Academic Senate votes to keep ROTC on campus

By Malei Jessee Staff Writer

The Cal Poly Academic Senate voted not to ban ROTC from campus in a Tuesday meeting.

"We're not going to kill ROTC on this campus," said James Murphy, Academic Senate chair. "The people who are participating in the program have as much right to do so as those who cannot participate."

The purpose of the meeting was to decide whether Cal Poly would support the CSU's Academic Senate's proposed resolutions against ROTC policy toward homosexuals.

"Our original statement was to support the entire resolution," said Margaret Means Committee, along with many other students, are concerned," Taylor said.

By Gubrielle Friedly Staff Writer

The state Legislature has proposed a 20 percent budget cut for the CSU system.

"I let them (the legislature) know we, as students, are concerned," Taylor said. Taylor testified before the Ways and Means Committee, along with many other student and groups representing schools throughout the CSU system.

"I definitely think we need an ethnic studies class and definitely think we should have the option for a minor for students to take," said Dennis Albiani, director for the School of Agriculture. "But if you want to study ethnic studies as a major, it should have the option for a minor.

When first presented to ASI at the April 10 meeting, the resolution included creating a department with both a major and a minor. Concern arose, however, regarding the fact that Cal Poly is a polytechnic university.

"It was a big risk to try something new," Forrester said, "but I think it was definitely very successful." The week-long program called "All Roads Lead to the Union" was the first of its kind. "We wanted to bring all the ASI entities together for the first time," Forrester said. "It was a big risk to try something new," Forrester said, "but I think it was definitely very successful."

By Kelly Gregor Staff Writer

All roads led to the University Union last week when ASI hosted a series of events designed to encourage student involvement in the organization and its resources.

The events were a big hit overall, said Kyle Forrester, ASI marketing coordinator.

"It was a big risk to try something new," Forrester said, "but I think it was definitely very successful." The week-long program called "All Roads Lead to the Union" was the first of its kind. "We wanted to bring all the ASI entities together for the first time," Forrester said.

Activist lights up crowd with pro-marijuana talk

By Geoff Seratti Staff Writer

Marijuana will lower your stress level better than anything else on earth, an activist told a crowd of about 500 at the Veterans Hall Wednesday night.

Author Jack Herer spoke in favor of the 1992 California Hemp Initiative, as well as the social, economic and environmental benefits of hemp, better known as marijuana.

"There are a number of scholarship programs on this campus that technically discriminate because you have to belong to ROTC," said Murphy.

"There's a significant dilemma," Murphy said. "On one hand, we cannot support any kind of discriminatory practice. On the other hand, removing ROTC from campus would deprive those currently involved in the program." One argument offered was that people who want to participate should not be denied this right, as well as the fiscal support ROTC offers, Murphy said.

"There are a number of scholarship programs on this campus that technically discriminate because you have to belong to ROTC," said Murphy.

"We're not going to kill ROTC on this campus," said James Murphy, Academic Senate chair. "The people who are participating in the program have as much right to do so as those who cannot participate."

SLO lacks the culture of L.A.

This letter is regarding the close-minded comment of our "worldly" Mayor Ron Dunin. The quote, "We don't want to be like L.A. — not even L.A. itself," appeared in the Wednesday, April 17 issue of Mustang Daily. The question is — mayor, have you ever been in L.A.? Perhaps to see a play? A museum? A concert? An art exhibit? Did you ever go there simply because San Luis Obispo just doesn't have an exhibit of the above? The above is culture. Do you know what culture is, don't you mayor? Those of us who enjoy the better things in life can appreciate larger, more cultured cities such as L.A. and San Francisco. So please, hold your close-minded comments to yourself!

We are ruining our environment

David Brenizer: April 16 was a special day for me. It was concerned about the ecological crisis we face today, and the future. I believe that man is responsible for a major part of our ecological crisis. This is not a new concept. It is not a new way. It is ourselves. In the past we have been able to change our ways without fancy technology, without a clear understanding of what it is we are up against. And flying off into Dances-with-Wolves fantasy land is no help at all.

Cal Poly faculty administration promote a hypocritical society

By Martin Kaliski

I have been the department chairman of the electronic and electrical engineering department for the past year and a half. This office has given me a unique perspective on faculty, administrators and students that I was not privileged to have as an "ordinary" faculty member. It has made me — a born and bred northerner — open my eyes to the full spectrum of political philosophies while they are here, then they will be comfortable with their sons or daughters marrying an "ethnic minority"?

