Rental rules debated

By Ken A. Forkus

Cal Poly students have temporarily dodged a bullet with a proposed city ordinance on residential rental regulations.

The City Council meeting Tuesday night was packed with students — including members of the Student/Community Liaison Committee and community members debating the ordinance.

The regulations, proposed last April by Residents for Quality Neighborhoods, a citizen group, would tie the number of occupants allowed to the number of available parking spaces. Hearings were delayed until September so students returning to the city could participate.

Students living off campus likely would be most affected by the ordinance. They traditionally room together, increasing the number of occupants per residence, because they can't afford high rents.

The public hearing was postponed until the Oct. 3 meeting of the council because of the large number of people who wanted to speak before the City Council.

Several representatives opposed to the ordinance, including Cal Poly ASI Chairman of the Board Ricardo Echeverria, who also chairs the liaison committee, asked for a 30-day grace period to unify Cal Poly students, most of whom have just arrived back in town.

The ordinance is being proposed as a solution to the traffic, noise, parking and maintenance problems within local neighborhoods. They are concerned over the number of students permitted to reside in a house zoned as single-family housing, most of a city's neighborhoods.

UC Davis adopted a similar ordinance to UC Davis. What was then, This is WOW!

That was then, This is WOW!

From Farmer's Market to Bubblegum Alley, WOWies invade every aspect of SLO life. See it in pictures!

Asbestos stops BA&E plans

By Karen Kondor

Plans to expand the Business Administration and Education building came to a screeching halt this summer at a $1.2 million red light.

Materials containing asbestos were found in the ceilings, pipes and floor tile of the business building, said Douglas Gerard, executive dean of faculties administration.

"The asbestos fibers that are available in probably 90 percent of the buildings on campus are not harmful if disturbed," said Gerard. "Asbestos is a naturally occurring material," Gerard said, "and if you went outside and kicked your foot in the dirt you'd likely stir up some." Whenever construction takes place on older buildings, he said, asbestos fibers are likely to run into materials containing asbestos.

When they do, special steps must be taken to make sure the fibers are removed correctly to prevent any future potential for contamination, Gerard said.

An inspection three years ago identified asbestos only in the piping insulation, said Gerard.

Last summer, however, San Jose State University signed a contract to remodel an engineering building. The contractor suspected asbestos. His suspicions were confirmed and the job was called off until the construction drawings could be reworked to safely get rid of the asbestos.

Since Cal Poly's Business Administration and Education building was also built in the 1940s, Gerard ordered another inspection. More asbestos fibers were found in the ceilings and floor tile.

Construction drawings have undergone an asbestos study.

Bike ban takes effect

By Cyndi Smith

The beginning of school can be confusing: dialing CAPTURE, finding classes and waiting in long bookstore lines.

This year, students can add another confusion to the list thanks to new bike regulations approved by Cal Poly President Warren Baker last month — where to ride and park their bikes.

Cyclists are allowed only in marked bike lanes along the outer perimeter of campus and on Via Canta through the center of campus.

Bikes may only be parked in designated racks along the outer perimeter. The new rules affect skateboarders as well. Skateboards are now prohibited on campus except for special events cleared by police.

Students illegally parking their bikes can expect to lose their locks and their bikes impounded, said Sgt. Steve Schroeder of Public Safety.

Students illegally riding their bikes may also have them impounded.

It will cost $8 to get them back. Schroeder said Public Safety will issue warnings this week and will begin impounding on Monday.

He said student cooperation has been good so far. The many pedestrian/cyclist conflicts last year in the inner core area spurred the new regulations, Schroeder said. They said they were long overdue because "a lot of bikers are not careful of pedestrians."

Some students disagree. Megan Besieddecki, a child and family development senior, said the rule uniformed the practice.

"I think it's ridiculous that the administration let in so many new students that they have to do something like this," Besieddecki said. "The pedestrians don't watch out for us any more than we watch out for them, yet we are the ones having our privileges taken away." Besieddecki also predicts a parking problem for bikes because "all the racks are gone."

New regulations ban bikes and skateboards from the campus core.

Bike ban takes effect

Opinion

Reporter's notebook
Environment needs our daily help

It's your first week at or back to Cal Poly and here's one thing to think about: the world has recycled, reused and reduced its holding capacity. All of us are responsible to keep the planet green. We walk on it, we breathe the air and we see the oceans in which we live.

One thing we can all do is be so environmentally responsible that no one else can hit us where the sun don't shine. We damage them, our oceans are now crying out for help. And again we are responsible.

To all the organizations that do ongoing recycling efforts, thank you! And we will do it through this wonderful media and this is great! Don't let me wrong; it's important to support these groups, but...

It's time we all get back to our roots and evaluate not only ourselves but the roles we play in this great land. I could tell you how to grow your hair out and never cut it, stop wearing leather products and treat a vegetarian before there are no animals left, but this won't help the earth.

This is a message to all! Myself more than the rest. Instead of just donating money to the organizations that are committed to a clean and considering people on their efforts, we need to start within ourselves.

Many companies have begun a cleanup plan already by recycling their materials and kind of Syrofoam, using environmentally-safe packing materials and so forth. But many others still exist that are riddled with habits and practices that are unsanitary and general environmental protection.

