Gas leak releases 'foul odor' in city
Buckley Road spill causes concern

By Steve Harmon
Managing Editor

Cal Poly dorm residents complained of an "offensive, foul odor" last night about 10 p.m. that turned out to be noxious fumes from an oil pipeline about five miles south of the university.

Linda Barton, a public safety dispatcher, said she received about 30 calls in response to the rotten egg smell in the air.

Health Center Director Dr. James Nash said there were no reports of anyone going to the center because of runny eyes, headaches, nausea, or dizziness, all of which may result from inhaling the fumes.

The substance, toxic naphtha, a flammable crude oil-type substance that Unocal pipes from San Luis Obispo to San Francisco for refining, was reported bubbling out of the ground on Buckley Road at about 7:45 a.m. Monday.

Robert McElroy, district supervisor for Unocal said there was "no health risk" from the leak.

The 12-inch steel pipe carrying the petroleum substance may have been ruptured about six months ago when a private contractor was doing some work on the site, McElroy said.

The spill was cleaned up Monday by Unocal and soil and ground water tests are currently being conducted to determine the extent, if any, of contamination.

McElroy said he was at the site all day and only had "watery eyes" from the fumes. He said Unocal employees are required to wear safety gear when handling the substance.

Unocal resumed pumping the 1,000 to 1,500 barrels of crude an hour through the line Tuesday morning, McElroy said. He said a barrel equals 42 gallons and that the line is used 24 hours a day, seven days a week, all year.

He said Unocal has several hundred miles of pipeline running throughout the county.

The California Department of Forestry/County Fire Department was the first to respond to the call just before 8 a.m. and notified other county agencies.

"We were standing by because it's (naphtha) a flammable substance," said Susan Speer, dispatcher for the CDF/County Fire Department.

Unocal and county crews were at the site throughout the night cleaning it up, with clean-up completed at 4 a.m., said Bob Holden, director of the six.

It's not a flu bug — just scratchy throats

The sore throat responsible for reduced class sizes is not the flu — it's something else, according to the Health Center.

"We've seen students all summer — and more now — with mild to moderate viral infections, but no flu," said Dr. James H. Nash, director of Student Health Services.

The number of students seeking treatment at the Health Center, however, is no different from last year.

Nash said the specific virus causing this latest outbreak of illness was not determined.

"There's no simple way to culture these things," Nash said.

Symptoms include a mild sore throat, he said, but without swollen glands or a high fever.

Political science senior Rody Bell, however, said he got swollen glands and a fever along with a sore throat and a stuffy nose.

"My nose feels the size of a cantaloupe," Bell said. "And my desire is for it to slide off my face and into oblivion. I sit in class and zone. I have my mouth open as far as it will go, and I won't realize it."

Bell, 22, claimed he received the virus from a roommate. He said he didn't miss school but he did call in sick to his work as a tutor at Lindamood-Bell Learning Processes.

The Health Center had no exact figures on students affected with the virus, but Nash estimated 20 percent of Health Center traffic has had a "respiratory inflammation." Of those, he said, about half have some kind of viral infection.

Letters to the Editor

Author of letter contradicts himself

Editor — It is very difficult to explain the reaction of Jeff Coffman to ads printed in Japanese by the Mustang Daily during the past week. In his letter (Oct. 2), Coffman expressed his views about the use of Japanese in discriminatory, that many Asian immigrants do not possess the knowledge of America and concludes himself by stating that these Asian immigrants plan to take their education back to their homelands.

An immigrant is a person who has come to live, study, work and perhaps die in the United States. This applies to most of our Asian schoolmates.

Those who come to the United States to study and then return to their homelands are called foreign students and they are very few, relatively speaking.

We should be proud of this because the United States is exporting education and with it the American culture.

Regarding the “English only” proposition, it is evident Coffman as well as all those who support it have forgotten a great part of California’s history, which, in turn, has led them to believe English is the only heritage of California.

It must be taken into account that centuries before California became part of the United States, it had been discovered, conquered and colonized by the Spaniards, and centuries before the first Europeans arrived. California had been populated by many Indian tribes, each one with a different language.

It is very wrong to relate speaking English only to being proud of America. These are totally unrelated activities.

Working hard, being respectful of the law and excelling in school is a way to show and even increase our American pride.

These are things I’ve observed that many Asians do.

The fact is that an American can be any Caucasian, African American, Chinese, Japanese, Italian, Jew, Hispanic or any other minority member that at a certain point in history has taken part in building what the United States is today.

How're you going to do it?

