Academic Senate votes to keep ROTC on campus

By Malei Jesse

The Cal Poly Academic Senate voted not to ban ROTC from campus in a Tuesday meeting.

"We're not going to kill ROTC on this campus," said James Murphy, Academic Senate chair. "The people who are participating in the program have as much right to do so as those who cannot participate."

The purpose of the meeting was to decide whether Cal Poly would support the CSU's Academic Senate's proposed resolutions against ROTC policy toward homosexuals.

"Our original statement was to support the entire resolution," said Margaret Taylor, lobbied to express student budget concerns

By Malei Jesse

"I let them (the legislature) know we, as students, are concerned," Taylor said.

Taylor testified before the Ways and Means Committee, along with many other students and groups representing schools throughout the CSU system.

Taylor used the Maddy Act as a point of argument, saying the budget cuts are a violation of state law. The Maddy Act limits fee increases to 10 percent a year. Larry Martinez, a Cal Poly political science professor, said, "The Maddy Act is a result of the federal government cutting taxes during the Reagan administration."

"Monies once gotten from the state aren't going to be there," he said. "As a result cuts have to made elsewhere."

Associate Vice President of Academic Resources Frank Lebems said the proposed budget cuts create a frustrating situation.

"In mid-May we will have a much better feel of how much needs to be cut," Lebems said. See ROTC, page 8

Taylor lobbies to express student budget concerns

By Gabrielle Friedly

ASI President Adam Taylor was in Sacramento Tuesday lobbying to express student concerns on proposed budget cuts. The state legislature has proposed a 20 percent budget cut for the CSU system.

Taylor said the trip went well.

"Let them (the legislature) know we, as students, are concerned," Taylor said.

When first presented to ASI at the April 10 meeting, the resolution included creating a department with both a major and a minor. Concern arose, however, regarding the fact that Cal Poly is a polytechnic university.

"I definitely think we need an ethnic studies class and definitely think we should have the option for a minor for students to take," said Dennis Albiani, director for the School of Agriculture. "But if you want to study ethnic studies as a minor. Concern arose, however, regarding the fact that Cal Poly is a polytechnic university.

ASI Board of Directors unanimously passed a resolution Wednesday calling for ethnic program

By Kelli Martin

In an attempt to meet the need for increased cultural awareness on campus, the ASI Board of Directors unanimously passed a resolution Wednesday calling for the adoption of an ethnic studies or multicultural curriculum.

The resolution specifies that such a curriculum be adopted in the form of a department with a minor. It also states that an ethnic studies requirement be added to the general education and breadth requirements.

'Successful' week for ASI, U.U. boosts awareness of resources

By Kelly Gregor

All roads led to the University Union last week when ASI hosted a series of events designed to encourage student involvement in the organization and its resources.

The events were a big hit overall, said Asl marketing coordinator Kim Forrester. "It was a big risk to try something new," Forrester said, "but I think it was definitely very successful."

The week-long program called "All Roads Lead to the Union" was the first of its kind.

"We wanted to bring all the ASI entities together and show the community we are "boasting awareness of resources."

See ASI, page 8

Activist lights up crowd with pro-marijuana talk

By Geoff Seratti

Marijuana will lower your stress level better than anything else on earth, an activist told a crowd of about 500 at the Veterans Hall Wednesday night.

Author Jack Herer spoke in favor of the 1992 California Hemp Initiative, as well as the social, economic and environmental benefits of hemp, better known as marijuana.

Hemp for Majority of earth's paper, fiber, fuel, wood, paintiavist, medicine and longer life or The Greenhouse Effect - Choose One!"

A pamphlet on the initiative said the new law would allow hemp to be farmed as a natural resource and used as medicinal extracts. The measure also would set a 21-year-old age limit for personal use of hemp in private dwellings.

