Parking permits stolen in first weeks of school

By Cyndi Smith
Staff Writer

About 50 parking permits were lost or stolen in the first two weeks of school, said Cindy Campbell, parking supervisor for Public Safety.

Most of the missing permits are general student and staff. Campbell said she did not believe permits were stolen because of a lack of available permits. "The only permits we run out of are for the R-1 lot (located behind the dorms), and we usually don't have many of those stolen," she said, adding the R-1 permits are also the easiest to recover.

An increase in the price of permits has not been a contributing factor in the thefts either, she said. She said people who want to steal will take them no matter what the price.

By Cyndi Smith

"For those students who do steal to avoid buying a permit, the cost can end up being much greater, Campbell said.

Public Safety recovers over half of all stolen permits and handles the situation in a number of ways, she said. A citation is always issued for such infractions as misuse of permit, which costs $36, an invalid permit, $15, and illegal parking, $15.

After all these costs, Campbell said, the citation alone could cost up to $61, a full $23 more than the cost of a quarterly permit.

Cars with stolen permits on them are usually towed, she said, and the owner brought in for questioning.

"It's really not cost-effective to prosecute but we do in some cases," Campbell said.

In the past, Cal Poly has prosecuted students on charges of theft of lost property and possession of stolen property. Generally, though, Public Safety hopes to deter permit thieves through the financial penalties.

"We're trying to show them that it's just not worth it," Campbell said.

Anti-abortionists hit streets of SLO

Students prepare proposals for city

By Karen Kendzor

Representatives from Cal Poly, Cuesta College and the community met Thursday to create to-the-point modifications if the proposed rental regulations pass.

The regulations were proposed by the City Council and are designed to alleviate problems with parking, noise and overcrowding in residential housing areas.

Students serving on the Student/Community Liaison Committee unanimously consented to present the following six suggestions to the City Council before their next meeting Oct. 3.

• Apply the ordinance to the low-density housing zones as opposed to the medium-density housing zones.

• Apply the ordinance to both rental and owner occupied housing in order to avoid discrimination toward renters.

• Modify the parking requirement for off-street parking to read, "One off-street parking space per adult occupant, less two." It currently reads, "less one."

• Change the minimum usable floor area per adult occupant from 300 square feet to 225 square feet per person.

• Currently, the proposed ordinance stipulates that for a dwelling with one to five occupants, a business license is required. Moreover, for a dwelling with six or more occupants, a use permit would also be required.

• Only households of five or more occupants be required to apply the proposed standards outlined in the ordinance. All rentals, however, would still be required to obtain a business license.

• Enforce the ordinance "on a complaint basis only."

If a complaint is filed against a particular residence, the students requested that the occupants and/or owner of the residence be notified.

Furthermore, the students asked the City Council to define its definition of "on a complaint basis only."

"We're trying to open doors to better neighborhood relations," students on the Liaison committee released a new pamphlet that discusses party planning, noise, house and yard work, trash, pets, parking and bicycle safety.

Students also made the suggestion to improve the availability of condoms.

Condom reaction mixed

By Leslie Morris

The Mustangs lose to CSU Northridge 13-10 in football action.

The newspaper for Cal Poly. Since 1916.
CONDOMS
From page 1
The American-made condoms, priced at 50 cents each, are pro­
vided by the Food Services department. The vending machines are located in a common area in the Student Center. The machines are accessible at the end of each residence hall. The price includes the cost of packaging, machine accessibility, and service. The price is the same for condoms of all varieties. The machine is located near the reference room of Kennedy Library, the Computer Science building, and the Snack Bar.

Condoms are also placed in vending machines located in The Cellar and the Engineering and Ornamental Horticulture buildings. Residence halls have condom-only vending machines located in stairwells of the halls and in the basement of Vista Grande and the second floor of the University Union. The vending machines are located in the stairwells of the residence halls.

Residents can be found in the Campus Store and the Health Center.

