash Auditorium Monday.

Robert T. Herres, commander of the United States Space Command, said NASA as a civilian agency is greatly needed, "but there is still this little problem of providing for the national security." Herres said Air Force efforts in space are designed for peaceful applications.

"There are no aggressive systems in space," said Herres. "The systems we are promoting are confidence-building and defensive in nature."

MOWLINK, a communication system between the United States and Moscow, is an example of a confidence-building system, Herres said. "With our modern satellite technology, we now have a direct communications link between Washington and the Kremlin." Herres said the MOWLINK system helps both countries to keep a check on the other. "Other ideas include placing American military bases in Russia and Russian bases in the United States."

Herres said the space command is being very careful about stability. "All weapons systems are in my opinion destabilizing. Warning systems tend to help stability," he said. "We should try to chip away at the destabilizing systems."

"I don't think anybody wants a nuclear war, including the Soviets, but the stakes are too high not to protect ourselves," Herres said the military needs to do more research and needs new technology to keep up with the Soviets.

"No new frontier has ever been explored without the military being heavily involved," Herres said. "Military efforts in space help in surveillance, communication and navigation, said Herres. "Our hopes are that new technology used by the military in space will make the use of intercontinental ballistic missiles obsolete."

**TUESDAY**

- The Health Center will sponsor a Wellness Deduction from 10 a.m. to 3 p.m. in the University Union Plaza. Fifteen events will enable participants to assess their physical, mental and emotional health. Students, faculty and staff are welcome to participate and awards will be provided for achievement.
- The Learning Assistance Center will sponsor a seminar in "Listening and Notetaking Techniques" from 10 a.m. to noon. For locations and more information, call 546-1236 or drop by Chase Hall.
- The Undergraduate Business Law Association will take sign-ups for its law of Northern California law schools slated for "Mustang Daily". Five Mustang Daily staff members brought home six awards at the California Intercollegiate Press Association held in Irvine in March. Journalism senior Donald Munro was awarded first place for best front page layout for a daily tabloid and honorable mention for on-the-spot tabloid layout. Journalism senior Andy Freker won first place for best sports feature in a daily newspaper for his story on Ironman Triathlon competitor Chris Hinshaw. Computer science senior Kenneth Distzar placed first for best humor column in a daily newspaper for his column "Chemistry major's view of the world." Journalism major David Eddy captured first place for on-the-spot news reporting. Art major Grant Shaffer placed third in on-the-spot editorial cartooning.
- Animal science - Four animal science students have been qualified to represent the university in competition to be held at the annual meeting of the Western Section of the American Society of Animal Science meeting in July at Oregon State University. Seniors Ken Bryan, Lynn Durno, Alecia Dicken and Junior Sherri Prigus won the right to represent Cal Poly in a campus quadrathlon competition using the same format that will be used for the ASAS sectional contest. Four teams of four students each took part in more than eight hours of competition spread over two days. Oral presentations, a written test, laboratory practices and a competitive question period were used. Faculty of the Cal Poly animal science institutes and industry department conducted the campus contest and awarded plaques to members of the winning team.
- O.H. Club - Twelve ornamental horticulture students took part in the Associate Landscape Contractors of America's 10th annual Field Days this past weekend in Oklahoma City, Okla. The team took fourth place competing against 16 schools in 18 events, including the installation of a small brick patio, irrigation assembly and design and tree planting.

**WEDNESDAY**

- The University Union Craft Center will hold its quarterly craft class sign-ups beginning at 7 a.m. in the Craft Center. Classes will be available on a variety of subjects including stained glass, bike repair, unassisted calligraphy and woodworking.
- The natural resources management department will sponsor a seminar on Eucalyptus Management at noon. For more information contact Doug Pflito at 546-2906.

**THURSDAY**

• Mustard Daily — Five Mustang Daily staff members brought home six awards at the California Intercollegiate Press Association held in Irvine in March. Journalism senior Donald Munro was awarded first place for best front page layout for a daily tabloid and honorable mention for on-the-spot tabloid layout. Journalism senior Andy Freker won first place for best sports feature in a daily newspaper for his story on Ironman Triathlon competitor Chris Hinshaw. Computer science senior Kenneth Distzar placed first for best humor column in a daily newspaper for his column "Chemistry major's view of the world." Journalism major David Eddy captured first place for on-the-spot news reporting. Art major Grant Shaffer placed third in on-the-spot editorial cartooning.

