The Robert E. Kennedy Library may run out of space for additional books within 10 years if collection growth continues at the present rate. The $11.5 million library opened its doors five years ago, with more than 157,000 square feet of usable floor space. However, in the past five years the library collection of more than 2 million items has continued to grow, and the building is already showing signs of crowding.

Charles R. Beymer, interim library director, says: "Space, wise, we don't have 10 years of growth. I think we're going to be very crowded in five to six years.''

A library space committee was formed earlier this year to deal with the problem before it becomes critical.

The library collection of more than 2 million items has continued to grow and will soon reach book space limitations. The library is already storing 30,000 volumes in the Dexter Building. A space committee was formed earlier this year to deal with the crowding problem before it reaches a critical stage.

By Craig Andrews

The library, where some of the 7,700 students once urged stockpiling suicide pills in case of a nuclear war, now finds itself embroiled in an identity crisis. Sinzheimer favors the more traditional Mustang mascot. Page 7.

IN A WORD

enthynememe — an argument or truncated syllogism in which one of the propositions, usually a premise, is understood but not stated.

Weather

Tonight's low will be in the upper 40s. On Wednesday it will be sunny in the afternoon with highs in the upper 70s.
Opinion

ON THE STREET

What is the status of your senior project?

Ralph Scoum, business, graduating senior:

The project is a brilliant idea and is yet still only a brilliant idea.

Susan Edmondson

on development aphasia in adults.

M清理 ion's done — believe it or not. Michelle Hughes, Industrial

Ralph Scoum, busi nce s, graduating senior:

It's a very interesting project. I've had too many friends who've had to come back and take an extra year to finish it.

Patty Hayes, liberal studies, graduating senior:

I didn't do a senior project. I did student teaching instead — two quarters, not paid. It was fun though.

Michelle Hughes, industrial technology, graduating senior:

Mine's done — believe it or not.

Lori Mazzei, English, graduating senior:

I finished my senior project two quarters ago. I wrote a paper on the history of greeting cards and wrote a series of greeting cards for health and fitness conscious adults.

Alcohol on campus will cause problems

Editor — The potential for a decision to allow alcohol to be served at athletic events on the Cal Poly campus has begun to pop up more often recently. These occurrences bring rise to many questions.

Who will sell the alcohol? The Foundation, ASI or club concessionaires? Who will accept the responsibility and liability? Does Cal Poly need added risks to the current insurance dilemma? What behavior will alcohol consumption provoke? Is this behavior desirable at our university events? How can those who indulge be controlled? Will illegal consumption occur, bring ABC involvement? Will non-drinkers and alumni be offended, harassed, hurt? Will this decision take away more opportunities for teetotalers, underagers and sober people to attend "dry" events and be free from the stench of alcohol and bingeing?

How much will damage and injury increase? How much more trash and garbage will be strewn about our beautiful campus?

Keep in mind that more than just Poly students attend these events. What all this boils down to is: Is the presence and consumption of alcohol necessary to enjoy the sporting events and concerts by all spectators, drinkers, non-drinkers and children? Most people drive to these events, fight for the scarce parking and then will need to drive home. Should the university support or encourage drinking and driving? It will happen.

Maybe I am not alone in wanting a place to have fun with friends and family that is not centered around alcohol, but people. There are plenty of alcohol avenues to pursue in San Luis Obispo before and after games and events. Patronize these off-campus businesses and let's all enjoy some dry memorable fun on campus.

LETTERS TO THE EDITOR

Scientists versus SDI judge prematurely

Editor — It scences me to think that some of the scientists in this country are so against supporting a non-nuclear deterrent to the arms race that they would sign some silly pledge denying their talents to our nation's security. As a future engineer I would like to point out that we shouldn't jump to conclusions about SDI because it's credibility just because of what scientists say.

The Union of Concerned Scientists (UCS) reported that SDI would be ruinously expensive and argued that 2,400 defensive satellites would be needed for an effective shield. After receiving pressure from people like Robert Justrow, former head of NASA's Goddard Space Center, UCS concluded that actually only 79 satellites would be needed.

Another error UCS made was claiming that a linear accelerator necessary to generate power for energy weapons would weigh 40,000 tons, whereas 25-ton accelerators would be just as effective.