Condoms will be installed next to all machines to provide educational materials on AIDS. Small signs will also be installed in all vending machines on campus, excluding Vista Grande and the second floor of the University Union, to inform students of the condom machine locations.

The Cal Poly AIDS Prevention Task Force began pushing for condom availability on campus in January. They recommended condoms be made more available through vending machine locations selected for their accessibility, student traffic and extended hours of operation. The Task Force further recommended condom machines be placed in male and female restrooms in each residence hall complex.

The final proposal was submitted to Baker on July 28 and approved shortly thereafter.

The plan faced opposition at different stages of approval from some members of the campus community. The Student Senate voted on a vending machine resolution in May 1987 that passed by one vote, but the resolution was vetoed by then-ASi President Yang said, adding that the morality of the condom availability is no longer an issue.

The Foundation has exclusive rights for the provision of this condom service for a minimum of five years. Service and business levels will be reviewed by the university and Foundation each year, along with any increases, decreases, or alternations needed to be made.

Orcutt Rd. homeles shelter to open
Old house to provide room for about 50 individuals, mostly single mothers

By Nadya Williams

A portion of the city’s homeless should be moved to a permanent shelter on Orcutt Road by this winter.

The Economic Opportunity Commission has tried to move the Kansas Avenue shelter for more than a year, said spokesperson Emma Valdivieso, but has had difficulty finding a location acceptable to the surrounding neighborhood.

In the past, at City Council meetings, residents in an area where a proposed shelter was being considered showed up in protest. Proponents of the shelters accused them of the ‘NIMBY’ syndrome, ‘Not in my back­yard.”

Kurt Kupper, a former county supervisor, agreed this spring to lease his property on Orcutt Road to house the 40 to 45 persons served by the program, she said.

His decision was approved by the City Council and money was consolidated through the Equal Opportunity Commission. With that decision, a previous group operating as the People’s Shelter was effectively cut off from receiving any government assistance and had to cease operation. The People’s Shelter would house people at local churches on one-month intervals and provide basically the same service that the new Orcutt Road shelter will provide.

The site, just off Broad Street, contains a house as well as ample room for the Kansas Avenue shelter trailers, Valdivieso said. She said the trailers will be moved to the site soon but that it’s not ready yet.

“We just need time to prepare the site and renovate the house,” she said. “Just to move the trailers could cost up to $50,000.”

Money for the homeless shelter program comes equally from the city, county and the private, non-profit EOC.

The current site on Kansas Avenue is owned by the county.

“The (Sheriff’s) Department now needs to use the land,” she said. “We’ve had to look for a permanent place for the five trailers that serve as shelters.”

Valdivieso said.

The Orcutt Road shelter will be fenced off, Valdivieso said, and the residents will be supervised during the time they are at the shelter. They must leave at 7 a.m. and are allowed to return at 6 p.m.

Valdivieso said she realizes this schedule can be difficult for the homeless families with young children.

Mylène Abernathy, coordinator of programs, said about four families a month — usually headed by single mothers — use the shelter. The shelter screens individuals before allowing them to stay, Abernathy said.

Those with drugs or alcohol on them are not allowed to stay, she said. She said it would lead to too many problems the shelter can­not afford to handle.

Even with a shelter, many of San Luis Obispo’s 100 or so homeless remain on the street.

“In San Luis Obispo, anywhere from 40 percent to 60 percent of the homeless are veterans,” she said.

Most of the veterans fought in Vietnam, she said.

California Polytechnic State University
San Luis Obispo, CA 93407
Office of Student Affairs
(805) 756-1521

October 2, 1989
Dear Students,
Welcome to Fall Quarter! As things begin to settle in for you, I would like to take this opportunity to address an issue that has received much attention recently, the relationship between Cal Poly students and the community.

San Luis Obispo is a small community, relatively isolated from major metropolitan areas. As such, students play a highly visible and vital role in the welfare of the community. Students significantly contribute to San Luis Obispo’s economic base as taxpayers, a workforce, and consumers. Much student enthusiasm and energy is channeled toward programs that directly benefit the community’s welfare. Outstanding examples of these efforts include the ASI’s Good Neighbor Day, PALS Program, and numerous charitable drives.