The message to individuals is to look at how you live and decide what you can do to help. Then stop thinking about it and do something.

First off, when you are out and pass a piece of paper, can, bottle, etc., pick it up and throw it away. If the trash can is tipped over, don't assume someone else will pick it up. Do it yourself.

We all are familiar with the question, "Paper or plastic?" at the grocery store. News time asks for paper because it's biodegradable. Why the push? I you may ask. Besides, responsible users of our environment, there is a growing problem with landfills. They are filling up fast, and in fact some are closing because they have reached their maximum capacity. So where else can we put the waste?

Why? The push is good for the environment, there is a growing problem and landfills are filling up fast. As a result, some landfills are closing because they have reached their limit. So where else can we put the waste? One place is through recycling.

One thing that I would like to see is a change in how we think about waste. I believe that informing residents how to save paper at Cal Poly is helpful. I feel that the article was ready a problem on the East Coast, as they haul garbage out to sea and dump them near the Continental Shelf. But this is not really a solution either. Trash does wash ashore again. We all have to get our act together to make it work. And that is the real reason for the WOW issue.

And don't forget the San Luis Obispo environment — just look around — this place is beautiful!

What else can you do to help the community? Recycle newspapers, aluminum, glass, cardboard and even motor oil. ECO-SLO, an organization that serves San Luis Obispo County as a full-service recycling center will offer money for all aluminum goods, brass, stainless steel bars, lead, computer paper, glass (including household glass) and California redemption plastics.

You can also bring in for a non-monetary value in newspapers, recyclable goods and even your old textbooks. ECO-SLO is located at 45 Prado Road in San Luis Obispo and is open Monday through Saturday from 8:30 a.m. to 4:30 p.m.

For convenience, San Luis Garbage offers free curbside pickup to students that will not pick up your your trash. The days are for aluminum and glass only; newspapers have to be bundled separately.

But you have to do it; it's in your best interest. This is not a sales pitch; it's a strong reminder to keep in the back of your mind. Remember, there is no point in taking a verbal stand for the environment if we open ourselves to criticism based on the hypocrisy of our actions.

Let's start living our lives. It's not too late to start. Environmentally conscious students are doing it and making a difference. So why are you waiting? Get involved or else you are not doing your part for the environment. Just think of all the people you help. Your efforts will make a difference.

Let's start living our lives. It's not too late to start. Environmentally conscious students are doing it and making a difference. So why are you waiting? Get involved or else you are not doing your part for the environment. Just think of all the people you help. Your efforts will make a difference.

Letters to the editor

Readers unhappy with Daily's WOW issue

Editor — As a resident adviser, I was quite excited to start off the new school year with a "nothing out of the ordinary" issue. After all, it was the first time Cal Poly students, I was happy for them because they would understand the community.

That's what I came across an article by Christine Kohn (WOW issue) about her collections of past residents tales of dorm life at Cal Poly. I feel that the article was misguiding. Christine suggested to the readers that these tales were "nothing out of the ordinary." But they are out of the ordinary. As a resident adviser, it is my duty to report the purpose of the Mustang Daily in raising these misconceptions of resident life at Cal Poly?

I believe that informing residents how to look at their resident adviser's and student residence halls. One way is just put into the dumpster?

President retires

HAYWARD, Calif. (AP) — Ellis E. McCune said he will retire as head of California State University-Hayward at the end of the school year, ending the longest tenure of any president in the state's 20-campus system.

McCune, 68, has served as Hayward State's president for 22 years. The state university system trustees this summer approved a policy that states the campus presidents, chancellor and vice chancellor are "expected" to retire from those positions when they reach age 65.

Hayward spokeswoman Ruth Carlson said Tuesday that McCune had been thinking about retirement anyway, but that the new policy "just sped him up a little bit."

McCune said his retirement would be effective next year.

Short Takes

Techno series set

A lecture series titled "Technology and Ethics: The Rhetoric of Values in Conflict" is being sponsored by Cal Poly's Schools of Liberal Arts and Engineering during the 1989-90 academic year.

The speakers will provide "fresh insights into the topics and direct our attention to the technical and ethical questions surrounding us today," said Glenn W. Irvin, interim dean of the School of Liberal Arts.

The first lecturer will be Howard Ball, dean of the college of social and behavioral science at the University of Utah. He will speak on "National Security at All Costs: Technocratic Complexes in the Creation of Uranium Cancer Factorys" on Thursday, Oct. 12, at 7:30 p.m. at the Cal Poly Theatre.

Susan Doffy, a speech communication faculty member, brought her idea for the lecture series to light with the help of a grant from GTE Corp. and funds from the sure lottery.

There is no charge for the lectures, which are open to the public.

Dept. head chosen

Terry L. Smith begins his new appointment as head of the soil science department at Cal Poly this fall.

Smith, a specialist in soil fertility and plant nutrition, succeeds Bent Hallock who is continuing full-time teaching in the department.

Scott named V.P.

Hazel Scott has been named vice-president for student affairs by Cal Poly President Warren J. Baker. In making the announcement, Baker said Scott's service to the university "has been exceptional."