So, they exaggerated a lot. Errors like this adds hundreds of billions of dollars to the proposed cost of SDI. It is strange that these errors in the UCS report were not evenly distributed, but rather all pointed against strategic defense. These same scientists all reached conclusions within 10 days of Reagan's initial speech. This is hardly enough time to research a project of this magnitude.

I want to believe that many scientists have made premature judgements about SDI and speak partially as anti-Reaganes. I think scientists should be allowed to voice their opinions about important policy issues, but these should not necessarily be regarded as expert.

By cheating on the SALT treaties, the Soviets have amassed 2,500 new warheads and their beam weapon system. They have continued to develop nuclear defenses and encouraged underagers and sober people to attend "dry" events and be free from the stench of alcohol and bingeing. The underlying assumption is that there is nothing we can possibly do except wait for the situation to cool down on its own. I beg to differ. The way to deal with a problem like this is not to be nice to the perpetrators and hope they'll see fit to leave us alone and not blow us up in our streets and in our airplanes, but to destroy the problem and its source once and for all.

I was saddened to hear of the civilian casualties, but I was saddened more by the deaths of other innocents, like Leon Klinghoffer and the little baby who was blown from that TWA plane to her death by a terrorist bomb. This epidemic of national hand-wringing reminds me of the 40th anniversary of the bombing of Hiroshima last summer. People were so consumed with guilt over the bomb that they completely forgot about Pearl Harbor. Hopefully, Colonel Khadafy will wise up before his country gets turned into a radioactive glass bowl.

PAUL TROUSDALE

In long run, Libya bombing is the best

Editor — I find it hard to believe there is any negative reaction whatsoever in this country to our bombing of Libya. Most of the opinions expressed in Mustang Daily show a remarkable naivete and a refusal to face the facts. Were we a little harsh? Should we have thought it out a little more before we acted? Of course not! Every other tactic had already been tried. We had simply run out of alternatives.

Poly students attend these events.

Khodafy to expel foreign staffs

TRIPOLI, Libya (AP) — Moammar Khadafy's government said Monday it will expel 36 staff members of seven West European embassies in retaliation for diplomatic sanctions imposed against Libya by those governments.

West European nations have ordered dozens of Libyan diplomats expelled since deciding April 21 to take the sanctions. The decision followed the U.S. bombing raid on this North African country.

The official news agency JANA said the Foreign Ministry ordered 17 West European diplomats and 19 non-diplomatic Italian staff members to leave Libya, a former Italian colony, in a week to 10 days. Diplomats and staff members remaining at the seven embassies will not be permitted to travel outside Tripoli without permission, JANA said.

Chinese to launch US satellites

PEKING (AP) — China plans to launch two communications satellites for an American company before the end of next year, an official newspaper reported Monday. A Western diplomat said the agreement was not a surprise in light of the space shuttle grounding.

Chinese to launch US satellites for an American company before the end of next year, the official English-language China Daily reported.

"All the American experts are convinced that the Chinese have the capability to integrate our satellites and launch them properly," the newspaper quoted Henry A. Schwartz, president of Terasat, as saying. Schwartz said that the Chinese were selected because they have launched 18 satellites since 1972 with only one failure."

"The Gay and Lesbian Student Union along with the Multicultural Center and the Cal Poly Housing Department will feature the film "Pink Triangles" followed by a panel discussion concerning gay awareness. The free presentation will take place at 7 p.m. in San Luis Lounge."

"The English department will feature a lecture by poet Sue Brannan Walker at 11 a.m. in Science Building Room B-5. Walker will discuss the poetry journal she edits titled, "Negative Capability.""

(One coupon per pizza)
Congratulations to the following Cal Poly achievers:

□ Agriculture — The Cal Poly student chapter of the National Agrit-Marketing Association placed first in the marketing competition at a national conference earlier this month.

The 10 NAMA members surpassed the efforts of 22 other student chapters nationwide. Chapter adviser and agriculture professor Dan Block was named adviser of the year.

Cal Poly also ranked third in the chapter of the year competition, missing second place by two points.

Students attending the event in Dallas were Tammy Ames, Liza David, Suzanne Beaumont, Rich Flores, Theresa Garcia, Jenna Ladem, Lisa Sella, Wayne Sandvoss, Scott Walker and Tammy Wise.

