National teleconference probes greek social issues

By Erik Dills

More than 700 Cal Poly fraternity and sorority members took part in a national teleconference Sunday afternoon that focused on social issues such as hazing, date rape and alcohol abuse. The conference was designed to draw parameters concerning those and other issues pertinent to the greek community.

Approximately 80,000 Greeks from 85 campuses in 48 states participated in the first-ever "Greeks Live Teleconference." The program was telecast live from Oregon State University.

"The purpose of the program is to look at ourselves as we go into the '90s, see how we are viewed by the community, and look at how we can better ourselves for the next 10 years," said Cal Poly IFC President James Fitzgerald. "It's kind of an evaluation of where we stand ... to create a plan of attack for the 1990s."

Fitzgerald said that issues such as hazing, date rape and alcohol abuse were being discussed at the conference in an effort to promote both understanding and change among greek communities throughout the country.

"We are constantly trying to have educational programs," Fitzgerald said. "Last year we had Will Keim (the BBC's America correspondent) speak in person ... and we also had a speaker on date rape and a speaker on hazing."

The purpose of the program is to look at ourselves as we go into the '90s, see how we are viewed by the community, and look at how we can better ourselves for the next 10 years.

— James Fitzgerald

IFC President

The Canadian Consulate that the stamp in question was unnecessary, so (according to the history department) he was not anticipated in such a problem.

Max Riedlsperger, head of the history department, said Monday that he is outraged because the way Oriji has been treated.

"In all honesty I have to say that when we had Will Keim come here in person it was much more effective. But it is a lot less expensive."

"I am ashamed of my government," Riedlsperger said. "I am outraged because there aren't very many chances for all the greeks to look at all these topics."

Home economics junior Anja Moss agreed with Maples but said that she thought the conference gave Greeks a chance to hear many good speakers on a variety of subjects.

"Now it is more like a conference and there are different things for different people," she said. "We all have a schedule of events and you can't come and go when you need to."

Fitzgerald said that there will be discussions to follow-up the conference and to answer unanswered questions.

"We are going to set up follow-up programs on this and we are videotaping the teleconference also," he said. "We will probably try to set up something so that those subjects will still be discussed in the houses."

Grad dies in Saudi jet crash

By Jason Foster

A Cal Poly poly history professor is stranded in Canada after being refused re-entry to the United States last Sunday because of an apparent lack of a stamp on his passport.

John Oriji, a native of Nigeria, is being held by the Canadian Consulate in Toronto because he did not have the proper documentation to enable him to re-enter the United States.

At this time, Oriji is awaiting a decision from the Consulate on Wednesday that will either send him back to California or deport him to Nigeria. Apparently, Oriji was told by the Canadian Consulate that the stamp in question was unnecessary, so (according to the history department) he was not anticipated in such a problem.

Max Riedlsperger, head of the history department, said Monday that he is outraged because the way Oriji has been treated.

"I am ashamed of my government," Riedlsperger said. "I am outraged because there aren't very many chances for all the greeks to look at all these topics."

Wheatley begins duty as department head

By David Bock

The new chairman of Cal Poly's computer science department hopes to bring a little empathy and understanding to an area of academia traditionally associated with aggressive, unemotional machines.

Professor Patrick Wheatley, a 20-year faculty member is beginning his three-year term after being appointed by Dean of Engineering Peter Y. Lee.

Wheatley said that he wants to use a more personal and people-oriented approach to his position.

"I feel I'm a people person," said Wheatley. "What I want to do is to try and help both students and faculty achieve their goals and to be happy with their work."
Letters to the Editor

Lacrosse is a Cal Poly team

I am writing in response to certain comments I overheard at the Cal Poly home game on Friday.

I am an officer of the Cal Poly lacrosse club and I was very disappointed to find out that WOW counselors and others had been informing the student body that "Cal Poly does not have a lacrosse team." This is, of course, not true, but it's not an organized team.

We do have a team and this year we will be playing in Division I north play last year.