Scott was dean of students for the past 15 months.

Her new responsibilities include programs in cooperative education and placement services; financial aid; health services; housing; placement; student academic services and educational equity; and student life and activities. Scott will also coordinate and oversee Associated Students Inc.

— D. June Thompson
Bee cool by dropping hot stools

LOS ANGELES (AP) - Scientists say they figured out why thousands of Asian bees leave their nests to defecate together, producing "yellow rain" - the U.S. government once claimed was a biological weapon used by the Soviets.

By relieving themselves of hot deposits equal to one-fifth of their body weight, the honeybees are able to cool themselves and their nests more efficiently, helping their offspring survive and grow, the researchers said in Thursday's issue of Nature, a British science journal.

In a 1981 speech and 1982 report, then-Secretary of State Alexander Haig Jr. asserted "yellow rain" was a Soviet biological weapon used to kill thousands of people in Cambodia, Laos and Afghanistan during the previous decade.

The claim later was discredited by scientists who proved the yellow deposits were bee droppings.

Now there’s more in the Apple Macintosh family to choose from than ever before, with six computers to meet every personal computing need. Start with the Macintosh Plus, the Macintosh SE and the Macintosh SE 30. These integrated systems offer the affordability, ease of use, and consistency of applications traditionally associated with Macintosh. And their compact design makes them easy to transport, wherever you go. Now meet the modular side of the family: the Macintosh II, Macintosh IIX, and the newest member, the very versatile Macintosh IIX. These expandable, high-performance computers can be configured for virtually any task. You choose the amount of RAM, the type of monitor, and the storage capacity of the hard disk, which means you can build a system to handle everything from desktop publishing to scientific and engineering applications. But no matter which system you choose, you’re still getting all the advantages of a Macintosh. See us today, we’ll help you choose wisely.

MOJO: He’s still stuffin’ muffins
By Rob Lorenz

six months ago, Mojo Nixon and his partner Skid Roper came screaming into town to do a show at the Baja Bar to begin their North American tour. On Wednesday, Sept. 27, the minister of madness will be back in town to weave a path of destruction through MOJO's Co.

Mojo, who will be coming off of a month break, will begin the second leg of his tour in Santa Barbara on Sept. 26. After his San Luis Obispo show, he will continue on up the California coast into Canada and as he puts it, "The Great Northwest."

"You should have seen three years ago at the Darkroom," he said in a phone interview from Los Angeles. "We were huge, we were the band of the year. People were just jammed in there. There was a buzz from people on the roof of it, waiting for the show.

"Then there was the show in Cayucos, a couple years back. People were getting pressed up against the stage — it was so tight. You'd think we were the Clash or something!"

Mojo thrives on whipping the crowd into a frenzy, a skill he's "absolutely obsessed with.

"Some have claimed that I've watched vintage film of Hitler and Mussolini," he said. "I've also been told that I'm a cross between Robin Williams and Hitler. I guess I'm just a great exasperating orator.

Nixon said the record of tickets sold to the better run for him to perform. However, the breakdown by

See MOJO, A&E page 4

Poly Arts all set for new season
By Donna Taylor

Cal Poly Arts, modern dancers and acting troupes will grace the Cal Poly Theatre stage in 19 performances throughout the year, and executives of Cal Poly Arts hope high pre-season response is an indication of another successful year.

"Sponsoring programs like these generally lose money," said Ron Reiter, Cal Poly Arts director. "But last year we exceeded our financial goals, meaning we were happy that we lost less than we expected. We had tremendous support from the community.

Reiter said the theater reached an average of 74 percent of its 497-member MoJo Northwest fan base at their last concert, with a total attendance of more than 6,300.

"I think this year will be even more successful," said Reiter. "Several events have already sold more than half of the tickets just from season-ticket sales."

This year for Cal Poly Arts is the production of a four-color brochure, describing upcoming performances and season-ticket deals. It was mailed to the community during the summer.

"We have been swamped in the ticket office since we mailed that," he said.

"I think we'll have a big year again this year," Reiter said. "We need to come to the arts. Here, the theater, don't have to fight the L.A. traffic for tickets."

Programs sponsored by Cal Poly Arts include "metamorphosis," a classical music series; "measure," a theater and dance series; featuring touring companies; Bofe featuring young, emerging artists and Weiss-Speck, presenting prominent creative writers.

See POLY ARTS, A&E page 2

' Storm Reading ': a different kind of play
The Access Theatre Company of Santa Barbara will storm into Cal Poly Theatre Friday night, on the wings of appearances on NIH, a whirlwind national tour and hearty promotion by actor Michael Douglas, one of the company's founding fathers.

In "Storm Reading," the company's 15th production since its founding by Red Larham in 1976. Access Theatre has "the elitist riffing of writer/actor Neil Morris.

"It's not a play, it's not a musical, it's not a drama," Larham said by telephone from Santa Barbara. "It's just spilling an evening with a man, his diaries and his

POLY ARTS

From A&E page 1 (reading and discussing their work)
Cal Poly Arts will also sponsor a different dance film series each quarter. The films of Franconia, who established himself as one of France's most important New Wave directors in the 1960s, will run Monday evenings during fall quarter.
Franconia's film 400 Blows kicked off the series Monday and continues next Monday, Sept. 25.