People tend to grow more conservative as they get older. If our students are not taught to open their eyes to the full spectrum of political philosophies while they are here, then they will only continue their rapid descent into a conservative that supports a political and economic system wherein white, Protestant males get more rich and more powerful while they grow less tolerant of others. Our faculty have an obligation to our students to act as professional role models and not conservative role models.

Martin Kaliski is the chairman of the electronic and electrical engineering department.
Bush announces plan to reform U.S. schools

WASHINGTON (AP) — President Bush unveiled his blueprint Thursday for top-to-bottom school reforms, including a voluntary nationwide exam system, aid pegged to academic results, and hundreds of millions of dollars in start-up funds for "a new generation of schools."

"This is how we say America will move forward," declared Bush as he described the "America 2000" education strategy in an East Room address before governors, business leaders and educators.

"The time for all the reports and rankings, for all the studies and surveys about what's wrong with our schools, is past," said Bush.

The plan, crafted by new Education Secretary Lamar Alexander in his first month on the job, calls for relatively little new federal spending. It relies instead upon states, governors, teachers, parents, students and communities to take steps to embrace the rigorous new education goals that Bush and the plan proclaimed early last year.

It is "a national strategy, not a federal program," according to a 34-page Education Department strategy manual.

U.S. agency imposes penalties on Neil Bush

DENVER (AP) — Federal regulators today imposed sanctions against Neil Bush for conflicts of interest while he was a director of the failed Silverado Banking Savings and Loan, a lawyer said.

James Nesland, attorney for the thrift office penalty resulted from a federal agency imposes $1 billion. whose failure is expected to cost taxpayers $1 billion. The drums lacked labels indicating their toxic contents and when they were disposed, and one or two drums lacked proper covers, the EPA said.

Apple to pay 15 blacks for racial bias claims

SAN JOSE, Calif. (AP) — Apple Com­puter Inc. will pay $438,687 to settle racial bias claims filed by 15 employees who said they were denied jobs, but the company on Thursday said it doesn't have discriminatory practices.

Apple Computer admitted no wrongdoing in the settlement and the company offered jobs to all 15 people who complained to the federal government twice last November, resulting in an EPA inspection. The company probably will contest the fine, which was announced Wednesday.

The EPA alleged that Unocal lacked a plan to identify or deal with the wastes, failed to follow a written pond inspection schedule, lacked a plan to make sure the pond is clean once it is shut down, failed to train workers to handle wastes, and lacked an adequate emergency plan and money to cope with accidents.

Unocal also was accused of keeping improperly labeled hazardous waste drums on refinery grounds. The drums lacked labels indicating their toxic contents and when they were disposed, and one or two drums lacked proper covers, the EPA said.

Sam Huntley graduated from Cal Poly in March, but she still keeps in touch with her adopted grandmother, Jean.
Huntley and Jean met three-and-a-half years ago, when Huntley was director of the program.
Once a week, Huntley would bring a diet soda for Jean, and they would watch an episode of "Magnum P.I." Jean’s favorite show.
"I go to see her, and sometimes I don’t want to because a nursing home can be intimidating and tough environment," Huntley said. "But when I realize how much she gets out of it, I know it is all worthwhile."

Kosko.
"We are always looking for more students. There is always a need for companionship," said Kosko.

"We are always looking for more students. There is always a need for companionship," said Kosko.

The council also voted Tuesday to place the desalination project on hold for a year to see whether other agencies could participate in a joint project.
Joint participation could help reduce the cost of such a project, which has been estimated to be between $36 million and $37 million.

The initial reports are considering two alternatives in providing water to San Luis Obispo — either west to Whale Rock Reservoir or south over Cuesta Grade.
Heldman said the city has enough water to last until spring of 1994. But if rainfall is not received next winter, the city will be forced to seek new sources.

ELDERLY

Rain in March equals a break in conservation for residents

Residents now will be faced with 15 percent cutbacks, a 20 percent reduction. Roalman, Pinard say reduction is shortsighted.

By Shea Roberts
Start Water

Because of the March rainfall, the San Luis Obispo City Council decided Tuesday to give residents a break and reduce its mandatory cutback under the water conservation program from 35 to 15 percent.
The council vote was split 3-2. Peg Pinard and Bill Roalman opposed the proposal, saying such a sharp reduction was shortsighted. Pinard objected to the reduction because she said the city’s water supply is still uncertain.
Mayor Ben Dunin voted in favor of the reduction. "I think the community deserves a little reprieve," he said.

