Trial continues for man accused of raping student

Victim takes stand for prosecution

By Michael J. Levy

For The Daily

The trial of the man accused of raping a Cal Poly student in early February has reached its third day, as the trial moved from San Luis Obispo Superior Court.

The prosecution was expected to finish its presentation by late Wednesday afternoon.

The prosecution argues that the defendant, Carl Reed Goff, 19, forced the liberal arts student into a creek along Prefumo Canyon Road in the Laguna Lake area and raped her.

Goff is being tried for one count each of forced oral copulation and one count each of forced sodomy. He could face up to 30 years in prison.

The victim, 21, took the stand Tuesday and testified against Goff. She testified that the defendant was driving with two of her friends, Shawn Bergen, who was working for the California Conservation Corps at Camp San Luis, and Stewart McKenzie, who was on a weekend leave from the Community Development Department.

The victim, who requested anonymity, was grabbed from behind, then forced to turn and face her attackers. She then alleged that Goff grabbed her by the arm, put a knife near her collar bone, and told her to shut up. He forced her into a nearby creek while Teller and Bergen remained in the car.

The victim testified that Goff led her through the creek, told her to take off her clothes, and threatened to rape her if she didn't. She then reported the incident to the police.

The $18,000 bond was set Wednesday afternoon.

By Byrdy Williams

For The Daily

A transition from fossil fuel and nuclear energy sources could fundamentally resolve many of the most serious global environmental problems, according to an author who will be at Cal Poly today.

Scientist Harry Braun will discuss problems like greenhouse warming, acid rain, oil spills, stratospheric ozone depletion, air pollution and the production of nuclear waste.

Braun, of the International Association for Hydrogen Energy, is a leading advocate of solar-hydrogen technologies and will provide an audiovisual presentation on the subject tonight at 7:30 p.m. in the University Center.

Student renters not obligated to accept substandard housing

By Glenn Hom

For The Daily

Student renters do not have to accept substandard housing conditions merely because their rent is inapparent, the San Luis Obispo City Planning Commission was told Thursday.

Rob Bryn, who receives about five housing occupancy complaints daily, said students can file complaints, if they think their rented building is unsafe or not properly maintained and the owner will not correct the problem.

Though not a tenant/landlord dispute, the Community Development Department will handle complaints by anyone who is aware of common violations and safety hazards.

"We're not asking them (students) to be building inspectors," Bryn said. "We simply want them to look and be aware of some things."

To help students recognize basic housing problems, the city of San Luis Obispo has teamed up with Cal Poly and Cuesta College to produce a student renter brochure, scheduled to be distributed within the next week.

The "Renter's Checklist To Safe Housing" was compiled by a subcommittee of the ASI Student-Community Liaison Committee.

"One of the main reasons that we put this brochure together," Bryn said, "is to prevent students from renting substandard housing.

Kim Veitch, chairperson for ASIS'S Student-Community Programs Committee said the brochure will help students get the "fair deal of the deal."

"Although they consider fair housing an issue," she said, "a lot of students might not immediately think that can get a (decent) standard of living without paying more."

One of the biggest concerns the renters brochure warns about is the gas water heater and the location in which it is stored. Fire codes prohibit water heaters from being placed in a bathroom or any room that is used for sleeping.

The handout also notes that a heating system is required and must be able to maintain a room temperature of 70 degrees Fahrenheit. Portable "kicker" heaters do not meet this requirement.

Additionally, many conversions of garages, attics and sheds into living quarters are not authorized "by permits and do not meet safety codes.

Most students know smoke detectors, exposed wiring and sanitary conditions are a landlord's responsibility. Many, however, are not aware that an owner must also provide sufficient parking and have a permit if more than five adults occupy a residence.

After a complaint is filed, investigators will contact the owner and visit the site. If necessary, citations will be issued, thus forcing landlords to comply with housing codes, Bryn said.

In the most extreme cases involving "life-safety" violations, the Community Development Department will respond to complaints within 24 hours or, if necessary, order tenants out of the residence, he said.

"All we're trying to do is make it safe and (ensure) that everyone's rights are protected," Bryn said.

"This is not an anti-landlord campaign," he said. "It's not the people (owners) we have contacted, but the people have been executed.

If necessaiy, order tenants out of the residence, he said.

Students council to hold panel on housing

Along with his lecture, Braun will show slides and a 15-minute video on a liquid hydrogen fuel research project. Braun is a technical advisor to Arizona State University and a research analyst with Trans Energy Corporation, p. private engineering and material sciences firm in Arizona.

Together with other members of the American Hydrogen Association, Braun will provide an audiovisual presentation on the subject tonight at 7:30 p.m. in the University Center.

Student council to hold panel on housing

Reminiscing about Poly...