The Cal Poly lacrosse club is U.S.I.L.A. and W.C.L.L. approved. This league membership and recognition is not just handed out to anyone. It is earned by playing consistent, solid lacrosse.

I must admit that this club exists in the past, suffered poor attitudes of a few individuals, but these problems have been solved.

The future looks good for us, with a returning veteran coach and an increased amount of stability and team unity coming within the next few years.

Lacrosse is the only other contact club sport, other than rugby, offered at this university that gives the students an opportunity to compete in an intense physical field competition without the extreme commitment of a football team.

It is my hope that with this letter, I can put the idea that the club will be increased and that maybe next term some more interested people may come out just to see what it's all about before deciding to join. They missed some great games because they had the facts straight before they answer.

Scott Birchett
Lacrosse club officer

Party-goers must be responsible

I have been living in San Luis Obispo for the past six years, going to school, working and now getting my Master's degree.

As a student, I can understand why people want to "party" and I think it is part of the time that does not bother me. The thing that bothers me is probably many of the other students and members of the community, it is the inconsiderate behavior of some of the party-goers which reflects poorly on the entire community.

What I am specifically referring to are those students that dispose of their beer cans, bottles and plastic cups in the street or in people's front yards.

Hathaway Street on any Sunday morning is a mess! It is then up to the residents to clean up after the party.

Another thing that is irritating and rude are those people that feel it necessary to "relieve themselves" in the front yards of the most convenient house. Do they think no one notices?

Private is the key word. If for some reason this energy is not released (for example when you're on a crowded bus and can't get off), muscles suffer a build up of lactic acid that leaves them irritated and inflamed. There are few things in life which feel better than massage, or chronic conditions. Stress triggers the production of adrenaline or chronic conditions. Stress triggers the production of adrenaline and serum. According to Richard Stein, M.D., associate professor of clinical medicine and acting chief of cardiology at State University Medical Center in Brooklyn in New York, touching also seems to act as a substitute for medical treatment in serious or chronic conditions.

One reason massage is a great stress reliever is because stress triggers the production of adrenaline and a corresponding burst of energy to help you survive any stress.

According to a recent article in Runner's World, the list of benefits many runners attribute to massage is so long and varied that you begin to think the therapy is nothing short of magical. The benefits listed in the article for runners (and others as well) were - muscle maintenance because a regular massage actually makes for healthier muscles; improved circulation - with healthy, well-maintained muscles, you can train harder and improve your racing; peak performance, injury repair; and because a massage feels good.

After completing my massage course, I then investigated in one hour of professional massage by a therapist and, I will definitely invest again.

There are few things in life which feel better than a professional massage therapist's warm, oil-covered hands stroking and knocking your feet and legs. As you let yourself become more relaxed, the therapist's fingers probe deeper into your muscles. And the more relaxed you become, the more exquisite the state of relaxation.

During a full-body massage, the therapist works systematically, progressing from one area to the next until all the knots and kinks have been worked out and your entire body feels relaxed.

At $30 to $80 an hour, a full body massage by a professional therapist is a luxury.

I personally would recommend anyone, sports oriented or not, stressed-out or stress-free, to get a professional massage. If you don't want to invest that kind of money, then take the class here on campus through Rec Sports. It's only $22 for six weeks (three hours a week).

The world of artful touch is a doorway to deep relaxation and connectedness with one's body, mind and spirit. It can help to further understand the natural connection between physical symptoms and emotional ones.

WOW Board was not responsive

I am adding to some comments I made concerning this year's overlapping of WOW and Panhellenic Rush dates in the Oct. 1 article "Poly Panhellenic rush figures drop by 13 percent." First, I would like to make it clear that I am not speaking for Panhellenic, and I thus relinquish the burden of being diplomatic.

For the record, Panhellenic is an organization that continuously lends itself back in the name of mutual respect and co-existence. Comments made in this article by Panhellenic President Kelly McMcIlvan and Panhellenic Rush Director Kim Forrester are exemplary of this. Both commend the WOW Board's efforts to compete with some of the problems presented by conflicting schedules.