According to a report from utilities director William Hetland and utilities engineer Gary Henderson, the March rainfall has caused significant changes in the city’s water situation.
The city’s reservoirs currently hold 21,163 acre-feet, which is the same level as in August 1988.

Heldman said although the reservoirs have received significant storage, the city is definitely not out of the drought.
He said if next winter does not bring adequate rainfall to provide additional storage, the city will be in the same position as last month.

Although the council is giving temporary relief to residents, they have been researching alternatives such as implementing a temporary desalination project and tapping into Nacimiento Lake.

The council also voted Tuesday to place the desalination project on hold for a year to see if additional rain is received next winter.

The estimated cost of the five-year desalination program is $66.9 million.
If funded by rate increases only, single family bills will rise from an average $20 per month to $70 per month.

Due to the San Luis Obispo voters’ rejection of the State Water Project in last week’s special election, interest in Nacimiento reservoir has been revived.

SLO County is entitled to 17,500 acre-feet of water per year from Nacimiento Lake, but the city has no water rights.

Political agreements between the county and the city could provide temporary. Heldman said the initial step is to obtain a formal water entitlement from the county and determine whether other agencies could participate in a joint project.

Joint participation could help reduce the cost of such a project, which has been estimated to be between $36 million and $37 million.

The initial reports are considering two alternatives in providing water to San Luis Obispo — either west to Whale Rock Reservoir or south over Cuesta Grade.
Heldman said the city has enough water to last until spring of 1994. But if rainfall is not received next winter, the city will be forced to seek new sources.

Men's gymnastics finishes a record-breaking season

By Amy Reardon
Staff Writer

The Cal Poly men's gymnastics team broke all team scoring records and returned from the Div. III National Championship at UC Davis last weekend ranked third in the nation. That victory in itself is impressive.

All the gymnasts said they were impressed with what their team has been able to accomplish and said their motivation came strictly from within the team.

"We have such limited resources," said senior Lance Engen. Because the team is officially a club, Cal Poly does not give it any financial support. Engen said luckily, the team found a "really great guy who is an incredible help." Steve Norby, who was willing to volunteer his spare time to coach the team outside of a busy dental practice.

"Find another organization in the nation that's completely student-run, that is progressing at our level," Eagen said. "We have no funding. We can't hire a coach. We have all kinds of red tape to deal with. We have to fight for gym time." However, team captain Ken Paquette said Eagen, Couch and Vanetsky "are pretty original and the difficulty of their routines. Couch does an Arabian one-and-three-quarter somersault which shocked the audience, Paquette said. "No one else in the division does that trick." Couch scored 8.95, Vanetsky, who ended up in fourth place, scored 9.0 which tied him for eighth overall in the competition. He placed seventh."

"By the end of the meet, Vanetsky had totaled an all-around score of 47.85 to receive his third All-Americans award of the competition. He placed second overall in the competition, while teammate Couch placed fourth all-around with a 46.05."

Overall, Paquette said, "the team could have scored about eight points higher. Right before nationals we were all either sick or injured and we weren't having good workouts. "But we really pulled together, not as a bunch of soloists, but as a team," he said. "Some of the guys hit the best routines of their lives."

Couch said because the team members knew they would have performed better minus the sicknesses and injuries, "It gives us more motivation to do even better next year. We can't wait to get back in the gym to learn more, because even though we did better than ever before, we aren't as good as we could be." "I learned several new tricks this year that I never thought I'd get. Once you get them and get to show them off, you get thirsty for more," Couch said.

Also at nationals, Engen received an Outstanding Senior award from the United States.
From page 1
said. Right now, various programs that can be reduced, are being reduced, he said.
One that hopefully will not be reduced, said Associate Vice President for Student Affairs, Alan Yang, is financial aid.
"We don't expect the proposed cuts to have any effect on financial aid," he said.
Taylor urges students and parents to write letters to the governor and representatives expressing concerns and asking questions about the budget cuts.
Taylor hopes to start a letter-writing campaign. "One voice is heard, but it's not like 17,000," Taylor said.
Students who want to write letters can give them to the ASI office to be mailed to Sacramento.
Taylor hopes to go back to lobby again next Tuesday and again in May. He wants to bring with him to Sacramento a small delegation of students and a stack of letters.
Thylor hopes to start a letter-raisers we do," he said. "This beats all fraternities."
"This spring we will be focusing on fund raising again," said Paquette. Some of the fund-raisers the team does include selling ads for its program, hosting Central Coast club gymnastics meets, hosting clinics and putting on shows.
"We've got travel, uniform and judging expenses to cover (for next season). And nationals is in Springfield, Mass., next year," Paquette said. Some of the fund-raisers the team does include selling ads for its program, hosting Central Coast club gymnastics meets, hosting clinics and putting on shows.