With Les Miserables and Shout the Piano Players in Chaminah Auditorium.
In addition to its series performances, Cal Poly Arts will present six Special Events throughout the year, beginning Thursday with the Access Theatre Company in "Storm Reading" and accompanying work.
The Quiescence Series begins Thursday, Sept. 29 with the Los Angeles Chamber Orchestra Winds. The CenterStage Series kicks off Oct. 4 with the Ear Libowitch Dance Company, which the New York Times called the best contemporary dance company worldwide for 1986.
Pianist Alan Chow will begin the Debussy Series Jan. 12. Chow was first prize winner of the Concert Artists Guild's International Competition in New York. Regier said new directions Cal Poly Arts has taken this year include diversification of musical productions.
"We think we have presented classical music performances in the past," he said. "But the Masters of the Folk Violin (Oct. 25 and Queen Ida, for example, will offer something different."
The construction of the new performing arts center on campus, which could begin in late 1991, should drastically affect Cal Poly Arts.
"We have major goals for that," Regier said. "We can't afford to wait until the last minute to plan, since it will mean a change from a 500-seat to a 1,500-seat auditorium."

Season ticket packages for this Cal Poly Arts year offer several options. Student season tickets are available for the Quiescence Series ($40 preferred, $45 premium) and the CenterStage Series ($47 preferred, $56 premium).
A Select A-Season package allows the student to choose six of the 19 events for $38 preferred, $46 premium, and the Season Sampler Package three events sells for $52 preferred, $63 premium.
For more information, call the ticket office at 756-1421 or Cal Poly Arts at 756-6556.

From A&E page I

Marcus has dysionia, a rare neurological disorder that affects muscular coordination but not the mind. "Because of his disability, Neil's speech is very laborious and difficult to understand," said Latham, artistic director. "His brother Roger serves as his speaking voice, as does Kathryn Voice, who artistically translates the show in American Sign Language. It's a very unique piece of theatre."

Douglas, whom Latham met in 1980, opened many doors for Access Theatre. He convinced Maria Shriver, host of NBC's "Today, Today and Tomorrow," to feature the theater company in a segment. Douglas also said the company recently performed at the Kennedy Center for an NBC special called "From The Heart," and presented "Storm Reading" at the historic Ford Theatre in Washington, D.C.

Access Theatre's board of directors includes such big names as Douglas, Rue McClanahan of "Golden Girls," singer Kenny Loggins and actor Anthony Edwards. Latham said Marcus has an addictive and comic stage presence.

"This performance destroys the preconception society has put on people who are labeled 'disabled.'" said Latham. "Neil gives us humor and great insight in a personal and wonderfully warm way. What he has to say touches everyone on a common, human level."

The Access Theatre Company has performed at colleges before. Latham said, and will travel to Stanford University after Cal Poly.

"'Storm Reading' plays very well to university audiences," he said. "Most college audiences are progressive, and this show is very progressive. Unlike the average Joe Public, college students are quite open-minded.

"This production has actually been changing lives and left a trail behind as we tour. People tell me they just aren't the same again after seeing it."

- Donna Taylor

"Storm Reading" will be performed Friday at 8 p.m. in the Cal Poly Theatre. Tickets are $8 students, $10 public for preferred seating; $10 students, $12 public for premium seating. All seats are reserved. Call 756-1421 for reservations.

Their way.

You can save literally days of work between now and graduation. Simply by using an HP calculator. To keep you from endlessly retraclng your steps, ours have built-in shortcuts. Such as the unique HP Solve function for creating your own formulas. Menus, labels and prompts. Program libraries. Algebraic or RPN models.

Better algorithms and chip design help you finish much faster and more accurately than their way. So, whether you're in engineering, business, finance, life or social sciences, we've got the best calculator for you. For as little as $49.95. Check it out at your campus bookstore or HP retailer.

Our way.

There is a better way.

Leadership:
A good man can handle it.
You don’t have to look twice to see that this man is in charge. There is a certain strength of character, an undoubted sense of self-confidence, that says he is a leader. Men believe in him because he believes in himself. He is a Marine officer.

If you believe in yourself and would like to find out more about the kind of leader we look for, call First Lieutenant Angus at (213) 254-3736. Who knows, we may not have to look any further than you.

THE FEW, THE PROUD, THE MARINES.

MOJO
From A&E page I
keeps throughout the show limits
the amount of time he can play.
"I got worn out," he said. "I can’t play longer than two hours because if I did, I’d have to pace myself. I go at a ten-mile sprint, not at a 26-mile jog."

Mojo is touring to promote his most recent album, Root Hog or Die. The album features such classics as "Louisiana Live Oak" and the ever-popular "Debbie Gibson is Premium Wash My Two-Headed Love Child." Mojo will also perform such favorites as "Elvis is Everywhere", "If Want to be Smart, Martha’s Muffin," and the ever-popular Elvis hotline song, "(810) 299-KING." The latter song has elicted tremendous response from around the nation. "We actually set up a phone line for people to call and leave a message," said Mojo. "We’ve got 50,000 calls since March. We asked to get about 500 calls a day, but it’s trickled down to about 50 now. We’ve had people call and tell us that they love Elvis in their closet. We just did an interview in New Zealand, so hopefully we’ll get ‘em some calls from there soon."

