ASl discusses Gulf help
 ■ Directors urge students to become personally involved in showing support for American forces in Saudi Arabia.

By Kelli Martin Staf Writer

The crisis in the Persian Gulf sparked concerned discussion by ASI President Adam Taylor and other members of the Board of Directors Wednesday night during the first ASI meeting of the winter quarter.

Last week's Jan. 16 meeting was canceled because of the announcement of U.S. engagement in war with Iraq.

Members voiced personal concerns for those Americans stationed in the Middle East as well as for the people of other nations involved in the conflict. Sentiments turned to the need for student support of American troops, and the directors urged people on campus to become personally involved in supporting U.S. forces.

Several ideas were mentioned, such as sending letters and Cal Poly T-shirts to adapted military units.

"Whether you agree with it (war) or don't, these people are over there, and there are a lot of lives at stake. We should send letters and do everything we can to let these people know, especially those from the United States, that we care about them and we want them to come back," said Taylor.

In other somber discussion, a brief report concerning proposed California State University budget cuts, which include 20-30 percent tuition fee increase, was given by Academic Senate Representative William Ampsuhecher.

Cal Poly ranks fifth in

Ag seminar looks into the '90s
 ■ Topics include water, farming and international trade.

By Amy Alonso Staff Writer

"The 90s — Boom Not Gloom" is the theme speakers will be focusing on at a seminar planned "for alumni, agribusiness alumni and event chairman Jody Miller said. The seminar is a joint effort between Cal Poly's agribusiness and crop science departments.

Most of the speakers and panel members will be alumni who are experts in their fields, Miller said. During the two-day event being held today and Saturday at the Embassy Suites Hotel, speakers will address current issues in agriculture, such as the state's water strategies, the use of chemicals for farming and international trade. Miller said the water topics will be among the hottest issues. "Water has become a real pressing issue, and it's getting worse every year," she said.

Agriculture/Agribusiness alumni George Suarez will begin the seminar with his ideas on the outlook of agriculture in the 90s. Suarez is a former lawyer.

Prof seeks ethnic studies renewal
 ■ A visiting scholar hopes he can raise student awareness.

By A. Mortimer Naughton Staff Writer

What is it like to be black, white, Asian or Hispanic? What is it like to be a woman, or an ethnic woman for that matter? These are the kind of questions Bob Gish would like Cal Poly students to occasionally ask themselves.

Gish is the university's visiting scholar and is the consultant for the rebuilding of the ethnic studies department.

"Ethnic studies is imperative for understanding today's world," he said in an interview Wednesday.

Pointing to the war in the Persian Gulf, he said we live in "very volatile times" and said the "relativity of otherness" should be kept in mind. He went on to explain the "otherness".

"The 'others' have a perspective, too. It's all relative to who's looking at what."

Gish has been teaching for nearly 30 years and is presently on leave from the University of Northern Iowa. He will be here until June to advise the school in its attempt to build an ethnic studies program that he hopes will open up a larger world to students here.

"Everybody's very committed to it. I'm not here on my own," he said, commending the administration and faculty for their support.

"Some say that still not enough is being done in the classroom to show students how to deal with issues in an unbiased way."

The hot topics include water, farming and international trade. Miller said.

Local MPs ready for duty in Saudi Arabia
 ■ Camp San Luis unit deploys next week.

By Karla Hale Staff Writer

They seemed like any other group of Cal Poly students gathered to relax and have a good time. Their spirits were high. They laughed and joked easily.

But these men, gathered on the balcony of a Holiday Inn in Monterey, were on 24-hour leave from their duties at Fort Ord.

They have temporarily put their college careers on hold. They are members of the 649th Military Police Company, California National Guard. And they will go to Saudi Arabia at the end of the month as part of Operation Desert Storm.

They were activated as Active Army on Jan. 3 and went to Fort Ord three days later. While on a 24-hour leave from the army installation near Monterey, they received and their feelings about the Gulf crisis and their desire to remedy the situation.

LETTER TO THE EDITOR

Students must support Bush

As proud Americans we find it very upsetting that there is so little visible support for our President and our troops here at Cal Poly. The only rallies we have seen are anti-war and peace protests. Where do these long-haired-hippie, ignorant boneheads come from? They love their "No Blood for Oil" slogan, which to us and other informed Americans shows they have no idea what is really happening.