Heren opened by talking about his goal to put an end to the present United States government, "I know it is an outlaw government," he said. See HEMP, page 7
This idea may be attractive and comforting, but it's just plain false. Primitive peoples are no better ecologists than we are. They are every bit as ignorant of the consequences of their actions as everyone else. Even without fancy technology, they have managed to degrade the soil, drive thousands of species to extinction and pollute waters. They, too, are responsible for ecological crises. If they hadn't, we wouldn't all be living as noble savages in perfect harmony with nature?

Since Sunday is Earth Day, we should all make a special point of reflecting on our ecological crisis. We should think about the depletion of natural resources and the pollution of our environment. We should consider what must be done to turn things around. But I don't think we're going to find any solution without addressing the root of our problems.

Make no mistake about it, this root cause is not society, our culture or our consciousness. It is ourselves. In the final analysis, the biggest obstacle to finding a way out is our own, all-too-human nature. So I would like to suggest that we start from our natural and how it got that way. I don't think we have a chance of solving this crisis without a clear understanding of what it is we're up against. And flying off into fantasy land is no help at all.

and kicked the protesters as they fled. Roused at the students, the police punched in clouds of the choking gas. About 40 dentists reached a shopping district near demonstrators today to disperse thousands of protesters who had gathered in a northern cemetery to honor people killed in the April 19, 1960, uprising that triggered a northern cemetery to honor people killed in the April 19, 1960, uprising that triggered an IRA military fort for Kurdish refugees was to meet Friday for the meeting, according to the spokesman, but a diplomatic source said for the meeting, but a diplomatic source said the meeting would be to help the meeting, but a diplomatic source said the meeting would be to help

The agency said Unocal miscalculated a concrete-lined 22-million-gallon pond that collects waste water containing cancer-causing benzene and other hazardous materials. The EPA alleged that Unocal lacked a plan to identify or deal with the waste, failed to follow a written pond inspection schedule, lacked a plan to make sure the pond is clean once it is shut down, failed to train workers to handle wastes, and lacked an adequate emergency plan and money to cope with accidents. Unocal also was accused of keeping improperly labeled hazardous waste drums on refinery grounds. The drums lacked labeling indicating their toxic contents and when they were disposed, and one or two drums lacked proper covers, the EPA said.

**U.S. agencies impose penalties on Neil Bush**

DENVER (AP) — Federal regulators today imposed sanctions against Neil Bush for conflicts of interest while he was a director of the failed Silverado Banking Savings and Loan, a lawyer said.

James Nesland, attorney for the president’s son, who runs the Denver office of Thrift Supervision, said the director Timothy Ryan accepted an administrative law judge’s December finding that Neil Bush should be banned from future conflicts of interest. It’s just a cease-and-desist order,” Nesland said.

The thrift office penalty resulted from a nearly two-year battle with federal regulators over Bush’s role at Silverado, whose failure is expected to cost taxpayers $1 billion.

Bush, involved in settlement hearings with another Silverado-related case with the government this week in Denver, would not comment, Nesland said.

Bush, who lives in a settlement hearing with another Silverado-related case with the government this week in Denver, would not comment, Nesland said.

“Bush was琼ies with the decision just like we disagreed with the decision of the administrative law judge,” Nesland said, adding that an appeal by Bush would depend on the outcome of his current hearings.

**Apple to pay 15 blacks for racial bias claims**

SAN JOSE, Calif. (AP) — Apple Computer Inc. will pay $348,687 to settle racial bias claims filed by 15 Black workers who were denied jobs, but the company on Thursday said it doesn’t have discriminatory practices.

Apple Computer admitted no wrongdoing in the settlement and the company offered jobs to all 15 people who complained to the Equal Employment Opportunity Commission last year. But one of the complaints accepted, the company said.

Local black leaders and the U.S. Department of Labor officials, who said the settlement was the largest out of the San Francisco area, agreed that Apple is known for its progressive policies and good affirmative action record.

“Apple Computer has been extremely cooperative with us in this case,” said Joe Kirkbride, a spokesman for the federal agency.

The company has been the first to offer to make these employees whole again,” Kirkbride said.