**NOTABLES**

- The ASI will sponsor the third annual Good Neighbor Day where students will volunteer a helping hand to the community of San Luis Obispo. Volunteers will provide labor for chores such as yard clean-up, moving and home repairs. The event will begin at noon and volunteers are expected to complete their tasks before 4 p.m. Sign-ups will be taken in U.U. Rm. 217.
- A registration meeting for tryouts for next year's football pep squad and "Musty" the Mustang mascot will be held at 9 a.m. in the Main Gym.
- The Cal Poly Library Associates will hold its seventh annual book sale starting at 10 a.m. in front of the Robert E. Kennedy Library. The sale will continue on April 14 and 15 from 10 a.m. to 3 p.m. in the courtyard of the library. More than 6,000 old and new books on a variety of subjects will be for sale and proceeds will go toward the purchase of additional materials for the library. For more information call the library's special collections department at 546-2305.
- The National Ag Marketing Association will hold a career conference from 9 a.m. to 4 p.m. in the U.U.
Garden guardian

Spring flowers bloom under the supervision of a guardian angel behind the Architecture and Environmental Design Building. The statue is one of a pair that came to Cal Poly from the Palace of Fine Arts in San Francisco, designed by Maybach for the 1915 Pan-American Exposition.

Community for the retired is suggested

By Christie Barry

A parcel of land owned by the university is the possible site for a continuing care retirement community, according to a Cal Poly architecture instructor.

Kenneth Schwartz, who teaches architectural design, gave the problem to his class last quarter. Former university president Robert Kennedy and his wife, Mary, served as clients for the class.

The Kennedys are interested in having a continuing care retirement community, CCRC, built to accommodate those ready for retirement in San Luis Obispo County. Many tenants would be former teachers and staff members of Cal Poly.

“They're the driving force with their prior association with Cal Poly,” Schwartz said.

With a one-time lump sum entrance fee followed by monthly rental payments, a CCRC occupant would receive a place to live, access to communal facilities, housekeeping services, meals and care for life.

“Once you're there it's your home... until the end,” Schwartz said.

Kennedy held a meeting with about 30 retired faculty and staff members who were much in support of the project.

Campus officials have other ideas for the use of the land. President Baker is looking for a way for 50 housing units to be built for newly-hired staff and faculty members who come from other areas.

“Housing is difficult to find in San Luis Obispo,” Schwartz said.

Nothing has been made definite yet; the parcel of land is still under negotiation.

APPLICATIONS are now being accepted for editor of Mustang Daily for the 1986-1987 school year. For more information call Donald at 546-1143. The deadline for applications is April 11.

Wheelmen manage wet track at Stanford

Rain caused a wet course and treacherous turns Sunday at Stanford as the Cal Poly Wheelmen competed in the Stanford Criterium.

But Sheldon Smith made out unscathed as he led the Wheelmen in category A. A unscathed as he led the 30-mile A course with the first nationally ranked riders rode the Stanford rider, Brad Chen, the high-powered field with several Ford Criterium.

Stanford as the Cal Poly treacherous turns Sunday at the field. Five riders lapping the rest of the field.

Wheelmen Craig Anderson in category B race. Fred Boot, a member National Cycling Team.

The Cal Poly men's track team coame to compete at Stanford as the Cal Poly's Pozo toughest road race on the tour, next to Cal Poly's Pozo Road course. Kinny finished in 10th place and Jim Kinny in 11th.

Wheelmen Robert Enzerink and Tim Hyland placed first and eighth respectively in the 20-mile category B race. In the category C race, Deb Thorngberg finished in second place.

Tracksters set records at Fresno Bee Games, SF State

By T. Williams

The Cal Poly men's track team split this weekend to compete in two different meets.

Four Mustangs traveled to Fresno to compete in the Fresno Bee Games, while the rest of the team went to San Francisco for a dual meet with the San Francisco State Gators.

At the Fresno Bee Games, Anthony Mudy became the team's newest national qualifier with a 6'11" in the high jump, which was good enough for second place. Jim Halter also had a good performance at the Fresno Bee Games recording a lifetime-best in the shot put with a put of 55'11 1/2". It was not only good enough to win the event but also the best put in the CCAA.

At S.F. State, the Mustangs won 13 of 19 events, including a sweep in the 4 X 1-mile relay, to win a 103-57 victory over the Gators.