"And I want to express my deep felt indebtedness and gratitude to my PS/2. It helped me get more done — so I had more time for fun."

You don't have to be the valedictorian to know college is no picnic. But the IBM Personal System/2® can be a big help. It lets you get more done in less time. You can organize your notes, write and revise papers, and create smart-looking graphics to make a good report even better. All in all, the IBM PS/2® can make your school life a lot easier. And after school, it can give you a head start on your career. Because there's a good chance you'll be working with a PS/2 wherever you work after college.

And right now, as a student you have an advantage. You can get the IBM PS/2 at a terrific low price. So save money and make a smart career decision at the same time.

Win a Jeep Wrangler!

LEAK

From page 1

member county hazardous mate­
rials response team.

He said the leak was not con­sidered hazardous beyond the
actual spillage site.  

McElroy said this isn’t the
first time the line has leaked. In
the past, however, it was other
substances that were spilled and
not the highly odorous naphtha.
The CHP reported that
naphtha flowed onto nearby
Buckley Road and the CHP clos­
ed it and another street for safe­
ty reasons, Speer said. Vachell
Lane at lower Higuera Street
was closed until 11 p.m. Buckley
Road at Santa Fe was closed un­
til midnight Monday, when the
situation was deemed safe.

Speer said there was a report
of the county department
responding to one call for medi­
cal aid resulting from the leak.

Barton said she was aware of
the event from listening to the
police scanner carrying details of
the county’s response to the over
100-gallon leak reported by a
motorist.

“We knew what it was, so we
just told callers that due to a
change in the wind patterns that
the smell from the leak was car­
died to Cal Poly,” Barton said.

Yosemite Tower 7 resident ad­
visor Sally Hughes, a psychology
senior, said she noticed the smell
about 11 p.m. She said she left
her room and came back and
that’s when she realized there
was something in the air.

“You know how when you
leave a room and come back you
notice the smell?” Hughes said.

She said residents of her tower
also complained of a strong odor
in the air.
Is the U.S. hurting or helping?

Island farmers and S.F. expert disagree on effect of U.S. aid to Philippines

By Nadya Williams

Recent events in the Philippines and on campus have highlighted the extremes of our country's long relationship with this Pacific island nation.

About a week ago, four Filipino farmers spoke to Cal Poly students and faculty about the benefits of an American-based organization, World Neighbors — has brought to their community in the Cebu area of the Philippines. However, within days of their presentation, two U.S. army men were assassinated in Manila; and Filipino dictator, Ferdinand Marcos, long supported by the United States government, died in exile in Hawaii.

The Filipino farmers presented a very positive report of their cooperative work with World Neighbors. However, a different perspective was given by Walden Bello, a Filipino scholar and author of Development Debacle, an exhaustive study of the political and economic impact of U.S. foreign policy on the Philippines. Bello is a professor at UC Berkeley and is chair of research and analysis at the University of the Philippines, a U.S.-funded Institute for Food and Development Policy.

Bello's book acknowledged the nearly beneficial results of small-scale, self-help projects like World Neighbors, but also chronicles the increased impoverishment of the Filipino population at the hands of the U.S. Agency for International Development, the World Bank, the Marcos regime and multinational corporations from the U.S.

According to Bello, the politically motivated murders of the American officers, and the numerous street protests during a recent visit to Manila by U.S. Vice President Dan Quayle, expressed a deep-seated bitterness toward the United States.

"By the time Marcos was forced from office in February of 1986, his 14-year regime had received more than $10 billion in U.S. military and economic aid," Bello said in a recent phone interview from San Francisco. Marcos also received unflagging political support from the Reagan administration up to the last days of his rule, Bello added.

On the other hand, a spokesperson for the visiting group of farmers, Lapulapu Cerna, talked about the effectiveness of World Neighbors, a private, self-help organization. Cal Poly became the first college to establish an on-campus chapter of the non-profit, international group two years ago.

Cerna showed slides of the highly successful farming projects he began three years ago. He spoke eloquently of alleviating poverty and hunger for the 700 villagers affected by World Neighbors' work in the Philippines.

Bello stressed, however, that through the Marcos regime, U.S. foreign policy has had a devastating effect on a majority of the Philippines' 60 million people.

"When Marcos took power in 1972, the rate of poverty was 49 percent," Bello said. "By 1985, close to 70 percent of the population lived in poverty. Filipino plantation land was opened up unto U.S. agribusiness — especially the giants: Cargill, DuPont and Del Monte.