**For the past 12 years, students and seniors have met through the program, and students have remained close in the last 12 years.**

**Staff Writer**

**By Lori Cheeseman Staff Writer**

Many students do not get a chance to visit their grandparents more than once or twice a year. Many students never have had a chance to get to know their grandparents at all. But if you would like to have a grandparent here at school, you can "adopt one."

"Adopt a Grandparent" is the Seniors Project sponsored by Student Community Services. Through the project, Cal Poly students can get matched up with a senior citizen at Hill Haven Care Center in San Luis Obispo. Students and seniors who are matched have the opportunity to spend time together, talk walks, shop or just get to know one another.

Michelle Kooko, an animal science sophomore and director of the Seniors Project, says relations between students and their adopted grandparents are special ones.

"Students can learn a lot from the elderly, and the seniors get the companionship they really miss when their families are not around," Kooko said.

"Adopt a Grandparent" is also a way for students to gain an awareness of aging. She said that many times it is the fear of growing old that keeps students away from the elderly, and the program helps people face that fear.

For the past 12 years, students and seniors have met through the program, and students have remained close in the last 12 years.

**See ELDERS, page 4**

**South Korean police clash with protesters**

SEOUL, South Korea (AP) — Riot police fired tear gas and charged into demonstrations as thousands of people marching to demand the ouster of President Roh Tae-woo had no face-to-face contact with any Iraqi military during their efforts.

The new commander of the U.S. relief effort for Iraqi refugees was to meet Friday in northern Iraq with an Iraqi military delegation to discuss ways to avoid any accidental conflicts during the operation, a military spokesman said.

The U.S. commander, Lt. Gen. John M. Shalikashvili, was to travel from this base in southern Turkey to Zakhu in northern Iraq for the meeting, according to the spokesman.

"Woodhouse did not disclose the reason for the meeting, but a diplomatic source said earlier that such a meeting would be to help avoid clash with the Iraqis."

Iraq has been warned not to interfere with the efforts.

Elderly keeps in touch with her adopted granddaughter, Jean. Huntley and Jean met three-and-a-half years ago, when Huntley was director of the “Adopt a Grandparent” program.

Once a week, Huntley would bring a diet soda for Jean, and they would watch an episode of “Magnum P.I.”, Jean’s favorite show. “I go to see her, and sometimes I don’t want to become a nursing home can be an intimidating and tough environment,” Huntley said. "But when I realize how much she gets out of it, I know it is all worthwhile.”

Kosko said the program must be a commitment because the seniors count on the relationship, but the amount of time the students want to spend with their adopted grandchildren is up to them. “We are always looking for more students. There is always a need for companionship,” said Kosko. Anyone interested in the “Adopt a Grandparent” program can pick up an application at the Student Life and Activities Office.

Residents now will be faced with 15 percent cutbacks, a 20 percent reduction. Rosalman, Pinard say reduction is shortsighted.

Peg Pinard and Bill Rosalman opposed the proposal, saying such a sharp reduction was shortsighted. Pinard objected to the reduction because she said the city’s water supply is still uncertain. Mayor Ron Dunin voted in favor of the reduction. “I think the community deserves a little respite,” he said.

According to a report from utilities director William Hetland and utilities engineer Gary Henderson, the March rainfall has caused significant changes in the city’s water situation.

The city’s reservoirs currently hold 21,163 acre-feet, which is the same level as in August 1988.

Hetland said although the reservoirs have received significant storage, the city is definitely not out of the drought. He said if next winter does not bring adequate rainfall to provide additional storage, the city will be in the same position as last month.

Although the council is giving temporary relief to residents, they have been researching alternatives such as implementing a temporary desalination project and tapping into Nacimiento Lake.

The council also voted Tuesday to place the desalination project on hold for a year to see if additional rain is received next winter.

The estimated cost of the five-year desalination program is $66.9 million. If funded by rate increases only, single family bills will rise from an average $20 per month to $70 per month.