We know from the support we have gotten from the older residents of San Luis Obispo from the pro-America signs in our front yard and the American flags on our cars, that the majority of people do support our country in this war. What concerns us is the general apathy of the students at Cal Poly. Walking through the parking lots at Cal Poly the only cars with flags on them are ours and maybe a handful of others. Americans are putting their lives on the line in Saudi Arabia for something they believe in, and we think that the least we could do is give them and our President the support they so richly deserve.

We all believe what America is doing is the right thing and Saddam must be forced from Kuwait. We support President Bush and our troops 100 percent and if you do too, SHOW IT. Don't let the left-wing, radical "protest for any cause" minority faction drown out your voice.

A poem about protesters

While in the Gulf there is tension and turmoil,
Many people here cry, "No blood for oil."
Is it a question of all? I think you can see
That no matter what happens they will disagree.
They protest and march on issues because
They oppose the government whatever it does,
And they continue to protest day after day; "Love it or leave it," in all I can say.

I know that some truly believe it is wrong,
And for them I do not intend my song.
But for those who just love to protest and shout,
I say, "Stop your damn protests and get the hell out!"

LET'S MAKE THIS QUICK SO WE CAN ALL GO HOME AND WATCH L.A. LAW.

Real courtrooms cannot be found on television's L.A. Law

It is unfortunate the way the legal process is depicted on television. I will have to admit, a little reluctantly, that I used to be an L.A. Law junkie. But after five months as an intern with the San Luis Obispo Superior Court, I cannot watch L.A. Law anymore. Nor can I watch the other television shows involving law because of the unrealistic representation of the subject.

It took me a while to figure out why these shows angered me, but I finally realized it is because they degrade our legal system, especially the trial process. Television leads many people to think that what happens on a show like L.A. Law or Matlock is what happens in all courtrooms. Furthermore, T.V. makes our legal system look unconstructed and unfair.

The made-for-television courtroom scenes seem bent on having the attorneys and the judge all working against each other. The opposing attorneys fight with one another and with the judge, and the judge is often depicted as being unfair or corrupt.

In real trials, the courtroom is actually a fairly peaceful place. The attorneys don’t fight and the judge tries to work with the attorneys, not against them. If attorneys do disagree on an issue, they will either quietly discuss it at the judge’s bench or chambers.

On T.V. trials, attorneys take maybe a minute or two for their closing arguments. In reality, closing arguments usually last a lot longer. I just recently watched closing arguments for a four-week long civil suit involving insurance.

Saudi airman downed pair of Iraqi fighters

DHAHRAN, SAUDI ARABIA (AP) - Iraqi jets are coming out to attack the allies, but they're losing the fight.

A Saudi Arabian pilot is getting much of the credit for today's victories. The Saudis say two Iraqi planes entered their airspace on French-made Iraqi jets — which were loaded with bombs and anti-ship Exocet missiles.

A U.S. military spokesman said a navy jet and helicopter encountered Iraqi forces in the Gulf, too. The spokesman said three Iraqis were killed and 51 taken prisoner. The clash is the first in the Gulf between U.S. and Iraqi forces.

Later, a U.S. helicopter picking up Iraqis from the water came under fire from a small boat. The helicopter returned fire and the Iraqis deserted the boat. Later, a U.S. military spokesman said a navy jet and helicopter encountered Iraqi forces in the Gulf, too. The spokesman said three Iraqis were killed and 51 taken prisoner. The clash is the first in the Gulf between U.S. and Iraqi forces.

Military jet downed in Kuwaiti air battle

A Marine captain said a U.S. military patrol found three Iraqi fighters and helicopter in Southern Kuwait. A Marine captain said artillery had been used against an Iraqi rocket battery in Kuwait.

The spokesman said the chopper from the water came under fire from a small boat. The helicopter returned fire and the Iraqis deserted the boat.

Nevada nuclear arms test location turns 40

LAS VEGAS (AP) — The 40th anniversary of the first nuclear weapons test in Nevada is expected to pass quietly Sunday, with public focus on a high-tech war half a world away.

Nevada nuclear weapons testing

A CBS News crew covering the war is still on assignment.

The number of tests at the Nevada Test Site has grown from the handful planned in 1951 to 707 as of today. The Nevada site now serves as the only nuclear weapons testing facilities for the United States and Great Britain.