Guest columnist Stewart McKenzie reflects on his four (yes, he made it out in four!) years at Cal Poly.

Vroom!

Cal Poly student Michael Edick will spend his summer living a childhood dream: working for a race car driver.

Dancing her heart out...

One Cal Poly student is dancing in the San Luis Obispo Civic Ballet's "Gala World Premiere" of three contemporary dances.
I drive to campus infrequently. Luckily for me, I'm just close enough that I can ride a bike or take the bus. But for those of you who drive here every day, I'm not referring to the lack of parking spaces, but I'm referring to the fact that we seem to have opened up more spaces lately. Rather, I speak of the pedestrians who insist on crossing without thinking, "It's the cars turn to go! I'll wait on the corner a second." 

Instead they bolt on out from the sidewalk into the crosswalk and in front of your car, when it was your turn to go! And they know they've pushed the limits of pedestrian rights because they never look at you. They always stand at the ground or straight ahead as if they didn't notice your impatient glare.

One week ago as I sat in my Subaru waiting and waiting for my turn, I thought I'd rev the engine a little, hoping to spur a pedestrian to think, "Gee, maybe I should have waited for that car to go by before I decided to cross the street ... I hope this guy doesn't run me over." It didn't work. Obviously, I need a truck with a bigger, meaner sounding engine. 

I see other drivers successfully getting across by edging their cars into the crosswalk, faking the oncoming traffic, and then waiting for the pedestrians to start their crossing, giving the impression that they are being held up by the pedestrian in the crosswalk. 

Hopi Indians have to go around your car. This is just enough extra effort that most will stay on the sidewalk, hoping you'll drive away. It's even been my experience that some will wait and wait, to the point of a standstill, of just thinking they have a right to be on the crosswalk.

Oh sure, laws say all cars must wait behind the crosswalk when a pedestrian is in the crosswalk. But the Hopi see no such law as holding them to this pedestrian attitude, "I'm crossing and I don't care if 40 people mean to hit me." 

If one area had to be singled out as the best place to find these people and the worst place to attempt to drive a car through, it would be the intersection at North Perimiter Road near the library.

I see these "crosswalk commanders" should be excused from using their gray matter since they probably just melted half of it reading a comic or two in the library. I figure they still have half a brain for their right half.

The other crosswalk crawling with "crosswalk demanders" is 300 feet up from the first on North Perimiter Road at Via Carta. The excuse here for not waiting on the curb for a car to two pass must be related to the Pavlov dog conclusion. You know, external stimuli work the same way within us, in this case, the external stimulus must be vision of the campus store, whereby pedestrians have immediately been educated to consider student cracker party mix, and are willing to risk their life to get it. What else could explain such pedestrian impatience?

And the reader may ask, "How do you know so much about it?" I confess: I was a crosswalk commander myself. Yes, I once deserted my curbside right, but then I saw the other side ... as a driver. Only then did I realize that a ten second wait on a campus curb was a small price to pay for improving overall driver manner. I think this is the least I can do to make just a little more sense.

Naturalists spout off at whale watchers who are unaware of safety issues

By Mooorea Warren

From May to October every year, two pilgrimages take place. In one, whales migrate to breeding grounds — in the other, fleets of whale watching boats embark on the ocean, hoping to catch a glimpse of earth's largest creatures.

Once just a pastime for nature buffs, whale watching has become a full-blown tourist attraction along the coastlines of California, Hawaii, Alaska and New England, said Fred Bentcough, who conducts whale watching tours in Santa Barbara.

However, scientists believe that this fascination with whales could be causing the endangered species more harm than good.

Naturalist Nina Young said boats that compete with each other for sightings interrupt the feed cycle, forcing the animals to use up valuable calories. She also said at times, the boats hit the animals.

"Twenty-five percent of whale mortality is caused by collisions with boats, and 15 percent of whales show propeller scars," she said.

Bentcough does not agree. Whales, which can weigh up to 70 tons, can spend 24 hours-a-day eating fish and plankton. He said they are going to eat if a boat is there or not.

Bentcough also pointed out that he doesn't believe boats hit whales that often. "If whales are hit, they usually hit boats, not the other way around," he said.

Gill nets do hurt whales, however, if they become tangled up in them, he said. Boats' motor noise also worries scientists. The noise could be damaging the fibers in the whales' ears, causing them to go deaf, Young explained.

The Marine Mammal Protection Act provides needed regulations, and bans harassment of whales, including a closest approach distance of 100 yards.

An average two-hour whale watching trip costs $18 for adults and $9 for children. Around 20,000 grey whales pass along this coastline each year.
WE'RE FILLING UP FAST!

543-4950

This illustration is Braun's "The Phoenix Project" is a painting of what a solar dish forest might look like in a typical desert region. Braun calls the solar gensets "technological trees."