□ English — Professor Angle Estes has been selected to participate in a National Endowment for the Humanities Seminar, "Contemporary Poetry and the Modernist Tradition," at UC Berkeley this summer.

□ Library — Associate librarian Dene Rockman has been invited to present the results of her 1985 sabbatical research, "End-User Search Services in Academic Libraries," at the 14th Annual Library Orientation/Instruction, or LOEX, conference at Eastern Michigan University in May. Papers will also be included in the published proceedings of the conference.

□ Architecture and Environmental Design — Landscape architecture professor Alice C. Loh and Serin Desel of the architecture department presented a proposal, "Empowering People to Retrofit Housing: One Solution for the Elderly," for the session on Housing and Related Services at the 32nd annual Conference of the American Society on Aging in San Francisco.

□ Architecture — Architecture professor James Baggs has been elected director for the Western Region of the Association of Collegiate Schools of Architecture.

In the position, Baggs will guide ACESA seminars and other activities among the 20 schools of architecture west of the Rockies. The association, the preeminent organization of architectural educators, includes 102 schools in the United States, divided into six regions.

Baggs’ three-year term on the ACESA Board of Directors begins in July.

□ Chemistry — Professor Dennis Phillips authored and presented a paper at The Pittsburgh Conference and Exposition on Analytical Chemistry and Applied Spectroscopy in Atlantic City. The paper was "Sulphur-K-Beta Emission Studies on Sulphur-Bearing Heterocycles."

□ Crop science — Jeff Pinkham was awarded first place in the Innovative Teaching Techniques competition sponsored by the North Central Branch of the Entomological Society of America at their annual meeting in Minneapolis, Minn. His topic was "The Use of Concept Related Humor in a Lecture: A Serious Teaching Tool."

□ Philosophy — Professor Stanislav J. Dondon participated in a two-day workshop dealing with World Bank evaluation in development management and USAID "Public Choice" planning for regional water supply problems in Yemen at the annual American Society for Public Administration convention in Anaheim in April.

□ Chemistry — Professor M. Zafar Iqbal has been elected to serve on the board of directors for the San Francisco General Hospital Medical Center.

Information for Notables must be submitted to the Mustang Daily office, Graphic Arts Building Room 226, no later than Friday at 4 p.m. for consideration for Tuesday publication.

IT'S FUN BEING AT THE CENTER OF ATTENTION

Mustang Village will be giving away trips to Jamaica, Hawaii or Mexico. Our drawing will be held at our gala live broadcast BBQ on KSLY May 17. Stop by our office and register to win anytime.

Hours: Mon-Sat 9am-5pm
Sunday May 18 9am-5pm

- Five laundry facilities
- Creekside balconies
- A place to study
- Convenient to banks and shopping centers
- Under New Management

One Mustang Drive•SLO•(805)543-4950
By Sally Kinsell

Cal Poly students are reminded each day of their mascot, thanks to a life-size statue of a mustang sculpted by an animal and veterinary science professor.

The horse is the result of more than a year of planning and work on the part of Roy Harris, who has been teaching at Cal Poly for 33 years and sculpting in his spare time for more than 10 years. The finished piece now resides in a small plaza area between the University Union and the Administration Building.

The mustang sculpture is one of the few life-size sculptures he has made in his career, said Harris. Most of the sculptures he has done have been smaller in scale, he said.

Harris said he became interested in art work at an early age, but the opportunity to actually become a sculptor did not present itself until later in life. "Even though I have been interested since I was younger, either the time was not right or my activities were not conducive to artwork."

In 1972, Tom Johnston, head of the art department, influenced Harris to become involved in sculpting, and offered to teach him the mechanics and techniques, said Harris. Previous exposure came from his sister, who is an excellent artist, he said.

His main interest in the field is Western bronze sculpture. This includes horses, cows and cowboys — things that he is familiar with, said Harris. Having been born and raised on a horse ranch in Idaho, Harris said he felt he really knew the horse anatomy enough to sculpt it. "But it's surprising how little you know, and how much study is required, when you start to do the art work."

Harris does his sculpting in his spare time out of two studios in his home. One he uses as a type of showroom for his work. The other is used to work on his lifesize and monument pieces.