The World Bank and the Marcos regime forced labor policies that were so repressive that wages fell by 50 percent, Bello said. The period between 1972 and 1978 saw the bloodiest years of martial law and the installation of the regime's political and economic structures.

American manufacturing interests and oil companies were also given free reign, said Bello.

According to Cerna, together with Cal Poly's International Agriculture Development group, World Neighbors has perfected the Green Revolution in the Philippines. World Neighbors is an American agricultural project designed to bring hybrid seeds and modern chemical farming to Third World countries, a failure for the common people. Massive infusions of World Bank and USAID grants and loans for the purchase of expensive U.S. technology only served to strengthen the wealth and expand the land holdings of the local and multinational elites, Bello concluded in "Development Debacle." The Revolution's result was bankruptcy for small farmers, landlessness and increased hunger.

When asked about the progress of long-promised land reform under the 3-year-old government of Corazon Aquino, Cerna replied that the land reform laws were on the books, but their enforcement "depends on the will of the government."

Bello firmly believes that the Aquino government is basically conservative and is either unwilling or unable to take any significant amount of power away from the traditional owners. In reality, the ouster of Marcos in 1986 was a mere coup, and not the true revolution many had hoped for, he said.

World Neighbors is obliged to operate under similar conditions and to focus on hillside farming methods in many other Third World countries whose political and economic systems leave large segments of the population landless and hungry. Of the 17 countries worldwide that host World Neighbors projects, Haiti, Honduras and Indonesia have experienced U.S. policies remarkably similar to those of the Philippines.

Cris Pillsbury, local World Neighbors media representative, said that county residents had contributed $25,000 in the last year to World Neighbors. She explained that the non-sectarian organization was founded in 1951 and is based in Oklahoma City. The San Luis Obispo chapter was founded in 1976 by Cal Poly professor Will Alexander, graduate student Roland Bunch and community activist Phyllis Davies, Pillsbury said.

"World Neighbors is a people-to-people movement independent of government foreign policy considerations. It does not solicit or accept U.S. government funding," Pillsbury said.

However, as the spokesperson for the visiting delegation of Filipino farmers explained, the Cebu project is now funded by the Ford Foundation with an $80,000 grant as opposed to the World Neighbors donation of $2,000.

Bello concluded his comments with a reminder that the United States has had a long history of relations with the Philippines dating back to the Spanish-American War of 1898. An exhaustive eight-year research by Bello's colleagues, historians Jonathan Shepard and Luzviminda Francisco, estimates that between one million and three million Filipinos died at the turn of the century resisting the American military incursion.

Zimmer has spent life in baseball
Cub manager cracked skull in Columbus, played in Japan

Chicago (AP) — He was 58 years old and had never been kissed quite like that before. And so he blinked and blushed and shookered, from the tips of his toes to the silver nubs on the top of his head.

"I've been kissed more times tonight than by my wife in 38 years," Don Zimmer said, for­ ding a stream of champagne and tears in a jubilant Chicago Cubs locker room last week.

Like most everything else Zimmer says, this, too, had the ring of truth about it. Baseball had broken his head and his heart more times than he could count, but it has been his mistress two years longer than the former Jean Bauerle has been his wife.

They were married at home plate in Elmiria, N.Y., before a night game on Aug. 16, 1951, when he was phenom being groomed to succeed the legend­ary Pee Wee Reese as shortstop for the Brooklyn Dodgers. Soott, who had been his sweetheart since the 10th grade at Western Hills High in Cincinnati, was still naive enough to believe in the romance of being a baseball wife.

Two years later, on a hot July night in Columbus, Ohio, those dreams were shattered forever. Don Zimmer lay half-dead at home plate, struck on the left temple by an overhand curve from right-hand Jim Kirk.

There were cracks in his skull of such frightening width and depth that doctors used buttons made of a rare metal called tantalum to hold what remained together.

Don Zimmer lay half-dead at home plate, struck on the left temple by an overhand curve from right-hand Jim Kirk. There were cracks in his skull of such frightening width and depth that doctors used buttons made of a rare metal called tantalum to hold what remained together.

"I said, 'That's it.' And I never thought about it again," the player he was, "he said.

"I said, 'That's it.' And I never thought about it again," he said.

The doctor, of course, turned out to be right. Zimmer lasted 12 years in the major leagues, play­ing in the 1955 and 1959 World Series with the Dodgers and ear­ning an All-Star berth in 1961. But the skills that promised gran­deur were smothered by the tramp­olines and no one traveled by bus and train. The blooms of youth withered in the grand things predicted in the parabola of the ball begin its de­cent toward the green grass.