Taylor is a member of the team. We've done better than anybody expected."
"That's why every gymnast I've ever had. What an awesome way to end a career," Eagen said, "I was amped. It's kind of cool to see something I started four years ago and helped build up," Eagen said. "Now people know Cal Poly has a team. We've done better than anybody expected."
Paquette was also one of the original founders of the team.
Eagen said although the team has no money with which to recruit gymnasts, potential team members have been contacting them. "We don't even have any admission slots, so they have to be accepted first themselves," he said. "That's why every gymnast on the team is a student first, then an athlete."
Thylor hopes to start a letter-nergies said students battled police with firebombs and rocks.
There were no immediate reports on injuries or arrests in either incident.
Police said more than 15,000 other students rallied elsewhere in mostly peaceful anti-government, anti-Soviet or anti-U.S. protests to mark the uprising's anniversary.
The eve of the anniversary customarily is used to honor the approximately 100 people who were killed in the uprising.
Radical students have staged violent protests during the past week against the visit of Soviet President Mikhail S. Gorbachev for summit talks with Roh on the southern island of Cheju. The Soviet leader is to arrive Friday.
Students scattered leaflets today opposing the meeting of Gorbachev and Roh and sprayed-painted messages in red on roads: "We oppose Gorbachev's visit, which will help freeze division of the peninsula."
Protesters argue Gorbachev's visit will anger rival North Korea, a longtime Soviet ally.

HEMP

From page 7
The California Hemp initiative is a volunteer initiative, Herer said. In the last 20 years there have been only two volunteer initiatives on the ballot in California. Herer asked the audience to get involved in helping to select petition signatures. Herer said he collects 1,500 signatures a day and that 300,000 more is needed.

Herer entertained the crowd with stories of him being introduced to and smoking marijuana.

"I smoked three joints and I didn't know what was going on. I didn't know music could be like it," Herer said. He thought pot was like tobacco when he started smoking in 1969.

Herer had many arguments for the legalization of hemp for personal and industrial use. "The single best asthma medicine in the world is hemp, but it is illegal. No single person has ever died from cannabis in the history of this country right up to this minute," he said.

Herer said many of his findings come from United States government studies and research. He brought copies of many respected newspaper and magazine research articles.

Herer said the best way to make money from hemp, "One acre of hemp can replace four acres of trees being cut down for paper. Hemp is the best, economically sustainable plant in the world," the crowd clapped vigorously after many of Herer's points about the benefits of hemp.

Herer also criticized the marijuana law. "It is a stupid and ignorant law. Hemp is a safe and easy plant to use and can grow in the backyards of all 50 states. The hemp plant grows everywhere," he said.

Dressed in jeans and a "Hemp For Victory" T-shirt, Herer asked the crowd how many people knew someone who was in an accident after drinking, 85-90 percent raised their hand.

When he asked the crowd how many people knew in marijuana-related accidents, six to eight people raised their hand.

Herer said there are less accidents after smoking marijuana than being alcohol but he added, "You miss the freeway exit more after smoking marijuana," and the crowd laughed.

The crowd continued the laughter as Herer described how people drive under the influence of marijuana. "They drive just under the speed limit, never break any traffic laws and they are overly courteous," he said. Herer warned the audience that if they are ever too high, they should get someone else to drive.

Herer disputed the differences between marijuana and alcohol. "Why can't I copy home and relax with a joint?" Herer called the myth of marijuana users having short-term memory loss a lie, "It's called short-term memory displacement," and the crowd laughed.

Herer, sporting a pennytail on his grayish-black hair, argued, "If there is the plant that can save the world, then hemp is the one.

Herer's book hemp was used worldwide throughout this world until 1937, when federal marijuana laws were passed making it illegal to grow hemp in the United States.

Herer then argues that laws against marijuana were passed after the development of a machine to harvest and process hemp so it could compete commercially against businesses owned by the Reata, DuPonts and other powerful, rich families.