Besides the mustang, another large project that Harris has worked on was sculpting two life-size bronze skiers. The rest of his sculptures have been smaller projects such as 150 editions of a smaller Mustang, 12 editions of the McLintock's cowboy and a sculpture of 10 Arabian mares for the Prince of Spain, Harris said.

"Most of my work at this point in time is large- ly commission work," he said. Usually he has anywhere from two to four commission pieces he S C U L P T O R , page 9
Recondo Club fights ‘friendly guerillas’ in weekend exercises

By Julie Anne Lauer  
Staff Writer

Dodging snipers, avoiding ambushes and maneuvering through the hills of Camp San Luis were all in a day’s fun for the members of the Cal Poly Recondo Club as they conducted their final advanced patrolling field exercise of the year on Saturday.

The day-long exercise was designed to test the skills the recondos have acquired during the past year in a field environment.

The exercise involved splitting the club’s members into three separate groups. Each group was told there were no friendly teams in the area and any contact would be with an enemy force.

The teams were given the map coordinates of a “friendly guerilla fighter” who would give them instructions on how to get to their main objective known as “Civilian.”

Each group’s course was designed so it crossed the paths of the other two groups as well as lead the group into a series of carefully prepared ambushes set up by club officers and army instructors.

“The purpose was to test stamina, stealth, cleverness, tactical abilities and the ability to deal with stressful situations in a combat environment,” said Tam Warren, commanding officer of the Recondo Club.

According to John Esola, a club member and combat veteran, the training received by club members provides the building blocks of confidence and leadership ability while learning to handle a wide variety of problems.

Major Edward E. Hampton, the club’s adviser, believes the recondos receive more than just technical and tactical training.

“They learn how to persevere,” Hampton said. “They develop an attitude of never giving up that can help them in their everyday lives.”

Building self-confidence and mental and physical poise is one of the objectives of the program.

Participants in the field exercise said they found it to be an excellent learning experience.

“The exercise provided a lot of experience,” said Robert Anthony, an ROTC cadet. “It is a way of getting a head start on everyone else.”

Many of the members of the Recondo Club will go on to careers in the military and these exercises provide good practical experience.

“You can do a lot of classroom and simulated exercises but until you engage an enemy you don’t know how you will react,” said Mike Gervasoni, a Marine officer cadet.

The leaders of the field exercise were very happy with the outcome of the operation.

“I am very pleased with the performance of the recondos,” Warren said. “They are a top-notch unit, a very motivated and dedicated group.”

Black market steroids. They're commonplace among amateur and professional athletes to help in building strength. But the drugs have side effects that can harm those who use them.

By Julie Anne Lauver

Bodybuilders and other athletes sometimes use steroids because they help build strength and muscle mass. This and drugs give users a physical advantage over an athlete with identical training who has not used steroids.

Hayek's research includes a review of past studies and an in-depth research into the drug's effects. Carefully measured amounts of the steroid administered to mice are being used to help determine how the body as a whole is affected by the drug. Hayek said the amount of the drug administered to the mice is proportionally equivalent to the amount used by some local bodybuilders.

The effect of the steroids on the animal is that muscles, fertility and offspring are the focus of their study. Forty mice are involved in the experiment, which includes the test mice and a control group.

According to Hayek's research, close to 99 percent of the men involved in bodybuilding use the drug. The research also revealed a disturbing number of females bodybuilders are also using steroids.

Some of the negative effects of the drug include liver cancer, high blood pressure, infertility and arteriosclerosis (a thickening of the walls of the arteries). Women who use, the drug have been known to develop deeper voices, body hair and other masculine side effects. Many of the long-term effects of steroids are not known yet because in-depth research into the drug's effects have been done only in the past few years.

A Northerner's View of the Central Coast

Editor's note: J.D. Pinkham is a visiting professor in the crop science department. He wrote the following article as a reflection on his stay at Cal Poly.

By J.D. Pinkham

Two years ago last Christmas the temperature in Fargo dropped to a brisk 40 degrees below zero. (The Scandinavian temperature rating system is as follows: 0-20 below, tropical; 20-30 below, cool; 30-40 below, brisk; more than 40 below, nippy.) Add to this temperature a 45 mph wind and we had a deadly little chill factor of 100 degrees below zero. Unreal. Believe it or not, I actually like winter, but that was even too much for me to handle.