Due to the San Luis Obispo voters’ rejection of the State Water Project in last week’s special election, interest in Nacimiento reservoir has been revived. SLO County is entitled to 17,500 acre-feet of water per year from Nacimiento Lake, but the city has no water rights.

Political agreements between the county and the city could prove paramount. Hetland said the initial step is to obtain a formal water entitlement from the county and determine whether other agencies could participate in a joint project.

Joint participation could help reduce the cost of such a project, which has been estimated to be between $32 million and $37 million.

The initial reports are considering two alternatives in piping water to San Luis Obispo — either west to Whale Rock Reservoir or south over Cuesta Grade.

Hetland said the city has enough water to last until spring of 1994. But if rainfall is not received next winter, the city will be forced to seek new sources.
Men’s gymnastics finishes a record-breaking season

By Amy Reardon

The Cal Poly men’s gymnastics team broke all team scoring records and returned from the Div. III National Championship at UC Davis last weekend ranked No. 1 in the nation.

That victory in itself is impressive.

All the gymnasts said they were impressed with what their team has been able to accomplish and said their motivation came strictly from within the team.

“We have such limited resources,” said senior Lance Eagen. Because the team is officially a club, Cal Poly does not give it any financial support. Eagen said luckily, the team found a “really great guy who is an incredible help.”

Steve Norby, who was willing to volunteer his spare time to coach the team outside of a busy dental practice.

“Find another organization in the nation that’s completely student-run, that is progressing at a unbelievable pace,” Eagen said. “We have no funding. We can’t hire a coach. We have all kinds of red tape to deal with. We have to fight for gym time.”

“Gary really turns the rockets around score of 47.85 to receive his third All-American award of the season,” Paquette said. However, he said, “Lance Eagen (a graduating senior) did the last set of his life, probably his best ever. He helped us reach our goal as promisers.”

By the end of the meet, Vanetsky had totaled an all-around score of 47.85 to receive his third All-American award of the competition. He placed second overall in the competition, while teammate Couch placed fourth all-around with a 45.05.

Overall, Paquette said, “the team could have scored about eight points higher. Right before nationals we were all either sick or injured and we weren’t having good workouts.”

“But we really pulled together, not as a bunch of soloists, but as a team,” he said. “Some of the guys hit the best routines of their lives.”

Couch said because the team members knew they would have performed better minus the sicknesses and injuries, “It gives us more motivation to do even better next year. We can’t wait to get back in the gym to learn more, because even though we did better than ever before, we aren’t as good as we could be.”

“I learned several new tricks this year that I never thought I’d get. Once you get them and get to show them off, you get thirsty for more,” Couch said.

Also at nationals, Eagen received an Outstanding Senior award from the United States Gymnastics Association.

Eagen scored a 7.75, the team’s top score for that event. Vanetsky also did very well, said Paquette. “They are both consistent, solid performers,” Paquette said. “After the first event, we were feeling confident.”

Vault was the next event. Then, team powerhouse Gary Vanetsky scored a 9.05 to qualify for individual event finals. At finals, which were held the following day, Vanetsky nailed his vault again, to score 8.95 and place second in the event, earning All-America honors.

On the high bar, Paquette said he hit his routine to score a 5.65 which tied him for eighth place and qualified him for finals by the skin of his teeth.”

At finals, Paquette improved his score to 8.7, to place seventh. Paquette said Corey Couch “did an excellent high bar routine.”

The team went to the floor exercise next. “It doesn’t matter how good or bad the team is doing, we get to floor and it is in ways a boost. Everybody has the ability to score in the nines on floor,” said Paquette.

Paquette said Eagen, Coach and Vanetsky “are pretty awesome to watch on floor. The entire gym was watching them.”

The highlights of Couch’s floor exercise, said Paquette, are his originality and the difficulty of his tumbling. Couch does an Arabian one-and-three-quarter somersault which shocked the audience, Paquette said. “No one else in the division does that trick.”

Vanetsky, who ended up in fourth place after floor exercise finals, scored 9.3 on his standout routine. “His tumbling was amazingly high,” Paquette said.

