Water rationing approved during heat wave

City Council denies post-March 15 building proposals

By Mark Ashmeyer

Water rationing has arrived in San Luis Obispo. At 1 a.m. Thursday, the City Council reached a consensus on a proposed water rationing plan, as defined in the public utilities' proposal. The council also adopted a building moratorium that calls for a halt to new construction through March 15. The action came after council members were shown the contents of the proposal presented to the council after March 15. Consideration of the moratorium will be heard in July if water conditions don't worsen. The entire project will cost $230,000.

The council chamber was full. Some of the public was seated in the rear door to watch the proceedings.

The decision was not an easy one. The council had been meeting starting at 7 p.m. Wednesday, and for five- and-a-half hours to complete.

Public Works Director David McFarland, by stating how much public water, as opposed to reservoir water, the city of San Luis Obispo uses per year and what could be done to change that. Overall, we can reduce our consumption by 50 percent," said Romero.

McFarland explained her theory of trash disposal.

Overall, we have to reduce our consumption by 50 percent.

— David Romero, Public Works director

"Right now the city uses 155 acres feet per year.

To use more water on important areas like Mission Plaza, we need to cut out on other areas such as playgrounds. We could also cut down on the number of toilets and use port-a-potties instead. Romero also mentioned sacrificing other items like shrubs and trees and the discouragement of any new tree planting or landscape architecture.

Romero said that "it will mean a drastic change to the city's lifestyle, but if it will save water."

McFarland presented to the council for an overall 20 percent reduction in water use. This will result from a combined effort by the residential, commercial/industrial, and institutional parts of the city. The plan includes a 25 percent reduction with seasonal allowance requires residential consumption to be cut by 25 percent, commercial/industrial use by 10 percent, and institutional consumption by 30 percent.

The system starts off by determining a customer's target allocation. For this, an average amount has been determined based on what type of facility a customer resides or works in. Another consideration would be family size. Once the amount of water allocated is figured, the customer may use up to this amount.

"It is our goal to let everyone know what their targets are by May 1," said Water Division Manager Allen Shockey.

The council discussed five ways to fine customers who do not comply with their quotas. A two-tier percentage surcharge would be the most heavily favored.

This system will fine a 100 percent surcharge when there is an increase above the target allocation. If the customer exceeds the base-year consumption, the surcharge will go as high as 200 percent of the total water bill. When a customer exceeds the customer twice within a year, a flow-restrictor may be installed.

New Poly rodeo queen crowned

Rides off the sunset after a tough competition

By Jenny Midgarden

The winner's saddle didn't arrive until an hour before its presentation and the former queen's crown broke. Despite those few hitches, the new Cal Poly rodeo queen was crowned Wednesday night after two days of competition.

Kellie McParland, a junior animal science major, competed in riding, Western and semi-formal fashion, personal interview and extensive and prepared speaking events on her way to the win.

McParland's hometown is Clements, Calif. where she started her horseshow career. She was the first runner-up in the 1988 Miss California Rodeo crown broke. Despite those few hitches, the new Cal Poly rodeo queen was crowned Wednesday night after two days of competition.

Editorial

City council shows guts with water measures

The combination of a three-year drought and a growth spurt has left San Luis Obispo with a serious water shortage. The sources of water for SLO — Whale Rock Reservoir and Santa Margarita Lake — are drying up. Whale Rock is down to 33 percent of its normal capacity, and Santa Margarita is only 63 percent full. There have been drier spells, but a larger population is draining the reserves.

Serious situations call for serious measures. The City Council took the first step Wednesday by instituting a building moratorium as well as water rationing. In addition to an immediate cut of 33 percent for single-family house residents and a 15 percent cut for apartment dwellers, no building will take place in the city. Only projects approved by mid-March can continue.

We applaud the council for its bold move in the face of opposition. Developers are often large contributors to election campaigns. With three seats up for re-election this year, this conservation plan may very well be one of the issues.
FIRE

From page 1

A temporary wood wall at 725 Higuera St. is all that is left of Et Cetera of SLO. on Monday night after a fire left the store in ruins.

"A fire destroyed Et Cetera of SLO and gift store, and the Party Exchange, a party goods store, the building was the site of last summer's fire. The shops were open late the night before, which was phoned in to 911 at 7:52 by an Et Cetera employee during a typical night's work. Andy Barton, part owner of Et Cetera of SLO, said that more than $100,000 was in the store at another location on Higuera Street within the next two weeks.