The weather is an integral part of the "up northerner" persona. Even the North Dakota state motto proudly proclaims, "40 below keeps out the riff-raff."

There are numerous other sayings associated with the area, for example: "The land of blond hair and blue eyes," "The land of 10,000 Lakes," "North Dakota isn't the end of the world, but you can see it from there," and so on. This latter slogan is actually true. Drive to Frozen Duck, North Dakota, take the first right after the grain elevator, go three miles and there you are. Unfortunately, the "End of the World" state park and scenic view never became the tourist attraction the state hoped it would.

In fact, few travelers actually seek out North Dakota as a vacation paradise. The folks who live there think that's just fine, thank you. Partial blame can be attributed to the constant wind which is strong enough to blow television and radio signals away from houses uphill only to be picked up by everybody three states downwind. The wind begins in the far northern reaches of Canada and rumbles and howls into the state with only barbed wire fences and water towers to slow its progress. That's the other problem: there are no hills to speak of and fewer trees. Then there's that cold again. Awesome, nose-numbing, bone-busting cold. More than once a passerby on the street has had to perform the humanitarian act of kicking some poor dog off of a fire hydrant. Spit cracks and freezes before it hits the ground, windows crystallize and shatter and match flames freeze before they reach a cigarette.

On the other end of the spectrum is summer. Once the great Fargo glacier begins to retreat (around June or so) temperatures of 100 degrees with matching humidity are not uncommon. "Nine months of winter and three months of tough sledding" is a popular saying. Did I forget to mention the mosquitoes? The locals refer to them as the state bird or flying syringe. I'm not just talking about one or two, but enough of the beasts to blot out the sun.

What could be stranger than living in a place like this? Actually enjoying it. I must confess, I number myself among this bizarre group and I don't mind saying my wife and I were quite sad when we left North Dakota to assume my job at a southerly university. The Seeling to step from behind a snow drift and utter, "Submitted for your approval, a young graduate student wondering a land

Zeta Tau Alpha, Theta Chi top Greek Week competition

The 1986 Greek Week came to a close Sunday with an awards ceremony at Delta Tau fraternity.

Zeta Tau Alpha sorority with a total of 290 points and Theta Chi fraternity with a total of 281 points took first place overall in the Greek Week competition. The week's events started with a volleyball tournament and ended with the Greek Olympiad at Port San Luis on Saturday.

Finishing behind Zeta Tau Alpha was Gamma Phi Beta (270), Alpha Phi (260), Alpha Chi Omega (207) and Sigma Kappa (185). Behind Theta Chi was Sigma Alpha Epsilon (271), Lambda Chi Alpha (254), Sigma Nu (169), Phi Psi (155) and Beta Theta Pi (150).

Greek Goddess was Francine Ming from Gamma Phi Beta. Runnerup was Julie Florini from Alpha Chi Omega; third was Chris Papoulias from Alpha Phi.

In the bike race, Alpha Chi Omega took first, Zeta Tau Alpha second and Gamma Phi Beta third. For the fraternities, Theta Chi took first, Delta Sigma Phi second, Sigma Alpha Epsilon fourth and Phi Kappa Psi and Lambda Chi Alpha tied for fifth.

In the volleyball competition, Alpha Phi won first, Sigma Kappa second and Zeta Tau Alpha third. For the fraternities, Delta Sigma Phi won first, Beta Theta Pi second, Sigma Nu third, Delta Tau fourth and Sigma Alpha Epsilon fifth.

In the swim races, Gamma Phi Beta took first, Alpha Chi Omega second and Alpha Phi third. For the fraternities, Alpha Sigma was first, Sigma Alpha Epsilon second, Delta Tau third, Alpha Epsilon fourth and Phi Kappa Psi and Delta Sigma Phi tied for fifth.

In the wrestling competition, Lambda Chi Alpha took first, then Beta Theta Pi, Delta Tau, Sigma Alpha Epsilon and Alpha Epsilon Pi.

In the Greek Sing competition that was held in Chumash Auditorium, Gamma Phi Beta won the sweepsites award with their navy theme and tap dancing. Behind Gamma Phi Beta, was Alpha Phi in first place, Sigma Kappa in second and Zeta Tau Alpha in third. For the fraternities, Lambda Chi Alpha won first with "Pee Wee Greek Adventure" and their salute to the song "We Are The World." Sigma Nu took second, then Sigma Alpha Epsilon, Phi Psi and Alpha Sigma.