Government and community agencies also benefit from various internships and volunteer student experiences offered through the Human Programs, curricular offerings, and individual student initiatives. In a community that is far from pluralistic, students offer a multicultural resource that enriches the lives of everyone.

For many of you, Cal Poly offers the first opportunity to be an independent member of a community away from home. However, being a member of a small community heightens the impact of your behaviors on those around you. Your curriculum is challenging and the occasion to let off steam and relax is a definite need. The underlying factor in fulfilling this need should be the consideration of others. The rights you have to enjoy the breadth of our educational process does not end at the classroom door nor at the boundaries of campus property. You are a member of both the Cal Poly and San Luis Obispo communities. Both communities enhance and support each other. Both communities share responsibility for addressing issues of concern. I will make every effort to enhance the relationship between students and the community while advocating the rights and responsibilities of students. I ask that you join me in the process.

Sincerely,

Hazel J. Scott
Vice President for Student Affairs

Now there’s more in the Apple Macintosh family to choose from than ever before, with six computers to meet every personal computing need.

Start with the Macintosh Plus, the Macintosh SE, and the Macintosh SE/30. These integrated systems offer the affordability, ease of use, and consistency of applications traditionally associated with Macintosh.

And their compact design makes them easy to transport, wherever you go.

Now meet the modular side of the family: the

Macintosh SE, Macintosh SE, and the newest member, the very versatile Macintosh Bx. These expandable, high-performance computers can be configured for virtually any task. You choose the amount of RAM, the type of monitor, and the storage capacity of the hard disk, which means you can build a system to handle everything from desktop publishing to scientific and engineering applications.

But no matter which system you choose, you’re still getting all the advantages of a Macintosh.

See us today, we’ll help you choose wisely.

**Train kills psychic**

**MOSCOW (AP) — E. Frenkel,** one of the Soviet Union’s growing number of psychic healers and mentalists, claimed he used his powers to stop bicycles, automobiles and streetcars.

He thought he was ready for something bigger, so he stepped in front of a freight train. It didn’t work.

The engineer of the train that killed Frenkel said the psychic stepped onto the tracks with his arms raised, his head lowered and his body tensed.

The daily Sovetskaya Rossiya on Sunday said investigators looking into Frenkel’s decision to jump in front of a train near the southern city of Astrakhan found the answer in the briefcase he left by the side of the track.

“First I stopped a bicycle, cars and a streetcar,” Frenkel wrote in notes that the investigators found. “Now I’m going to stop a train.”

Frenkel apparently felt he had found the secret of psychological power and that his efforts to halt a train would be the ultimate test of his powers, according to the notes. “Only in extraordinary conditions of a direct threat to my organism will all my reserves be called into action,” he wrote.

In the last few months, the nation has become awash with mentalists and self-proclaimed psychics who are appearing on state-run television, drawing huge crowds, and receiving thousands of letters requesting help.

Perhaps the most popular, former television journalist Anat Chumak of Moscow, appears daily on the morning TV news and variety program “120 Minutes.”

He claims his mental energy can help people over the television, and that even if they are not in front of the TV, he can energize a glass of water if they leave it there.

Bay Area series would be sweet

As we draw near the beginning of the 1989 Major League Baseball playoffs, I'm sure you don't need me to point out some things. Like the fact there will be two teams from the Bay Area in the playoffs, and no teams from the Greater Suburban Sprawl Los Angeles Area. Like the fact no one will have to go through watching Kirk Gibson limp around the bases after a dramatic, game-winning home run. Like the fact someone other than Orel Hershiser will be getting endorsements for Pizza Hut and Mitsubishi following this year's World Series.

Finally, for Bay Area fans anyway, the dream may become a reality. Both the Giants and the A's made the playoffs in the same year. Only one thing stands in the way of a Bay Bridge series in the playoffs. There arc many people talking about a Bay Area World Series as if it is already set. But they aren't set. You only have to look as far as last season to see anything can happen once playoffs start. You don't have to have a good, solid team to win in the playoffs. You need a little luck and a pitcher that looks like a high school English teacher.