Nine Colombian drug dealers sent to prison

All sentenced for up to 30 years for plan to sell 1,200 pounds of cocaine

LOS ANGELES (AP) — Nine Colombians who ran a sophisticated drug distribution ring were sentenced to prison terms of up to 30 years for possessing and planning to sell 1,200 pounds of cocaine. U.S. District Judge Manuel real on Monday sentenced Flor Mary Restrepo, 31, to a 30-year prison term, and her sister, Luz Restrepo, 34, to 26 years in prison.

The two women were described by authorities as the masterminds of the operation. They were convicted on numerous federal drug charges in July.

Also sentenced were: Faber Restrepo, 37, to 21 years and six months; Carlos Monroy, 33, to 23 years and three months; Luis Moshalse, 23, and Juan Casanova, 35, to 19 years. The men were from Medellin, Colombia, authorities said.

Other sentences were: Olga Naranjo Garcia, 32, and Janeth Naranjo Garcia, 30, to 25 years, and Claudio Roger Martinez, 27, to 23 years and three months.

All three were from Cali, Colombia.

The cocaine, which had an estimated street value of $200 million, was seized on April 10 in Westminster and Huntington Beach.

Assistant U.S. Attorney Susan Bryant-Decaen said the cocaine was one of the largest seizures, if not the largest seizure, ever tried in court.

Bryant-Decaen said Real imposed the stiff sentences on the group because of the sophistication of the ring.

She said that under new sentencing guidelines, imposed in 1987, the defendants must serve 85 percent of their sentences before becoming eligible for parole.

Flor Restrepo was also convicted in the trial of using her 17-year-old sister Viviana to assist in the distribution of the drug. Bryant-Decaen said the teen-ager was released on bail from juvenile court and has since disappeared.

Bakker blames Falwell in PTL trial

CHARLOTTE, N.C. (AP) — Jim Bakker completed testimony in his fraud trial by accusing the Rev. Jerry Falwell of cheating PTL followers and by conceding he and his wife accepted millions in bonuses as the ministry's finances founded.

"The real conspiracy to defraud came from that group of people who took over the ministry for their own selfish gains," said Bakker, who insisted Falwell to take over the ministry when he resigned in 1987 in a sex and money scandal.

Bakker also denied the prosecutor's assertions that he failed to tell PTL board members about the ministry's money problems.

"I don't know how the board members could have seen the worst of the financial crisis at Heritage USA," he testified Monday. "They knew we had cash flow problems and they voted to make of the large bonuses for the directors.

"Norman Roy Grinnan and Jerry Falwell threatened those board members that they would be in terrible danger," Bakker testified. Among the threats, Bakker said, was that the directors might be liable to civil suits.

Bakker said he and his wife, Tammy Faye, accepted $3.1 million in bonuses in the mid-1980s as the ministry's finances ran into trouble. He said the bonuses amounted to less than 1 percent of the more than $425 million he raised for the ministry.

"I went to the last defense witness," Bakker testified.

During defense questioning Monday, Bakker summed up his case: "We were a church, not a business." Bakker said Faiwell and his wife, he and his wife, ran it like a business. I had to keep telling them, this was a church, not a business.

In the government's rebuttal, prosecutor Smith challenged Falwell's claim on Friday that PTL had room to house as many as 211,000 "lifet ime partners" at Heritage USA theme park near Fort Mill, S.C.

From 1984 to 1987, PTL issued more than 150,000 "partnerships," promising three free nights stay annually for life in exchange for a $1,000 donation.

A Good Idea Can Make It To The Stars

"No matter what your age or experience."

TRW will be on campus October 18-19. See your college placement office to sign-up.

At TRW, we’re in the business of making history. Taking large scale projects from impossible to possible to yesterday’s news. And you can play a key role. Right now. All you need is talent, energy, and enthusiasm.

At our campus like facilities, you’ll pursue technological excellence alongside the industry’s most accomplished professionals. And you’ll work with sophisticated equipment on next generation satellite, earth/space communications, advanced avionics, or innovative software technologies.

In addition, TRW’s matrix management system complements your strengths by letting you choose your own career path. This way, you’ll have a career. Not a compromise.

For engineering, computer science, math or physics majors, it’s never too soon to talk with TRW. We’ll tell you about opportunities in microelectronics, high energy lasers, large software systems, communications, scientific spacecraft, and many more interesting projects.

If you’re unable to see us on campus, send your resume to: TRW College Relations, E2/4000, Dept. FC, One Space Park, Redondo Beach, CA 90278. Equal Opportunity Employer. U.S. Citizenship May Be Required.