Mojo’s no-holds-barred social commentary has brought its share of controversy. Originally, Root Hog or Die was to be titled Bush Idaho Slim, but Mojo is satisfied with the final title.
"Root Hog or Die is a fronter saying that first appears in print in Davis Crockett’s autobiography," Mojo said in his press release. "It means ‘get snapped’ or ‘crack.’ If you’re on the frontier, you gotta build your cabin and kill some animals, grow some crops and lay in wood for the winter, or it’s over. You can’t just sit around on your ass. It sounds good, too. ‘Root,’ ‘hog,’ ‘die’...all those are good words. And together it’s even better.”

Mojo will perform some new material as well, including a song called "Delta Dawn."

"Delta Dawn is guaranteed to raise the hair on your butt," said Nixon. "You’ll be talkin’ to Jesus afterward."
'Violence' is the key word

At the Sunset Drive-In, weekdays 5:30, 7:05 and 9:40.

The movie Night Game, cleverly manipulating baseball lovers with its unique title, has only a slight connection with the true story of the actual identity of this film lies within the absorbing subject of serial murders in Galveston, Texas. Police Lt. Mike Seaver, a former baseball player, is brought to life by veteran actor Roy Scheider. He exhibits such skills through his screen character, Mike, as perpetually smoking, slowly stuffing out obvious clues and maintaining an unlikely romance with screen spouse Rossy, played by unsensodness actress Karen Young.

Despite the fact Young appears to be 26 years younger than Scheider, she is cast as his equal in a give-and-take relationship. However, this attempt at intellectual equality, having previously moved at coordinating ages, fails as Rossy exhibits common sense. The murders occur systematically as you expect, with one lessening you questioning the actual brain activity of the chosen girl. The attacker chases one victim on the beach in his car. As he speeds toward her, she runs further down the open stretch of sand, never deviating from the path until she comes to an abandoned construction site, where she then decides to find refuge.

Amidst the continual violence, director Peter Masterson also decides to add senseless humor to the film. For example, the script brings to the screen Alma, Rossy's mother who somehow decides to add senseless humor to the film. For example, the script brings to the screen Alma, Rossy's mother who somehow disapproves of her daughter's choice in men, and illustrates this disapproval through frivolous arguments designed to entertain the viewer.

In two words, don't bother.

Rating: 2 out of 4.

Graphic proof of high-tech leadership.

The Casio fx-7000G $89.95.* It's the world’s first programmable scientific calculator with a graphic display. It can give form to your figures, instantly drawing graphs that depict your formulas and calculations.

With a screen that measures 16 characters by 8 lines, the fx-7000G can display enough information for some of your biggest ideas. And you can store graphs and formulas, then bring them back for an instant replay.

With its 422 step memory and 193 functions—including linear regression, standard deviation and computer math—the fx-7000G lets you perform computer functions without acquiring computer knowledge or incurring computer costs.

For additional capabilities, there's the fx-7500G ($109.95*). It has a larger memory capacity, with 195 functions, 4,006 memory steps, instant graph enlargement or reduction feature, plus a convenient horizontal folding format.

If you need even more power, our fx-8500G ($149.95*) techs you even higher, with 6,566 memory steps and 255 functions. And when hooked up with our optional FA-80 interface, it works with most parallel dot matrix printers or plotters including Casio's own models.

If you have any doubts as to who's the leader in high-tech calculators, just pick up an fx-7000G, fx-7500G or fx-8500G and draw your own conclusions.

Bomb linked to UTA crash

PARIS (AP) — A Moslem extremist group claimed responsibility Wednesday for the downing of a French DC-10 jetliner in southern Niger that killed all 171 people on board.

U.S., French and UTA airline authorities said they believe the plane, bound Tuesday from Chad to Paris, was blown out of the sky by a bomb. A U.S. team of investigators was to leave later Wednesday for Niger.

Two callers who claimed to represent Islamic Jihad but did not give their own names made their claims of responsibility in separate telephone calls to the airline and to a Western news agency.

Islamic Jihad is among several radical fundamentalist groups in Lebanon believed to be part of Hezbollah, or Party of God, the umbrella groups thought to hold 16 Westerners hostage in Lebanon, including eight Americans.

Among the passengers on the French jetliner were seven Americans, including Bonnie Pugh, wife of the U.S. ambassador to Chad, Robert L. Pugh. UTA Flight 772 was on a flight from Brazzaville, Congo, to Paris when it crashed Tuesday shortly after making a stop in N'Djamena, Chad. Debris was scattered over a 16-mile expanse of desert about 400 miles northwest of N'Djamena.

The French army, whose troops stationed in neighboring Chad were the first to reach the scene, said the 15 crew and 156 passengers died, including eight children.

Authorities said indications are that the aircraft was felled by a bomb.