Efforts by anti-nuclear activists to halt the testing are being fought by those who believe the presence of nuclear weapons has prevented a clash between the world's superpowers.

Bush will meet with new Soviet minister

WASHINGTON (AP) — U.S. officials say President Bush will meet with the Soviet Union's new foreign minister, Alexander Bessemertnykh, this weekend.

One possible issue is whether Bush wants to put off next month's scheduled summit in Northern Saudi Arabia.

Southland students rally for Gulf troops

LOS ANGELES (AP) — Sporting yellow ribbons and pro-President Bush banners, university students in Los Angeles rallied in support of Persian Gulf troops yesterday.

At UCLA demonstrators handed out 2,000 yellow ribbons and rallied near the administration building.

Across town at the University of Southern California, a faction supporting Bush's actions in Operation Desert Storm handed out American flags and posters.

The war was also in the mind of Mayor Tom Bradley.

He visited the Israeli Consulate to offer his assurances that Los Angeles supports the Jewish state while it is under missile attack from Iraq.

Resident shoots man breaking into home

STOCKTON (AP) — Police say a masked man broke into a Stockton apartment yesterday morning and was shot to death by one of the occupants.

Lt. Andy Jackson said another masked bandit fled after his partner was killed. He identified the dead man 20-year-old Monte Littrize.

Police were told that two people broke into an apartment shortly before 8 a.m. and forced a woman to lie on the floor. Jackson said then one intruder went into a bedroom where he was shot by a man who lived at the address.

Jackson said the case appears to be justifiable homicide.

Discovering the exotic flavors of Europe's olives

By Bill Moughan

Special to the Daily

The olive is a fruit. Growing up I didn't have much exposure to olives and olive oil. My ancestry is 50/50 Polish/Italian — too northern for olive eaters. I began to discover olive flavors as my ad
turens brought me to the lower latitudes of Greece and Spain.

The restaurants and bars of Spain greet you as you sit down with a small dish of olives. The olives are often prepared by someone in the kitchen and each establishment touted "the best olives anywhere."

In the morning I would go to a small cafe and have breakfast. Old men stood by the chairless bars and talked. Sometimes I saw the day's supply of olives brought in two large baskets. You could smell the vinegar.

They cooked the eggs in olive oil. Always eggs poached. See FOOD, page 4

**Food**

From page 3 up. The flavor was rich, like some exotic butter. I would order the eggs with two slices of a salty bacon roll. It all seemed like a great luxury for a few dollars.

Greece brought olives into my life again. I was traveling to the far western coast of the Peloponnesus in search of a mythical land great that my friend thought he had inherited.

We had a plan to spend the rest of our lives building boats and eating fried anchovies in the land of Ulysses. We did find the town of his ancestors and even shook a lot of distant relatives' hands. But we never found his rich inheritance, so we hitched out of Gargaloni in a turkey truck with a driver from Boston. The driver had returned to Greece for his health. He said the New England winters were killing him. I had lived in Boston and we both began to lament those icy winters.

Our drive had many stops as he had to sell his live turkeys to bartering crowds in each and every town. Along the way we passed through hilltops of olive trees. Small camps of gypsies worked the orchards. There were men in the trees, children carrying light loads and women in their beautifully colored skirts.

We talked about food and we talked about women, but mostly we talked about olives.

Our driver said that olive oil was good for your heart. "We don't have heart attacks in Greece." That the best oil came out in the first pressing. The lightest oil rising to the top to be skimmed off. "Extra virgin oil" is this oil gathered after the first pressing.

Extra virgin olive oil is used in a seasoning. It's too expensive to try with, you can use regular olive oil for that. "Use these oils like a one-quality butter," said Russ Parsons, Los Angeles Times. The oil adds body to soups and sauces and bring out the flavors of the other ingredients.

Last week's Los Angeles Times Magazine had an article on olive oil that provided a recipe for an Italian bean soup. I made it last weekend and it was pretty good.

Here's their recipe.

**Primo's Zuppa Di Fagioli**

- 2 cups dried cannellini beans or other small white beans, soaked 8 hours or overnight:
  - 1 bay leaf
  - 2 tbl. extra-virgin olive oil

Add onion mixture to bean pot; continue simmering 15 minutes. Add onion mixture to bean pot; cover pot and cook over low heat 1 hour or until beans are tender. Check every 20 minutes, adding water as needed. Reheat to taste with salt and pepper.