I commend the WOW Board for this as well.

However, why is it still my feeling that when it was called to the attention of WOW Director Mr. Bob Walters that this year's WOW date alterations coincide with traditional dates of Panhellenic rush, Walters calmly flipped his calendar over to September and said, "Ge, so they do. What of it?"

WEST BERLIN (AP) — Germans on Monday got ready for the nation's party of the century — a celebration of unity that could be disrupted by thousands of radical street fighters in Berlin.

When the clock strikes midnight tonight, the two German states will become a single sovereign nation, ending more than 45 years of postwar separation.

The mass-circulation Bild newspaper said that 10,000 leftist were expected to go on a rampage, breaking store windows and looting merchandise. Police fear they will clash with rightists who have also vowed to march through Berlin.

Kohl will lead the celebrations starting tonight in front of the Reichstag, the historic parliament building that still bears the scars of fighting between Soviet and German soldiers at the end of World War II.

In Hamburg, West German Chancellor Helmut Kohl said the powerful new country will have to take on a greater international role.

"Everyone must know that there is no withdrawing into a comfortable niche of world politics," Kohl told a convention of his Christian Democratic Union.

Thousands celebrate China's National Day

BEIJING (AP) — Chinese across the country Monday marked China's 41st National Day. Tens of thousands took advantage of the day off to visit the Asian Games, while others went to Tiananmen Square to see the elaborate floral arrangements there.

National Day marks the anniversary of the See WORLD, page 6

High court upholds death row decisions

WASHINGTON (AP) — The Supreme Court rejected the appeals of four California death row inmates, including a man who killed his father and stepmother with a shotgun in their Pacifica home nine years ago.

The court let stand on Monday previous lower court rulings that Michael Hunter, Kenneth Long Jr., Robert Thompson and Michael Anthony Jackson received fair trials and proper sentences.

Hunter was convicted of the Dec. 29, 1981, murders of Jay and Ruth Hunter in Pacifica. Prosecutors said Hunter had been feuding with his stepmother.

His appeal argued that a key defense witness should have been allowed to testify under limited legal immunity.

Lang was sentenced to death for the Aug. 18, 1983, killing of Thurmund Andersen, a Camarillo man who had been hunting in Los Padres National Forest near Santa Barbara.

Thompson was found guilty of strangling a 12-year-old boy, Benjamin Brennan, who failed to return home from his Anaheim paper route on Aug. 25, 1981.

Jackson was convicted of killing Los Angeles police officer Kenneth Wrede on Aug. 31, 1983.

Yosemite Park hits the one-century mark

YOSMITE NATIONAL PARK, Calif. (AP) — Rangers and tourists celebrated Yosemite's unique status as the granite gem of the Sierra on the park's 100th birthday Monday.

A moment of silence recalling the peace and quiet before humans came to Yosemite Valley highlighted the ceremony held in See STATE, page 6

Retired WWII nuclear attack general dies

MARCH AIR FORCE BASE, Calif. (AP) — Air Force Gen. Curtis LeMay, who relaunched the orders to drop nuclear bombs Hiroshima and Nagasaki, died Monday. He was 83.

The retired four-star general, who would have been 84 on Nov. 15, died of a heart attack at the 32nd Strategic Hospital at March Air Force Base, said Sgt. Steve Mahnke.

LeMay directed the air attack on Japan at the end of World War II.

"We felt that our incendiary bombings had been so successful that Japan would collapse before we invaded," LeMay said in a 1985 interview.

"We went ahead and dropped the bombs because President (Harry) Truman told me to do it. He told me in a personal letter."

But LeMay said he felt the United States could have defeated Japan in "a few more days" if it had continued the firebombing of Japanese cities.

LeMay, who lived in Newport Beach, also ran for vice president with third-party candidate George Wallace during the 1968 presidential campaign.

Police use radar to monitor speed on streets near Poly

**Officers: No crackdown, but doing our job**

By Sabrina L. Garcia

Cal Poly students should watch their speedometers in the "high speed areas" that surround campus or they'll probably have to pay a fine.