The Party Exchange suffered merchandise and equipment losses totaling approximately $100,000, said William DeMyers, owner of the business. DeMyers, who also owns a party goods store in Santa Barbara, plans to reopen in a shared building with Et Cetera again.

In addition to those stores, businesses on both sides of the gutted building received varying amounts of damage.

Bill Callahan, owner of Traders West, a jewelry store, said the fire caused little harm to his business. "We don't have much damage, just ceiling tiles." The amount of structural damage caused to the building that previously housed Delite Bakery, out of business since January, has not been determined yet, said owner June Wessel. Once the repair work is done, Wessel said, the building will be available for lease.

Smoke damage to the merchandise at Fanny Wrappers, a lingerie store, was so great that the store has temporarily closed since the fire. Terry Treats, owner of the business, said about 8,000 pieces of lingerie valued at $60,000 were destroyed by smoke damage. The lingerie store is not scheduled to reopen until April 13, although Treats said problems in getting the smoke smell out of the store may delay the opening until April 15.

Investigators from the California State Fire Marshal's Office were called in to help determine the origin and cause of the blaze.

"The fire was determined to be incendiary in nature, caused by an unidentified suspect, according to available combustibles (cardboard boxes containing a recently resubmitted proposal for enlargement of the student union)."

The current sprinkler ordinance in San Luis Obispo was adopted in 1984 and met too much resistance to be implemented. The ordinance was amended in 1985 to require that all new construction have sprinklers. Willis said that less than 3 percent of buildings in the county have sprinklers. "The ordinance was written without the 4,300 square foot specification, but Willis said it was more than 10 percent that are currently being installed as such.

"If there were a fire in a building with the 4,300 square foot specification, but Willis said it was more than 10 percent that are currently being installed as such. None of the buildings in the county have sprinklers. We compromised to get anything at all.

"The business people of the community, the contractors and developers, are looking for any sprinkler ordinance, and they fought that one off."

New sprinkler laws may be considered

By Sharon Sherman

A downtown fire last month that gutted a building and dam­aged 1,200 businesses in the area was likely to lead to amendments in the current sprinkler ordinance in San Luis Obispo. The building and the two businesses within it could have been saved if the building had had a sprinkler system, said Er­win Willis, city fire marshal.

"Sprinklers are 99.7 percent effective in putting out fires," Willis said. "So we're 99.7 percent sure that had there been sprinklers, it would have closed for the night, there would have been no clean-up the next morning and then we would have opened at the same time that morning." After the Higuera Street fire, Willis said, a council member asked that the fire department look into the feasibility of installing a more comprehensive sprinkler ordin­ance.

The current sprinkler ordinance was adopted in 1984 and requires that all buildings of more than 4,500 square feet install sprinklers. Existing buildings are not required to install them.

Although that ordinance is more demanding than what the building and fire codes call for, Willis said that less than 5 percent of buildings in the downtown area are actually required to have sprinklers.

The current ordinance was written without the 4,500 square foot specification, but Willis said it was more than 10 percent that are currently being installed as such.

"If there were a fire in a building with the 4,500 square foot specification, but Willis said it was more than 10 percent that are currently being installed as such. None of the buildings in the county have sprinklers. We compromised to get anything at all.

The business people of the community, the contractors and developers, are looking for any sprinkler ordinance, and they fought that one off."

Proposal for music major resubmitted to university

Kathryn Brunello
Staff Writer

A proposal to make music a major at Cal Poly has been resubmitted and is currently being reviewed by the Academic Senate and administration.

"Because the university is scheduled to enlarge (student enrollment), the creation of this department won't take away from other majors," said Clifton Swanson, head of the music department. "The higher enrollment will give us space to implement this new program.

The proposal, which combines music and music technology, is not considered to be a significant financial hurdle by those who resubmitted the proposal earlier this year.

An original proposal was made in the early '80s by the music department and was passed by the School of Liberal Arts but was never progressed any further than that. Now, the new proposal has been passed by the School of Liberal Arts and is presently waiting approval by the Academic Senate and higher ad­ministration.

If approval is given by the administration, the proposal will go to the CSU's Chancellor's Office for final acceptance.

Swanson said, "the major brings together a sense of tradition with an opportunity of technology in music." Although technology won't be the emphasis, the music major will allow students the newest developments in the music field.

The proposal also includes a request for better facilities, which Swanson said will remain even if the proposal to make music a major is not granted.

Cal Poly is presently the only state university that doesn't offer a music major. A music minor at Cal Poly takes 28 units and there are approximately 30 stu­dents actively participating in the program.

The oboe is an ill wind nobody blows good.