On Saturday at Port San Luis was the Greek Olympiad. Greeks competed in various events throughout the day. Zeta Tau Alpha took first, then Alpha Phi and Gamma Phi Beta. For the fraternities, Lambda Chi Alpha was first, then Sigma Alpha Epsilon, Beta Theta Pi, Sigma Nu and Alpha Sigma.

Saturday afternoon the annual chariot races took place on the beach at Port San Luis. Delta Sigma Phi won first, then Alpha Upsilon, Sigma Alpha Epsilon, Alpha Gamma Rho and Delta Tau.

In the car rally, Zeta Tau Alpha took first, then Sigma Kappa and Alpha Omicron Pi. For the fraternities, Lambda Chi Alpha took first, then Sigma Alpha Epsilon and Phi Kappa Psi.

The new Interfraternity Council officers were also announced on Saturday. President for the 1986-87 year is Jeff Toll from Delta Tau, vice president is John Fricks from Sigma Nu, treasurer is Jay Hansen from Phi Kappa Psi, secretary is Brett Yokom from Delta Tau, rush chairman is Galen Thomas from Sigma Alpha Epsilon, social is Brian Ternan from Alpha Upsilon and sports is Pete Back from Lambda Chi Alpha.

Outstanding Greek for the sororities is Laura Humeecke from Alpha Chi Omega and for the fraternities, Paul Gendron from Phi Kappa Psi. They were each presented with a plaque.

HAMPSTEAD, N.C. (AP) — Firefighters on Monday contained a 14-mile-long blaze that has consumed 70,000 acres in its weeklong, erratic path through swampland southeastern North Carolina. As about 75 fresh firefighters were rotated into to fight the fire, officials hoped steady winds would keep the flames away from populated areas to the north. More than 5,000 people have been evacuated but only two buildings have been destroyed.

SCULPTOR

From page 5

is working on at a time. “I've never been to the point where I don't have a project that I am working on ... I think that I am really lucky that I've been able to keep going.”

Harris said he has found his career as a sculptor very satisfying. “It's been rewarding financially and emotionally ... it's a way that I've been able to vent my creativity.” He added that he plans to retire from teaching within the next two years and will then pursue sculpting full-time.

By afternoon, the fire had closed ranks with a smaller blaze but Feldman Corn of the state Division of Forest Resources said it had been contained.

“Right now the fire does have lines around most of it,” said Rebecca Richards, a division spokeswoman. “We don't know if they're going to hold yet.

“We're going to wait and see what the wind does and we just hope it's not as erratic as it has been,” she said earlier in the day.

A thick layer of gray smoke clinging to smoldering remains of pine forests in Pender County, obscuring the flames from spotter airplanes.

Women capture CCAA track title

There were no surprises Saturday at the CCAA Women's Track and Field Championships in Pomona — the Mustangs brought home their sixth championship title.

The Mustangs scored 216 team points, which is a new CCAA record. Cal State Northridge finished second with 180 points and Cal Poly Pomona was third with 119.

"We had an outstanding meet," said Mustang coach Lance Harter. "We didn't load up either. We could have stacked certain events to get more points but we didn't need to."

Sharon Hanson shattered the CCAA Championship meet record in the 400-meter hurdles by almost three seconds. The old record was 62.1 set in 1983 by Chris Dubois, also from Cal Poly.

Hanson's record time was 59.8 which also broke the School record at Cal Poly. Laurie Hagan finished second in 60.8.

Patrice Carpenter also had a big day, winning the 100, 200 and 400-meters to anchor the winning 4 X 100-meter relay team. She won the 100-meters in 11.63, the 200-meters in 24.06 and the 400-meters in 53.90.

The Mustang 4 X 100-meter relay team of Felicia Saville, Hagan, Lynette Farum and Carpenter dominated the event coming in a strong first place with a time of 46.13. The next closest team was Northridge, coming in more than a second behind at 47.21.

Hagan, Karen Dowell, Saville and Hanson teamed up in the 4 X 400-meter relay to take first with a time of 3:47.47.