For a cleaner planet, recycle this paper.
Giants get Candlestick lease escape option

SAN FRANCISCO (AP) — The San Francisco Giants, shooting for baseball's world championship in postseason play opening Wednesday, could be shopping by year's end for a new city to call home next season.

The Giants' Candlestick Park lease, running through 1993, was, in effect, torn up by the city's Board of Supervisors on Monday night. By a 6-5 vote, the supervisors approved a measure that would let the Giants out of the lease if the proposal for construction of a new baseball stadium, Proposition P on the Nov. 7 ballot, is rejected by San Francisco voters.

"Bossy" demands scaring S.F. executives

HILLSBOROUGH, Calif. (AP) — A late-night scam artist has come up with a new twist to an employee's biggest nightmare — do-or-die demands from the boss.

An articulate man with a British accent has been calling executives in the San Francisco Bay area recently while they slept, demanding money on the pretense of a personal emergency and threatening to fire them if they can't provide it immediately.

"The whole idea is to hit them when they're half asleep," said William Key, chief of police of this posh community 15 miles south of San Francisco.

"What's baffling us and everybody else is that he seems to have private telephone directories of the corporations and knows who's who, including who's supposed to be." Inspector Ed Boll added if the scam doesn't work on one manager, "he just seems to go right down the directory's list, phone numbers until someone goes for it." Investigators are comparing the case to several on the East Coast. In New York, they said police have issued an arrest warrant for a man who jumped bail after his arrest in a similar scheme earlier this year. He reportedly swindled several East Coast executives, including a lawyer in Washington who personally rushed the thief to the airport to catch a flight.

Nearly the same thing happened last week in San Francisco. A stockbroker told police he lost $400 and even drove the con man to catch a Los Angeles flight after buying him an airline ticket.

In Hillsborough, three stockbrokers of three different companies have reported getting the early morning calls. None fell for the scam.

Key said the phony executive identifies himself as someone higher up in a corporation and angrily tells the would-be victims he has just had his luggage, money and airline tickets stolen and needs cash to make an important meeting in another part of the country that day.

If the person balks, the con man bruasquely threatens to fire him or her as soon as he gets back to corporate headquarters.

Finally, a store that works.
Hello ‘smart toilets,’ goodbye Mexican beer

‘The American Forecaster 1990’ makes predictions for other trends

DENVER (AP) — “Smart toilets” and car radar will usher in the high-tech advances coming in the 1990s, while bad service, loud rock music and Mexican beer will become passe, says “The American Forecaster 1990.”

Other trends on the rise for 1990 are New Age radio, portraits commissioned for ego gratification and “wet” beer to serve on the rocks, says Kim Long, author of the yearly book.

White will be the fashionable color in clothing for women, who will favor shorter hair, he says. Men will grow their hair longer and wear wider ties, the Forecaster predicts.

“In the 1990s we will see phenomenal advances. A popular phrase some futurists use is that life has the potential to move forward very rapidly because 80 percent of all the scientists and engineers who have ever lived are alive today,” said Long. “The corollary to that is that 80 percent of all the artists, crackpots and boozies who have ever lived are alive today. We will see some intriguing things happen in the 1990s.”

Long, 40, is a Denver free-lance author who began writing the Forecaster in 1983 and claims an 80 percent accuracy rate. He wrongly predicted a Dukakis presidency and the demise of television’s “Dallas” and “Dynasty,” but he estimated that half his material reflects inevitable consumer trends.

For example, a few years ago, he forecast that Cabbage Patch doll sales would drop by half. “They dropped off by more than half. It wasn’t guesswork. The information came from the toy industry, which says that all fad toys that sell that well that quickly are temporary phenomena.”

His predictions sometimes are based on his research into Japanese product development.

“Smart toilets” are made by a Japanese company to measure recent hospital outpatients’ blood pressure, pulse, urine, temperature and body weight. Results are displayed on a built-in monitor. Long predicts gadget lovers will pay the $3,000 to have a conversation piece.

Other high-tech trends in 1990 will be robot hamburger-makers employed by fast-food franchises to solve chronic labor problems, and car radar.

Long said car radar systems will gauge other vehicles’ speeds and may incorporate automatic braking. Some experts believe if all vehicles had the devices, highways could be safely packed with vehicles moving at high speeds.

New Age radio took off so quickly that it is a major trend, said Long.

“It’s going to be a permanent form of programming,” he said. “It’s been called musical wallpaper, at its most disparaging. It’s somewhere between jazz and soft rock, and it has the potential to not offend a fairly wide proportion of the population.”