Surely, if you look at the last two years, you'll find the Dodgers and the Twins were not the best team. In fact, an argument can be made that each of these teams was the worst of the four playoffs teams. But they won. The point is, no matter how good a team is over the long haul of the regular season, the playoffs are an entirely different beast. One loss in a 162-game season doesn't mean nearly as much as one loss in a seven-game playoff. The A's demonstrated that last year. Had the A's not lost the first game of the World Series on Kirk Gibson's home run, I would venture to guess the outcome of the series would have been entirely different.

But hey, that's in the past. All four of this year's playoff teams have a legitimate shot. Yes, I know the Blue Jays would have done no better than fourth in the AL West, but they have a strong pitching staff and momentum on their side. The Giar's pitching staff has been the walking wounded all year and they still made the playoffs, so they can't be discounted. Besides, they have Kevin Mitchell and Will Clark. And the Cubs have defined the odds all year long. Everyone

Poly drops to 0-4 in Big West play

Mustangs lose two tough matches over weekend to Pacific and San Jose State

By Jay Garner

If Cal Poly setter Kim Kaaiai wanted to write a song about Saturday night's match against San Jose State, it would probably be a blues tune entitled "We Can't Finish What We Start."

What the Mustangs started was an 11-7 lead in game one and a 12-7 lead in game three, only to lose both games 15-12. Game two may have been even more frustrating. Down 13-4, the Mustangs, bolstered by two Anja Knutsen service aces and a Jill Myers kill, pulled within three points of the Spartans at 13-10 before losing 15-10.

"We're just real inconsistent," Kaaiai said. "We haven't seemed to be able to put a full game together. We play a good first half or second half, but we haven't been able to put one good first and second half together yet."

Football

Poly suffers loss for second straight week

CSU Northridge hands Mustangs a 13-10 defeat in CCAA season opener

By Adrian Hodgson

The Cal Poly football team suffered a devastating 13-10 loss Saturday to Cal State Northridge at Mustang Stadium.

"This really puts us in the hole," said disappointed linebacker Jim Joseph. "We can't afford to lose again and we still have to play Portland (State) and Sac State."

Mistakes may have cost the Mustangs the game. On the first series of the second half, Cal Poly drove deep into Matador territory, but on third-and-goal from the 6-yard line, quarterback David Lafferty fumbled the snap, recovered the ball and was hit for a 13-yard loss. After an offsides penalty against the Matador defense, backup quarterback Keith Jarret fumbled the snap on the field goal attempt and Northridge took over at their own 21.

However, the Mustang's most costly mistake came with 1:01

dawn Wilson also had 14 kills and 14 digs.
For the Mustangs, Myers and Michelle Hansen had 11 kills each, and Knutsen had 15 digs.
On Friday night, the Mustangs played much better, Wilson said, but lost to the undefeated, third-ranked University of Pacific team 15-8, 10-15, 17-15 and 15-7. In game three the Mustangs squandered a game point at 14-11 before losing 17-15.

"It's depressing that we can't get one point when we need it," Hansen said.

Men's soccer

CSU Northridge hands Poly first defeat in CCAA conference opener for both teams

By Adrian Hodgson

The Cal Poly men's soccer team suffered its first loss of the season Saturday when Cal State Northridge beat the Mustangs 2-1 in overtime.

However, the story of the game didn't have to do with either team, but with the referees who didn't show up to Norridge's stadium. Both teams waited an hour before agreeing on having three other sanctioned referees, who were in the crowd, officiate the game.

Cal Poly Head Coach Wolfgang Gartner said his team had the choice of either playing or not playing the game, but decided to play because they thought they had a good chance to win.

"We had a great effort, especially by Poe (Allan)," said Gartner. "We were explosive and impressive, but a bit husky. Northridge was very fortunate to win."