In each serving bowl, place 2 tbl. pasta or rice; add beans and broth. Let cool. When just above room temperature, serve each bowl garnished with 1 tbl. oil. Makes 6 servings.

**NOTE**: In Florentine tradition, oil replaces grated cheese.

- 1 onion, finely chopped
- 3 cloves garlic, chopped
- 1 carrot, finely chopped
- 1/4 cup Italian parsley, finely chopped
- 1/2 cup extra-virgin olive oil

Drain beans and place in saucepan or Dutch oven. Add water to cover, about 1 quart. Add bay leaf, cover and bring to boil. Lower heat and let simmer 1 hour.

Heat 2 tbl. extra-virgin olive oil in skillet and add onion, garlic, celery, carrot and parsley. Simmer over medium heat. When onions starts to brown, add tomatoes and continue simmering 15 minutes. Add onion mixture to bean pot; cover pot and cook over low heat 1 hour or until beans are tender. Check every 20 minutes, adding water as needed. Reheat to taste with salt and pepper.

School Special"
Ah Louis sells history

The family-owned store is more than 100 years old and a registered landmark.

By Sabrina L. Garcia

Many students are curious about the funny little store on the corner of Palm and Chorro Streets.

The odd window displays of ancient Oriental artifacts and the limited store hours raise questions from students who drift in and out of San Luis Obispo for four or five (or sixty) years at a time.

But longtime San Luis Obispo residents understand. "I enjoy shopping here because theLouises are so personable," said Margarete Smith while shopping at the store. "I always bring my visiting relatives here because of the beautiful treasures they find."

Ah Louis, a family-owned business for more than 100 years, is a registered historical landmark and monument to an extraordinary man.

"Mainly this is a tourist attraction," said Howard Louis, the manager and the youngest of Ah Louis' eight children. "We don't make any money from this store. We love to meet people, so we do it for the city and for mother."

Ah Louis was born in 1838, moved to California in 1856 from China and became a self-made tycoon as a labor contractor. The bricks of the Ah Louis building were handmade in his own kiln.

Ah Louis sent to England for his wife are taking a vacation time when the odds were against that happening to Orientals in California. Eventually the Ah Louis store was build in 1884.

The store originally carried general merchandise and is presently packed with treasures from the orient: hand-carved furniture and ivory figurines, fine china and jewelry along with less expensive souvenirs.

"We have regular customers and a lot of tourists who just come in to look around," Howard Louis said.

Howard Louis said he and his wife are taking a vacation and will be back in late January. The store will be open for regular business hours, 2 to 5:30 p.m., Monday through Friday.

"I hope more students will come to enjoy our store," Louis said. "I like talking to young people, it reminds me of my college days at Berkeley. Not much has changed."
Arch club seeks funds for facility renovation

The former juvenile facility looking down on San Luis Obispo soon will become a museum of natural history, complete with botanical gardens.

Sunny Acres will be turned into a museum of natural history.

done."

Gish said, schools such as UC Berkeley and Stanford already have adjusted their curriculums to fit the societies in which they exist.

Gish said that one question that in forming such a program is determining what is what is "canonical" or what is considered "important."

"The time has come for people to say that our history is not absolute. Who is to say Shakespeare is the greatest author ever? What about Native American authors?"

The process of rebuilding the department began last summer with a group of concerned students and faculty who formed the Coalition for Ethnic Studies at Cal Poly. Cal Poly last had an ethnic studies department in the late 1970s. Gish said he would like to see it built up to the point where there is an ethnic studies major.

Gish said he thinks he has a unique opportunity with Poly being such a technically-oriented school. He believes that an understanding of culture is the key to the bridging of science and art.

"Science and technology cannot exist without a human component," he said.

Saying that the maturation of institutions is as inevitable as the maturation of people, he added that it is never too late to understand the different facets of society.

"Diversity is the byword of the '90s. All good reasons aside, it's just pragmatism."

THE SANTA CRUZ OPERATION

You're invited to an Information Session hosted by members of the System Team in the Business— we're ready to talk with you.

To discuss career opportunities at SCO, sign up at your Career Placement Office for an appointment with an SCO recruiter who will be at your campus on Wednesday, February 6.