"It exploded at high altitude leaving every reason to believe it was a bomb," said UTA spokesman Michel Iriesse. He said it was possible, but less likely, the explosion was due to technical failure.

A Foreign Ministry spokesman, speaking on condition of anonymity, echoed that sentiment: "The pieces are widely scattered, so it didn't crash on impact."
Poly co-op, services merge
New building to house both departments

By Jill Newhouse
Staff Writer

Student Services and Cooperative Education will soon be sharing the same new $1.5 million building under construction at the corner of Campus Way and South Perimeter.

The building, which is taking the place of staff parking, will house the offices now located in Jesperson and Heron Halls. Both halls were built in the late 1930's and have been condemned by the State of California.

Although this project is expected to be completed by the summer of 1990, Student Services cannot look forward to having more space. According to Shell Burrel of Cal Poly's Placement Center, the square footage at the new office building will not be increased.

Burrel said the reasoning behind this "odd" move is that the funds for the new building were allocated because the old building was condemned, not for expanded use or growth potential.

To go back through the administrative process and try to receive more funding for a larger building would take a long time, Burrel said.

As it is planned, the new building, located across from Mustang Stadium, will provide student assistance in both temporary and permanent job placement, and will be the site for on-campus interviews with potential employers.

Plant Operations architect Rex Wolf told the Mustang Daily over the summer that plans for the old halls is not definite, although Cal Poly's master plan shows the buildings as being completely removed. Many people in administration would like to see the continued use of the buildings, although Wolf said that upgrading, rather than demolishing the buildings, "would be a very big project."

The new building will have a stucco exterior and a tile roof, similar to Jesperson, Heron and Chase Halls. The building will be L-shaped, with the center courtyard facing away from Campus Way and South Perimeter.
HOUSING

From page 1

If he said of the 2,795 people in the dorms, 89 percent are new students.

Recent reports from Cal Poly and Cuesta College show that student enrollment at both institutions is growing. A report from the Board of Trustees said it expects Cal Poly’s enrollment to swell to about 20,000 students by the early 90s.

Building new dormitories on campus may be one alternative, Councilman said.

“We’re studying the feasibility, but this wouldn’t happen for another three years after the decision was made, spending 18 months on design and 18 months on the construction,” he said.

One alternatives include more off-campus housing, Councilman said.

For students, affordable rent and housing close to campus is becoming increasingly difficult to find. A proposed regulation before the City Council may make the search more difficult.

Residents for Quality Neighborhoods, a citizen group spearheading the regulation effort, is arguing the City Council restrict the number of students living in single family homes. The regulation would tie the number of residents to available parking.

The issue was tabled until the council’s Oct. 3 meeting.

ASBESTOS

From page 1

Modification and will probably be cleared and ready for bids by the end of this calendar year, Gerard said.

Plans have been made to add to the west side of the building including a large 200-seat classroom, 10 special purpose instructional rooms most of which are computer related, 70 faculty and dean offices and four departmental offices.

Total cost has been estimated at $12.5 million, Gerard said. The asbestos-related work, however, will cost an additional $1.2 million to $1.3 million.

Asbestos fibers do not absorb easily and therefore embed into the lungs. The Environmental Protection Agency has ruled that asbestos is harmful and that steps must be taken to eliminate it from work environments.

RENTALS

From page 1

would withhold statements until they had heard arguments from both sides, City Councilmember Jerry Reiss, however, said something must be done.

“I see things on both sides of the equation that are appropriate, and others not appropriate,” he said.

Vice Mayor Peg Pinard said the need of students attending Cuesta College and Cal Poly in the past 20 years and the lack of housing provided by these colleges are driving away potential home buyers out of the area.

Public opinion will be heard at the council’s next regular meeting Oct. 3.

BIKES

From page 1

Students will have access to the ornamental horticulture unit, the engineering building, and most of the other buildings that are farthest to walk to, the regulations state.

Football team opens season 2-0

By Adrian Hodgeson
Staff Writer

After handily beating West Texas State 31-10 on Sept. 9, Cal Poly's football team struggled early on Saturday before beating Humboldt State 29-16.

A highly favored Mustang team looked timid and sluggish for the first two quarters and fell behind 10-0. But the team's strength and stamina came through in the second half as it took and kept the lead.

Standouts for the Mustangs so far this season include running back Todd Henderson, who has rushed for over 100 yards in each game; freshman kicker Tom McCook, who is 4-4 on field goal attempts and 6-6 on PATs; and the Mustang defense, which has allowed its opponents an average of just 33 yards a game.

However, head coach Kyle Setencich said his team's performance during the first two quarters and fell behind 10-0. But the team's strength and stamina came through in the second half as it took and kept the lead.

The unbeaten Mustangs will travel to San Angelo, Texas, to play the fifth-ranked Angelo State Rams on Saturday. Cal Poly beat the Rams 15-8 at home last year, but Setencich said that Saturday's game would be tough.

Cal Poly begins its bid for the Western Football Conference title Saturday, Sept. 30, at 2 p.m., when it plays the Cal State Northerndargins at home.

Soccer impressive during preseason, ready for league

By Adrian Hodgeson
Staff Writer

The Cal Poly men's soccer team remains undefeated after its preseason games, much to the surprise of its coach, Wolfgang Gartner.