When the game started, the Mustangs stormed out of the blocks, scoring what Gartner called "a great goal" in the opening minute.

Midfielder Grant Landy took the ball down the right sideline and crossed the ball to the far post. Todd Henry rose above the Matador defense and headed a bullet past goalkeeper Mike Litman.

Cal Poly had a chance to go up 2-0 a few minutes later when Henry again headed a ball towards goal, this time off a corner kick. According to Gartner, it hit off a defender's shoulder and bounced just in front of the goal line. Then the Matadors simply fell on the ball and the referee called a free kick for Northridge.

"The referees made some unfortunate decisions," Gartner said.

One of these decisions almost cost the Mustangs a goal late in the second half. After Northridge's Jim Hofferber equalized the score in the first half, the teams played evenly until the Matadors were awarded a penalty kick in the 74th minute. Gartner argued the Matador player had taken a dive, but his complaint did not change the official's call.

Luckily for the Mustangs, junior goalkeeper Harry Crouch saved the kick and the teams stayed deadlocked until the end of regulation.

Northridge put the game away 10 minutes into the first overtime period when forward Bobby Reyes scored on a breakaway, after the Mustangs had been pressuring forward, hunting for the go-ahead goal themselves.

"We got caught flat in the midfield," Gartner said. "They beat us the way we score, on the counter-attack."

Even after losing this close game, Gartner still believes his team and the Matadors are the only two teams in the California Collegiate Athletic Association that have a chance to win the league title. He added the Mustang's most crucial game will come at home against the Matadors (10-0 in the CCAA, 4-2-2 overall) Oct. 18.

Cal Poly (1-1, 4-1-3) travels east Wednesday to play Cal State Bakersfield in a conference game. The Mustangs will play the Division I Fresno State Bulldogs in Fresno on Thursday, before returning home Sunday to host Sacramento State University.

Women's soccer

Women begin title defense with four straight wins

By Adrian Hodgson

The Cal Poly women's soccer club began its bid for a straight California Collegiate Women's Soccer Conference title Saturday by defeating Loyola Marymount University, 5-1.

The game, played at Cuesta College, was not as one-sided as the score reflected. Loyola played well for most of the game, but Poly capitalized on the Mustangs' lapses in concentration.

Lady Mustangs scored three goals in a 12-minute period in the first half, and the other two were separated by a minute at the beginning of the second stanza.

Senior forward/midfielder Janet VanSoest opened the scoring in the eighth minute when, from the right side of the field, she saw Loyola goalkeeper Kai Sauder standing off her goal line. VanSoest lofted the ball over Sauder's head and into the far corner of the goal.

VanSoest added another goal, her fourth of the season, five minutes later when she outright Sauder and headed the ball past her into the gap net.

Team captain Beth Barker widened the lead in the 20th minute. After midfielder Alcy Storyhame played a through ball to Barker's feet, Barker slipped the ball past a defender and beat Sauder for the Mustang's third goal in 12 minutes.

The remainder of the first half was a midfield battle with few scoring opportunities. However, Poly came out strong and depicted the second half, before easing off for the last 30 minutes.

Goalkeeper Tom Quiddedy and Saudran in the 48th and 49th minutes, respectively, cropped out the opponent's scoring.

A consolation goal by Loyola's Benjamin Folsom midway through the second half spoiled Poly's chance of a shutout, but neither the players nor first-year head coach Keith Coleman seemed to mind.

"We played a good game," said Coleman. "We got steady play from our midfield and our sweeper.

Coleman's team is 3-0 overall after beating Foothill Junior College 13-0, and 2-0 in the 42. As Lafferty dropped back to pass, he looked to pass to the right, but then threw a screen pass back to his left to right end and McGuire turned down the left sideline and into the end zone with the help of a couple of blockers.

The Mustangs added to their lead shortly before halftime on a 22-yard field goal by McCook.

However, Northridge scored a field goal of their own as time ran out in the half and hurt themselves on the drive with defensive back Michael Morris was called for a personal foul after a late hit on Bonner.