The Mustangs scored 216 points to break the point total record without the help of national qualifier Celeste Paquette in the discus. Paquette was disqualified at the event because of "an illegal implement," Harter said.

"Paquette had the leading throw in the competition, but was disqualified when it was discovered that the bearing in the middle of the disc was too big."

"It was too bad because it wasn't Celeste's (Paquette) fault; it was a manufacturer's defect," Harter said.

But Harter said the disqualification probably motivated Paquette to come back in the shot put. Paquette heaved the put 47'11" to place second in the event.

Kathy Kahn picked up the slack for the Mustangs in the discus, with a winning throw of 132"70. Emily Erthoging also picked up points for the Mustangs with a third-place toss of 42.64.

The Mustangs also scored big in the 200, 1,500-meters. Jill Ellington won it in 4:25.06, followed by her teammate Lori Lopez in second place in 4:26.41. Kathy Hildebrand placed sixth for the Mustangs with a time of 4:42.04.

Glades Priester won the 400-meters for the Mustangs in 2:07.65. Ellington placed fourth in 2:11.48 with Karen Dowell right behind her in fifth at 2:11.75.

The Mustangs are now preparing for the NCAA Division II Championships which will take place at Cal State Los Angeles May 21-24. If their season record is any indication of how the Mustangs will do, they should run away with it.

Carew gives up hopes of playing in majors

LOS ANGELES (AP) — Seven-time American League batting champion Rod Carew said Monday he has given up hope of playing major league baseball again.

"I don't have any hopes of anyone signing me," Carew told The Associated Press by telephone from his Anaheim Hills home. "I'd like to play, I don't understand what's going on but I don't sit around thinking about it, worrying about it. I'm just going on with my life."

"If that's the way it's going to end, that's the way it's going to end. If it's not in your control, there's not much you can do."

Carew, 40, was the California Angels' leading hitter for five of the past six seasons, including last year when he batted .300. He said last year that he wanted to play the 1986 season, then retire.

The Angels, however, decided during the off-season that they would give Carew's first base job to rookie Wally Joyner and didn't offer Carew a new contract. Joyner, 23, has been a big success, hitting .316 with 10 homers and a major league-leading 29 runs batted in.

"Carew earned $900,000 with the Angels last year and his high salary might have scared off potential employers, but he has emphasized that he would play for less."

"I'm enjoying myself, I've really gotten involved with my girls' softball team, trying to teach them," he said. "We're winning, it's been fun."

Carew said that Angels' standout Reggie Jackson has continued to stay in touch with him, and he appreciated that.

"I'm just sitting back and applauding what he's doing," Carew said of Jackson, who hit his 536th career home run Sunday, tying him with Mickey Mantle for sixth place on baseball's all-time home run list.

Jackson will be 40 next Sunday.

Carew has a career batting average of .328. He hit 300 or more in 15 of his 19 major league seasons and collected his 3,000th career hit last August.

But, as he acknowledged, he hasn't been a over hitter and hasn't driven in a lot of runs in recent years.

"I don't know what more I could have or should have done," Carew said. "I think we all have some shortcomings in our talent."

"It's always in the record what I've done in my 19-year career."

Bucks go to Boston with hopes of win

BOSTON (AP) — Beating Milwaukee in all five regular-season meetings doesn't mean Boston will keep beating the Bucks in the playoffs, Celtics' forward Kevin McHale said Monday. He has other reasons for believing that.

McHale watched on television as Milwaukee edged Philadelphia 113-112 Sunday afternoon as his team prepared for its Eastern Conference final series against Boston Garden Tuesday night. He wasn't impressed with either club.

"Neither team is playing so well that you say to yourself, 'We'll take one of them,'" McHale said. "The whole time I was watching the game I was saying, 'If we play the game I was saying, 'If we'

The Bucks, though, are approaching the best-of-seven series against a club which has won 74 of its 93 games this season, in the only logical manner.

We're going in there expecting to win,\(^\text{1}\) Milwaukee forward Terry Cummings said.

Three of Milwaukee's eight home losses were to the Celtics.

The average margin of Boston's five victories was 10.2 points. The Celtics outscored the Bucks four times in five games since last Tuesday.