Ban on Solidarity to be lifted

WARSAW, Poland (AP) — A government minister said Thursday the seven-year ban on Solidarity would be lifted immediately, and Lech Walesa urged supporters to put their "political victory" into action by organizing nationwide.

"The process of legalization of Solidarity should be completed between April 15 and April 20," said Sports Minister Aleksander Kwasniewski, a chief negotiator for the communist government in two months of talks with the opposition that concluded Wednesday in a broad accord.

Kwasniewski said the Sejm, or parliament, would meet Friday to enact the agreements on trade union freedoms, economic reforms and political changes, including creation of the first freely elected legislative body in the East bloc.

Walesa, looking relaxed at a news conference after a grueling week of negotiations, outlined the tasks his independent trade union faces. But he warned that the agreement could lead to disaster if Poland failed to take advantage of the changes.

"The most important task for today is to write applications immediately all over the country to provincial governors and city mayors so we get the technical possibility to organize as soon as possible," Walesa said.

The agreement allows Solidarity to organize on a national, regional and local level after parliament makes the necessary changes in the labor law to permit more than one legal trade union at a workplace.

On the national level, the union plans to form an organizing committee as early as this weekend to apply for formal registration by submitting a new union charter in court, said top Solidarity adviser Tadeusz Mazowiecki.

Today we as Poland have a great victory, but a political victory — a theoretical one which may turn out to be a victory or a disaster if we are not able to make use of it. — Lech Walesa

From Brazil to Taiwan, IP offers students a life-changing year on a Poly budget

It was a calm, cloudy English day on the Thames River when Kingston Polytechnic in England saw its first Poly student arrive in their host country. The whole Kingston team was celebrating, including one team member, a student from Cal Poly.

On the opposite end of the world, the Masey University mountaineering club made it to the top of the highest mountain in New Zealand's north island for the first time in four years, and another Cal Poly student shared the experience.

These students, Rachel Bray and Tonya Conner, were two of nearly 80 Cal Poly students who live and study overseas each year through the California State University International Programs (IP). This program allows CSU students to study at foreign universities while paying CSU tuition and getting CSU credits.

This year is IP's 25th anniversary. IP has more than 500 CSU students study overseas each year. There are over 80 students, all coursework transfers, and all financial aid except work study applies. The IP office assists students in academic planning, transportation, and housing before and after students arrive in their host country.

Bill Killian, who studied in Mexico, said "My every need was met by the IP people. I really appreciated it because it was my first time out of the country." Killian found that it was much cheaper for him to study in Mexico. In his financial aid had to be lowered to adjust for the cheaper living expenses.

Marilyn York, the coordinator of International Programs at Cal Poly, said finances should never be a deterrent. There are scholarships, fellowships, and grants and the cost is comparable to a year at Cal Poly.

For students to be eligible for IP, they must have a 2.75 to 3.0 minimum GPA, their major or long term goals must fit with the program to which they are applying, and they must have junior standing.

Despite the requirements, Cal Poly has a 90 percent acceptance rate. Cal Poly sends more students to IP than any other 19 CSU campuses. Next year 465 students from the 19 campuses will be studying overseas. Of those 80 will be from Cal Poly.

The Quest to be the Best is a Team Effort

TEAM HARVEYS

Harveys resort Hotel/Casino, located in beautiful Lake Tahoe, will have representatives at Cal Poly on April 12 & 13 to conduct interviews for full-time and summer positions. Employment opportunities are available in the following areas:

- Food & Beverage
- Hotel
- Casino Dealers (1 week school)

Contact the placement center to set up an interview and ask about our $200 summer incentive.

Be a part of the winning team. Harvey's, the newest and best resort hotel/casino at Lake Tahoe.

WATER

From page 1 in the customer's water supply line at a cost to the customer, or the surcharge may be increased.

If a customer exceeds the allotment three times within a year, the city reserves the right to terminate the water service, in addition to imposing the surcharge.

Short, Water Conservation Coordinator Tina Metzger and Utilities Director William T. Heiland also created a policy for enforcement. On the first offense, customers will receive a written warning. The second time they will receive a citation. On the third offense customers will have the flow-restrictor placed on their water-supply line at their expense and the fourth offense will result in a two day termination of water services.

"We hope that it doesn't come down to having to terminate services," said Short, "but if it does, we're ready to do it."

Other uses of water prohibited in the policy include using water from fire hydrants for any reason other than the health, safety, and welfare of the public, and uncontrolled runoff from property owned. There are exemptions from these prohibitions, and residents must fill out an application to see if they qualify.