Following the bobble the snap on the field goal attempt at the beginning of the third quarter, Northridge marched down the field and scored a 35-yard field goal to narrow the score to 10-6.

Northridge's next sustained drive was foiled by an interception by Steve Miller. Miller cruised down the field with the ball and turned it over to Poly.

The loss puts Cal Poly at 0-1 in the Western Football Conference and 2-3 overall.

Sternsch is still optimistic about his team's chances, however. He said his team is missing a few ingredients which would make Cal Poly a good football team, and he believes all the teams in the W.F.C. will lose at least one conference game this year.

'A crime of racial terrorism' — D.A.

Cross burner's bail upheld

HAYWARD, Calif. (AP) — A judge scientifically labeled a San Leandro man accused of burning a cross on a black family’s lawn as "a danger to society," and kept him in behind bars, refusing to reduce bail.

San Leandro-Hayward Municipal Court Judge Robert Fairwell said Friday the suspect, Dean Gordon Foster, had 15 prior failures to appear in court on other cases and seven probation violations.

The 24-year-old construction worker was held in lieu of $10,000 bail on two misdemeanor violation charges of terrorism and violating civil rights. Tips from two of Foster’s co-workers led to the arrest.

Leonard Luvisi, an assistant Alameda County public defender, asked that Foster be released on his own recognizance. Luvisi told the court Foster has an alcohol problem, but would cooperate with alcohol counseling and stay away from the San Leandro family whose front yard was the site of the cross-burning last Saturday.

The judge responded that there was no indication that "alcohol was a problem at the time" of the cross-burning. He also said that Foster, who is white, was reported to have bragged about the cross-burning later.

Reginald Saunders, a deputy district attorney opposing release of Foster, called the act a "crime of racial terrorism and intimidation," not only against the victimized family, but against the community.

Foster made no plea. It was postponed by Fairwell until Foster undergoes a court-ordered psychiatric evaluation.

Meanwhile, San Leandro police Lt. Tom Hull said no other arrests have been made yet in the case and that three suspects besides Foster are being sought.

"They all worked together," said Hull, but he declined to elaborate or to identify the three being sought.

Consulting Opportunities

with

KURT SALMON ASSOCIATES, INC.

Kurt Salmon is the world’s largest management consulting firm serving the consumer goods and services industries. Our clients span the entire consumer products chain, including retailers and direct marketers, manufacturers of soft goods and hard goods, plus their suppliers in the fiber, textile, apparel, home furnishing and related industries.

Positions available for 1990 Cal Poly BSIE, BSME, MSIE, & MSME Graduates in the following areas:

MANUFACTURING OPERATIONS
DISTRIBUTION OPERATIONS

Interviews will be conducted on Monday, October 9, 1989.

Please join Lynn Spuhler, Regional Service Director for an informal Presentation

Tuesday, October 3, 1989
6:00 - 8:00 PM
Staff Dining Room B.

WHY DO MORE CALIFORNIA STUDENTS COME TO US FOR STUDENT LOANS?

Because we do more than just talk about great service.

Other banks may claim to have quick service and a complete line of education loan programs. But compare their products and services to ours and you’ll see why we’re the lender more California students choose.

Service

Marine Midland’s Educational Funding Services uses a state of the art, in-house processing system...eliminating any unnecessary confusion. The result - fast, professional service by a concerned and caring staff.

Loan Alternatives

One sure way to measure a bank’s commitment to education finance is to look at the number of different loan programs they offer.

Educational Funding Services offers not only the Stafford, SLS and PLUS loans...but MEDLOANS a loan program for allopathic medical students...as well as CONSERN a loan program for families with higher incomes.

Debt Management Assistance

You hear a lot of talk about students defaulting on their student loans. But did they get anything from their bank other than overdue notices?

At EFSI, we’ll give you the tools and information you need to manage your debt, including:
• Graduated Repayment Options
• Loan Consolidation

So when you’re asked which bank you want your student loan from...choose California’s best:

MARINE MIDLAND BANK'S EFSI

Poly police impound 6 bikes

By Barbara Courain

Six bicycles parked in prohibited areas on campus were impounded last week.