Paquette, who is more than six feet tall, said he could easily have stood under Vanetsky’s somersaults.

Another team member described Vanetsky’s performance, “Gary really turns the rockets on. He gets the crowd excited.”

The last event of the competition, the floor exercise, was held in the event where we have by far the most room for improvement,” Paquette said. However, he said, “Lance Eagen (a graduating senior) did the last set of his life, probably his best ever. He helped us reach our goal as promisers.”

SUMMER JOBS AVAILABLE

The Morning Star Company has placed thousands of truckers with trucking companies for the past 30 years. We are currently accepting 80 drivers starting July 1st through the later part of October. We encourage drivers to work full time for us as we guarantee 4500 miles per month for the 4 months. We also have part time drivers for all months. Our drivers have the opportunity to work all 48 states as well as Canada. Our hiring criteria are: Driver must have at least a CDL A, must be able to work a 3-4 day work week and must be able to work nights and weekends. We offer $1000 per week, a company paid health plan, and a 401K retirement plan.

Call or stop by the Morning Star Company for an application.

said. Right now, various programs that can be reduced, are being reduced, he said.
One that hopefully will not be reduced, said Associate Vice President for Student Affairs, Alan Yang, is financial aid.
"We don't expect the proposed cuts to have any effect on financial aid," he said.

Taylor urges students and parents to write letters to the governor and representatives expressing concerns and asking questions about the budget cuts.

From page 3

GYMNASTICS

Gymnastics Federation, the meet sponsor.

"It's kind of cool to see something I started four years ago and helped build up," he said. "Now people know Cal Poly has a team. We've done better than anybody expected."

Paquette was also one of the original founders of the team.

Eagen said although the team has no money with which to recruit gymnasts, potential team members have been contacting them. "We don't even have any admission slots, so they have to be accepted first themselves," he said. "That's why every gymnast on the team is a student first, then an athlete."

Vonisky, Paquette and Chris Ha, each received All-Americans Scholar awards for keeping a cumulative GPA of over 3.5. Their GPAs are 3.7, 3.7 and 4.0 respectively. Team members work to keep high GPAs and are actively involved in other activities, said gymnast Sean Hearne. The gymnasts usually practice six days a week for 2/1 hours a day.

The team exists because its members love gymnastics and are willing to work to make it happen, explained Hearne. "Cough cut. The only reason our team works is that everyone wants to see the team do well. I'm amazed at all we accomplish. We went to Virginia this year, and all the fund-raisers we did," he said. "This beats all fraternity."

"This spring we will be focusing on fund raising again," said Paquette. Some of the fund-raisers the team does include selling ads for its program, hosting Central Coast club gymnastics meets, hosting clinics and putting on shows.

"We've got travel, uniform and judging expenses to cover (for next season). And nationals is in Springfield, Mass., next year."

Paquette said his team is putting on shows.

Couch agreed. "The only way to end a career." Eagen will go on to graduate school after graduating from Cal Poly. "That's why every gymnast is an athlete."

Students who want to write graduation in June.

Students scattered leaflets today opposing the meeting of Gorbachev and Roh and spray- painted messages in red on roadways: "We oppose Gorbachev's visit, which will help freeze division of the peninsula."

Protesters argue Gorbachev's visit will anger residents of North Korea, a longtime Soviet ally.

HEMP

From page 1
The California Hemp initiative is a volunteer initiative, Herer said. In the last 20 years there have been only two volunteer initiatives on the ballot in California. Herer asked the audience to get involved in helping to select petition signatures. Herer said he collects 1,500 signatures a day and that 300,000 more is needed. Herer entertained the crowd with stories of him being introduced to and smoking marijuana. He said in 1969 he had burned and had never smoked marijuana.

"I smoked three joints and I didn't know what I was going on. I didn't know music could be like this," Herer said he thought pot was like tobacco when he started smoking in 1969.