Gartner said that it is tough to play top Division I schools such as Stanford and San Diego State and remain undefeated.

The Mustangs most recent triumph was Saturday night, when it soundly beat Stanford 3-0 to improve its record to 3-0-3, the team's best start ever. Mark Mitchell, a junior, out of the lineup.

Mitchell breaks foot, out for 6 weeks

The Cal Poly men's cross country team won its first meet, the San Francisco Invitational, took second at the Fresno State Invitational behind only Division I powerhouse University of Arizona and yet, Coach Tom Henderson is nervous.

The win over FSU raised the team's record to 6-3, with Big West league play beginning on Saturday, Sept. 30, at 7 p.m., when it soundly beat Stanford 3-0 to improve its record to 3-0-3, the team's best start ever. Mark Mitchell, a junior, out of the lineup.

AGAINST CAL STATE HAYWARD, 1-0,

and United States International

University, 3-0. The team came

up unranked in San Diego State,

the 1987 NCAA Division I run-

ner-up, in San Diego on Sept. 10.

The Mustangs had come from

behind to take a 2-1 lead into the

final minute when the Aztecs

were awarded a corner kick. As

the ball came across the goal

mouth, goalkeeper Harry Crouch

catched it, but was then pushed

into the goal by a San Diego

player. The referee allowed the

goal, and the Mustangs were

forced to settle for a tie.

Cal Poly winds up a three-game

homestand Saturday at 7 p.m.

when it plays Cal Poly Pomona

in its first league game.

Women runners dominate

By Jay Garner

The Cal Poly women's cross

country team heads to the

Humboldt Invitational this

Saturday in search of some

competition.

Competition was certainly

nowhere to be found at the

Sonoma Invitational last

Saturday. The Mustangs blew

away the rest of the field in

heavy rain on a muddy course.

"We completely dominated," said Coach Lance Harter. "We

virtually ran unchallenged; we

could have scored all 10 of our

runners (instead of the regula­

tion five) and still won easily."

Indeed, Cal Poly scored 26

points, while the second place

team, Cal State Hayward,

scored 121 points.

Freshman Jamie Park led

the way for the Mustangs with

a time of 17:11, good for sec­

ond place overall, on the

five-kilometer course.

Park finished only nine

ATLANTA (AP) — Russ Nixon, the manager of the Atlanta Braves, vows to remember the San Francisco Giants' insult of his team. Next season's first meeting between the two teams will be rather interesting.

"I'm not blowing this off," Nixon said Tuesday night after being told by National League president Bill White that the Giants were complaining about the Braves' lineup against the Houston Astros — a team still in contention in the NL West race.

"Who's kidding who?" Nixon asked after his lineup filled with youth handed the Astros a 1-0 defeat, pushing Houston six games behind the first-place Giants. "I don't think if I had a five-game lead and the best club in the league I'd be worrying too much about a last-place club. I'm going to remember this.

"That kind of burns me up. The Giants are getting paranoid out there. I wonder if they called 'incinco, too, and told them not to pitch frosho Scott Sparkman, told them to throw (Tom) Browning every night."'

"I guess they look like fools now," Atlanta shortstop Andres Thomas said of the Giants after losing 12-4. "I don't think if I had a last-place club. I'm going to remember this.

"I'll call him (Nixon) a genius if they win," Craig said. "I'll withdraw it." Nixon said White telephoned him 30 minutes before the Tuesday night game, responding to similar complaints by the Giants, who alleged that Atlanta wasn't fielding a representative team amid a pennant race.

The complaint to White came 24 hours after the Giants' general manager, who apparently was concerned by Atlanta's youth, was quoted over the radio to the effect that the rest of the year, rather than to use rookie pitchers. "I'm going to remember this," Nixon said.

"That kind of burns me up," said Craig. "I don't think if I had a last-place club. I'm going to remember this.

Wahyes deaths end Bay Area study

CALIF. DAILY (AP) - Two beaked whales who arrived in captivity for a record stretch of time helped marine biologists conduct groundbreaking studies of the dolphins-like mammal.

Researchers at Marine World Africa USA collected tissue, blood and film footage of the mammals and were able to record their vocalizations.

Marine researchers had previously obtained only a rare sounds from captive beaked whales.

President of Marine World Africa USA, said Mike Demuro, thai a "rare find".

"We're thrilled with the health of the pair that wash up on a San Francisco beach last month, died early Monday after surviving a record 25 days in captivity.

The other whale, killed, died Sept. 4 of pneumonia.

Grape growers pick up after storm

SAN FRANCISCO (AP) - A violent ending to last weekend's three-day storm, tornados touched down in the northern California vineyards to harvest ungrape harvests. The storm damaged a fruitful grape harvests in the wine country.

Free repairs offered in Ford recall

WASHINGTON (AP) - Ford Motor Co. says it will repair for no charge up to 406,000 Fords, Mercury and Lincoln vehicles with faulty emission control systems and 67,156 Tracors with air bag defects.

The automaker announced recalls of both sets of vehicles Monday. Emission control improves upon its offer for the 1985 Ford Escort and Mercury Lynx and the 1986 Escort, Lynx and Ford EXP.