We're looking for engineers in the following areas:

► Software Development ► Quality Assurance ► Technical Support ► MIS

Qualifications:

B.S./M.S. in Computer Science or equivalent

Excellent communication skills

if you are unable to meet with us while we're on campus, please send your resume to:

SUNNY ACRES Association also participated in Authority of the City of San Luis Obispo. It funded a professional study conducted by architecture firm Crawford Multari of an affordable house using technology and knowledge within the reach of tomorrow's leaders of these industries. "A computer package of this type would be difficult, if not impossible, to obtain on the open market," Lerg said.

"By supporting projects of this sort, AIAS hopes to bring the technology and knowledge developed by today's leaders of the architecture and construction industries within the reach of tomorrow's leaders of these industries."

The firm designed a concept plan for Sunny Acres that will serve as a guide for the students participating in the design contest. In the spring of 1990 the first local competition of this kind was held. It called for the design of an affordable house using recycled materials, and was open to Architecture students, majors and possibly journalism students who will help promote Design but also civil engineering majors. The club's main program objective is to bridge the gap between Architecture students, alumni and industry. Lerg said that there are three main projects incorporated into the overall program, the first being the Sunny Acres competition. In the spring of 1990 the first local competition of this kind was held. It called for the design of an affordable house using recycled materials. This year the winning entry will be built in Templeton. Lerg said construction begins this month. This was an example of a competition with several diverse sponsors, each of whom was interested in a different aspect of the problem with the competition.

Last year's competition also resulted in the further employment of the winning student designer to develop and build his winning entry. The Sunny Acres competition will accept entries in the fall of 1991. Meanwhile, AIAS is attempting to get sponsorship from industry representatives. This project will not only incorporate majors in the School of Architecture and Environmental Design but also civil engineering and ornamental horticulture majors and possibly journalism students who will help promote the project. AIAS's second project involved working with THE EXHIBIT PLACE in San Jose, the largest custom designer and fabricator of professional showroom exhibit.-

The project is sponsored by the San Jose State University's College of Business Administration, the National History Museum and the Profit Housing Corporation. It is seeking sponsorship fromfuture leaders of these industries within the reach of tomorrow's leaders of these industries."

This was an example of a competition with several diverse sponsors, each of whom was interested in a different aspect of the problem with the competition.

Last year's competition also resulted in the further employment of the winning student designer to develop and build his winning entry. The Sunny Acres competition will accept entries in the fall of 1991. Meanwhile, AIAS is attempting to get sponsorship from industry representatives. This project will not only incorporate majors in the School of Architecture and Environmental Design but also civil engineering and ornamental horticulture majors and possibly journalism students who will help promote the project. AIAS's second project involved working with THE EXHIBIT PLACE in San Jose, the largest custom designer and fabricator of professional showroom exhibit.-

The project is sponsored by the San Jose State University's College of Business Administration, the National History Museum and the Profit Housing Corporation. It is seeking sponsorship from

SAY I LOVE YOU WITH FLOWERS & A 5X7 PORTRAIT ONLY $35 A LA SUPPLEMENT. ANY QUANTITY CALL 549-8966. EL CORRAL BOOKSTORE JAN. 22-25 A 2 Hour class to be held on Sat. Jan. 26 in the Los Osos location. Congrats! Phi Delt Pool $325/MO W/ WATER AND TRASH PAID Available Administrative and ECE units required. Call or come today 543-1450. PLEASE INQUIRE at 2075 Johnson Ave. Preschool and ECE units required. Call or come today 543-1450.

THE UNIVERSITY UNION ADVISORY BOARD IS LOOKING FOR STUDENTS TO SERVE ON THE BOARD. INTERESTED STUDENTS SHOULD APPLY TO BUSINESS OFFICE ANY TO CALL 543-4129. JAN 29 8AM-3PM 1/24/91 AD PRINTING ERROR 1/28 6:00 Grph. Arts Rm. 106. Starts Mon 1/28 6:00 Grph. Arts Rm. 106. Starts

SUNNY ACRES Association also participated in Authority of the City of San Luis Obispo. It funded a professional study conducted by architecture firm Crawford Multari of an affordable house using technology and knowledge within the reach of tomorrow's leaders of these industries. "A computer package of this type would be difficult, if not impossible, to obtain on the open market," Lerg said.