In order to enforce these rules, Short said that a team of "water cops" will patrol San Luis Obispo. There will be round-the-clock patrol shifts to discourage people from attempting to use water at irregular hours.

South County Students: LEAVE HOME WITHOUT IT!!

Tired of the park and hike scene? The drive getting you down? How about the $36 per quarter parking permit fee or the $15 to $25 parking tickets? Worse yet, is the $800 to $2,500 annual cost of driving your car between the South County and Cal Poly.

SO LEAVE YOUR CAR AT HOME... AND RIDE SLO-SCAT!!!

You could save up to $1,900 annually and eliminate your parking problems and costs. SLO-SCAT makes three round-trip weekday runs between Arroyo Grande, Grover City, Shell Beach, Pismo Beach and San Luis Obispo, including a loop through Cal Poly. The cash fare is only $1.25 and monthly passes are available at a low $45.

FOR INFORMATION REGARDING SLO-SCAT AND OTHER BUS SYSTEMS CALL 541-CARS, M-F, 8-5 p.m.

Author released early from jail

SAN LUIS OBISPO, Calif. (AP) — A novelist and former Hollywood screenwriter jailed for stealing thousands of books from more than 70 libraries in two countries released 88 days early so he could get back to work.

Author Michael Herr, 41, who co-wrote the screenplay for the 1987 film "Full Metal Jacket," had also become a "high profile prisoner and the subject of verbal and written attacks from other prisoners," said Orlan Donley, Herr's attorney.

Herr was released Tuesday, 28 days before he would have been eligible for parole and 88 days before he would have finished his six-year sentence.

Donley said San Luis Obispo County Superior Court Judge Warren Conklin that Herr had a chance to go to France to work on a movie based on a book Herr recently had published. Herr's also working on a deal with a publisher for three more books, Donley said.

Herr's income depends on his writing and he can't write in jail, the attorney argued.

Conklin said he released Herr because the writer had a job, had agreed to pay restitution and agreed to let authorities determine which books belonged to the writer and which should be returned.

Herr can go out of state and travel out of the country, but he must report to his probation officer in writing, Conklin said.

Herr wrote "The Short-Timers," based on his experience as a combat correspondent with the 1st Marine Division during the Tet Offensive of 1968.

Stanley Kubrick purchased the rights and Herr and shares screenwriting credit on "Full Metal Jacket" with Kubrick and Michael Herr. The screenplay was nominated for an Academy Award in 1987, but the honor went to authors of "The Emperor."
Contests: fun, but no sex

Contest lures entries of airplanes, jewelry

By Mtral Katz
Health Center

There are more uses than one for what was once merely a convenient form of birth control.

And many of the inventive uses for condoms were displayed in the University Union Wednesday as part of the first annual "Most Original Non-Use of Condoms" contest.

The contest, sponsored by the Mortar Board Honor Society and the Cal Poly Health Center, was part of a two-day AIDS Awareness Event held Tuesday and Wednesday.

The main purpose of the contest was to "have fun and to demystify the use of condoms," said Carolyn Hurwitz, a health educator with the Health Center who helped organize the contest.

Hurwitz said that doing something fun like the contest makes it easier to talk about what can sometimes be a difficult topic to discuss.

"But just having pamphlets available you're not really doing anything," she said. "What we're going to pick them up?" "If we do something like this and people talk about it, then we're getting someone where," she said.

A cardboard figure of GI Joe taking a shot at a condom punching bag stuffed with jello took first place honors and drew a grand prize of $50. The second place winner for $25 was a pair of condom earrings. Other entries included the "Condom Tennis Club" which had condom figures stuffed with flour volleying on a miniature tennis court, a bookmark, a cardboard plane with condoms on its wings, and a "noiseless windchime".

The winners from the nine entries were chosen by a panel of judges representing the Red Cross, the County Public Health Department and the AIDS Support Network.

The contest met with controversy last month when a promotional flyer that depicted a chorus line of cartoon condoms was removed from circulation after receiving several complaints. However, Hurwitz said, the publicity created by the controversy probably helped to promote the event.

Other activities held during the event included a series of lectures and discussions on AIDS by Dr. Richard Keeling, the chairman for the Task Force on AIDS and president of the American College

The Condom Tennis Club and other condom creations highlighted the recent contest.

Health Association. In addition, there was a series of videos shown in the Health Center and information tables on AIDS set up in the University Union.

Hurwitz, who plans to make AIDS Awareness an annual event, called this year's event "successful," and expects it to be much bigger next year.