The Environmental Protection Agency discovered excessive emissions of hydrocarbons and carbon monoxide during routine tests of 1985 models, agency spokesman Eric Asensio said.

Sen. Cranston of California, named to head the nine-member task force, said Monday that one of its purposes will be to prod the Bush administration to take a position on housing for the disadvantaged.
SALCADO must stand trial

SANTA ROSA, Calif. (AP) — Ramon Salcido was ordered Tuesday to stand trial for the slaying of seven people in Sonoma County's worst killing spree.

Judge Knoll Owens ordered that the charges against Salcido include the special circumstance of multiple murder, which means Salcido could face the death penalty if convicted.

Public Defender Maureen Miller on Tuesday argued unsuccessfully that such charges be dismissed because the country where Salcido was arrested, Mexico, has no death penalty.

Miller also maintained Salcido was improperly extradited under a 1933 treaty signed by several countries, including Mexico and the United States.

Deputy District Attorney Peter Bumerts has said that Salcido's extradition from Mexico was approved by the attorney general of that country and has no bearing on whether Salcido can stand trial in the United States.

Salcido, 28, is charged with the April 14 murders of his wife and two daughters, his mother-in-law, his wife's two sisters and his former supervisor at the Grand Cru Winery. The pre-dawn rampage shocked the quiet communities of the wine country.

Owen scheduled Salcido's arraignment hearing for Oct. 3 before Sonoma County Superior Court Judge B. Bryan Jarar.

Library to be computerized

New system will speed up search for books

By Kathryin Hults

The whole world can be at the touch of a button — at least Cal Poly's corner of it can be.

The Robert E. Kennedy Library is leaving the old card catalogs behind. Computerized card catalogs are here and will be ready for use at the beginning of winter quarter, said Paul Adalian, head reference librarian.

About 32 to 36 terminals are planned for throughout the library for public use as well as 16 terminals in a lab for instructional use. Sixteen terminals will occupy the space where the old card catalogs are presently located, and eight will be in reference, Adalian said.

The half-million-dollar venture is funded by the California State University University Chancellor's office as part of a project to equip all 20 CSU campuses with online card catalogs, he said.

All books, periodicals, maps, computer software, music scores and government documents will be integrated into the catalog.

"We are even indexing all the big collections that were not included in the card catalogs before," Adalian said.

This will include the Library of American Civilization, covering America's history from its founding until 1917, he said.

First step in the system's implementation is to teach thousands of students, staff and faculty to use the computers, he said.

The easiest method for using the new system is similar to using a card catalog. But users can also enter commands for specific date, language and format.

The computer can also cross reference subjects, authors and dates, he said.

"This is where the real power comes in." The system will also be accessible by outside modems, he said.

More employees will be added when the computers go into use, he said.

The Miriam Library at Chico State was the pilot project. Its online catalogs were implemented seven years ago.

In 1985, Chico began working with the Sequen company to develop a new online catalog, the Symphony system. This is the system that Cal Poly is implementing, said Deborah Hunt, systems analyst at Chico State.

At first there were a few bugs in the system, she said, but they have been worked out.

"Everyone is happy with the system," she said.

Cards are no longer filed at Chico.

Cal Poly is going to keep the old card catalogs. They will be moved to the first floor lobby next to the elevators, Adalian said.

New CSU services plan adopted

By Christine Kohn

A California State University student services plan will provide a blueprint for Cal Poly's educational support services during the next few decades, according to the dean of student affairs.

The plan, which was developed by a CSU Task Force and approved by trustees in June, will provide a systemwide guide for student services that are designed to help students achieve educational goals, improve the quality of student life, enhance the campus learning environment and encourage students to stay in school once they've started.

Educational support services generally include co-curricular and outreach programs, financial aid, child care and campus clubs.

Cal Poly officials will use the plan as a model for a "sound program," said Vice President of Student Affairs Hazel Scott.

University officials will pay particular attention to professionalism described in the plan. Although Cal Poly already offers 10 out of class) programs like outreach and recruitment, financial aid, child care and campus clubs.

Cal Poly also offers 10 out of class) programs like outreach and recruitment, financial aid, child care and campus clubs.

Candidate can't "bare" to give up

YUCAIPA, Calif. (AP) — City council candidates shouldn't necessarily bare all, say two men seeking that job.

They want a photographer who posed nude in Playgirl magazine and a swingers' publication to withdraw from the race for Yucaipa City Council.

Wesley Ford, 41, an attorney and photographer, is one of 19 candidates vying for a council seat in the Nov. 7 election in the San Bernardino County town.

Two of his opponents, Brett Granlund and Conrad Nelson, called for his withdrawal recently after receiving copies, of an advertisement depicting Ford nude in the August edition of "Swingers Hot Line."

Ford reportedly appeared nude in a 1984 issue of Playgirl magazine, in which he was shown prone on a bed, on a rocky beach and with a towel draped around his neck.

"I'm getting a little old for it, though," he said. "I've got too many gray hairs now."

Ford called his colleagues "stone-throwing hypocrises" and has refused to withdraw from the race.