From page 1 believes that solar technology has been identified that could be mass produced to generate hydrogen from water at a price that is competitive with energy from fossil fuel and nuclear systems.

The hydrogen energy system, Braun says, is the only alternative that is non-toxic, abundant, completely renewable and relatively safe in the event of accidents, and it is essentially pollution-free.

In order to accelerate a transition to solar-hydrogen energy systems, Braun helped draft an Environmental Initiative petition mandating that after the year 2000, new cars would not be allowed to emit any hydrocarbon emissions. The only fuel that could meet such a requirement is hydrogen, according to Braun.

This November, California voters will decide on a "Big Green" environmental initiative that will deal directly with information Braun will be presenting.

Because water is the only by-product, off shore solar-hydrogen production would be especially beneficial by delivering fresh water to drought-stricken Central and Southern Californian communities, according to the Hydrogen Association. Braun's organization believes that if the world's 400 million cars could be retrofitted with hydrogen fuel, they would not only run pollution free, but the engines would last longer and produce more power.

Hydrogen fuel can even be produced by bacteria from refuse. Such use of man's waste products would drastically reduce or eliminate problems of sewage pollution and landfill accumulations.

The Thursday evening lecture is sponsored by the ASI Speaker's Forum. Tickets are on sale at the University Ticket office for students and seniors $3, general public $3 and children under 12 are free.

A Cal Poly student will be featured in the San Luis Obispo Civic Ballet's "Gala World Premiere" presentation of three ballets on Friday night.

Raina Tsuda, a graphic communications freshman, is one of the 15 members of the San Luis Obispo Civic Ballet Company. Tsuda has been a member of the company since last September.

"I'm excited to be a part of the ballet," said Tsuda, who also danced with Cal Poly's Orchestra group fall and winter quarters. "I think the event is going to be really good. Everything in the gala is really original."

"I like the Civic Ballet," she said. "I like ballet the most. Orchestra is more jazz and modern."

"The Gala World Premiers," which will be held in the Cal Poly Theatre, features three dances. The first ballet, "Crossing the Silence," is a suite of contemporary dances. The dances illustrate the idea that between who we think we are, and who we actually are, is a silence, and crossing that silence sets us free and re-introduces us to the world-at-large.

"Crossing the Silence" is a three-part dance," said Tami Ewing, a 10-year member of the company. "The piece takes you from who you think you are to who you really are."

The second ballet, "Walking Suite," is a traditional ballet featuring music by Chopin, Tchaikovsky, Zebelius and other great classical composers.

The third ballet is "Celestial Navigations," which will take place three times a week since March to prepare for its spring production.

Tsuda said that the members of the company have fun together. "They're really good people and dancers," she said.

**Skeptiks’ lyrics take stand on serious issues**

By Amy Koval

When you put them together, you get athletic, aggressive artistry. Music is treated as a sport, an outlet, an escape — or all three.

Just a month young, the Skeptiks is a band whose members are Cal Poly students with musical interests spanning from jazz to metal. The result is a self-described heavy, hard, melodic thrash.

But it doesn’t end there. What the Skeptiks’ band members do that might set them apart from other bands is consider the message they put across. And, at least to some degree, they believe music is something to be studied.

Frank Cook, one of the Skeptiks’ founding fathers and its lead guitarist, is an English senior with a minor in music. His minor project was fulfilled by recording a four-song demo with his previous band, Kruegar — the band from which the Skeptiks’ founding fathers and its rhythm guitarist Zack Williams.

(Skeptiks is a band whose members are Cal Poly students who recently formed a new band, the Skeptiks. (Not pictured is the group’s lead guitarist Zack Williams.))

“We work well together,” Ewing said. “We’ve all danced together since we were 7 years old. It definitely builds a real strong sisterhood kind of relationship.”

The concepts and choreography for the gala are by the Civic Ballet’s Artistic Director Lori Silvaggio.

“Lori’s great,” Tsuda said. “She’s a good inspiration to everyone and really encourages everyone.”

In addition to the company, a special guest dancer also will be performing in the gala. Kendall Sparks, a dancer for the Cleveland Ballet Company, will be making a special appearance in “An American in Paris.”

Sparks has been with the Cleveland Ballet Company for more than two years. He originally trained to dance in San Francisco as a member of the Berkeley Ballet Company.

Sparks has performed in other Civic Ballet productions, including "The Nutcracker." We’ve really excited to have him,” said Bonnie Garrattano, the public relations director. “He’s a really dynamic dancer. He’s so exciting to watch.”

“I think it’s great to have Kendall,” Tsuda said. “He’ll add to the show because it’s sometimes hard to find professional dancers who would want to dance.”