According to Sgt. Bob Schumacher from Public Safety, impounding (when a bike's lock is cut and the bicycle is taken to storage) is not a new policy.

"We have always cut bike locks if they are attached to rails, trees or other prohibited areas," he said.

Although impounding is an old school policy, the new bicycle rule, which restricts bicycles on the inner perimeter of campus took effect this fall.

With the relocation of bicycle racks to the outer core, many students have decided to defy the ban and park on the hand-capped railings and other objects in the inner campus area, causing a more visible increase in illegal parking, Campbell said.

"There have been complaints from students," according to Cindy Campbell, parking supervisor and coordinator of Student Bicycle Safety. "But I have heard just as many praises about the new rule.

"The new bicycle regulation was not dreamed up to make life rough for students," Campbell said.

The new bicycle regulations were enacted for liability insurance reasons — the university does not want to be slapped with lawsuits resulting from collisions between pedestrians and bikers.

Campbell said that a bike lane cannot be painted on the inner perimeter road because by law it must be five feet wide and be used by bicycle traffic going one way. In other words, two lanes would be needed for two-way bike traffic and that would take up 10 feet of the 15 feet road. This is not possible because the road is used by motor vehicles as well and cannot be restricted to just bicycle use, Campbell said.

"I understand some people are upset, but look at it from Public Safety's point of view," Campbell said. "It's common sense, it's for safety." According to Campbell, the new bicycle rule, which restricts bicycles on the inner perimeter road because by law it must be five feet wide and be used by bicycle traffic going one way, is really a minor inconvenience, "Having the bike racks located on the outer core of campus is really a minor inconvenience," Schumacher said. "The rule was enforced for safety reasons.

He said Poly View Drive had the most potential for accidents.

"Of the 12 to 15 bike accidents that were reported to Public Safety last year," he said, "one-third of those occurred in the inner perimeter.

Catherine Groves, an industrial technology senior said, "I just wish they would let us walk our bikes to our classrooms and put more racks by the business building.

"I would come to us to get their bike back," Campbell said. "This is where we put our bike back," Campbell said. "This way the student's bike lock would not get ruined.

There is an $8 fee to get a bike after it has been impounded.

The current problem, Campbell said, is getting the word out to students as to where the inner-perimeter bike racks have been relocated.

"All of the racks except three have been relocated," she said. "Bike riders are still wanting to park right by their classes and not seeking out available places.

A student has been hired by Public Safety to map out the locations of all bike racks on campus, which will hopefully be available next week and later put in booklet form with bicycle safety information.

Campbell said the university will be installing more bike racks, but she was unsure when that would be.

Pregnancy stalls jail term

MARTY BEACH, S.C. (AP) - Hurricane Hugo uncovered the remains of an old, wooden ship on the shore of Marti Beach, officials said Saturday.

At 8:30 a.m., North, people were busy digging up wooden planks, pieces of board and iron spikes. They also found a large piece of wood with iron sheathing attached, which had not been part of the boat's stern.

Jack Thompson, a photographer and longtime Marti Beach resident, notified city officials of the shipwreck.

It was a case of deja vu for Thompson, who was among the first to find the Freda A. Wiley, a Boston lumber ship, at 43rd Avenue North, after Hurricane Hazel, 35 years ago.

Friday afternoon, a friend of Thompson's called to say he'd found a chain on the beach and wondered if Thompson had heard of any shipwrecks before. Thompson said he went to the area to investigate and found a pulley from the ship.

"I believe there were several ships in that area, flotting, lumber from Boston to New Orleans, that were caught up in the storm of 1898 (the sank the Freda A. Wiley). This may be one of those lumber ships," Thompson said. 

Some folks were hoping to find more lumber Saturday afternoon.

"All this time, and nobody's found a bottle of rum? What's going on here?" joked Mayor Bob Grissom when he arrived at the site.

"I've been looking for the gold," said James."