Contrary to popular belief, Traffic Sgt. Jim English of the San Luis Obispo Police Department said Monday that there is not a crackdown on traffic violators in the Cal Poly area.

"There is not a crackdown, it's called 'doing our job,'" English said. "If it seems like more citations have been given it's because the streets around the Cal Poly campus are generally high speed areas and motor officers are assigned to that area. So with the students being back in town, there will obviously be more violations."

The radar trailers seen on the surrounding streets of campus, English added, are there "for the benefit of the drivers."

"The trailers don't take your picture or send you a ticket," said English. "Hopefully when you see the trailer and realize how fast you're going, you'll slow down voluntarily."

Radar trailers have been placed on every main street in San Luis Obispo, English said. Lately the trailers have been on Slack Street, California Boulevard, Grand Avenue and Fredericks Street.

But English said his office distributes motor officers only where they are needed. "I didn't have anything in mind when I made the assignments in the Cal Poly area," he said. "I put my officers where the citizens say they're needed. If I get a request that someone's neighborhood has problems with fast traffic, then that's where I'll send my officers."

Graphic arts senior Bob Marcoulier said Monday, "I've seen those things on wheels that tell you your speed everywhere lately and it seems like there is always a cop near by. I think there is a crackdown. I see cops everywhere."

The traffic on California Boulevard has gotten more attention lately, according residents.

Mike Matheny, a business senior, lives in the Delta Sigma Phi house on California Boulevard. He said that in the time he has lived in the area, he has never seen so many police officers on California Boulevard. "I see a lot more cops and a lot more people getting tickets," Matheny said. "I haven't seen any accidents though, so maybe this crackdown is good."

From page 3
Hypocrisy on Campus, a 1,000 member of activists. "If one (religious) sign, they all should join." Cosentino said he is encouraging students to call the Arizona chapter of the American Civil Liberties Union (ACLU) — the petitionor of the successful suit filed against the university's board of regents — to protest other religious symbols on campus.

He said kachina figures on a water fountain near the school's Language and Literature Building, an Indian ritual mural in the Administration Building and symbols near the entrance to Hayden Library have been linked to Shintusm all should be targeted.

He also said his group is considering legal action.

The ACLU filed a lawsuit last fall against the school's former Interim President Richard Peck and the Arizona Board of Regents, calling for the cross's removal on the grounds that its presence was a violation of the school's constitution, which ensures separation of church and state.

After the judge delivered his decision, he allowed two Christian campus group several months to file an appeal, but both groups said they could not afford the legal costs.

The symbol has been relegated to a storage space in the university archives building, but some members of the university community say they would like to see it put on public display. Others would like to see it used for its original purpose somewhere off campus.

"If they're going to keep it boxed up, they should give it to someone who needs it, said senior Dan Martin, one of the students who defended the 3-foot by 3-foot, sheet-metal cross during the legal battle.

Sue Richardson, a member of the Campus Crusade for Christ, said she would like to see the symbol displayed. "But if it's not on top of a chapel, I don't think it makes much of a difference one way or another," she said.

In a 1249 decision of the People's Republic of China following the overthrow of the Nationalist government.

On Sunday night, Premier Li Peng toasted the party's 41-year rule at an annual reception for foreign diplomats.

The traditional mid-autumn moon festival, a time for family reunions, this year falls two days after National Day, extending the holiday and adding to the festive atmosphere.

In Beijing, the where the the 11th Asian Games are under way, National Day banners have gone up along streets already lined with colored flags and banners hailing the games and welcoming athletes and tourists.

Last year, the government held an elaborate evening ceremony in Tiananmen Square with fireworks, a 28-pan salute and performances by thousands of dancers. Such events are held only once every five years.

This year, Tiananmen Square is crammed with more than 1949,000 plants in a dozen floral arrangements of the sunflowers and clear skies to visit parks, Tiananmen Square or the Asian Games village.

By noon, more than 40,000 people had entered the sports center, the official Xinhua News Agency reported.