Meanwhile, affluent executives are commissioning sculptures and portraits of themselves and their families, a trend Long calls “ego-art.” “They are recycling what once was a very solid artistic tradition.”

A major trend that will carry through the 1990s is a campaign by retailers to stamp out bad service.

Surveys, polls and extensive studies have shown that this is the top priority,” Long said. “We have become fine-sensitive. Queuing up is a foreign disease that we don’t want to catch.”

Ear plugs are being offered to customers at pop music clubs and rock concerts because of concern about hearing loss, according to “The American Forecaster.”

He notes that at the same time, over-amped car sound systems are booming.

Among drinkers, the Mexican beer fad will be on the way out, he predicted. Liqours with lower alcohol levels and “wet” beer, a brew served on the rocks, will debut in 1990 while low-alcohol beer will continue to founder, said Long.

DENVER (AP) — Former Secretary of State Haig in China

Former Secretary of State Haig in China evening to watch celebrations for the nation’s 40th anniversary.

Li described Haig as an “old friend of the Chinese people.”

Nixon is much admired here because he saw the strategic and diplomatic importance of China and initiated the normalization of relations in 1972 even though China domestically was still in the throes of the ultra-leftist Cultural Revolution.

The Xinhua report said Li and Haig also discussed China’s domestic situation, and Li said he hoped U.S. and Chinese businessmen would increase cooperation.
Rutan indited in academy

Designer of Voyager is '65 Poly grad

A Cal Poly graduate Tuesday was inducted into the National Academy of Engineering at a ceremony in Washington, D.C.

Burt Rutan, designer of the Voyager, was chosen for "leading the engineering, design and construction of a sea-going, remotely piloted, one-time-use aircraft to circle the earth." According to an academy announcement, the 45-year-old graduat

from Cal Poly's aeronautical engineering department in 1968.

Rutan was also given an honorary doc
torate in 1986, the only one he has ever given.

Rutan was not available for comment.

Rutan's brother, Dick, and Jena Yeager, who lives in Nipomo, were the pilots of Voyager's historic nine-day flight, which ended Dec. 23, 1986.

Rutan Aircraft Factory in Mojave, his first company, is where the building for the Voyager began.

Rutan is now president and chief executive officer of Scaled Composites Inc. in Mojave, 80 miles east of Bakersfield.

The Voyager crew was award
ated the only Citation of Honor and a Medal in a ceremony at the White House on Dec. 29, 1986.

Eighty-nine other U.S. engineers were also inducted into the academy.

The National Academy of Engineering is a private organization established in 1964. Members of the academy ad
vise the federal government on questions of science and technology.

Cynthia Garvey released after serving 1 day in jail

LOS ANGELES (AP) — Steve Garvey's ex-wife was ordered freed Tuesday from a county jail where she had served one day of a five-day sentence for refusing to allow Garvey his court-ordered visits with their two teenage daughters.

Judge of the 2nd Court of Appeals, ruling on a petition filed by Cynthia Garvey's at
torney, said the Superior Court "abused its discretion" in ordering her to jail for Monday of contempt of court.

The scate appellate court said the "petitioner should be released on her own recognizance." Signing the

order were justices Joan Klein, George Danilson, Armand Arabian and R.C. Walter Crenshaw, said judge Duke Mayfair.

Garvey was expected to be released by late afternoon from the San Bernardino jail, the county's maximum security women's facility in Monterey Park.

Superior Court Judge Frank Farina barred Garvey, her of violating a December 1988 court order to allow Garvey his court-ordered visits with their two teenage daughters Whiskey, 13, and Kira, 14, to spend every Thursday afternoon and two weekends a month with their father.

ILLNESS

From page 1
— is an acute highly contagious disease caused by a number of different viruses — a feverish illness. Vaccination against influenza is not necessary, he said, unless there is a preexisting illness or transplant. He advised students with heart disease, serious asthma, or those over 60 years of age to check with their doctor.

In the meantime, the Health Center is either prescribing no drugs or over-the-counter drugs such as Tylenol or antihistamines for the viral infections of most students.

Bell said he took four herbal pills “the size of wine corks” all at once and has felt better since.

Now there’s more in the Apple* Macintosh* family to choose from than ever before, with six computers to meet every personal computing need.

Start with the Macintosh Plus, the Macintosh SE, and the Macintosh SE/30. These integrated systems offer the affordability, ease of use, and consistency of applications traditionally associated with Macintosh.

And their compact design makes them easy to transport, wherever you go.