Herr had many arguments for the legalization of hemp for personal and industrial use. "The single best asthma medicine in the world is hemp, it is illegal. No single person has ever died from cannabis in the history of this country right up to this minute," he said.

Herr said many of his findings come from United States government studies and research. He also quoted many respected newspaper and magazine research articles. Herer said the best way paper is made from hemp. "One acre of hemp can replace four acres of trees being cut down for paper. Hemp is the best, most economical sustainable plant in the world," the crowd clapped vigorously after many of Herer's points about the benefits of hemp.

Herer also criticized the marijuana law. "It is a stupid and ignorant law. Hemp is a safe and easy plant to use and can grow in the backyards of all 50 states. The hemp plant grows everywhere," he said.

Dressed in a jeans and a Hemp For Victory T-shirt, Herer asked the crowd how many people knew someone who was in an accident after drinking 85-90 percent raised their hand.

When he asked the crowd how many people knew in marijuana related accidents, six to eight people raised their hand.

Herer said there are less accidents after smoking marijuana than smoking alcohol but he added, "You miss the freeway exit more after smoking marijuana," and the crowd laughed.

The crowd continued the laughter as Herr described how people drive under the influence of marijuana. "They drive just under the speed limit, never break any traffic laws they are overly courteous," he said. Herer warned the audience that if they are ever too high, they should get someone else to drive.

Herr disputed the differences between marijuana and alcohol. "Why can't I come home and relax with a joint?" Herr called the myth of marijuana users being overly courteous, "It's called short-term memory loss," he said. If they are ever too high, they should get someone else to drive.

Herr showed the 1942 United States Department of Agriculture film, "Hemp For Victory." The film started by showing old ships that had ropes and sails made out of hemp. The film said hemp could replace the needs of the naval industry.

Hemp chokes out weeds, and soil that grows good corn will usually grow good hemp, the film said.

Doug Osburn was the keynote speaker. Herr was Lynn Osburn of the Business of Hemp (B.O.C.H.). He addressed the audience on hemp's potential in biomass in producing the fuel methanol to power automobiles and other pertinent facts on certain resources such as oil and coal.

Osburn said a 1979 Senate committee voted that hemp was a sterile and non-fertile fuel. "We don't need coal or oil because the U.S. has the agricultural land to grow hemp plants," he said.

The audience paid between $3 and $6 to hear the speakers. Near the end, Herr asked the crowd, "Have you learned something new about marijuana?" He tossed the entire audience a clapped.
**U.U. WEEK**

From page 1 together, Forrester said, from the multicultural center to ASI concerts, while still involving students in the process.

Laure Tartaglia, U.U. program coordinator, expressed her goal more simply. "We just tried to get people to the U.O.U."

Tartaglia said most students do not know what is available to them through ASI and the U.U. and by the time they realize it, they are graduating seniors.

During the week's events Tartaglia said there was "real involvement all around."

Forrester said the most successful events were Tuesday's club day and Friday's luncheon with campus club presidents and San Luis Obispo Mayor Ron Duran. She also said that the interaction among clubs and involvement with students was better than expected.

Included in the week's events was an open forum, attended by nearly 100 people; it dealt with ethnicity in relation to the campus. "It brought up a lot of concerns and issues in a positive manner," Forrester said.

At a Bicycle-A-Thon Wednesday, Cal Poly seniors and fraternities gathered 247 pounds of aluminum. "We raised $146 that's going to Special Olympics," said Shawn Warren, ASI Greek relations.

There were a couple of minor setbacks in the week, Forrester said. A seminar in the residence halls was canceled due to a power outage, and a dunk tank planned for use Thursday was not in working condition.

Forrester said that while participation during the week could have been stronger, she was happy with the response.

"Whenever you do something for the first time on a monumental level, you can't expect it to be perfect," the board would have to set the foundation for something like this in the future," Forrester said.

Tartaglia emphasized that students should take advantage of ASI features, especially since they pay into the organization when they pay for their education.

"Everybody's a part of ASI," Tartaglia said, "whether they know it or not."

---