"By supporting projects of this sort, AIAS hopes to bring the technology and knowledge developed by today's leaders of the architecture and construction industries within the reach of tomorrow's leaders of these industries."

The firm designed a concept plan for Sunny Acres that will serve as a guide for the students participating in the design contest. In the spring of 1990 the first local competition of this kind was held. It called for the design of an affordable house using recycled materials, and was open to Architecture students, majors and possibly journalism students who will help promote Design but also civil engineering majors. The club's main program objective is to bridge the gap between Architecture students, alumni and industry. Lerg said that there are three main projects incorporated into the overall program, the first being the Sunny Acres competition. In the spring of 1990 the first local competition of this kind was held. It called for the design of an affordable house using recycled materials. This year the winning entry will be built in Templeton. Lerg said construction begins this month. This was an example of a competition with several diverse sponsors, each of whom was interested in a different aspect of the problem with the competition.

Last year's competition also resulted in the further employment of the winning student designer to develop and build his winning entry. to the state assembly. "This should be an upbeat speech," said agribusiness pro­
fessor Bob McCorkle. "We will hopefully be good years for agriculture."

Panels will discuss public relations in agriculture, agriculture regulations and alternatives, and trade with Mexico and the Pacific Rim.

Fred Clark, deputy chief counsel for the committee on agriculture in the U.S. House of Representatives, will give the keynote speech on his inter­
pretation of the 1991 Farm Bill. Clark helped write the Farm Bill, which sets national public policy for the agricultural sector for the next five years. All speakers and panelists are coming at their own expense or at the expense of the companies they represent. There is a $45 fee for attending the seminar.

"The seminar is a good chance to see old friends and make new contacts," Miller said. The com­mittee is especially encouraging alumni who graduated 10, 20 and 30 years ago to attend. "This way the event can also serve as a class reunion," Miller said.

These seminars are put on every other year in January. Alumni from different areas of the state rotate the responsibili­ty for planning the event. This year's committee is from the Imperial Valley.

This year's seminar marks the first time that the agribusiness and crop science departments have worked together to plan this type of event. "The com­bination has been beneficial," Miller said. "Both departments were able to contribute their own expertise."

come back home to their families, their friends and their classes or careers. While at Fort Ord, they have had drills in physical training, communications, weapons, nu­clear and biological chemical warfare training and the process­ing and treatment of enemy prisoners of war.

"Considering the formidable army and challenging environ­ment we may find ourselves up against, we need to train enough. However I feel that the army is doing its best given that this is the biggest military deployment in many years," said James Walker, a 27-year-old metallurgical and materials engineering senior.

Kevin Rhine is a social sciences senior. "We are going to Saudi Arabia because of oil," he said. "Oil is the life-blood of the entire earth's economy. I hope everyone is go­ing to realize that we need to go to alternative energy sources like wind, solar and even nuclear energy."

"However, we can not let Hus­sein get away with invading Kuwait. We have to draw the line somewhere."

Although they would rather be studying at Cal Poly than going to war, they are confident in their own abilities and in each other. They said their commander, Capt. Brick Loomis, had worked hard to make them feel like members of the same family, and they are confident in his abilities. If they have to go to war, they agreed, they want to go with him.

They expressed concerns about poisonous gas and about being able to identify potential ter­rorists in the civilian population.

"We will be prepared as long as we get all the equipment we need," said construction management sophomore Robert Conklin.

In addition to standard govern­ment-issued equipment, they have been advised to take pan­ty hose to keep the sand out of their weapons. Flea collars for personal use also have been recommended.

They agreed that Congress made the right decision to give President Bush the power to declare war.

James McDyes is a former Cal Poly earth science student.

"Bush said he would not go in with one hand tied behind his back," McDyes said. "If you're going to go to war, you have to go 100 percent. I think Bush is handling the situation correctly.

"I know he is under a lot of pressure and it's easy (for us) to criticize but we probably only know a percentage of what's really going on," he said. "I think he's trying to centralize the power of waging war."

The guardsmen said that they appreciate support from the people at home. They commented on the great show of support at the Jan. 6 farewell celebration held at Camp San Luis for them and the other 73 members of their unit.

They said anti-war is all right. But the thing is, don't be afraid to speak your mind because everybody should be anti-war, but don't blame this war on the soldiers."