NATION

From page 3
The American Academy of Family Physicians are astonishing, with people who murder 400,000 Americans in a year, in order to save a possible 35,000 or 40,000 because of lowering cholesterol," said Dr. Brent Blue, a family physician in private practice in Jackson Hole, Wyo., and a member of the Family Physicians' academy.

According to the U.S. Office of Smoking and Health, smoking is the leading preventable cause of death, killing an estimated 390,000 Americans each year.

The doctors' organizations have allowed their names and official symbols to appear in newspaper and magazine supplements supported by Fleischmann's, a maker of margarine and a cholesterol-free egg substitute.

Fleischmann's products are made by the Nabisco Foods Co., part of the RJR Nabisco tobacco conglomerate. Fifty-five percent of the conglomerate's net sales in 1989 came from tobacco products, said Jason Wright, an RJR spokesman.

"It's a pathetic use of a medical organization for the commercial ends of a tobacco and food conglomerate," said Dr. Alan Blum, a family physician and chairman of a group that fights smoking group DOCs, or Doctors Ought to Care. Blum is a member of the American Medical Association and the American Academy of Family Physicians.

Fleischmann's is an advertiser in the academy's supplement in the current issue of Reader's Digest. Fleischmann's ads appear on the same double, fold-out page with the academy's low-cholesterol message.

In a separate campaign, Fleischmann's paid the AMA $250,000 to become a corporate sponsor of its Campaign Against Cholesterol, said the organization's Wendy Borow, who directs the campaign.

Three years ago, members of Doctors Ought to Care fought vigorously to prevent the American Academy of Family Physicians from joining Fleischmann's.

STATE

From page 3
The traditional day of the Middle East crisis, President Bush did not attend as was initially expected, but other federal officials talked of the legacy of Yosemite and hopes for the future.

"Given all the history relating to Yosemite and all of its controversies, still it's a marvelous place for the American public to see," Superintendent Michael Finley said in an interview prior to the ceremony.

The history ranges from Muir's grieving commitment to the national park in the late 1800's to lighting-caused fires that blackened 23,000 acres in and near the park this summer and forced the closure of Yosemite Valley for 11 days.

The controversy includes criticism that the National Park Service has failed to implement a 1960 master plan calling for removal of most public facilities from the narrow valley, which is visited by 3.4 million people a year. Park Service Director James Ridnour announced this summer that funds would be budgeted to relocate maintenance facilities.

The park's centennial is attracting more attention in the area than did the historic formation of the park by Congress on Oct. 1, 1890.
**Spice company grants $36,000 for student use**

By Michele Morris

Cal Poly's food science department is receiving donations valued at $36,000 from Spire Island Division of Specialty Brands Inc., based in San Francisco.

Department head Joseph Montecalvo said the gifts include a new, state-of-the-art water activity measuring instrument valued at more than $8,000. The device is used to determine if food products can support microbiological growth and can predict the rate and extent of enzyme reactions, which control fat oxidation and browning rates of food products.

This instrument will be used in a project involving spices and spice quality without food additives, said Harry Khalil, a food science and nutrition professor. His main use right now is in the project, but it will be used in all classes, he said. Graduate students and others are working on the project.

The department also received $28,000 to develop alternative processing strategies for selected spices, said Montecalvo. These funds will support six senior projects and part-time pay for four additional students to work on the project with Montecalvo and Khalil.

Cal Poly has more than 550 students in its bachelor's degree programs in food science and nutritional science and offers graduate courses for the university's master's degree specialization in food science and nutrition.

Len Chapman, vice president of operations for Specialty Brands, attended the presentation of the equipment and donation. Chapman said Cal Poly will receive an industrial-size microwave from the Thomas Thromatron Company of New York. The other campus with a bachelor's degree in dairy science.

Another gift that Cal Poly will receive is an industrial-size microwave from the Thomas Thromatron Company of New York. The other campus with a bachelor's degree in dairy science.