Now meet the modular side of the family: the Macintosh II, Macintosh IIx, and the newest member, the very versatile Macintosh IIcx. These expandable, high-performance computers can be configured for virtually any task. You choose the amount of RAM, the type of monitor, and the storage capacity of the hard disk, which means you can build a system to handle everything from desktop publishing to scientific and engineering applications.

But no matter which system you choose, you’re still getting all the advantages of a Macintosh. See us today, we’ll help you choose wisely.

ORDINANCE

From page 1

issue, we ask that you (the coun­
cil) take heed of our concerns,”
Echeverria said.

None of the committee
recommendations were used in
the ordinance.

Vice Mayor Peg Pinard, who
ran the meeting due to Dunin’s
absention, said the ordinance
will benefit students as opposed
to popular opinion.

“Students have said to me,
‘Why do I have to live in a shed
because there’s no other housing
available?’ There is no way to
deal with that right now (before
the passage of the ordinance),
but this (the ordinance) would
deal with it,” Pinard said.

During the public forum, sev­
eral students voiced concern that
this decision should be theirs.

In spite of the decision, Coun­
cilmember Allen Settle said he
was happy to see the massive
student turnout.

“It is wonderful to see.
I compliment all the students
who came out tonight because we
need to hear from the students as
much as we need to hear from the
community,” said the mayoral
candidate.

AN EQUAL OPPORTUNITY EMPLOYER
L.A. tests 'electronic leashes' as juvenile hall alternative

LOS ANGELES (AP) — Overcrowding prompted juvenile detention authorities to release some accused offenders in shackles — not chains but electronic leashes designed to keep them under house arrest.

Youngsters accused of moderate, mostly non-violent offenses can lounge at home watching TV or playing cards, but if they try stray more than 150 feet from home, the electronic monitoring ankle alert system takes effect.

Since the program began in the spring, 21 boys and one girl have been released from San Fernando Valley Juvenile Hall in Sylmar with the electronic tracking devices.

Just three of the 22 youths taking part in the pilot program have violated probation and authorities consider only one of those cases a clear failure.

"It used to think, 'Gee, that sounds like '1984,'" but when you think about being in a juvenile hall that's way over capacity, with really hard-core kids, then this can be a really good option," said Michael Lindsay, a Los Angeles County juvenile detention director.

The detention facility houses 1,900 juveniles although it was designed for a maximum capacity of 1,300.

Those participating in the program stand accused of crimes ranging from burglary and auto theft to vandalism, non-violent weapons assaults and small-time drug sales.

Youths facing major drug charges, weapons violations or repeat offenses cannot take part. While under house arrest and awaiting trial dates, the juveniles cannot use alcohol or drugs, or associate with known troublemakers, including gang members.

The devices strapped to their ankles are programmed to set off a central computer alarm if they stray more than 150 feet from a transmitter placed in a home telephone.

Deputy District Attorney Shellee Samuels says the electronic home surveillance may not be strict enough to deter the youth from a life of crime.

"Part of the whole idea about juvenile hall is that it's supposed to show them what institutional life is going to be like if they don't straighten up," Ms. Samuels said.

"I'm not sure staying at home, even with all the restrictions, really does that," she said.

But some county officials say the electronic surveillance system is worth a try because of the overcrowding situation and the fact that the leashes provide the county with a cheaper way to detain alleged offenders.

The average per-day cost using the system is $15, compared to the $61 daily cost of housing them at the juvenile hall.

Similar electronic leash systems for juveniles exist in Riverside and Orange counties, as well as in North Carolina and Mississippi.

Joseph Vaughn, a criminal justice researcher at Central Missouri State University, said most juveniles spend all their time at home watching TV or playing cards, and find that people they thought were their friends don't come to visit.

"They're typically running with a fast crowd, a street crowd that doesn't want to come over and watch TV or Par- cheese," Vaughn said. "All of a sudden they see that these aren't their good friends.'

Cool Car Contest, Sock Hop coming

The South Bay Community Center in Long Beach is sponsoring a 50s/60s Sock Hop Sat., Oct. 7 at 8 p.m. Admission is $6. The event will feature dancing, eating, door prizes, dress prizes, a limo contest and dances from the era performed by a dance troupe.

Also included will be a Mock Rock Contest, where participating groups will pay their own record and lip sync. Winners are selected by the applause meter. Something new for this third annual dance is the "Cool Car Contest," where anyone owning a 50s or 60s car will be able to enter it in a contest for the Cool Car Award.