To further promote hemp, Herer showed the 1942 United States Department of Agriculture film, "Hemp For Victory." The film detailed the benefits of hemp in American history.

The film started by showing the old ships that had ropes and sails made out of hemp. The film said that hemp could meet the needs of the naval industry.

Hemp chokes out weeds, and soil that grows good corn will usually grow good hemp, the film said. The film showed that Herer was Lynn Osburn of the Business for the Legalization of Hemp (B.A.C.H). He addressed the audience, on hemp's value in biomass in producing the fuel methane to power automobiles and on certain resources such as oil and coal.

Osburn said a 1979 Senate committee report said that hemp, a non-" 1.8, has the agricultural land to grow hemp plants," he said.

The audience paid between $3 and $6 to hear the speakers. Near the end, Herer asked the crowd, "Have you learned something new about marijuana?" and put the entire audience clapped.

"22nd ANNUAL RANCH TRIP
A FRIDAY, APRIL 26
FRO CHAPEL HILL, NC
THE ADVENTURE CLUB"
From page 1, a particular group or must have certain qualifications," he said. The first two resolutions by the CSU Academic Senate stated that campuses should not renew ROTC contracts and that the CSU chancellor, Board of Trustees and the campus president should enact policies to ensure nondiscrimination statewide.

The remaining resolutions urged the CSU legislative body to use "moral force" to persuade the Department of Defense to change its homosexual policy and to reinstate ROTC programs if the policy does change. Cal Poly's Academic Senate accepted the second and third resolutions.

"The meeting was handled very well," said Major Mark Earley, campus ROTC recruiter and military science professor. "Any ROTC reaction to the CSU policy will be handled on a national level."

From page 1 together," Forrester said, from the multicultural center to ASI events, while still involving students in the process. Laure Tartaglia, U.U. program coordinator, expressed her goal more simply. "We just tried to get people to the U.O." she said.

Tartaglia said most students do not know what is available to them through ASI and the U.U. and by the time they realize it, they are graduating seniors.

During the week's events Tartaglia said there was a lot of involvement all around. Forrester said the most successful events were Tuesday's club day and Friday's lunch with campus club presidents and San Luis Obispo Mayor Ron Duran. She also said that the interaction among clubs and involvement with students was better than expected.

Included in the week's events was an open forum, attended by nearly 100 people; it dealt with ethnicity in relation to the campus. "It brought up a lot of concerns and issues in a positive manner," Forrester said.

At a Bicycle-A-Thon Wednesday, Cal Poly students and fraternities gathered 247 pounds of aluminum. "We raised $140 that's going to Special Olympics," said Shawn Warren, ASI Greek relations.

There were a couple of minor hallucinations in the week, Forrester said. A seminar in the residence hall was canceled due to a power outage, and a dunk tank planned for use Thursday was not in working condition.

Forrester said that while participation during the week could have been stronger, she was happy with the response.

"Whenever you do something for the first time on a monumental level, you can't expect it to be perfect," the Department of Defense would set the foundation for something it didn't necessarily support. Tartaglia emphasized that students should take advantage of ASI features, especially since they pay into the organization.

"Everybody's a part of ASI," Tartaglia said, "whether they know it or not."

From page 1 major, I don't think this is the institution to choose (to attend)." Albiani suggested that classes such as Native American Literature or Afro-American history be incorporated into the C.3 literature requirements, but felt that a major did not fit in with Cal Poly's focus.

"I personally can't support it, and the people that I have talked to within the school I represent can't support it," Albiani said.

Patrick Hayashi, director for the School of Engineering, argued for a curriculum for the sake of general knowledge and education in creating a more well-rounded student and graduate.

After further discussion, however, a vote of 15-8 passed the amendment to eliminate the word "major" from the resolution, so it would only be a minor. It was mentioned that the unit totals required for graduating in many majors, especially in the School of Engineering, were already pushing the borderline of five units. If another G.E. requirement would only increase the problem.

Mark Denholm, ASI chairman of the board, said he had discussed the matter with President Warren Baker already and asured the board Baker would take it into consideration.

Uncertainty was also expressed over how funding for such a program would be generated, especially considering the budget crisis already facing the California State University system. William Amosapper, Academic Senate representative, reminded the Board to "address the merits of the program regardless of the funding which may or may not occur." Amosapper said he could not give an estimated date of when the program, if instated, would begin.