"They've got a little more tired than we are," McMahon said. "We couldn't keep up, little rusty. They could come off a big emotional victory really high. We've got to take care of ourselves in the first quarter tomorrow (Tuesday) night and then after that we'll probably get into our flow,\(^\text{2}\)

**Bucks**

From page 10 play our game, we're going to do real stuff against other teams.\(^\text{1}\)

The Bucks, though, are approaching the best-of-seven series against a club which has won 74 of its 93 games this season, in the only logical manner.

We're going in there expecting to win,\(^\text{1}\) Milwaukee forward Terry Cummings said.

Three of Milwaukee's eight home losses were to the Celtics.

The average margin of Boston's five victories was 10.2 points. The Celtics outscored the Bucks four times in five games since last Tuesday.

"They're going to be a little more tired than we are," McMahon said. "We couldn't keep up, little rusty. They could come off a big emotional victory really high. We've got to take care of ourselves in the first quarter tomorrow (Tuesday) night and then after that we'll probably get into our flow.\(^\text{2}\)

Bucks are going into Boston Garden where the Celtics were 37-1 during the regular season and are 5-0 in the playoffs.
the shelves may walk out of the library without asking, the circulation desk to retrieve the materials. Neymer says weeding is a big job, and money will have to be budgeted for this purpose if an effective job is to be done.

The state Department of Finance is currently pushing for a policy to eliminate the need for future library space within the CSU. According to a statement by the Department of Finance: "Once the Legislature has provided sufficient space to accommodate library needs, it is up to the CSU to develop the operational strategy to insure that future growth will not result in the need for additional space."

A proposed statewide policy would work with a three-tiered storage scheme to include on-campus storage (such as Dexter), off-campus storage and discarding of materials no longer needed.

The Chancellor's Office has decided, however, that off-campus storage is not a good idea for academic libraries where quick access is necessary, although such facilities are currently in use for many research-oriented institutions, including the University of California.

Also, there may be questions as to what items are truly no longer needed. What some professors and librarians consider useless may not coincide with what others consider useless.

The Department of Finance is planning for the CSU's system-wide library collection to stabilize at 21 million volumes in about 10 years. Once a stable collection is reached, the CSU must discard as many volumes as it acquires each year.

Adalian says he doesn't know how the Department of Finance came up with the figure of 21 million volumes.

According to figures provided by Adalian, Cal Poly annually adds 19,997 volumes to its library collection. This takes up approximately 2,000 square feet per year.

There is 6,374 square feet left for growth in the library, and 8,077 square feet in Dexter. Based on CSU space formula and current available space, the Kennedy Library has seven years of growth if the collection continues to grow at the present rate.

There are other solutions being developed to curb library growth problems.

CSU Northridge is considering an automated access facility to solve problems of overcrowding at its Oviatt Library. This facility would be like a warehouse full of bins of books in dense stacks. Each aisle would contain a column with a mechanical retriever. Patrons would give the card catalog number to a computerized circulation desk, and the bin containing the book would be retrieved.

This system is seen as cost effective when compared to traditional library construction. In 1984 the total projected cost for a traditional library building at Northridge was $271.1 million. The projected cost of expansion with the automated access facility was $114 million, according to the HBW report.

Further use of microforms is also encouraged by the report, but there is no uniform opinion among library professionals regarding the role of microforms.

The report rejects on-site compact storage because it consumes too much staff time and such storage does not provide a long-term solution.

Adalian says comprehensive weeding of materials will probably be the direction taken by the CSU to approach zero collection growth.

On Thursday the implications of discarding library materials in order to make room for new items will be examined. Also, the growing role of computers in libraries will be examined as the Kennedy Library plans to replace the card catalog with computer terminals in the 1987-88 fiscal year.

---

SLUGS

From page 1

Sea Lions as a mascot for the seaside campus.

"It's a symbol of the ideology involved, not just what the mascot's going to be," said Eric Satzman, chairman of the Student Union Assembly, which sponsored the mascot election. He noted that "this university is in a period of transition. There's a lot of pressure to make it more traditional."

Students want progress, he said, "but we want to maintain some of our non-football mentality."

Students have for years used the Banana Slug as a de facto symbol of the school. The matter had originally been scheduled for a vote during regular campus elections held last month but was pulled because Sinsheimer felt it "inappropriate."

Banana Slugs was one of six nicknames on a ballot and students selected that over Sea Lions.