Tickets for the event are available at the South Bay Community Center, Fast Eddie's in the Central Coast Plaza and other locations. For more information please call 528-4169. The South Bay Community Center is a non-profit, public benefit corporation.

Craft is keynote at women's festival

Cuesta College's 16th Annual Conference for Women will be held Friday, Oct. 6 at 6 p.m. in Cuesta's old gymnatorium. The conference features TV anchorwoman Christine Craft as the keynote speaker at approximately 8:45 p.m.

Craft is noted for her successful legal battles against discrimination by a former employer, a TV station in the Midwest.

She will also talk about her work as a managing news editor of a Sacramento TV station.

The conference will showcase an art exhibit by Cuesta students and faculty and 30 non-profit organizations will stage tables within the gym. There is a $5 admission fee, which includes a free cup of coffee and a Continental Breakfast.
Raiders' head coach Shanahan is canned

DEVER (AP) — If Mike Shanahan isn't named Denver's first assistant coach again, he's welcome to return to the Denver Broncos' staff.

Shanahan, a former offensive coordinator with the Broncos, was fired on Tuesday as head coach.

Broncos head coach Dan Reeves said that although he hasn't talked with Shanahan since the firing, he definitely was receptive to discussing Shanahan's return to Denver.

"I wouldn't rule out any possibility," Reeves said Tuesday. "Mike is a great coach. I don't know what his plans are, but I would love to have Mike Shanahan on our staff."

Asked what capacity he would fill, Reeves said, "Anything but head coach."

Shanahan, 37, guided the Raiders to a 7-9 record in his first season in 1988. This year, after winning their opener, the Raiders lost their next three games.

"I feel badly for Mike because I don't think he was given an opportunity," Reeves said.

Before taking the Raiders' job, Shanahan was an assistant coach in Denver for four seasons, serving as offensive coordinator during Denver's two Super Bowl seasons of 1986 and 1987.

On Tuesday, Art Shell was named the Raiders' new head coach, becoming the first black head coach in modern NFL history.

"I think the world of Art," Reeves said. "He's been a great player, and I know he can be a great coach. He certainly has silver and black running through his blood. I wish him the best ... in all his games except one."

Over 180,000 world AIDS cases reported

GENEVA (AP) — More than 182,000 AIDS cases were reported worldwide by the end of September, a month in which nearly 5,000 new victims were registered, a World Health Organization update said Tuesday.

The United States reported most of the new cases — 3,325 — raising its total to 104,210. The U.S. figure accounted for 57 percent of the 182,463 cases reported in 152 countries through last month.

WHO experts estimate the actual global total is more than double that and that at least 1 million new cases will occur worldwide by 1993.

Updates from several West European countries also pushed up the total toll. WHO covers only people diagnosed as having developed Acquired Immune Deficiency Syndrome, not those infected by the AIDS virus who haven't developed the disease.

Van Gogh robbers get 5-year prison terms

ANNHEM, Netherlands (AP) — Two Dutch men were sentenced to five-year prison terms Tuesday for stealing three paintings by Vincent van Gogh and demanding $2.2 million for them, a court spokeswoman said.

No ransom was paid for the works, and they were all recovered undamaged.

The three paintings, which have a combined value of up to $90 million, were stolen Dec. 12, 1986, from the Kröller Muller Museum, which is in a remote national park 12 miles north of this eastern Dutch city.

The thieves smashed a window of the museum and got away before police arrived.

In April, the thieves returned one of the works, "The Loom," from 1884, in an attempt to force their ransom demand. However, a planned ransom exchange fell through, and the two other paintings, the 1887 "Wilted Sunflowers" and an early version of the famous "Potato Eaters" painted in 1885, were recovered following the July arrests of four suspects.

Brazil reported 7,538 cases, giving it the world's second-highest reported total. Uganda, which has not updated its figure since April, has reported 7,375 victims, followed by France with 7,149.

Brazil's rate of 2.1 cases per 100,000 inhabitants is lower than Uganda's rate of 26.3 per 100,000 and France's rate of 4.5 per 100,000. The United States has a rate of 11.7 AIDS cases per 100,000.

Poly horse judges place at LA Fair

Cal Poly's newly formed Horse Judging Team placed riders in numerous events at the Los Angeles County Fair's Intercollegiate Horse Judging Contest, Sat. Sept. 30 in Pomona.

The riders placed second and fifth in performance judging; fourth and fifth in halter; fourth and fifth overall and third and fourth in reasons.

Coaches Mike Lund and Kay Murphy of the Animal science department worked to prepare the team for the contest but the team only had a week to prepare, Murphy said. The team has 22 students.