Allen Aubuchon had a busy week competing in five events. He set a meet record in the hammer throw with a lifetime-best toss of 149'1" which earned him first place. He also placed second in the shot put, third in the discus, fifth in the high jump and seventh in the pole vault. Erik Josephson also did well, winning both the 100-meters (10.70) and the 200-meters (21.6). Bubba Bently won the shot put with a put of 48'1" and the discus with a lifetime-best fling of 146'9".

The Mustangs dominated the pole vault competition with a sweep of the top four spots, led by Hans Finning in first place and followed by Shane Tilston in second, Todd Cramer in third and Kevin Qualls in fourth.

Cal Poly also took charge in the 1,500-meters. The Mustangs hold six of the top seven marks in the CCAA in the 1,500-meters. Jim McCarthy led a Mustang sweep with a first-place season-best time of 3:53.0. McCarthy was followed by Joe Rubio, who is back from an injury, in second place with a season-best time of 3:54.4. Chris Craig was also clocked in 3:54.4, his lifetime-best, but finished third.

Craig also led a Mustang sweep in the 5,000-meters with a first-place 14:52.1, followed by Shawn Ayers in second in a season-best 15:17.6. Jim Chaney finished in third and Robin Dienes came in fourth.

Arnold Maler came from behind in the 400-meters to win it after his blocks slipped at the start. He was followed by Jeff Garser in second. Steve Abernathy and Martin Higgingsboth won the 400-meter intermediate hurdles and finished third in the 100-meter high hurdles.

The Gators wanted to try and break their school record in the 4 X 1-mile relay, an event that hasn't run much anymore, so the Mustangs put together a team to push the Gators. Joe Rubio, Steve Abernathy, Mike Livingston and Jim McCarthy not only pushed the Gators, but beat them and established a new meet record as well.

Rubio led off with a 42.06 first leg, followed by second man Abernathy, who ran a 43.33.1. At this point the Mustangs were in second. Livingston cut the Gators lead with a 42.63 leg and anchor man McCarthy ran a 42.18 with a 60-second last lap to pass the Gators' runner and put the Mustangs in first. The Gators didn't break their school record though.

Elizabeth Strange, second from left, peddles to catch a Stanford rider in a criterium race at Stanford Sunday. Strange placed third for the Wheelmen.
Peace marchers to cross border

CAL NEVA, Calif. (AP) — Participants in the Great Peace March for Nuclear Disarmament, spirits bolstered by the Rev. Jesse Jackson, will leave their desert encampment Tuesday and cross into Nevada, a spokesman said Monday.

"We are still 400 yards west of the state line," spokesman Chris Ball said. "Our plan is to march Tuesday to the first of several Bureau of Land Management sites."

Jackson told them not to despair from a lack of money that has plagued the walk, forcing the initial sponsoring group to disband.

"Don't let them break your spirit," Ball quoted Jackson as saying.

The marchers, 200 miles from Los Angeles where they started the 3,200-mile trek March 1, were encouraged Sunday by a telephone call from Jackson.

Jackson to them not to give up at anything," Reynolds replied when asked what goals her administration hasn't been able to accomplish in the past three years.

"Don't let them break your spirit," Ball quoted Jackson as saying.

In regard to faculty-administration relations, Reynolds, who has spent 20 years as a faculty member, said her administration has done a lot of faculty-governance work in that area to sustain good collegiate relations and rely on faculty for the future growth of the campus.

"I've gone after faculty salaries with the governor for the past three years, and I have gotten them raised 27 percent," Reynolds said.

In coming to the CSU system, Reynolds served as the Provost of Ohio State University, where she also was a professor of anatomy, obstetrics and gynecology. She has held additional faculty and administrative positions at the University of Illinois College of Medicine and Ball State University.

Reynolds holds a bachelor's degree in biology and chemistry from the Kansas State Teachers College and a master's degree and Ph.D in zoology from the University of Iowa.

CHANCELLOR

From page 1

By adding actual classroom experience to the teaching major's curriculum early on and by requiring teaching students to pass the standardized CBEST test before they can teach, in addition to allowing only the top half of teaching classes to advance, Reynolds believes the quality of teaching candidates is also improving.

"I never gave up at anything," Reynolds replied when asked what goals her administration hasn't been able to accomplish in the past three years.

"Don't let them break your spirit," Ball quoted Jackson as saying.