As a result of Khalil's call, representatives came to Cal Poly to see what the school needed. He proposed a deal with the company that he would use his knowledge of the equipment to show people how it is used and find interested buyers in California. They agreed and will give Cal Poly a unit worth $50,000.

The other campus in California that has a similar piece of equipment is Fresno State, Khalil said. Their instrument is used for dehydrating food, whereas Cal Poly's will be mostly for pasteurization and sterilization, he said.

ministrator Sylvia Panetta said Congressman Panetta's office is doing "everything they can to assist Mr. Oriji." She said she was not at liberty to discuss the details of the case.

In the meantime, the history department is juggling Oriji's classes, filling in with substitute teachers and cancellations.

Oriji's classes were cancelled for almost a week when the history department found a temporary replacement. Oriji had been teaching four history courses at the beginning of the quarter.

Oriji's family is waiting for news at their home in Arroyo Grande.

Men's X-country
Mustangs out-race CCAA in Riverside

By Angie Carlevarot
Staff Writer

The Cal Poly men's cross country team captured another victory this past weekend at the UC Riverside Invitational.

Out of 23 teams and 220 individual runners, Mustang sophomore Scott Hempel placed first in the 8.5 mile race making it his first collegiate cross country victory.

Hempel raced to an eight second win (25:21) over UC Riverside's Shanon Winkelman (25:29), the Humboldt Invitational champion and fourth place finisher in last year's Division II cross country national championships.

"Scott ran an outstanding race, he ran very smart and patient," said Head Coach Tom Henderson. "He took the lead at the four mile mark and never looked back."

The whole team ran smart and confident, Henderson said. "At the one mile mark, (the top seven runners) were in the top 40 places and by 2½ miles, our pack had moved into the 30s, then by four miles, all seven guys were in the 20s. They worked the second half of the race perfectly," he said.

Hempel led his team to a 49 to 122 victory over Arizona State and 21 other teams including the entire California Collegiate Athletic Association. UC Riverside placed seventh overall. Cal Poly's sixth and seventh men were sophomores Matt Hempel, who was 25th; and senior Mike Parrott, who crossed the finish line in 27th place.

"The men were racing extremely well and we are looking forward to the championship-half of the season," Henderson said.

This race was important to the team because it is the site for the Western Regional championships. The team now has run on both the Western Regions course (UC Riverside) and the National Championships course (CSU Humboldt).

"I know from the beginning the key to the success of this team is the development of the young team members, including the Hempels," Henderson said.

"With victories at the Humboldt and Riverside Invitational, it's safe to say we are developing right on schedule. This team races smart, confident and very aggressively," he said.

Coming up next for the team is the 14th Annual SLO Cross Country Invitational. The race is scheduled for Oct. 13 and will be the only home meet this season for both cross country teams.

Women's X-country
Poly improves times in 2nd-place finish

By Sabrina L. Garcia
Staff Writer

The Cal Poly women's cross country team returned from UC Riverside this weekend with a feeling of accomplishment.

Of the 32 teams competing in the Invitational meet, the Mustangs finished second and improved their overall times since their last meet.

"These young ladies really improved over the Fresno meet," said Head Coach Deanne Henderson Monday. "Our biggest strength is the positive attitude of the ladies and team improvement."

The top five runners improved their time from 41 seconds apart at the Fresno meet to 24 seconds apart in Riverside. Johnson reiterated the importance of the Riverside meet because it is the home of the Western Regional championships in November.

Freshman Kim Robinson improved her time enough to break into the top seven runners and was chosen for the traveling team, which will compete in the Stanford Invitational this weekend.

"Kim really worked hard," Johnson said. "I told the girls would take the top seven runners to Stanford this weekend, and she really wanted it."

Tracey Leichter ran first for the Mustangs and Johnson said she ran an "excellent overall race."

"This is again another high class invitational with more than 30 teams competing," Johnson said.

"I am anticipating a good outcome because of this group of ladies and their positive attitudes. I can't stress that enough. We'll be successful because of that," Johnson said. She has enjoyed her new position and is really exc