In addition to Friday night’s show, the company will be making a special presentation to the San Luis Coastal School District. “It’s (the gala) really innovative choreography,” Ewing said, “and I think the audience will really enjoy it.”

The Civic Ballet’s Friday night performance is at 8 p.m. in the Cal Poly Theatre. Ticket prices range from $5 to $10. For more information, call 544-3463.

Oregon keeps Shakespeare’s memory alive

By Ken Essl East Oregonian

Planning a trip this summer? One need only look to the state above California for the perfect getaway.

Ashland, Ore., is presenting its 55th annual Oregon Shakespeare Festival this summer and, play performances, which kicked off this week, will run through October.

Festival representatives said 88 percent of those who attend the annual event travel long distances to enjoy the many productions. The average Ashland visitor sees five plays and stays in the area four days.

The outdoor Elizabethan Stage is scheduled to open June 15. Three of Shakespeare’s plays will be presented on the stage throughout the season — including a comedy, a historical drama and a romance.

“The Comedy of Errors” is a play about mistaken identities and hilarious confusion between a man and his servant. The two plays and stays in the area four days.

“The Winter’s Tale,” Shakespeare’s romance of forgiveness and healing, opens June 17. Shakespeare wrote of a suspicious husband whose unreasonable jealousy leads to the loss of his faithful wife and young son.

Although the Oregon Shakespeare Festival features plays by Shakespeare, the acting company also presents the works of other playwrights each summer.

“The Comedy of Errors” and “The Winter’s Tale” date to the 1590s. The Oregon Shakespeare Festival also offers Ashland visitors special concerts, lectures, a museum and classes.

Ashland is nestled between Grizzly Peak and the Siskiyou Mountains, which is about a 10-hour drive from San Luis Obispo. Festival members claim the town has similar qualities to San Luis Obispo with a blend of small town pleasures and urban amenities.

Tickets are $10 for general admission. For more information, call 543-0223.
China frees 97 protesters, including 2 student leaders

BEIJING (AP) — China freed 97 pro-democracy protesters, including two student leaders, after the anniversary of the June 4 army attack on last year’s demonstrations passed without major unrest, officials said Wednesday. The releases bring to 881 the number freed in the past six months, out of thousands arrested.

But new arrests have been reported as recently as last week, and the releases did not signal a softening by the aging leadership.

The leaders still maintain that last spring’s massive protests for democratic reform and an end to corruption were part of a coup attempt and that Western-style democracy is inappropriate for China.

Rather, the leaders appeared to be trying to put the protests behind them and improve their image at home and abroad. China’s most-favored-nation trade status remains under review in the U.S. Congress, and foreign tourism and investment remain far below their pre-June 1989 level.

A Chinese state radio reported 22 of the protesters are actually in jail, some in undisclosed locations. At least 10 more are still under investigation.

"Spend your rental money wisely," Bryn said. "Don't get involved in something that is not good for you."

According to Edick, on an average track, the Nissan can attain speeds of 170 mph on a straightaway.

But new arrests have been reported as recently as last week, and the releases did not signal a softening by the aging leadership.

The leaders still maintain that last spring’s massive protests for democratic reform and an end to corruption were part of a coup attempt and that Western-style democracy is inappropriate for China.

Edick was recently elected president of Society of Automotive Engineers and did all of the welding on the Cal Poly solar car, "Sun Luis."

"Spend your rental money wisely," Bryn said. "Don't get involved in something that is not good for you."
OPPORTUNITY KNOCKS!

Upperclass or graduate student in electrical engineering wanted for summer project by private individual. Must be capable of independent work and familiarity with digital, analog/digital circuits. Mechanical abilities a plus for prototype assembly. Person will be expected to design, document, and construct a device for possible patent application. Person will also be expected to sign a non-disclosure agreement. Please be prepared to provide any hobby or other projects demonstrating your capabilities. Professor's reference(s) desirable.

Project synopsis: A signal from either an optical or magnetic pick-up is to be properly digitized, counted and displayed on a LCD read-out with user choice of units (i.e. feet, inches, etc.).

Person will be expected to design, document, and construct a device for possible patent application. Person will also be expected to provide any hobby or other projects demonstrating your capabilities. Professor's reference(s) desirable.

VALENCIA

... For Those Who Want It All!

• Private Bedrooms

• Heated Swimming Pool

• Weight Room

• Computer/Study Room

• Fitness Center

• Cal Poly Shuttle Bus

We believe Valencia is the finest student housing in San Luis Obispo. But we don't want you to just take our word for it. We invite you to look at our competition (Cedar Creek, Murray St. Station, Stemmer Creek, Mustang Village, Foothill, Hacienda, and others) and then look at Valencia. We're confident you'll choose Valencia!
